Narrative of Hayes Arctic Exploring Expedition, 1860-1861, in the schooner *United States* to the Smith Sound region, to extend northward the explorations of the Second Grinnell Expedition, and to make scientific observations and collections.

Contains an account of the organization and course of the expedition; the wintering at Port Foulke; survey of "My Brother John's Glacier"; death of Augustus Sonntag; sledge journeys north (to about 81°-82°N.) along coasts of Greenland and Ellesmere

Island; voyage in Smith Sound; with comments throughout on Eskimos, physical features of the region, and on the daily work.

Copy seen: DLC.

6796. HAYES, ISAAC ISRAEL, 1832-1881. The open polar sea: a narrative of a voyage of discovery toward the North Pole, in the schooner "United States." New York, Hurd and Houghton, 1869. 3 p. l., [xi]-xxiv, 454 p. front., illus., 9 plates (incl. map)

Popular edition of work first published in 1867; reprinted by D. McKay, Philadelphia [1886] (same pagination, etc.)

Copy seen: DLC.

6797. HAYES, ISAAC ISRAEL, 1832-1881. The passage to the North Pole. (American journal of science, May 1858. Ser. 2, v. 25, p. 384-92)

A discussion of inferences to be drawn from early voyages toward the polar basin, and of the desirability of exploring possibilities of the Baffin Bay-Smith Sound route.

Copy seen: DSI-M.

6798. HAYES, ISAAC ISRAEL, 1832-1881. Physical observations in the arctic seas, made on the west coast of North Greenland, the vicinity of Smith Strait and the west side of Kennedy Channel, during 1860 and 1861. Reduced and discussed at the expense of the Smithsonian Institution. By Charles A. Schott. [Washington, Smithsonian Institution, 1867] xi p., 1 l., 271 p., illus., maps (incl. fold.), diags. (Smithsonian contributions to knowledge. [v. 15, art. 5]) Smithsonian Institution publication 196.

Scientific results of the Arctic Exploring Expedition 1860-1861, under I. I. Hayes.

Contents: Introduction (a summary account of the expedition).

Pt. 1. Astronomical observations (record and results of astronomical and geodetic observations with preliminary note on instruments and methods), p. 1-69.

Pt. 2. Magnetic observations (record and results with introductory note on instruments and methods), p. 71-112.

Pt. 3. Tidal observations (record and results with introductory note on instruments and methods), p. 113-64.

Pt. 4. Meteorological observations (record and results for Port Foulke: temperature, atmospheric pressure, and

wind, with introductory note on methods and instruments), p. 165-239.

Appendix (record of weather and miscellaneous notes, kept in the course of the voyage and at Port Foulke, July 1860-Oct. 1861), p. 241-70.

Maps include map (1:1,200,000) of west coast of Greenland, east coast of Ellesmere Island, about 76°-82°N., showing discoveries, trails and surveys of the Second Grinnell Expedition 1853-55, and of Hayes' Expedition 1860-61, also map (1:170,000) of the vicinity of Port Foulke (Hayes' winter quarters) from original surveys.

Copy seen: DLC.

6799. HAYES, ISAAC ISRAEL, 1832-1881. Pictures of arctic travel, Greenland. New York, Printed for the author by J. J. Little & Co., [1881] 144 p. Also issued in New York by G. W. Carleton & Co., and London by S. Low & Co., 1881.

Popular sketches of life and people (a Danish doctor, native Eskimos and others), the icebergs and glaciers of West Greenland.

Copy seen: DLC; NNSStef.

6800. HAYES, JAMES GORDON, 1877- The conquest of the North Pole; recent arctic exploration. New York, Macmillan Co., 1934. 317 p. front., illus. (plan) plates, ports., maps (part fold.) Also published in London by Butterworth, 1934 (same pagination, etc.)

Contains an account (with list) of expeditions, 1909-34, and (in more detail) of the Danish *Danmark Expedition*, 1906-08, under Mylius-Eriksen.

Copy seen: DLC.

6801. HAYES, JAMES GORDON, 1877- Robert Edwin Peary, a record of his explorations, 1886-1909. London, G. Richards & H. Toulmin [1929] xv, 299 p. 8 plates, 7 maps (4 fold.) diags. Analysis and critical evaluation of Peary's achievements.

Contains chapters on Peary's expeditions to the North Greenland region; a review of his book *The North Pole*; discussion of the polar pack on Peary's routes, navigational methods, Peary's sledging; exaggerations, marvels and mysteries regarding Peary's reports; notes and comments on Peary's claim to have reached the North Pole, his physical fitness and probable course; concluding remarks on the attitude of scientific institutions to Peary's claim,

and an estimate of Peary's character.

Includes R. A. Bartlett's log; list of other critics of Peary; bibliography (49 items), and an index. The table of contents is followed by a useful index to schedules of journeys, and tables of speeds, distances, astronomical observations, etc. *Copy seen:* DLC; NNSStef.

6802. HAYES, MARCIA. Some problems of health in Alaska. (Pacific Science Congress. 6th, Berkeley, Stanford University and San Francisco, 1939. Proceedings, *pub.* Berkeley and Los Angeles, 1942. v. 5, p. 465-72)

Contains demographic analysis of the population by age, race, and sex; description of economic conditions; detailed presentation of the health problems of the natives, particularly tuberculosis, malnutrition, and respiratory infections; description of public health facilities; and recommendations for a health program.

Copy seen: DLC.

6803. HAYNE, M. H. E. The pioneers of the Klondyke; being an account of two years police service on the Yukon. London, S. Low, Marston & Co. Ltd., 1897. xii p., 1 l., [2], 184 p. incl. front. (port.) sketch map, 15 plates.

Tales from a Royal Northwest Mounted Police detachment stationed near Forty Mile on the Yukon, 1895-97.

Copy seen: DLC; NNSStef.

6804. HAYNES, B. C. Polar weather flights. (Weather, Jan. 1949. v. 4, no. 1, p. 11-15, illus., plate)

"Interesting account of flight from Fairbanks, Alaska to the North Pole and return on August 2, 1948. Accompanied by cross-section showing place of lowest temperature at 20,000 ft. not at pole but about 82°N. on the Alaska side."—*Meteorological abstracts and bibliography*, Jan. 1950, v. 1, no. 1, p. 20.

Copy seen: DLC; DWB.

6805. HAYNES, THOMAS S. The Nulato massacre. (Alaska life, Oct. 1940. v. 3, no. 10, p. 12-13, illus.)

An account of the massacre of Russian traders in 1856, as told to the author in 1904, by Chief Isaac of the Koyukon Indians, who participated.

Copy seen: DLC.

HAYS, GEORGE A., *see* Buck, C. E., & G. A. Hays. Alaska's health needs. 1945.

Results of the Scoresby Sound Committee's 2nd East Greenland Expedition in 1932 to King Christian IX's Land. List with descriptive notes and keys, of nineteen species collected at Kangerdlugssuaq and Mikis Fiord, with complete lists of known species from East Greenland waters.

Copy seen: DSI-M; DGS.

6822. HEDING, SVEN GUSTAF, 1902- . Echinoderms. København, C. A. Reitzel, 1936. 34 p. illus. (Meddelelser om Grønland. Bd. 108, nr. 1)

Results of the 6th and 7th Thule Expeditions to southeast Greenland, 1931-33, the echinoderms of the 7th Thule Expedition being largely from the Angmagssalik and Kangerdlugssuaq

vicinities, and a few from Lindenows Fiord, Sermilik and other localities. Author gives a classified, annotated list, with extensive notes and localities of twenty-eight (including with descriptions, two new) species of echinoderms; notes on two new subgenera of *Henricia*; and notes on the genus *Leptasterias*. **Copy seen:** DGS; DSI-M.

Based on collections made by the cruiser *Ingolf* and other expeditions in Baffin Bay-Davis Strait, Denmark Strait, Greenland Sea and Svalbard waters. A taxonomic and geographic study of the sea cucumbers, including keys, and a list of twenty species of which eight new are fully described.

Copy seen: DSI-M.

6824. HEDING, SVEN GUSTAF, 1902—. Holothuriodea. II. Aspidochirota-Elasipoda-Dendrochirota. Copenhagen, H. Hagerup, 1942. 39 p. illus., 2 plates. (Ingolf-expedition, 1895-1896. [Reports] v. 4, pt. 13)

Based on collections made by the cruiser *Ingolf* and on other Danish collections from Davis and Denmark Straits and Greenland Sea. A list, with synonyms, localities and notes, of thirty-five (including with descriptions, five new) species of these echinoderms from over 300 meters depth; with a bibliography (31 items).

Copy seen: DSI-M.

Contains data on morphology, taxonomy and distribution of five species of hepatic genus *Riccia*, including *R. sorocarpa* and *R. frostii* brought home by H. W. Arnell, in 1876, from the lower Yenisey River region.

Copy seen: MH-A.

6829. HEEGAARD, P. E. The zoology of East Greenland. Decapod crustaceans. København, C. A. Reitzel, 1941. 72 p. illus. (incl. 25 sketch maps). (Meddelelser om Grønland. Bd. 121, nr. 6)

Based primarily on collections of the Three-Year Expedition, 1931-34, the 6th and 7th Thule Expeditions, 1931-33, Thor Expedition, 1935, and Dana Expedition, 1933, with additions from previously published records.

Contains a systematic synopsis with synonyms, East Greenland occurrence, distribution (illus. with maps) and remarks, of thirty-two species of marine crustaceans (one crab, nine hermit

crabs, and twenty-two shrimps); some general remarks on zones, a summary table of geographic and bathymetric distribution, and a bibliography (87 items). *Copy seen:* DSI-M; DGS.

6830. HEER, OSWALD, 1809-1883. Anmärkningar öfver de af svenska polarexpeditionen 1872-73 upptäckte fossile växter. (Svenska vetenskapsakademien. Öfversigt af förhandlingar, 1874. Arg. 31, no. 1, p. 25-32) *Title tr.:* Remarks on fossil plants found by the Swedish Polar Expedition, 1872-73.

Contents tr.: 1. Carboniferous plants from Roberts River near Recherche Bay, 77° ½'N. 2. Jurassic plants from Cape Boheman in Ice Fiord (78°23'N.) 3. Cretaceous plants from the sandstone hill at Cape Staratschin (78°N.) 4. Miocene plants from Spitsbergen: (a) plants from Scott's Glacier in Recherche Bay; (b) plants from Cape Lyell; (c) plants from Cape Heer.

Copy seen: DLC.

6831. HEER, OSWALD, 1809-1883. Beiträge zur fossilen Flora Sibiriens und des Amurlandes. 1-6. St.-Petersbourg, 1878. 58 p. 15 plates. (Akademiâ nauk SSSR. Mémoires. Sér. 7, t. 25, no. 6) *Title tr.:* Contributions to the fossil flora of Siberia and the Amur region. Issued also as his, *Flora fossilis arctica*, 1878. Bd. 5, no. 2.

Contents include in pt. 2, (p. 9-26), Jurassic plants from the arctic zone of Siberia; from the Lena River region. This is a list, with discussion and descriptions, of twenty-seven fossil species, deriving largely from the west bank to the Lena at about 71°N., with some specimens from localities at about 66°15', 66°45', and 70°40'N.

Copy seen: DLC.

6832. HEER, OSWALD, 1809-1883. Beiträge zur fossilen Flora Spitzbergens. Gegründet auf die Sammlungen der Schwedischen Expedition vom Jahre 1872 auf 1873. Stockholm, P. A. Norstedt & Söner, 1876. 141 p. incl. illus., 32 plates. (Svenska vetenskapsakademien. Handlingar. Bd. 14, no. 5) *Title tr.:* Contributions to the fossil flora of Spitsbergen. Based on the collections of the Swedish Expedition, 1872-73. Issued also as his, *Flora fossilis arctica*, 1877. Bd. 4, no. 1.

Contents tr.: Heer, Oswald. 1A. The Carboniferous plants of Recherche Bay.

1B. Descriptions of the (twenty-six) species.

2A. The Jurassic plants of Cape Boheman.

2B. Descriptions of the (thirty-two) species.

3. Cretaceous plants from the formation on Cape Staratschin (seventeen species).

3A. The Miocene plants of Cape Lyell, the Scott Glacier and Cape Heer.

3B. Descriptions of the (seventy-one) species.

Appendix: NORDENSKIÖLD, N. A. E. The geology of Ice Fiord and Bell Sound.

The appendix appears in this Bibliography under its author's name.

Copy seen: DLC.

6833. HEER, OSWALD, 1809-1883. Beiträge zur Miocenen Flora von Nord-Canada. Zürich, J. Wurster & Cie., 1880. 17 p. 3 plates. (His: *Flora fossilis arctica*, Bd. 6, Abt. I, no. 3) *Title tr.:* Contributions to the Miocene flora of northern Canada.

Contains introductory remarks on the additional specimens obtained from the Mackenzie River region at about 65°N. and a discussion of North American paleobotany; followed by descriptions, and discussion of the correlation, of fifteen species of fossil plants. For the earlier study on plants of this region, see the author's, Die in Nordgrönland (etc.) fossilen Pflanzen, 1868, Bd. 1 and Bd. 6, Abt. 1, no. 3.

Copy seen: DLC.

6834. HEER, OSWALD, 1809-1883. Beiträge zur Steinkohlen-Flora der arktischen Zone. Stockholm, P. A. Norstedt, 1874. 11 p. 6 plates. (Svenska vetenskapsakademien. Handlingar. Bd. 12, no. 3) *Title tr.:* Contributions to the Carboniferous flora of the arctic region. Issued also as his, *Flora fossilis arctica*, 1875. Bd. 3, no. 1.

Contents tr.: 1. Carboniferous plants from Klaas Billen Bay, Spitsbergen. 2. Carboniferous plants from Ujaragsuk on Disko Island, Greenland. These parts comprise a list, with full descriptions, of five species collected by A. Nathorst and H. Wilander in Aug. 1870, with discussion of species found at Bear Island; also descriptions, with synonymy, of forms of one species collected by Th. M. Fries and G. Nauckhoff during the Swedish Greenland Expedition, 1870. *Copy seen:* DLC.

6835. HEER, OSWALD, 1809-1883. Contributions to the fossil flora of North Greenland, being a description of the plants collected by Mr. Edward Whymper during the summer of 1867. (Royal Society of London. Philosophical transactions, 1869, pub. 1870. v. 159, p. 445-88, 18 plates) Issued also as his, *Flora fossilis arctica*, 1871. Bd. 2, no. 4 (actually bound as no. 1).

The expedition of Edward Whymper and Robert Brown in June-Sept. 1867 was financed by the British Association and the Royal Society, with the object of collecting fossil plants from Atanikerdluk, Nugssuaq Peninsula, West Greenland. (Collections also include two Disko Island localities). Heer gives here extracts from Whymper's report, concerning the geologic and physical features of the basaltic peninsula (Atanikerdluk) where the bulk of the material was collected; indication of the fossils collected from each locality, and a list of eighty plants, with full descriptions of new (though not so designated) species. *Copy seen:* DLC.

6836. HEER, OSWALD, 1809-1883. Les dernières découvertes dans l'extrême Nord. (Bibliothèque universelle et Revue suisse, 1869. Nouvelle période, t. 34, p. 512-43) English translation published as *The last discoveries in the extreme North*, 1869, q.v.

Contains remarks on Edward Whymper's Expedition to West Greenland in 1867, and the Swedish Polar Expedition of 1868 and their contributions to knowledge of the paleobotany of Greenland, Bear Island and West Spitsbergen; also a general discussion of the ancient climates and geography which the fossils indicate. *Copy seen:* DLC.

6837. HEER, OSWALD, 1809-1883. Flora fossilis alaskana. Fossile Flora von Alaska. Stockholm, P. A. Norstedt & Söner, 1869. 41 p. illus., 10 col. plates. (Svenska vetenskapsakademien. Handlingar. Bd. 8, no. 4) *Title tr.*: Fossil flora of Alaska. Issued also as his, *Flora fossilis arctica*, 1871, Bd. 2, no. 2.

Contents tr.: General remarks on the relationship with other arctic zones and the geologic age of the flora (in German).

Furuhjelm, Hj. On the climate and vegetation of the early Russian colonies in North America (in German).

Description of the fifty-six species (in Latin) (including mention of one insect and three molluscs).

Copy seen: DLC.

6838. HEER, OSWALD, 1809-1883. Flora fossilis arctica. Die fossile Flora der Polarländer. Zürich, J. Wurster [etc.] 1868-83. 7 v. illus., plates (part col.) maps.

Basic work, consisting of twenty papers, results (mainly) of Heer's work on the principal European museum collections of paleobotanical materials from various arctic regions. Fifteen of these papers were previously published in journals of scientific societies, and are reissued here.

Contents tr.: (papers in German unless otherwise noted) Bd. 1. The fossil plants of North Greenland, Melville Island, Banks Land, the Mackenzie, Iceland and Spitsbergen. 1868.

Bd. 2, no. 1. Fossil flora of Bear Island. No. 2. Fossil flora of Alaska (in Latin). No. 3. The Miocene flora and fauna of Spitsbergen. No. 4. Contributions to the fossil flora of northern Greenland (in English). 1871.

Bd. 3, no. 1. Contributions to the Carboniferous flora of the arctic zone. No. 2. The Cretaceous flora of the arctic zone. No. 3. Additions to the Miocene flora of Greenland. No. 4. A summary of the Miocene flora of the arctic zone. 1875.

Bd. 4, no. 1. Contributions to the fossil flora of Spitsbergen (etc.). No. 2. Contributions to the Jurassic flora of eastern Siberia and the Amur region. No. 3. On the petrified plants of Ando, Norway. 1877.

Bd. 5, no. 1. The Miocene flora of Grinnell Land. No. 2. Contributions to fossil flora of Siberia and the Amur region. No. 3. The early fossil flora of Sakhalin: Miocene flora of Sakhalin. No. 4. Contributions to the Miocene flora of Sakhalin. No. 5. On fossil plants from Novaya Zemlya. 1878.

Bd. 6, Abt. 1, no. 1. Additions to the Jurassic flora of Siberia. No. 2. Additions to the fossil flora of Greenland. No. 3. Contributions to the Miocene flora of northern Canada. No. 4. SCHRÖTER, C. Research on the fossil woods of the arctic zone. 1880.

Bd. 6, Abt. 2. The fossil flora of Greenland, pt. 1. 1882.

Bd. 7. The fossil flora of Greenland, pt. 2. 1883.

Each of these papers (with the exception of Bd. 4, no. 2 & 3; Bd. 5, no. 3 & 4, and Bd. 6, Abt. 1, no. 1, which are not concerned with arctic regions) appears in this Bibliography under its author's name.

A critical analysis of this work appears in Saporta, G. de. *Caractères de l'ancienne végétation polaire*, 1868, q.v.

This is the final paper in the author's series of works on the paleobotany of Greenland; it is a list of the three hundred sixteen species of fossil plants fully described previously; with the addition of full descriptions of the hundred forty-seven species, collected by K. J. V. Steenstrup, and others, 1871-80. A summary in Danish was published as Heer's *Oversigt over Grönlands fossil Flora*, 1883.

Contains a foreword which summarizes and succinctly characterizes the three Cretaceous horizons and the Tertiary forms, showing the localities for all on the Svartenhuk and Nugsuaq Peninsulas, Disko, Upernivik and Hare Islands, followed by:

Part 1, the list and descriptions of (1) the Kome horizon, and (2) the Atane horizon.

Part 2, (1) the Patoot horizon, (2) the Tertiary flora, (3) the fossil insects, (4) general summarizing remarks; also:

(5) STEENSTRUP, K. J. V. The stratigraphic relationships of the plant-bearing strata; with a map: The coal-bearing deposits of the west coast of Greenland between 69°15' and 72°30'N.

(6) LORIOL, P. de. On the fossil marine fauna of North Greenland.

These papers (5-6) appear in this Bibliography under their authors' names.

6843. HEER, OSWALD, 1809-1883. Die in Nordgrönland, auf der Melville-Insel, im Banksland, am Mackenzie, in Island und in Spitzbergen entdeckten fossilen Pflanzen. Zürich, J. Schulthess, 1868. vii, 192 p., 50 plates, map. (*His:* *Flora fossilis arctica*. Bd. 1) **Title tr.:** The fossil plants of North Greenland, Melville Island, Banks Land, the Mackenzie, Iceland and Spitzbergen.

Drawing upon the specimens of fossil plants brought back from American

and European arctic expeditions, the author seeks to clarify the question of polar origin of plants and subsequent dissemination of species from polar areas.

Contains (in Pt. 1) a discussion of the relation of geology of the various areas to the occurrence of fossil plants; a summary of such plants in the polar region according to geologic periods; and the past and present climates of the polar regions, according to period and region.

Pt. 2, descriptions (in full) of the fossil plants, according to period: West Greenland (Nugssuaq) one hundred twenty-one plants, and four insects; Melville Island, eleven plants; Bathurst Island, one; Banks Island, six plants; Mackenzie (Fort Norman to Great Bear River) seventeen plants. Includes an index of species.

Table summarizing the Miocene flora of polar regions and showing distribution of wild and cultivated analogous plants elsewhere in the world.

Appendix: CRAMER, K. E. Fossile Hölzer der arktischen Zone (p. 167-80). This paper appears in this Bibliography under its author's name.

Discussion of the correlation with other regions of sixteen species found in northeast Greenland (Kuhn Island, Hochstetter Foreland, and Sabine Island). **Copied seen:** DLC.

6859. HEER, OSWALD, 1809-1883. Preliminary report on the fossil plants collected by Mr. Whympers in North Greenland, in 1867. (British Association for the Advancement of Science. Report, 1869, *pub.* 1870. v. 39, p. 8-10)

Brief note on material which is fully described in the author's *Contributions to the fossil flora of North Greenland*, 1870, q.v. **Copied seen:** DLC.

6860. HEER, OSWALD, 1809-1883. Die schwedischen Expeditionen zur Erforschung des hohen Nordens vom Jahr 1870 und 1872 auf 1873. Zürich, F. Schulthess, 1874. 46, [1] p. **Title tr.:** Swedish expeditions for exploration in the far North, 1870 and 1872-73.

Contains brief accounts of the work of (1) Nordenskiöld's West Greenland Expedition, July-Sept. 1870, based at Godhavn (Disko Island), and its study of the inland ice and the geology of Nugssuaq Peninsula; and (2) the Polar Expedition to Spitsbergen under Nordenskiöld, July 1872-73, its study of the geology and natural history in Dickson Bay (Ice Fiord, West Spitsbergen), on the Norwegian Islands (northwestern Spitsbergen), its wintering at Mussel Bay (Wijde Fiord), and sledge trips to Parry Islands, along the north coast of Northeast Land, returning across the inland ice to Mussel Bay. Includes also discussion (in more detail) of the paleobotanical results of these expeditions in relation to broader aspects of arctic paleobotany and paleoclimate. **Copied seen:** NNStef.

6861. HEER, OSWALD, 1809-1883. Ueber den versteinerten Wald von Atanekerdluk in Nordgrönland. (Naturforschende Gesellschaft in Zürich. Vierteljahrsschrift, 1866. Jahrg. 11, p. 259-80) **Title tr.:** On the fossil forest of Atanekerdluk in North Greenland. Translation in English was published as his, *On the Miocene flora of North Greenland*, 1867.

The results of an examination of fossil plants, collected by several British expeditions, from the south shore of Nugssuaq Peninsula. Contains a discussion of the origin and nature of the

Atanekerdluk flora, and (in detail) of its evidence that the Miocene climate of Greenland was much warmer; a catalog of sixty-three fossil plants "hitherto discovered" in lat. 70°N. on West Greenland; and extracts from the journals of Captains E. A. Inglefield and P. H. Colomb, 1854, describing the localities of the Atanekerdluk fossils and the coal deposits on the opposite shore of the Vaigat (on Disko Island), closing with a brief quotation from Sir F. L. M'Clintock, *Voyage of the "Fox"*, 1860, concerning his coaling from the same seams on north Disko Island. **Copied seen:** DLC.

6862. HEER, OSWALD, 1809-1883. Ueber die Miocene Flora der Polarländer. (Schweizerische Naturforschende Gesellschaft. Verhandlungen, 1867. Bd. 51, p. 139-52) Translated as: *On the Miocene Flora of the polar regions*, 1868, q.v.

Contains discussion of the distribution and kinds of plants from the Mackenzie basin eastward across Greenland to Spitsbergen, with the geological climate indicated. **Copied seen:** DLC.

6863. HEER, OSWALD, 1809-1883. Ueber die von Dr. Lyall in Grönland entdeckten fossilen Pflanzen. (Naturforschende Gesellschaft in Zürich. Vierteljahrsschrift, 1862. Jahrg. 7, p. 176-82) **Title tr.:** Fossil plants collected by Dr. Lyall in Greenland.

Based on specimens sent to the author from the Kew Museum; a list, with remarks on their world-wide distribution, of seven species (the more interesting species from among the ten collected by Dr. Lyall on Disko) and concluding remarks on their significance for the knowledge of arctic paleoclimate. **Copied seen:** DLC.

6864. HEER, OSWALD, 1809-1883. Über fossile Pflanzen von Novaja Zemlja. Stockholm, P. A. Norstedt, 1878. 6 p. plate. (Svenska vetenskapsakademien. Handlingar Bd. 15, no. 3) **Title tr.:** On fossil plants from Novaya Zemlya. Issued also as his *Flora fossilis arctica*, 1878. Bd. 5, no. 5.

Contains descriptions of four fossil species of *Cordaites* collected by the expedition of Nordenskiöld at Cape Gisinny on the western coast of Novaya Zemlya in 1875.

Copied seen: DLC.

6865. HEER, OSWALD, 1809-1883. Uebersicht der Miocenen Flora der arktischen Zone. Zürich, Zürcher & Furrer, 1874. 24 p. incl. tables. Issued also as his *Flora fossilis arctica*, 1875. Bd. 3, no. 4. *Title tr.*: Summary of the Miocene flora of the arctic zone.

Contains discussion and summary tables of the occurrence and distribution of three hundred fifty-three species of Miocene plants, of Greenland, West Spitsbergen, Mackenzie District, and Banks Island. *Copy seen:* DLC.

6866. HEER, OSWALD, 1809-1883. Utdrag ur ett bref af professor Oswald Heer, rörande fossila växter från nordvestra Amerika, insamlade af bergmästaren Hj. Furuhielm. Meddeladt af A. E. Nordenskiöld. (Svenska vetenskapsakademien. Öfversigt af förhandlingar, 1868, Årg. 25, p. 63-68) *Title tr.*: Excerpt of a letter from Professor Oswald Heer concerning fossil plants from northwest America collected by Superintendent of Mines Hj. Furuhielm. Presented by A. E. Nordenskiöld.

List and some discussion of fossil plants collected in the Cook Inlet and Sitka regions of Alaska.

Alexander Borisoff, the painter of the far North. (McClure's magazine, Aug. 1908. v. 31, p. 411-19, 7 col. illus.)

Account of the travels of A. A. Borisov, in Novaya Zemlya and on the Russian mainland between Arkhangelsk and Yamal Peninsula, his life among the Samoyeds, and his painting; with seven colored reproductions.

Copy seen: DLC; NNS Stef.

6879. HEILPRIN, ANGELO, 1853-1907. Alaska and the Klondike; a journey to the new Eldorado, with hints to the traveller. New York, D. Appleton & Co., 1899. x, 315 p. plate, facsim., maps.

The journey was made in 1898, via White Pass and over Chilkoot to Dawson.

Copy seen: DLC; NNS Stef.

6880. HEILPRIN, ANGELO, 1853-1907. The arctic problem and narrative of the Peary Relief Expedition of the Academy of Natural Sciences of Philadelphia. Philadelphia, Contemporary Pub. Co., 1893. 1 p. l., 163 p. 22 plates (part col. incl. map, facsim.)

Contains chapter on the search for the North Pole; an historical summary of polar expeditions; the Spitsbergen route to the Pole; the Peary Relief Expedition to McCormick Bay (Peary's winter quarters on northwest Greenland) in the *Kits*, June-Sept. 1891, of which the author was leader; the loss of J. T. Verhoeff near McCormick Bay, Aug. 1891; the Greenland icecap and its glaciers; Captain Richard Pike, a retrospect on the captain of the *Proteus*, lost on the Second Greely Relief Expedition in Smith Sound, July 1883, with excerpts from the ship's log.

Copy seen: DLC; NnH.

6881. HEIM, ARNOLD ALBERT, 1882. Einige Beobachtungen über Eis und Schnee auf Novaya Zemlya. (Zeitschrift für Gletscherkunde, Juli 1938. Bd. 26, p. 137-40, illus., 4 plates) *Title tr.:* Some observations on ice and snow on Novaya Zemlya.

Description of glaciers, observed during the geologic excursion of the Seventeenth International Geological Congress, 1937, with detailed description of the mounds (Schmelzkegel) occurring on some of the glacier moraines.

Copy seen: DGS.

6882. HEIM, ARNOLD ALBERT, 1882-. Nordwest-Grönlands Gneisgebirge. Berlin, Gebrüder Borntraeger, 1911.

[8] p. 6 plates. (Stille, H. ed. Geologische Charakterbilder. Heft. 6) *Title tr.:* The gneiss rocks of northwest Greenland.

Consists of six photographic reproductions, accompanied by explanatory text, illustrating: the crystalline plateau of Nugssuaq Peninsula, Umanak colony, the gneiss island of Umanak, fiord-like lake at the foot of Umanak, and the rounded crystalline rocks of Ritenbenk.

Copy seen: DGS.

6883. HEIM, ARNOLD ALBERT, 1882-. Über die Petrographie und Geologie der Umgebungen von Karsuausuk, Nordseite der Halbinsel Nugsuaq, W. Grönland. (Meddelelser om Grönland, 1911. Bd. 47, 173-228 [2] p. illus., plates IX-XXIV (incl. col. map) diagrs.) *Title tr.:* On the petrography and geology of the region around Kaersuausuk, northern coast of the Nugssuaq Peninsula.

Discussion (based on observations made during Ravn and Heim's Geological Journey to Disko and the Nugsuaq Peninsula, 1909) of crystalline base rocks, sedimentary rocks, basalt flows, basalt dikes, peridotite and picrite, kaersutite rocks, contact metamorphism, diluvium and recent formations.

Copy seen: DLC.

6884. HEIM, ARNOLD ALBERT, 1882-. West-Grönlands Basalt- und Sedimentgebirge. Berlin, Gebrüder Borntraeger, 1911. [8] p. 8 plates. (Stille, H., ed. Geologische Charakterbilder. Heft. 7) *Title tr.:* West Greenland basaltic and sedimentary rocks.

Eight photographic reproductions illustrating the rocks and landscape of Disko Island and Nugssuaq Peninsula, with accompanying text.

Copy seen: DGS.

6885. HEINBECKER, PETER, 1895-. Further studies on the metabolism Eskimos. (Journal of biological chemistry, Oct. 1931. v. 93, p. 327-36)

Report, based on work among the Baffin Island Eskimos at Pangnirtung, 1930. Results of experiments showing mild ketosis during fasting; showing that basal metabolism of Eskimos living on a mixed diet is similar to that of persons in temperate zones; that Eskimos are able to oxidize fats more completely than ordinary persons.

Copy seen: DLC; NNS Stef.

6886. HEINBECKER, PETER, 1895- . Ketosis during fasting in Eskimos. (Journal of biological chemistry, Dec. 1932. v. 99, p. 279-82)

Results of experiment made on Baffin Island Eskimos at Pangnirtung in 1931, showing that Eskimos subjected to a seven-day fast developed a lesser degree of ketosis than the average white person living in the temperate zone.

Copy seen: DLC; NNS Stef.

6887. HEINBECKER, PETER, 1895- . Studies in hypersensitiveness. XXXIV. The susceptibility of Eskimos to an extract from *Toxicodendron radicans*. (Journal of immunology, July, 1928. v. 15, p. 365-67)

Based on experiments made during the Putnam Baffin Island Expedition, 1927. The author found Baffin Island Eskimos not susceptible to poison ivy extract, and considered this to be due to a lack of contact rather than to a lack of any racial characteristics essential to the development of susceptibility.

Copy seen: DLC.

6888. HEINBECKER, PETER, 1895- . Studies on the metabolism of Eskimos. (Journal of biological chemistry, Dec. 1928. v. 80, p. 461-75)

Results of experiments carried out during the Putnam Baffin Island Expedition, 1927, to obtain information on carbohydrate metabolism of the Eskimos and their liability to ketosis. Contains brief account of the diet of Polar and Baffin Island Eskimos; and report of high tolerance for carbohydrate, similarity of non-protein nitrogen of Eskimo blood to that of other races, these Eskimos' remarkable power to oxidize fats, and their higher basal metabolism; with a bibliography (8 items).

Copy seen: DLC.

6889. HEINBECKER, PETER, 1895- , and EDITH I. M. IRVINE-JONES. Susceptibility of Eskimos to the common cold and a study of their natural immunity to diphtheria, scarlet fever and bacterial filtrates. (Journal of immunology. Sept. 1928. v. 15, p. 395-406)

Results of investigations made during Putnam Baffin Island Expedition, 1927. Contains brief introductory remarks on West Greenland and Polar Eskimos' susceptibilities, and description of tests given to Baffin Island Eskimos. Results show that they are very

susceptible to upper respiratory injections on contact with the outside world; that ordinary bacterial infections rarely occur; that diphtheria and scarlet fever are unknown clinically; and that Eskimos showed a high percentage of positive reactions when tested with a *Staphylococcus aureus* filtrate.

Copy seen: DLC.

6890. HEINBECKER, PETER, 1895- , and RUTH H. PAULI. Blood grouping of Baffin Island Eskimos. (Journal of immunology, Sept. 1928. v. 15, p. 407-409)

Results of tests on southwest, west and north coast Eskimos, made during the Putnam Baffin Island Expedition, 1927. Blood grouping of one hundred sixty-six Eskimos gave further evidence to support the view that the pure-blooded Eskimos is of group I.

Copy seen: DLC.

6891. HEINBECKER, PETER, 1895- , and RUTH H. PAULI. Blood grouping of the Polar Eskimo. (Journal of immunology, Apr. 1927, v. 13, p. 279-83)

Results of tests made during the Greenland Expedition of the American Museum of Natural History, 1926. Tests of one hundred twenty-four Eskimos of Cape York, Thule, Northumberland Island, and Karma, showed that blood of pure-blooded Eskimos is group I, that of half-breeds generally groups II-IV. Bibliography (7 items).

Contains results of the study of plants spread by the agency of water, a study carried out by the author in mountainous regions in Torne and Åsele Lappmark; with a list of plants and data on their local distribution and habitats. *Copy seen:* MH-A.

6900. HEINTZE, SVEN AUGUST, 1881- . Växtgeografiska undersökningar i Råne Socken af Norrbottens län. Uppsala & Stockholm, Almqvist & Wiksell, 1910. 63 p. Arkiv för botanik, 1909-1910, pub. 1910. Bd. 9, no. 8) *Title tr.*: Geobotanical exploration of Råne parish of Norrbotten province.

Contains a geobotanical and ecological study of the vegetation of this part of northern Sweden, carried out by the author in the summer of 1907; with data on the woody, swamp, lake and

seacoast plant associations, and a list of about two hundred fifty species with ecological and phenological notes. The distribution of *Alopecurus geniculatus*, a typical northern herbaceous species is studied in detail. **Copy seen:** MH.

6901. HEINTZLEMAN, B. FRANK, 1888- . Alaskan peat proffers profits. (Alaska life, Oct. 1939. v. 2, no. 6, p. 11)

General remarks on Alaska's peat deposits. **Copy seen:** DLC.

6902. HEINTZLEMAN, B. FRANK, 1888- . Auto ferry to Alaska. (Alaska life, Dec. 1943. v. 6, no. 12, p. 3-6, illus., map)

Notes on the coastal route by land and water, from Alaska to Seattle, especially the proposed ferry route between Prince Rupert, B. C. and Haines, Alaska. **Copy seen:** DLC.

6903. HEINTZLEMAN, B. FRANK, 1888- . For future farmers of Alaska. (Alaska life, July 1943. v. 6, no. 7, p. 12-15, illus.)

Discussion of Alaskan agricultural situation in general, and future possibilities. **Copy seen:** DLC.

6904. HEINTZLEMAN, B. FRANK, 1888- . The forests of Alaska as a basis for permanent development. (Alaska magazine, Jan. 1927. v. 1, p. 169-70, illus., map)

General discussion of the importance of forests as a natural resource. **Copy seen:** DLC.

6905. HEINTZLEMAN, B. FRANK, 1888- . Pulp-timber resources southeastern Alaska. Washington, D. C., 1928. 34 p. illus., 2 sketch maps. (U. S. Dept. of Agriculture. Miscellaneous publications. No. 41) Study of the Tongass National Forest.

Contains general descriptions of the geography, climate, geology, and communication and transportation facilities.

Timber resources: general description of the forest; volume of standing timber; species, forest types and silvicultural features; details of a sample area.

Brief notes on national forest administration, forest management policy, and general conditions applying to timber sales; water-power resources, logging methods and costs, existing forest

industries, and possibilities for pulp and paper industry. **Copy seen:** DA.

6906. HEINTZLEMAN, B. FRANK, 1888- . Sitka spruce, an Alaska industry that needs developing. (Alaska life, Oct. 1940. v. 3, no. 10, p. 11, illus.)

Brief analysis of spruce resources and possible milling outlets. **Copy seen:** DLC.

6907. HEINTZLEMAN, B. FRANK, 1888- . They're open . . . if you can cut it. (Alaska life, Oct. 1945. v. 8, no. 10, p. 44-45, 47-52, 60-61, illus.)

Information respecting the Tongass and Chugach National Forests; how land may be "patented"; factors in making a living on a forest homestead; "special use" permits as for fur farms, resorts, summer homes and townsites; and administration. **Copy seen:** DLC.

6908. HEINTZLEMAN, B. FRANK, 1888- . Woodman, where's that ax? (Alaska life, Oct. 1938. v. 1, no. 9, p. 10-11, illus.)

Discussion of Southeast Alaskan forest resources and need for development of a pulp industry. **Copy seen:** DLC.

6909. HEINTZLEMAN, B. FRANK, 1888- , and H. W. TERHUNE. A plan for the management of brown bear in relation to other resources on Admiralty Island Alaska. [Washington, U. S. Govt. Print. Off., 1934] 20 p. sketch map. (U. S. Dept. of Agriculture. Miscellaneous publications. No. 195)

Contains a description of the island, and notes on its forest management, mining, fishing industry, agriculture, etc., and a discussion (in detail) of the distribution, habits, reproduction, estimated population, and many aspects of conservation of the brown (grizzly) bears. **Copy seen:** DA.

6910. HEINZE, KURT, 1907- . Die parasitischen Würmer. (In: Peters, H. B., and others. Zoologie, Pub. in: Deutsche Grönland-Expedition Alfred Wegener, 1929 und 1930-1931. Wissenschaftliche Ergebnisse, 1934. Bd. 6, p. 185-89, illus.) **Title tr.:** The parasitic worms. (Zoology, in German Greenland Expedition Alfred Wegener, 1929 and 1930-31)

Notes on two seal nematodes, a fox and two seal cestodes, and three (including with description, one new) seal acanthocephalans. **Copy seen:** DLC.

6911. HEISTAND, HENRY OLCOT SHELDON, 1856- . The Territory of Alaska. A brief account of its history and purchase; its inhabitants, geographical features and resources, with especial reference to the gold-fields and methods of reaching them. Comp. from official government records and the latest and most reliable sources. Kansas City, Mo., Hudson-Kimberly Pub. Co., 1898. 195 p. 32 plates, 3 fold. maps.

Includes appendices: United States and Canadian mining laws. Provision list. Distance tables. Newspapers. Post-offices. Freight and passenger rates Pacific Coast Steamship Company.

Copy seen: DLC; NNS Stef.

6912. HEIZER, ROBERT FLEMING, 1915- . Aconite arrow poison in the Old and New World. (Washington Academy of Sciences. Journal, Aug. 15, 1938. v. 28, p. 358-64, map)

Brief discussion of the use of various species of *Aconitum* plants for arrow poison by primitive peoples in the Old World and America. The suggestion is made that the practice had a distributional center in the Himalaya region extending from there northeasterly to Yezo, Sakhalin, the Kuriles and Kamchatka, and thence eastward across the Aleutian chain to Kodiak.

Copy seen: DSI-M.

6913. HEIZER, ROBERT FLEMING, 1915- . Aconite poison whaling in Asia and America, an Aleutian transfer to the New World. (U. S. Bureau of American Ethnology. Bulletin, 1943. No. 133. Anthropological papers no. 24, p. 415-68, illus. (incl. map) 7 plates.

Contains descriptions of whaling practices of (among others) the Kamchadals, Koryaks, Chukchis, Aleuts, Koniags, Eskimos, Tlingits and other Indians of the northwest coast, based on the literature (with discussion of sources) from the time of Steller. Discusses use of aconite poison by natives of the Kamchatka-Kurile area and the Aleutian-Kodiak area, and poison-lance whaling as "another . . . of [the] cultural elements and complexes which can be demonstrated to have entered the New World from Asia via the Aleutian Island chain." Appendix discusses poison harpoons and nets in modern whale fishery. Bibliography (about 140 items). *Copy seen:* DLC.

6914. HEIZER, ROBERT FLEMING, 1915- . Petroglyphs from southwestern Kodiak Island, Alaska. (American Philosophical Society. Proceedings, 1947. v. 91, p. 284-93, incl. 6 plates)

Contains a set of illustrations of the inscriptions, with a discussion of their possible significance and age.

Copy seen: DLC.

6915. HEIZER, ROBERT FLEMING, 1915- . Pottery from the southern Eskimo region. (American Philosophical Society. Proceedings, 1949. v. 93, p. 48-56, illus., incl. sketch map)

"This report is a presentation of a portion of the archaeological material collected by Dr. A. Hrdlička for the U. S. National Museum on Kodiak Island from 1931-1938." It contains analysis and methods used by the Kodiags; descriptions of fragments; and conclusions that the Kodiak pottery belongs to the later prehistoric period; that in broader relationship it can be placed with the Yukon-Kuskokwim ceramic group (in agreement with de Laguna); that nothing specific was detected by the author to support de Laguna's proposal that this pottery group was derived from the Kurile-Kamchatka region via the Aleutian Islands; bibliography (15 items).

6916. HELLAND, AMUND THEODOR, 1846-1918. Geschwindigkeit der Bewegung der grönländischen Gletscher im Winter. (Deutsche geologische Gesellschaft. Zeitschrift, 1881. Bd. 33, p. 693-94) *Title tr.:* Speed of the movement of a Greenland glacier in winter.

A comparison of the author's measurements, 1875, with those of R. R. J. Hammer, 1879-80, both made on the Jacobshavn Ice Fiord.

Copy seen: DGS.

6917. HELLAND, AMUND THEODOR, 1846-1918. Om de isfyldte fjorde og de glaciale dannelser i Nordgrønland. (Archiv for matematik og naturvidenskab, 1876. Bd. 1, p. 58-125, 2 plates (1 fold.)) *Title tr.:* On the ice fiords and glacial formations in northern Greenland.

Brief report in French was published in Association française pour l'avance-

ment des sciences. Comptes rendus, 1878, pub. 1879. Séss. 7, p. 588-91.

Based on a journey from Egedesminde (68°42'9"N.) to Kangerdlugssuaq Fiord (71°15'N.) made June-Aug. 1875, including the Disko Bay region and Jakobshavn Ice Fiord.

Contains brief description of the mountains along this section of Greenland's west coast, and of the inland ice; detailed notes on glaciers and ice-filled fiords, including speed of glacier movement and formation of icebergs; on ice fields and their formations, and on glacial formations.

Copy seen: DLC.

6918. HELLAND, AMUND THEODOR, 1846-1918. Om klormængden i Nordsøen, Atlanterhavet og Davisstrædet. (Archiv for matematik og naturvidenskab, 1876. Bd. 1, p. 229-38, incl. tables) *Title tr.:* On the chlorinity of the North Sea, Atlantic Ocean and Davis Strait.

Based on titrations carried out during a voyage in Apr.-Sept. 1875, tabular data of surface temperature and chlorinity of Denmark Strait waters (5 days in May), Davis Strait (June 1-15, and a few days in Aug.-Sept.), Disko Bay (a few days in June and July) and Umanak Fiord (2 days in Aug.)

Report on Norwegian fishery and marine investigations. v. 2, no. 2)

Results of physical investigations in the sea between Norway, Iceland, Jan Mayen and Bear Island, made, chiefly with the *Michael Sars*, Norwegian Fisheries research steamer, under the direction of F. Nansen in 1900, and

B. Helland-Hansen, 1901-1904. The cruises of 1902-1904 were in waters south of Greenland Sea.

Contents: 1. History of exploration of the Norwegian Sea.

2. Cruises of 1900-04.

3. Instruments and methods.

4. The basin of the Norwegian Sea; area and bathymetric features (with charts).

5. General description of the water-masses.

6. Apparent irregularities in horizontal distribution of temperature, salinity, and density.

7. The Norwegian Atlantic Current.

8. The Norwegian coast water.

9. Polar currents: Bear Island Arctic Current. Spitsbergen Polar Current. East Greenland Polar Current. East Iceland Arctic Current. Denmark Strait Polar Current. The ice.

10. Cyclonic systems of the southern and northern Norwegian Sea. (Currents)

11. Bottom-water.

Kristiania, J. Dybwad, 1917. 341, [1] p. incl. tables, diagrs. 48 plates. (Norske videnskapsakademi, Oslo. Skrifter. I. Matematisk-naturvidenskabelig klasse, 1916. No. 9) *Title tr.:* Temperature variations in the North Atlantic Ocean and the atmosphere; introductory studies on the cause of climatological variations. English translation was published with title as above, q.v.

The principal meteorological and oceanographic factors which contribute to climatic (mostly temperature) fluctuations from year to year and over long periods are analyzed. A detailed statistical analysis of the temperature variability (of both the air and sea temperatures) over the North Atlantic are based on the records of many stations during the period 1875-1910.

6964A. HEMSTOCK, R. A. Permafrost at Norman Wells, N.W.T. [n.p.] 1949. 2 p. l., [iv], 100 numb. l. incl. 46 p. of illus. (diags. (11 fold.) photos.) 4 diags. numb. separately, map. Type-script.

Research report on a project sponsored by the Arctic Institute of North America "to prepare and furnish a study of all available data on permafrost in the Norman Wells area and on related soil and snow mechanics." Results of observations, mainly during 1943-48, of the effects of permafrost and other subarctic phenomena on communications, road building, and construction in general. Author gives in chap. 1 (l. 1-15) a general description

of climate, records of precipitation and snowfall, notes on geology, break-up of ice, vegetation, and habitation; chap. 2 (l. 16-47) definitions and discussion in detail of soil temperatures, active layer, soil characteristics of the immediate region which create a special problem for foundations, permafrost distribution and thickness; chap. 3 (l. 48-67) description of building difficulties, pile driving, pile heaving, materials and pile anchorage; chap. 4 (l. 68-74), service installations, sewage and water supply. Chap. 5 (l. 75-93) is a discussion of factors affecting road, bridge, and airport construction: frost heaving, admixtures, drainage, icings, snow. Chap. 6 (l. 94-97) summarizes briefly communications and transportation methods and difficulties in the northern region. Bibliography (21 items).

Illus., etc.: mounted photographs of installations, permafrost phenomena, terrain, etc.

6968. HENDERSON, EDWARD P. The Aggie Creek meteorite from Seward Peninsula, Alaska. (American mineralogist, Mar.-Apr. 1949. v. 34, p. 229-32)

Petrographic description, including chemical analysis of a specimen from an iron meteorite discovered close to bedrock about twelve feet deep, at 64°53'N. 163°10'W. *Copy seen*: DGS.

6969. HENDERSON, EDWARD P. Mineralogical explorations in southeastern Alaska. (Smithsonian Institution. Explorations and field-work of the Smithsonian Institution in 1936, pub. 1937. p. 11-14, illus.)

Sketch of Prince of Wales Island, and note on new localities there of epidote.

Copy seen: DLC.

HENDERSON, FRANK DILLON, 1871- . *see* Canada. Dept. of the Interior. Northwest Territories & Yukon Branch. Canada's Arctic Islands. Expeds. 1922-25. 1927.

6970. HENDERSON, JAMES FENWICK, 1905- . Beaulieu River area, Northwest Territories. Preliminary report. Ottawa, King's Printer, 1939. 2 p. l., 16 p. fold. map (separate) (Canada. Geological Survey. Paper 39-1)

Contains a description of the geological formations and gold mines, with mention of a niccolite vein, and notes on prospecting for area on north shore of Great Slave Lake, 62°-63°N. 112°-114°W.

Copy seen: DGS.

6971. HENDERSON, JAMES FENWICK, 1905- . Extent of Proterozoic granitic intrusions in the western part of the Canadian Shield. (Royal Society of Canada. Proceedings and transactions, May 1948. Ser. 3, v. 42, sect. 4, p. 41-54, map, table)

Brief description of the geology and a correlation table for four divisions of the region from Great Slave Lake to Great Bear Lake, Mackenzie District; showing that granite batholiths are Proterozoic rather than Archaean in age. Bibliography (29 items).

Copy seen: DGS; DLC.

6972. HENDERSON, JAMES FENWICK, 1905- . MacKay Lake area, Northwest Territories. Ottawa, King's Printer, 1941. 2 p. l., 6 p. fold. map. (Canada. Geological Survey. Paper 41-1)

Contains descriptions of the geological formations, and prospecting notes, with a blueprint map of the geology of the area north of the east arm of Great Slave Lake, 63°-64°N. 110°-112°W.

Copy seen: DGS.

6973. HENDERSON, JAMES FENWICK, 1905- . Nonacho Lake area, Northwest Territories. [Ottawa] 1937. 1 p. l., 22 l., fold. map. (Canada. Geological Survey. Paper 37-2)

Contains a preliminary mimeographed report on the geological formations and possibilities of mineral deposits, with notes on routes from Lake Athabaska and from Fitzgerald, and on the physical geography. Includes preliminary geological map, 61°-62°30' N. 108°30'-111°W., on Taltson River.

Copy seen: DGS.

6974. HENDERSON, JAMES FENWICK, 1905- . Pitchblende occurrences between Beaverlodge and Hottah Lakes, Northwest Territories. Ottawa, 1949. p. l., 17 p. fold. map. (Canada. Geological Survey. Paper 49-16) Mimeographed.

Results of field-work, 1945, in an area of 10 square miles, 64°40'-65°N. 118°15'-30'W. on the southeast corner of Great Bear Lake. Contains description of the Snare group of late Precambrian rocks, the gabbros, diabases and gabbros, the Paleozoic conglomerates and sandstones of the area, and descriptions of thirty-eight individual pitchblende occurrences.

Maps: Uranium occurrences (a) Hottah Lake, scale 1 in.:500 ft., and (b) Beaverlodge Lake, scale 1 in.:1,000 ft.

Copy seen: DGS.

6975. HENDERSON, JAMES FENWICK, 1905- . The relation of gold deposits to structure, Yellowknife, N.W.T. (Precambrian, July 1948. v. 21, no. 7, p. 6-11, illus., 2 sketch maps)

"Prepared . . . from a paper presented at a meeting of the Prospectors and Developers Association in Toronto, Mar. 9, 1948." Discussion of the gold and faults of the area. For another treatment of this subject, see Jolliffe,

A. W., *Yellowknife faults and ore bodies*, 1945.

Descriptions with some discussion of five species, based on specimens in several collections taken from various localities in the North Pacific, including Alaskan waters. *Copy seen:* DLC.

6999. HENRY, T. J. G. Meteorological observations at Winter Harbour, Melville Island. Ottawa, 1947. 23 leaves, process print. (Canada. Dept. of Transport. Meteorological Division. Cir. 1275, TEC. 16, 20 Jun. 47)

Summary of observations made on southern coast of Melville Island (74°46'N. 110°45'W.) by Sir W. E. Parry, Sept. 1819-Oct. 1820, and by the C.G.S. *Arctic*, Sept. 1908-July 1909. Discussion of duration of daylight, pressure distribution, winds, temperatures, precipitation and thunderstorms, cloud, fog; with tabular data appended. *Copy seen:* CaMAI.

7000. HENRY, T. J. G., and G. R. ARMSTRONG. Aerological data for northern Canada. Upper wind frequencies. Average upper-air temperature, pressure and humidity data. Surface climatic data for selected stations. Normal isobaric charts. Toronto, Head Office of Dept. of Transport, Meteorological Division of Canada. 1949. 4, 271 p. maps, tables, diagrs.

The average monthly values of upper air pressure, temperature and humidity and percentage frequency of upper winds (seasonal) by direction at standard levels or standard pressure

are determined by the available observational materials, largely within the period Mar. 1942-June 1948. The instruments, methods in conducting the aerological observations, and the procedures in compiling the data are discussed. Normal temperature and dynamic heights for standard pressure charts are drawn for typical seasonal months. Climatological data for each aerological station appears in a separate section.

Reviewed as a "major contribution to the climatology of the Arctic", in *Arctic*, Apr. 1950. v. 3, no. 1, p. 66-67.

IV. Salicineae.

V. Cannabineae, Urticaceae, Ulmaceae, Juglandaceae, Betulaceae, Myricaceae, Coniferae, and Gnetaeae.

Consists of extensive critical notes on two hundred forty-two species from eastern Asia, continuing Herder's *Plantae Raddeanae Monopetalae*, 1864-87, q.v. Includes some arctic species.

Copy seen: MH-A.

7013. HERDER, FERDINAND GOTTFRIED THEOBALD MAXIMILIAN von, 1828-1896. *Plantae Raddeanae Monopetalae*. Die Monopetalen Ostsibiriens, des Amurlandes, Kamtschatka's und des Russischen Nordamerika's nach dem im Herbarium des Kaiserlichen botanischen Gartens befindlichen von G. Radde und vielen anderen gesammelten Pflanzen. (Moskovskoe obshchestvo ispytatelei prirody. Bülleten', 1864. T. 37, pt. 1, no. 1, p. 190-235. plates 1-3; 1865. T. 38, pt. 1, no. 2, p. 369-421; 1867. T. 40, pt. 1, no. 1, p. 201-241; no. 2, p. 406-447; 1868. T. 41, pt. 2, no. 3, p. 1-53; 1870. T. 43, pt. 1, no. 1, p. 81-111, no. 2, p. 174-217; 1883. T. 53, pt. 1, no. 2, p. 367-415; 1884. T. 58, pt. 2, no. 3, p. 38-111; 1884. T. 59, pt. 1, no. 2, p. 231-45; 1885. T. 61, pt. 1, no. 1, p. 119-66. Leningrad. Glavnyi botanicheskii sad. Trudy, 1887. v. 1, vyp. 1, p. 1-82)

Title tr.: *Plantae Raddeanae Monopetalae*. Monopetalous plants of eastern Siberia, Amur region, Kamchatka Peninsula and Russian North America, collected by G. Radde and many others, deposited in the herbarium of the Imperial Botanical Garden and worked out by Ferdinand von Herder. Reprinted as v. 3 (T. 37-43 of Bülleten') and part of v. 4 of Regel, E. A., and

F. Herder, *Reise in den Süden von Ost-sibirien*, etc., 1861-66, q.v.

Contains description and determination of collections from eastern Siberia and adjoining regions, made by G. Radde and many other explorers, with extensive critical notes, literature citations and data on distribution.

This work was continued as the author's *Plantae Raddeanae Apetalae*, 1889-92, q.v. For critical notes see the author's *Addenda et emendanda*, etc., 1878-81, q.v. For further details of the publication of these papers see Leningrad. Glavnyi botanicheskii sad. Trudy, 1887. T. 10, p. 69-82.

Narrative of the voyage and work of this wooden ship which accompanied

the main expedition ship Mainz, during the German Arctic Zeppelin Expedition, 1910. Describes the Fönix's exploration of embayments of the west coast of West Spitsbergen, the ship's run into the pack ice on the north coast. Includes notes on ice conditions and discussion of the expedition's aerological and meteorological work which was based on the Fönix.

7024. HERRMANN, JULIUS. Die Fahrt nach dem Ob und dem Jenissei im

Jahre 1905. (Zur Nordostdurchfahrt). (Annalen der Hydrographie und maritimen Meteorologie, Mai 1906. Jahrg. 34, p. 193-219, plate, 3 maps (1 fold.) fold. diagr.) **Title tr.:** The voyage to the Ob' and Yenisey, 1905. (On the Northeast Passage).

Based on reports and meteorologic journals of captains of eight steamers which were part of the fleet of vessels sent by the Russian government on a voyage to carry provisions and to transport railway materials to the Ob' and Yenisey Rivers, Aug.-Sept. 1905.

Contains a day-by-day account of the fleet's progress; notes on the route, the ice encountered, and the currents. Includes sailing directions for Catherine Harbor (Alexandrovsk, Kola Inlet), the course from Vardö to Yugor Strait, navigation and anchorages in the strait, the course from Yugor Strait to the Yenisey, the mouths of the Ob' and the Yenisey. **Copy seen:** DLC.

7025. HERRMANN, JULIUS. Die russischen hydrographischen Forschungen im Nördlichen Eismeeer im Jahre 1902. Nach dem Bericht des Kapt. A. Warnek. (Annalen der Hydrographie und maritimen Meteorologie. 1903. Jahrg. 31, p. 492-96) **Title tr.:** The Russian hydrographic investigations in the Arctic Ocean, 1902. From the report of Capt. A. Warnek.

Brief summary of information in a Russian publication, issued in St. Petersburg, 1903, by the Imperial Hydrographic Department; *Kratkii ocherk rabot Gidrograficheskoi ekspeditsii Severnago Ledovitago okeana v 1902 godu*.

The report covers the work of two vessels, the *Pakhtusov* and one other, which surveyed coastlines, and made soundings in the White and Kara Seas, July-Sept. 1902. Notes the survey and tides of Orlov Banks (about 67°11'N. 42°49'E.) in the White Sea, the depth and salinity along the southwest coast of Kara Sea, the depth of Kara Strait, and survey activities at the mouth of the Pechora, in Kara Strait and along the coast between Yugor Strait and Kara River. Includes a few geodetic and magnetic observations.

7031. HERSEY, HENRY B. Meteorological work at Camp Wellman, Danes Island, Spitsbergen. (U. S. Weather Bureau. Monthly weather review, Feb. 1907. v. 35, p. 63-68)

Summary account of the first part of the Wellman *Chicago Record-Herald* Polar Expedition, organized in 1906 to carry out Walter Wellman's plan of reaching the North Pole by means of airship or dirigible balloon. The author, representing the U. S. Weather Bureau and National Geographic Society, was in charge of this section of the expedition to Danes Island (Danskøya) off the northwest coast of Spitsbergen.

He gives here the tabulated results of daily meteorological observations at 1800 hours (local time), and hourly registerings of air temperature and wind speed at Cape Wellman, Danes Island, during the period, June 26-Aug. 31, 1906. A description of the instrumentation and its exposure and a chronological (daily) résumé of weather conditions June 21-August 26, precedes the tabular materials.

zu Dresden. Jahresbericht, 1885. Bd. 21, p. 217-23) *Title tr.*: On Bering Island. From the travel journal of Otto Herz.

Description (in brief) of Bering Island and (in detail) its fur seal industry. *Copy seen*: DLC.

7035. HERZ, OTTO, 1853-1905. Frozen mammoth in Siberia. (Smithsonian Institution. Annual report, 1903, *pub.* 1904. p. 611-25. illus. 9 plates, map)

Translated extracts of the report (*Otchet'y nachal'nika ekspeditsii* (etc.) 1902, q.v.) of the author as leader of the Imperial Academy of Sciences Expedition to the Berezovka River to excavate mammoth remains in 1901. Account with some day-to-day notes of the author's examination *in situ* of frozen mammoth remains preserved in a cliff along the Berezovka River, a right tributary of the Kolyma; also notes on preparation of the remains for transportation to the Zoological Museum, St. Petersburg.

Copy seen: DLC.

7036. HERZ, OTTO, 1853-1905. *Otchet'y nachal'nika ekspeditsii Imperatorskoï akademii nauk na Berezovku dlia raskopki trupa mamonta.* (Akademiia nauk SSSR. Bulletin, avril 1902. Sér. 5, t. 16, p. 137-74, 9 plates, sketch map) *Title tr.*: Reports of the leader of the Imperial Academy of Sciences' Expedition to the Berezovka River for the purpose of exhuming the carcass of a mammoth.

Contains 1. An account of the origin of the expedition, which consisted of the author (senior zoologist of the Academy's Zoological Museum) and two assistants. News had been received (April 1901) that a well-preserved mammoth had been located in a ridge on the Berezovka River.

2. Gert's letters from Yakutsk, Verkhoyansk, and Sredne-Kolymsk, describing the preparations and the journey on horseback and on foot. Letter from the banks of the Berezovka, including journal of events from Aug. 29 to Oct. 24. List of parts of mammoth obtained, as prepared for shipment in frozen state to St. Petersburg.

3. The return, ending Feb. 18, 1902 in St. Petersburg.

Copy seen: DSI (plates and map bound following p. 094 of Feb. issue).

7037. HERZOG, WILHELM PHILIPP, 1836-1900? Ueber die Verwandtschaft des Yumasprachstammes mit der Sprache der Aleuten und der Eskimostämme. (Zeitschrift für Ethnologie. Berlin, 1878. v. 10, p. 449-59) *Title tr.*: On the relationship between the Yuma linguistic stock and the language of the Aleut and Eskimo stock.

Consists chiefly of parallel vocabularies of various Yuma, (North American Indian), Aleut, and Eskimo words, between which there is some resemblance. *Copy seen*: DLC.

7038. HESLOP, BARBARA. Arctic rescue. (Beaver, Mar. 1944. Outfit 274, no. 4, p. 8-14, illus.)

Account of the air operation which succeeded in evacuating the post manager and his wife from Fort Ross, Nov. 1943. *Copy seen*: DSI-M.

Contains condensed, technical information on the physical and mechanical properties of snow and (both fresh-water and marine) ice; and a comprehensive treatment of glaciers, including their movement, temperature, structure, drainage, icebergs, moraines, variation, and distribution.

Copy seen: DLC.

7040. HESSE, ERICH. Bernhard Hantzschs ornithologische Ausbeute in Baffinland. (Journal für Ornithologie, 1915. Jahrg. 63, p. 137-227) *Title tr.*: Bernhard Hantzschs's ornithological results on Baffin Island.

Based on the specimens in the Royal Zoological Museum, Berlin, and on Hantzschs's journal, 1909-11. Field notes (with Eskimo names) on thirty-eight species, and a section on the eggs and nests of eighteen species.

Copy seen: DSI-M.

7041. HESSELBERG, THEODOR, 1885-. On the projected cooperation with Roald Amundsen's North Polar Expedition. (Norway. Geofysiske kommission. Various papers on the projected cooperation with Roald Amundsen's North Polar Expedition. *Pub.* in: Geofysiske publikationer, 1920. v. 1, no. 4, p. 1-4, map)

Plans for the erection of geophysical stations and the extension of work in existing stations in countries around the Arctic Ocean. *Copy seen:* DLC.

7042. HESSELBERG, THEODOR, 1885-. Polaråret. (Norsk geografisk tidsskrift, 1932-33, *pub.* 1933. Bd. 4, p. 110-20) *Title tr.:* The Polar Year.

Contains remarks on the First International Polar Year, 1882-83; discussion of the organization and preparations for the Second Polar Year, 1932-33, the proposed participation of Norway, the network of stations and auroral investigations planned.

Copy seen: DLC.

7043. HESSELBERG, THEODOR, 1885-. Polarforskning og meteorologi. (Norsk geografisk tidsskrift, 1926-27, *pub.* 1927. Bd. 1, p. 257-74, sketch maps) *Title tr.:* Polar exploration and meteorology.

Remarks on the cooperation of the Norwegian Meteorological Institute with arctic expeditions, 1873-1922; account of its participation in the preparations and flights made by Amundsen 1925 and 1926; also remarks on arctic weather and flying conditions and discussion of the weather during the flights.

Copy seen: DLC.

7044. HESSELBERG, THEODOR, 1885-. Våre arktiske værstasjoner. (Norsk geografisk tidsskrift, 1932-33, *pub.* 1933. Bd. 4, p. 455-64, illus., chart) *Title tr.:* Our arctic meteorological stations.

Discussion of Norwegian stations and weather forecasting in arctic regions; their importance to Norway.

Copy seen: DLC.

7045. HESSELBERG, THEODOR, 1885-, and B. J. BIRKELAND. Sækulare Schwankungen des Klimas von Norwegen. Oslo, 1940-43. 3 pt.: 106, 65, 76 p. incl. tables (Geofysike publikasjoner, v. 14, no. 4-6) *Title tr.:* Secular changes in the climate of Norway. No. 4. Air temperature; no.

5. Precipitation; no. 6. Air pressure.

The secular trend of the climate of selected stations in Norway and insular possessions of Norway is analyzed according to departures of ten-year running averages of the various climatic elements, from the normal value based on the period 1901-1930.

No. 4 (Air temperature) includes chapters on the tree line, the extension of the shipping season between Norway and Spitsbergen, and the results of rise of temperature in Svalbard and neighboring waters (recession of glaciers).

Copy seen: DLC.

7046. HESSELBO, AUGUST, 1874-. List of the Andreaeales and Bryales found in East-Greenland between 74° 15' and 65° 35' lat. N. in the years 1898-1902, by Aug. Hesselbo. 1907. (*In:* Amdrup, G. C. Carlsbergfondets expedition til Ost-Grønland. 4. del. nr. 9. *Pub.* in: Meddelelser om Grønland. 1911. 30. hefte, p. 313-32)

List, with localities, of one hundred thirty-seven species of mosses, collected during the Carlsberg Fund Expedition to East Greenland, 1898-1900, and Kruuse's Botanical and Ethnological Expedition to Angmagssalik, 1901-1902.

Copy seen: DLC.

7047. HESSELBO, AUGUST, 1874-. Mosses collected on the Fifth Thule Expedition. [Copenhagen, Gyldendal, 1937] 17 p. (Thule Expedition. 5th, 1921-24. Report. v. 2, no. 2)

List of mosses from twenty-seven localities in Melville Peninsula, Cockburn Land (northwest Baffin Island) and the Northwest Territories.

Copy seen: DLC.

7048. HESSELBO, AUGUST, 1874-. Mosses collected on the north coast of Greenland by the late Dr. Th. Wulff. (*In:* Thule ekspeditionen til Grønlands nordkyst. 2d, 1916-1918. [Beretninger] nr. 10. *Pub.* in: Meddelelser om Grønland, 1927. Bd. 64, p. 269-77)

List, with localities and remarks, of sixty-seven species of mosses and liverworts.

Copy seen: DLC.

7049. HESSELBO, AUGUST, 1874-. Mosses from Clavering Ø and the surrounding areas. København, C. A. Reitzel, 1948. 22 p. map. (Meddelelser om Grønland. Bd. 116, nr. 6)

Results of the Three-Year Expedition to Christian X's Land, 1931-34.

List, with notes on habitats, of one hundred thirty-nine species of mosses and liverworts from Sabine Island, Wollaston Foreland, Clavering Island, Hudson Land, Hold with Hope, Strindberg Land, Payer Land, and Cape Stewart (Scoresby Sound).

Copy seen: DGS; DSI-M.

7050. HESSELBO, AUGUST, 1874- . Mosses from North-East Greenland (Lat. 77°N.). København, C. A. Reitzel, 1948. 10 p. (Meddelelser om Grønland. Bd. 128, nr. 3)

Results of the Danish Northeast Greenland Expedition, 1938-39. Lists, with habitats, of seventeen species of liverworts, and sixty-seven mosses, based on collections made on the north shore of Dove Bay and on Wollaston Foreland.

Copy seen: DGS.

7051. HESSELBO, AUGUST, 1874- . Mosses from north-east Greenland (N. of 76°N. lat.) collected by the "Danmark-expedition" 1906-1908, determined by Aug. Hesselbo. 1910. Danmark-ekspeditionen til Grønlands nordøstkyst, 1906-1908. Bd. 3, nr. 8. (Meddelelser om Grønland, 1917. Bd. 43, p. 169-80, plates XI-XII)

Contains list, with localities and notes on habitat, of ninety-one (including with description, one new) species, mostly from the vicinity of Danmarks Havn, Germania Land (76°46'N. 18°45'W.) and also from northerly spots including Lamberts Land and the north side of Hyde Fiord (83°10'N.).

Copy seen: DLC.

7052. HESSELBO, AUGUST, 1874- . Some mosses from N. W. Greenland (Wolstenholme Sound and Inglefield Gulf). (In: Thule ekspeditionen til Grønlands nordkyst. 2d, 1916-1918. [Beretninger] nr. 8. Pub. in: Meddelelser om Grønland, 1927. Bd. 64, p. 215-20)

List, with localities and names of collectors, of thirty-seven species.

Copy seen: DLC.

HESSELBO, AUGUST, 1874- , *see also* Gandrup, J., & others. Botanical trip to Jan Mayen. 1924.

7053. HESSELMAN, HENRIK, 1874-1943. Om mykorrhizabildningar hos arktiska växter. Stockholm, P. A. Norstedt, 1900. 46 p. illus. 3 plates. (Svenska vetenskapsakademien. Handlingar;

Bihang. Bd. 26, afd. 3, no. 2) *Title tr.:* On mycorrhiza in arctic plants.

Drawing chiefly on research during the Swedish Arctic Expedition, 1898, the author gives (1) a historical survey of mycorrhizal research; (2) list, with discussions, of plant species with ectotrophic mycorrhiza; (3) survey of the anatomical structure of the species investigated; and (4) discussion of humus in arctic regions.

HEUGLIN, MARTIN THEODOR *von*, *see* HEUGLIN, THEODOR *von*, 1824-1876.

7055. HEUGLIN, THEODOR *von*, 1824-1876. Beiträge zur Fauna, Flora und Geologie von Spitzbergen und Novaja Semlja. Braunschweig, G. Westermann, 1874. viii, 352 p. plate. (His: Reisen nach dem Nordpolarmeer in den Jahren 1870 und 1871. Dritter Theil) *Title tr.:* Contribution to the fauna, flora and geology of Spitsbergen and Novaya Zemlya.

The scientific report of the author's voyages during the summers of 1870 and 1871, which took him to Edge, Barents and Vaygach Islands, as well as West Spitsbergen and Novaya Zemlya.

Contains in (1) zoology: systematic lists, with bibliographic references and extensive notes on distribution and natural history, of nineteen species of land and marine mammals, fifty species of birds and thirty-one species of fishes; simple lists, with localities, of the molluscs, bryozoans, crustaceans, arachnids, insects, free-living and parasitic worms, echinoderms, coelenterates,

and protozoans of the two land groups and the waters between them.

(2) Botany: lists, with localities, of the flowering plants, ferns, liverworts, mosses, algae, lichens, and fungi of the two island groups.

(3) Geology: remarks on the general geology, coastal uplift, glaciers, and drift-wood of West Spitsbergen, and brief comment on Novaya Zemlya rocks.

7056. HEUGLIN, THEODOR von, 1824-1876. Notes on the birds of Novaya Zemlia and Waigats Island. (Ibis, Jan. 1872. Ser. 3, v. 2, p. 60-65)

Based on collections made during a cruise in the *Germania*, July-Sept. 1871, an annotated list of forty-three species, including some reported earlier and not observed by the author.

Copy seen: DSI-M.

7057. HEUGLIN, THEODOR von, 1824-1876. Reise in Norwegen und Spitzbergen im Jahre 1870. Unternehmen in Gesellschaft des Grafen Karl v. Waldburg-Zeis-Trauchburg. Braunschweig, G. Westermann, 1872. xii, 328 p. 16 plates, 2 fold. maps. (*His:* Reisen nach dem Nordpolarmeere in den Jahren 1870 und 1871. Erster Theil.) *Title tr.:* Voyage to Norway and Spitsbergen, 1870. In company with Count Karl Waldburg-Zeis-Trauchburg.

The schooner *Skjøn Valborg* cruised, July 3 to Oct. 6, among the islands off northern Norway, across Greenland Sea (west of Bear Island) to the west coast of West Spitsbergen (Horn Sound), then north along the east coast of West Spitsbergen, Edge and Barents Islands, returned to the west coast again (Ice Fiord), thence to Norway.

Heuglin studied the marine and land faunas and made natural history collections. He gives here a narrative of the voyage, descriptions of the birds, whales, seals, and walrus, the methods of their capture and other natural history notes; remarks on the physical features of land areas, the vegetation, weather, and sea ice; with special notes on Bear Island, the Negri glacier, and general history of exploration of the Svalbard region.

Meteorological tables of this cruise appear as Appendix A, in his: *Reise nach Novaja Semlja* (etc.) 1873, q.v.

Summary account of Heuglin's explorations in Stor Fiord, with new map

and list of new place names by Petermann, was published in *Th. v. Heuglin's Aufnahmen in Ost-Spitzbergen, 1870.* (Petermann's geographische Mittheilungen, 1871. Bd. 17, p. 176-82)

Copy seen: DLC.

7058. HEUGLIN, THEODOR von, 1824-1876. Reise nach Novaja Semlja und Waigatsch im Jahre 1871. Unter- nommen mit der Rosenthal'schen Expedition. Braunschweig, G. Westermann, 1873. vi, 300 p. illus., 8 plates, fold. map. (*His:* Reisen nach dem Nordpolarmeere in den Jahren 1870 und 1871. Zweiter Theil) *Title tr.:* Voyage to Novaya Zemlya and Vaygach, 1871, with the Rosenthal Expedition.

Narrative of the cruise of A. Rosenthal, July 23-Sept. 20, with the steamer *Germania*, across Barents Sea, within Matochkin Shar, Kostin Shar, Yugorskiy Strait and waters west of Vaygach Island, carrying on hydrographic, natural history and meteorological investigations. Includes remarks on the marine fauna, temperature and ice, the weather, and the physical geography of coasts which the steamer touched.

Appendices tr.: A. Meteorological observations during the voyage to Spitsbergen, June 4-Nov. 1, 1870. (Daily air and sea surface temperatures, color of the sea, wind direction, cloudiness, state of sea, and remarks).

B. Excerpts from the log of the *Germania*, July 8-Nov. 3, 1871. (Remarks on ice, weather and bathymetry).

C. Meteorologic journal of the *Germania*, July 8-Nov. 3, 1871. (Barometric pressure, air and sea-surface temperature, wind direction and strength, cloudiness, weather, state of sea, and remarks).

Supplementary remarks on the most recent exploration of King Karl's Land.

Map: Insects of Matochkin Shar, Belushya Bay, and Kostin Shar (Novaya Zemlya), and of Kara Strait, Vaygach Island, and Yugorskiy Strait.

Copy seen: DLC.

List, with descriptions, of sixteen (including four new) species, from Dr. G. C. Wallich's cruise in the *Bulldog*, 1860. The specimens were dredged "off Fredrikshaab, Davis Strait in 100 fathoms", not off Iceland, according to the author's *Note on lists of arctic Hydroida*, 1877, q.v.

Copy seen: DSI-M.

7103. HINCKS, THOMAS, 1818-1899. On new Hydroids and Polyzoa from Barents Sea. (Annals and magazine of natural history, Oct. 1880. Ser. 5, v. 6, p. 277-86, plate)

Detailed descriptions of one new hydroid and seven new bryozoan species, collected by the Dutch expeditions in the *Willem Barents*, 1878-79.

Copy seen: DSI-M.

7104. HINCKS, THOMAS, 1818-1899. On Polyzoa from Iceland and Labrador. (Annals and magazine of natural history, Jan. 1877. Ser. 4, v. 19, p. 97-112, 2 plates)

List, with localities and arctic distribution, of thirty-two (including, with descriptions, four new) species from Davis Strait off Frederikshaab, and sixteen (including one new) species from Hamilton Inlet, collected by Dr. Wallich, 1860, in the *Bulldog*, with some incorrectly labeled from Icelandic waters.

Copy seen: DSI-M.

7105. HIND, HENRY YOULE, 1823-1908. Explorations in the interior of the Labrador Peninsula, the country of the Montagnais and Nasquapee Indians. London, Longman, Green Longman, Roberts, & Green, 1863. 2 v. (xv [1] 351 p., xiii p., 1 l., 304 p.) col. front., illus., plates (part col.) 2 maps (1 fold.)

The expedition of 1861 here described, covered the Moisie River basin, for the most part south of the 52°N. parallel.

Contains, in v. 1, a narrative of the journey, with description of the country and the Indians. v. 2, includes chapters on history and geographical description of Labrador and northern Quebec, the Indians and Eskimos, and the missions; with an index.

Copy seen: DLC; NNSf.

7106. HIND, HENRY YOULE, 1823-1908. The mechanical effect of arctic ice in producing ocean currents. (Canadian naturalist, 1878. New ser., v. 8, p. 417-24)

A discussion of how the ice formed in the arctic regions can affect the tides and currents, with estimates of total amounts of ice formed and descriptions of various forms of ice.

Copy seen: DGS.

7107. HIND, HENRY YOULE, 1823-1908. Notes on some geological features of the northeastern coast of Labrador.

(Canadian naturalist, 1878. New ser., v. 8, p. 227-40, 262-78)

The area discussed extends from Sandwich Bay, 53°45'N. to Ukkasik-salik, 55°55'N.

Contents: Area description. Rock cleavages. Pan ice. Extent of pan ice work. Glacial striae and glacial clays. Icebergs. Formation of boulder clays. The marine climate. The crystalline limestones of the Laurentian series. Symmetrical structure of the strata. Concretionary structure. Boulders and outliers Upper Laurentian or Labrador series. Permanent snow drifts. Influence of wind on composition of drifts. Mechanical effects produced by snow drifts. Amount of snow fall in north-eastern America. Direction and force of winds. Influence of snow drifts as geological agents. *Copy seen:* DGS.

7120. HITCHCOCK, ALBERT SPEAR, 1865-1935. *Agrostis* genus novis speciebus Americae septentrionalis auctum. (Repertorium specierum novarum regni vegetabilis, 1908. Bd. 5, no. 99-104, p. 356-59) *Title tr.:* Some new North American species of the genus *Agrostis*.

Contains Latin diagnoses of the grasses *Agrostis* (*Euagrostis*) *hiemalis* subsp. *geminata* n. subsp. from Unalaska and *A. melaleuca* from Alaska.

Copy seen: MH-A.

7121. HITCHCOCK, ALBERT SPEAR, 1865-1935. Collecting grasses in Newfoundland and Labrador. (Smithsonian Institution. Explorations and fieldwork of the Smithsonian Institution in 1928, pub. 1929. Pub. no. 3011. p. 123-28, illus.)

Brief account of a trip to collect grasses in Newfoundland and Labrador (Cartwright, Battle Harbour, Hope-dale and Nain).

Copy seen: DLC.

7122. HITCHCOCK, ALBERT SPEAR, 1865-1935. North American species of *Agrostis*. Washington, Govt. Print. Off., 1905. 68 p. plates 1-37. (U. S. Dept. of Agriculture, Bureau of Plant Industry. Bulletin. No. 68)

Contains data on taxonomy, nomenclature and history of the genus *Agrostis* (Gramineae), keys to the species of this grass and an enumeration of North American species, including some native to arctic regions. Descriptions of new species also published in the author's *Agrostis genus novis speciebus*, 1908, q.v.

Copy seen: MH-A.

7123. HITCHCOCK, CHARLES B. Echo sounding records. (In: Boyd, L. A. Fiord region of East Greenland. 1935, p. 300-312, 3 plates) Results of Louise A. Boyd Expedition to East Greenland, 1933.

Contains soundings to determine the character of the fiord bottoms, with

profiles constructed for Franz Joseph Fiord and branches, Sofia Sound, Vega Sound, King Oscar Fiord, Narwhal Sound, Kempe Fiord, and Antarctic Sound; bathymetric record across Greenland Sea combined with other records to construct profiles of the continental shelf.

7127. HJELMQVIST, HÅKON. The flax weeds and the origin of cultivated flax. (Botaniska notiser, 1950, häfte 2, p. 257-98, illus., text maps)

Contains a study of the origin, migration, relative age and geographic distribution of various flax weeds and

the still unsettled question of the origin of cultivated flax; includes *Lolium remotum*, a weed occurring in northern Norway and Swedish Lapland.

Copy seen: MH-A.

7128. HJELMQVIST, HAKON, and ELSA NYHOLM. Några anatomiska artkaraktärer inom *Carex*-gruppen *Distigmaticae*. (Botaniska notiser, 1947, häfte 1, p. 1-31, illus.) *Title tr.*: Some anatomical species characteristics in the Scandinavian Carices *Distigmaticae*.

Contains a study of leaf anatomy in the critical group *Distigmaticae* of the genus *Carex* in Scandinavia, based partly on material from Swedish Lapland, and a discussion of its importance for determination and taxonomy.

Copy seen: MH-A.

7129. HJELT, HJALMAR. Kännedom om växternas utbredning i Finland med särskildt afseende å fanerogamer och ormbunkar. Helsingfors, 1891. 152 p. fold. tables, (Societas pro fauna et flora fennica. Acta, 1892, pub. 1891. v. 5, pars 1a) *Title tr.*: Information on the phytogeography of Finland with emphasis on phanerogams and ferns.

Contains a study of plant distribution in Finland (especially phanerogams and ferns), with a systematic list of over one thousand species and tabulated statistical data on distribution in 29 geobotanical regions, including Finnish and Russian Lapland; bibliographical footnotes.

Copy seen: MH-A.

7130. HJELT, HJALMAR, and R. HULT. Vegetationen och floran i en del af Kemi Lappmark och Norra Osterbotten. Helsingfors, 1885. 158 p. (Societas pro fauna et flora fennica. Meddelanden. Häfte 12) *Title tr.*: Vegetation and flora of a part of Kemi Lappmark and North Osterbottnia.

Contains a study made by the authors in the summer of 1877, including a sketch of the journey, physical and geographical survey of the region (66°-67°N. in Finland), a study of plant formations and elements of the flora, botanico-statistical data and a systematic enumeration of over three hundred fifty plant species. *Copy seen:* MH-A.

7131. HJORT, JOHAN, 1869-1948. Forschungsfahrten auf nördischen Meeren. (Gesellschaft für Erdkunde zu Berlin. Zeitschrift, 1904. p. 484-97)

Contains a discussion of the general oceanographic conditions in the seas between Norway, Greenland and West Spitsbergen as they affect the fisheries, especially in the Norwegian area.

Copy seen: DLC.

7132. HJORT, JOHAN, 1869-1948, and others. Oversigt over Norsk fiskeri- og havforskning 1900-1908. Review of Norwegian fishery- and marine investigations 1900-1908. Bergen, J. Grieg, 1909. 204 p. 18 plates (diags.) (Norway. Fiskeridirektoratet. Skrifter: ser. havundersøkelser. Report on Norwegian fishery and marine investigations. v. 2, no. 1) *Other authors:* B. Helland-Hansen, A. Apellöf, D. Damas, E. Koefoed, Knut Dahl, Oscar Sund, and T. Iversen. Text in Norwegian and English.

The work undertaken during the years mentioned, (with the *Michael Sars*, also fishing boats) was mostly in the coastal waters of Norway. Cruises in 1900 and 1904 included waters between Norway, Bear Island, Jan Mayen, and Iceland. This report contains a full description of the research vessel, *Michael Sars*, and her equipment; and reviews of the research on hydrography, bottom fauna, plankton, and the spawning, eggs, age, growth and fluctuation of (commercial) fishes.

Kristiania, Jacob Dybwad, 1895. 14 p. 2 plates (Norske videnskapsakademi. Skrifter. I. Matematisk-naturvidenskapelig klasse, 1895, no. 2) *Title tr.*: The anatomy and life development of a crustacean (*Sarcotaces arcticus* Collett.) parasitic in the flesh of fishes.

Discussion of specimens from various stations off northern Norway and of parasitism in fishes.

Copy seen: DLC.

7134. HJORT, JOHAN, 1869-1948, and H. H. GRAN. Currents and pelagic life in the northern ocean. Bergen, J. Grieg, 1899. 1 p. 1., 22 [1] p. illus., 28 p. of tables (part fold.) 7 plates (4 double-face diags., 3 charts). (Bergen. Museum. Skrifter. Nr. 6)

"Report on Norwegian marine investigation 1895-97." The waters of

the Norwegian coast are studied in great detail, with inclusion of data and discussion on the Greenland Sea north of Norway and between Iceland and Norway. Covers hydrographic conditions and the periodic influence upon them of the Gulf Stream, Arctic Current and the continent of Norway; and the kinds and annual periodicity in occurrence of the phytoplankton.

Copy seen: DLC.

Contents include: Introduction (p. 5-11) a summary of the currents and water masses of the Greenland Sea and Baffin Bay-Davis Strait waters.

Chap. 1. The Greenland waters (p. 11-37). Brief remarks on the history of whaling and fishing off the west coast, the fishery investigations, and Danish commercial fishing efforts 1924-28, including the *Michael Sars* expedition, 1924, and a whaling expedition carried out simultaneously. Discussion (in brief) of the currents, temperature and plankton of the waters across Davis Strait at about 66°N.

Chap. 3. Problems and conclusions (p. 75-84). A. Plankton communities. 1. Waters covered by floating ice (Greenland Sea). *Copy seen:* DF.

7138. HJORTLUND, S. Lidt om hajkød. (Gronlandske selskab. Aarskrift, 1917. p. 47-60, diags.) *Title tr.*: Something about shark meat.

Describes shark meat poisoning; bacteriological and microscopic tests; analyzes influence of temperature and seasons on poisons; notes importance of hunting shark and value of products.

Copy seen: NN.

7139. HOARE, J. DOUGLAS. Arctic exploration. London, Methuen, 1906. viii, 314 p., 1 l., 18 plates (incl. front.) 4 maps (2 fold.)

Contains chapters on voyages, land journeys, (and Andrée's balloon flight), from earliest times to 1900; with an index. *Copy seen:* DLC; NNStef.

7140. HOARE, WILLIAM H. B., d. 1948. Report of investigations affecting Eskimo and wildlife, District of Mackenzie 1924-1925-1926. [Ottawa, 1926?] 3 p. l., 16, 44 l. illus., with mounted

photographs. 2 fold. maps. Mimeographed. Issued by the Canadian Dept. of the Interior, Northwest Territories and Yukon Branch.

The author, as special investigator, spent the season of 1924-25 in Bernard Harbour, Mackenzie Point, Coppermine River region, and 1925-26 in the Bathurst Inlet region, studying the needs and food supply of the natives with reference to caribou, and the migration routes, food and pasturage of the caribou; and educating the natives in conservation and protection of the caribou. He recommends the shifting of trading posts away from areas of caribou destruction, the encouragement of more fishing by the Copper Eskimos and the discontinuance of their spring caribou hunts. *Copy seen:* CaMAL.

7141. HOARE, WILLIAM H. B., d. 1948. Sanctuary. (Beaver, June 1939. Outfit 270, no. 1, p. 38-41, illus.)

Facts concerning the musk ox and a note on the Thelon Game Sanctuary.

Copy seen: DSI-M.

HOARE, WILLIAM H. B. d. 1948, *see also* Canada. Dept. of the Interior. Northwest Territories & Yukon Branch. Conserving Canada's musk-oxen. 1930.

7142. HOBBS, WILLIAM HERBERT, 1864- . An arctic airplane route between America and Europe. (Arktis, 1929. Jahrg. 2, p. 15-17, sketch map)

Discussion (in brief) of the great circle route from Chicago to Scandinavia and its flight conditions.

Copy seen: DLC; NNStef.

7143. HOBBS, WILLIAM HERBERT, 1864- . Characteristics of the inland-ice of the arctic regions. (American Philosophical Society. Proceedings, 1910. v. 49, p. 57-129, illus., 5 plates)

Contents: The arctic glacier type. Physiography of the continental glacier of Greenland. Nourishment of the Greenland inland-ice. Depletion of the Greenland ice from surface melting. Discharge of bergs from the ice front.

Includes descriptions (in brief) of the inland ice of Franz Josef Land, West Spitsbergen, Northeast Land, and other regions. *Copy seen:* DLC.

7144. HOBBS, WILLIAM HERBERT, 1864- . The climate of the Arctic as viewed by the explorer and meteorologist. (Science, Aug. 27, 1948. v. 108, p. 193-201)

Discusses results of the contrasted methods of investigation used by explorer and meteorologist in (1) the Arctic Basin, and (2) the inland ice of Greenland. Remarks on future techniques in reporting weather; bibliography (33 items). *Copy seen:* DLC.

7145. HOBBS, WILLIAM HERBERT, 1864- . Conditions of exceptional visibility within high latitudes, particularly as a result of superior mirage. (Association of American Geographers. Annals, 1937. v. 27, p. 229-40, illus.)

Discussion of recent meteorological work in explaining the phenomena, with references to both arctic and antarctic literature. *Copy seen:* DLC.

7146. HOBBS, WILLIAM HERBERT, 1864- . The defense of Greenland. (Association of American Geographers. Annals, 1941. v. 31, p. 95-104, illus., plate)

Discussion of the physical characteristics and potential bases.

Copy seen: DLC.

7147. HOBBS, WILLIAM HERBERT, 1864- . Discovery and exploration within the area to the west of the Kane Basin. (Geographical Society of Philadelphia. Bulletin, Apr. 1937. v. 35, p. 26-30, 4 sketch maps)

Occasioned by a misstatement in reports of the Oxford University Ellesmere Land Expedition, 1935, concerning the early surveying and naming of features of that island. The author reviews and clarifies the results of Peary's and O. Sverdrup's explorations in the region of Bache Peninsula.

Copy seen: DGS.

7148. HOBBS, WILLIAM HERBERT, 1864- . The early attempted flights to Europe over Greenland. (United States Naval Institute. Proceedings, Jan. 1949. v. 75, p. 39-45, illus.)

Account of the preparations for the Hassell-Cramer flight, 1928, and services rendered after its crash near Søndre Strømfjord, West Greenland, by members of the University of Michigan Greenland Expedition; also mention of later flights, 1929, 1931 and 1941. *Copy seen:* DLC; DN-HO.

7149. HOBBS, WILLIAM HERBERT, 1864- . Evolution in the travel technique of polar exploration. (*In:* Zbiór prac poświęcony przez Towarzystwo

Geograficzne we Lwowie Eugenjuszowi Romerowi w 48 - lecie jego twórczości naukowej. Lwów, 1934. p. 79-104, illus.)

(In: Collection of works dedicated by the Geographical Society of Lwów to Eugenjusz Romer on the 48th anniversary of his scientific contributions.)

Review (in brief) of natural conditions to be met at the Poles by explorers, the navigation of pack ice, wintering base, dogs vs. ponies as draft animals, types of sledges, supporting parties, clothing, shelter, cooking en route, motor sledges, airplanes, airships, and submarine; with a bibliography (59 items).

Copy seen: CtY; NNNStef.

7150. HOBBS, WILLIAM HERBERT, 1864- . Exploring about the North Pole of the winds. New York, London, G. P. Putnam's Sons, 1930. viii, 376 p. front., illus. (incl. maps, plan) 23 plates, ports. maps on lining-papers.

Contains an account (by the leader) of the University of Michigan Greenland Expeditions 1926-1928, including the trips on the inland ice. Describes (in general) the work on upper air research, and the rescue of Hassell and Cramer, the Rockford fliers.

Copy seen: DLC.

7151. HOBBS, WILLIAM HERBERT, 1864- . The First Greenland Expedition of the University of Michigan. (Geographical review, Jan. 1927. v. 17, p. 1-35, illus. (maps) fold. plate)

Narrative of the journey to the inland ice from Maligiak Fiord, Holsteinsborg District, northeastward to Otto Nordenskiöld Glacier, beyond Lake Kardligssuit. Includes discussion of glaciology, anticyclones and Greenland winds, geomorphology as related to glaciation, meteorological results and climate, the topographic survey, geological and tidal studies.

Copy seen: DLC.

7152. HOBBS, WILLIAM HERBERT, 1864- . The glacial anticyclone and the continental glaciers of North America. (American Philosophical Society. Proceedings, 1943. v. 86, p. 368-402, illus., diags.)

Largely concerned with Pleistocene glaciation of the United States, but includes discussion of the Greenland icecap conditions, manner of nourishment, and winds.

Copy seen: DLC.

7153. HOBBS, WILLIAM HERBERT, 1864- . The glacial anticyclones; the poles of the atmospheric circulation. New York, London, Macmillan Co., 1926. xxiv, 198 p. illus. (incl. maps) 3 plates. (incl. col. front.) diags. (University of Michigan studies. Scientific series, v. 4) Introduction by Hugh Robert Mill.

History of polar wind observations, of exploration of the Greenland continent and continental glaciers; theory and data on relationship of inland ice and wind; atmospheric circulation over specific arctic areas; certain glacier shapes, and the "glacial anticyclone".

Copy seen: DLC.

7154. HOBBS, WILLIAM HERBERT, 1864- . Greenland, the advances of a decade (1921-1931). (Michigan Academy of Science, Arts and Letters. Papers, 1933. v. 18, p. 363-411)

A survey of the maps and publications in all fields of physical science, during the period, with a bibliography.

Copy seen: DLC.

7155. HOBBS, WILLIAM HERBERT, 1864- . Introduction. (In: Michigan University. Greenland Expeditions, 1926-1933. Reports, 1931. pt. 1, p. 1-37, 4 plates, diags.) Results of University of Michigan Greenland Expeditions, 1926-29.

Contains a statement of the objectives and personnel, description of the bases of the first three expeditions, and of the field work carried out; comparison of Greenland anticyclones with North Atlantic storms, and discussion of the pilot-balloon ascents in East Greenland.

Copy seen: DLC.

7156. HOBBS, WILLIAM HERBERT, 1864- . The January storms over the North Atlantic and the strophs of the Greenland anticyclone. (U. S. Weather Bureau. Monthly weather review, July 1926. v. 54, p. 286-88, diagr., tables)

Synoptic pressure distributions over area contiguous to Greenland and incident to the anticyclonic strophs of East Greenland are analyzed and charted.

Copy seen: DLC.

7157. HOBBS, WILLIAM HERBERT, 1864- . Loess, pebble bands, and boulders from glacial outwash of the Greenland continental glacier. (Journal of geology, May-June 1931. v. 39, p. 381-85)

Based on observations made, during the University of Michigan Greenland Expeditions, 1927-29, at Mt. Evans, near the head of Søndre Strømfjord, West Greenland. Contains a discussion of "the action of the glacial anticyclone upon the outwash deposit of its front", and the manner of deposition of the materials now collected in dunes. *Copy seen:* DGS.

7158. HOBBS, WILLIAM HERBERT, 1864- . Nourishment of the Greenland continental glacier. (Journal of geology, Mar. 1944. v. 52, p. 73-96, illus.)

Author's interpretation of the data from meteorological stations set up in the interior of Greenland, 1930-33, in support of his views on the path of cyclones around Greenland and on the source of nourishment for the icecap, with further remarks on the glacial anticyclone and the present-day recession of the glacier. *Copy seen:* DGS.

7159. HOBBS, WILLIAM HERBERT, 1864- . Observations of pilot-balloons near margin of Otto Nordenskjöld Glacier, July [i.e. August] 5 and 7, 1926. (In: Michigan. University. Greenland Expeditions, 1926-1933. Reports, 1931. pt. 1, p. 243)

Contains a few data from the edge of the icecap, directly east of Holsteinsborg, West Greenland.

Copy seen: DLC.

7160. HOBBS, WILLIAM HERBERT, 1864- . Peary. New York, Macmillan Co., 1936. xv, 502 p. illus., 8 plates, incl. ports., 27 maps (2 fold.) diagrs. (1 fold.)

Detailed and thoroughly documented biography of Robert E. Peary, with interpolated information on Greenland, expedition equipment, meteorology, etc., by a veteran scientist-explorer of West Greenland. Chapters on Peary's training, government service and (particularly) his eight expeditions to the North Greenland region. Includes discussion of the icecap, its wind system, Cape York meteorites; Peary's assaults on the Pole (in detail); the Peary-Cook controversy.

Appendices (six) include list of Peary's publications (125 items); computations of geographic positions in vicinity of the Pole; record of some dog-sledge journeys over sea ice; medals, appreciations, etc.

Copy seen: DLC.

7161. HOBBS, WILLIAM HERBERT, 1864- . The progress of discovery and exploration within the arctic region. (Association of American Geographers. Annals, 1937. v. 27, p. 1-22, illus.)

Copy seen: DGS.

7162. HOBBS, WILLIAM HERBERT, 1864- . Rhythm in the Greenland glacial anticyclone. (American Geophysical Union. Transactions, 1944. v. 25, p. 491-94, illus.)

Discussion (with illustration) of a diagram prepared by Dr. Georgi, of the German Greenland Expedition under Alfred Wegener, 1929-31, which did not appear in the expedition reports, and which indicates an approach to periodicity; also diagrams based on results of British observations, 1930-31.

Copy seen: DLC.

7163. HOBBS, WILLIAM HERBERT, 1864- . The rôle of the glacial anticyclone in the air circulation of the globe. (American Philosophical Society. Proceedings, Aug. 1915. v. 54, p. 185-225, illus.)

Based on the author's study of results of polar exploration carried out by others in the Arctic and Antarctic. Discussion of the evidence for fixed glacial anticyclones above existing continental ice, their action of outward sweeping of surface snow, the sudden warming of air at the end of a blizzard, the Greenland foehn, the moist air and the clouds above the ice domes of Greenland, the evolution of the glacial blizzard and the foehn, and the theory of circumpolar whirls vs. the glacial anticyclone; the effect of the Greenland anticyclone upon migrating cyclonic depressions, and the fixed low pressure areas marginal to the Greenland inland ice. Concludes with remarks on the rôle of the glacial anticyclone of high latitudes in the general circulation.

7168. HODGE, FREDERICK WEBB, 1864- , editor. Handbook of American Indians north of Mexico. Washington, U. S. Govt. Print. Off., 1907-10. 2 v. (ix, 972 p.; iv, 1221 p.) illus. (incl. ports.) fold. map. (Smithsonian Institution. Bureau of American Ethnology. Bulletin 30)

A basic reference work begun in 1873 completed in 1910, embodying results of research till that time. Contains encyclopedic information on Indians (including those of northern Canada and Alaska), Eskimos and Aleuts; articles (by various authorities) on history, archeology, manners, customs, institutions, arts, industries, settlements, relations with government; brief descriptions of all linguistic stocks, tribal groups and divisions, with short biographies of notable individuals. Synonymy v. 2, p. 1021-1178; bibliography, v. 2, p. 1179-1221, also bibliographical references throughout the text.

Copy seen: DLC.

7169. HODGE, FREDERICK WEBB, 1864- , editor. Handbook of Indians of Canada. Published as an appendix to the Tenth report of the Geographic Board of Canada . . . Ottawa, Printed by C. H. Parmelee, 1913. x, 632 p. 3 fold. maps. (Supplement to the [Forty-fourth] annual report of the Dept. of Marine and Fisheries. [1911] Marine) Canada. Parliament, 1911-1912. Sessional paper 21a.

A selection from Hodge's *Handbook of American Indian north of Mexico*, 1907-10, q.v., of those portions relating to Indians of Canada; prepared for publication by James White, with typographical changes from American to English usage, and a few corrections of geographical and historical fact; with, also, the addition of new articles on treaties, Dept. of Indian Affairs, Indian reserves, etc. based on Canadian conditions, and with a specially prepared map.

Map: Aborigines of Canada, Alaska and Greenland, 1:12,500,000 compiled by James White, and embodying information resulting from V. Stefansson's work in northern Canada, 1908-12.

Copy seen: DLC.

7170. HODGE, WALTER H. What cost crabs? (Alaska life, Nov. 1940. v. 3, no. 11, p. 12-13, 21, illus.)

Analysis of costs in crab canning, especially in Cordova, Alaska region, and arguments for a protective tariff against Japanese competition.

Copy seen: DLC.

7171. HODGINS, THOMAS, 1828-1910. The Alaska Boundary Commission. (Canada law journal, Mar. 15, 1903. v. 39, p. 170-82)

Discussion of some of the American members of the commission, and the articles of the treaty-convention on the Canada-Alaska boundary dispute.

Copy seen: CaOAr (reprint); NNC.

7172. HODGINS, THOMAS, 1828-1910. The Alaska-Canada boundary dispute, under the Anglo-Russian treaty of 1825; the Russian-American Alaska treaty of 1867; and the Anglo-American conventions of 1892, 1894 and 1897. An historical and legal review . . . 2d ed. Toronto, 1903. 26 p. map.

A reprinting, with some addition, of the author's article *The Alaska-Canada boundary dispute* originally published in *Contemporary review*, 1902. v. 82, p. 190-206.

Copy seen: CaOAr.

7173. HODGSON, DUNCAN M. Ungava caribou. (Arctic circular, Aug. and Nov. 1948. v. 1, p. 69-70, 78) Mimeographed.

Brief note on plans, and report on expedition to George River, Sept. 1948, to collect pairs of the rare Ungava caribou for Canadian museums.

Copy seen: CaMAI.

7174. HOEBEL, E. ADAMSON. Lawways of the primitive Eskimos. (Journal of criminal law and criminology, Mar.-Apr. 1941. v. 31, p. 663-83)

Contains a documented analysis of the Eskimo's social organization: his property notions, leadership, including shamanism, legal homicide, homicide and sexual competition, criminal homicide, criminal sorcery and perfidy, evidence, regulated combat, and juridical song contests; bibliography (32 items).

Copy seen: DLC; NNS Stef.

7175. HØEG, OVE ARBO, 1898-. Blütenbiologische Beobachtungen aus Spitzbergen. Oslo, J. Dybwad, 1932. 22 p. (Norway. Norges Svalbard- og Ishavs-undersøkelser. Meddelelse. Nr. 16) *Title tr.*: Observations concerning the biology of flowers on Spitsbergen.

Notes made during the author's two visits to West Spitsbergen (1) in the Ice Fiord region and inner Wijde Bay (with Norwegian Spitsbergen Expedition in 1924), and (2) in the north-western part of the island, especially Ytre Norskøya (Vogt Spitsbergen-Ex-

pedition, 1928). He gives a list of the plants observed on Ytre Norskøya, and in Advent Valley, and the regions of Dickson Bay and West Fiord (Wijde Bay), with remarks on the insects associated with these places and discussion of pollination problems.

Copy seen: DGS.

7176. HØEG, OVE ARBO, 1898-. The corticolous Norwegian Pertusariaceae and Thelotremaeae. (Nytt magasin for naturvidenskapene, 1924. Bd. 61, p. 139-78, plate 3)

Contains a critical revision of twenty-two species (two new species and some forms) of epiphytic lichens of the families Pertusariaceae and Thelotremaeae, living on trees, with a key to the species, synonymy, descriptions and data on distribution in Norway, and hosts; includes some arctic species.

Copy seen: MH-Z.

7177. HØEG, OVE ARBO, 1898-. Cyanophyceae and bacteria in calcareous sediments in the interior of limestone caves in Nord-Rana, Norway. (Nytt magasin for naturvidenskapene, 1946. Bd. 85, p. 99-104, illus.)

Contains data on calcareous sediments in limestone caves in Nord-Rana, northern Norway, found to include some bacteria, probably short rods, and indeterminate species of the algal genus *Gloeocapsa* (Cyanophyceae).

Copy seen: MH-Z.

7178. HØEG, OVE ARBO, 1898-. The Downtonian and Devonian flora of Spitsbergen. Oslo, J. Dybwad, 1942. 228 p. illus. (incl. maps) 62 plates on 31 l. (Norway. Norges Svalbard- og Ishavs-undersøkelser. Skrifter. Nr. 38)

Contains introductory remarks on the Devonian system of north, central West Spitsbergen, 78°40'-79°40'N. 12°-15°E., and on the expeditions, 1882-1928 which have collected the fossil plants described herein; detailed descriptions, arranged by region of thirty-two (including eleven new) species of fossil flora; a stratigraphical discussion; discussion of the classification of the Psilophytes and others; a diagnosis of new genera and species; and a bibliography (293 items).

Copy seen: DGS; DLC.

7179. HØEG, OVE ARBO, 1898-. The fossil wood from the Tertiary at Myggbukta, East Greenland. (Norsk geol-

ogisk tidsskrift, 1931. Bd. 12, p. 363-90, 8 plates) Reprinted as Norges Svalbard- og Ishavs-undersøkelser. Meddelelse, 1932. Nr. 14.

Report on a study of specimens collected by the Norwegian Expedition to East Greenland, 1930; full descriptions of three species, of which two are new.

Copy seen: DGS.

7180. HØEG, OVE ARBO, 1898-. De fossile planter på Svalbard. (Polar-årboken, 1935. p. 125-30, illus.) **Title tr.:** The fossil plants of Svalbard.

Notes wealth and variety of fossil species, and importance of paleobotany in scientific investigations.

Copy seen: NN; NNA.

7181. HØEG, OVE ARBO, 1898-. Die Norwegischen *Nephroma*-Arten. (Nytt magasin for naturvidenskapene, 1922. Bd. 60, p. 85-97, illus. plate) **Title tr.:** Norwegian species of *Nephroma*.

Contains critical notes on five species of the lichen genus *Nephroma* distributed in Norway, including *N. arctica* of the northern regions.

Copy seen: MH-A.

7182. HØEG, OVE ARBO, 1898-. Notes on some arctic fossil wood, with a redescription of *Cupressinozylon polyommatum*, Cramer. Oslo, J. Dybwad, 1932. 9 p. 3 plates. (Norway. Norges Svalbard- og Ishavs-undersøkelser. Meddelelse. Nr. 17)

Description of samples from (1) Franz Josef Land (2) Jackson Island (East Greenland) and (3) locality unnamed.

Copy seen: DGS.

7183. HØEG, OVE ARBO, 1898-. Pollen on humble-bees from Novaya Zemlya. Kristiania, 1924. 18 p. illus., tables. (Norske Novaja Semlja ekspedisjon, 1921. Report of the scientific results. No. 27) Published by Det Norske videnskaps-akademi i Oslo (Videnskapsselskapet i Kristiania).

Discussion of pollen from nineteen plant species.

Copy seen: DLC.

Discussion, based on observations of old shore lines, of change of the level of northern Sweden during the ice age.

Copy seen: DLC.

7186. HÖGBOM, BERTIL, 1888-. Bidrag till Isfjordsområdets kvartärgeologi. (Geologiska föreningen, Stockholm. Förhandlingar, 1911, pub. 1912. Bd. 33, p. 32-57, illus. (maps) 2 plates) **Title tr.:** Contribution to the Quaternary geology of the Ice Fjord region.

Contains discussion of the region during the ice age, later glaciation of the fjords, and post-glacial conditions, with remarks on the evidences of glaciation and the structural soils. Summary in German, p. 55-57. **Copy seen:** DGS.

7187. HÖGBOM, BERTIL, 1888-. Einige illustrationen zu den geologischen Wirkungen des Frostes auf Spitzbergen. (Upsala. Universitet. Mineralogisk-geologiska institut. Bulletin, 1908-09, pub. 1910, v. 9, p. 41-59, illus.) **Title tr.:** Some illustrations of the geological work of frost on Spitzbergen.

Description of frost cracks, solifluction and "fossil ice," as observed during the Swedish expeditions, 1908-09.

Copy seen: DGS.

7188. HÖGBOM, BERTIL, 1888-. Om Spetsbergens Mytilustid. (Geologiska föreningen, Stockholm. Förhandlingar, 1913. Bd. 35, p. 151-56) *Title tr.*: On the *Mytilus* period of Spitsbergen.

Statement of the author's opinion, based on discussion of evidence, that the period was post-glacial.

Copy seen: DGS.

7189. HÖGBOM, BERTIL, 1888-. Über die geologische Bedeutung des Frostes. (Upsala. Universitet. Mineralogisk-geologiska institut. Bulletin, 1914. v. 12, p. 257-390, illus.) *Title tr.*: On the geological significance of frost.

Study of frozen ground, frost splitting as an agent of weathering and physiographic change, its resultant land forms, its influence on soils, polygon soils and solifluction; regional occurrence of recent and ancient frost action in arctic regions (and elsewhere); bibliography (140 items).

Copy seen: DGS; DLC.

7190. HÖGBOM, BERTIL, 1888-. Wüstenerscheinungen auf Spitzbergen. (Upsala. Universitet. Mineralogisk-geologiska institut. Bulletin, 1912. v. 11, p. 242-51, illus.) *Title tr.*: Desert-like occurrences on Spitsbergen.

Copy seen: DGS.

7191. HOEK, PAULUS PERONIUS CATO, 1851-. Die Crustaceen, gesammelt während der Fahrten des "Willem Barents" in den Jahren 1878 und 1879. [Leiden, etc., 1882] 75 p. 3 double-face plates. (Zoologischen Ergebnisse . . . "Willem Barents", 1878-79. Nr. 7. *Pub.* in: *Niederländisches Archiv für Zoologie. Supplement-Bd. I*) *Title tr.*: Crustacea, collected during the cruises of the *Willem Barents*, 1878-79.

Contains a list, with synonyms, references, descriptive notes, localities and depths, of seventy-three species (including one new isopod and three new amphipods) from Barents Sea; with a bibliography (32 items).

Copy seen: DSI-M.

7192. HOEK, PAULUS PERONIUS CATO, 1851-. The pycnogonids, dredged during the cruises of the "Willem Barents" in the years 1878 and 1879. [Leiden, etc., 1881] 28 p. 2 double-face plates. (Zoologischen Ergebnisse . . . "Willem Barents", 1878-79. Nr. 8, *Pub.* in: *Niederländ-*

isches Archiv für Zoologie. Supplement-Bd. I)

Contains a discussion and a table of all known arctic species and their distribution, and a list, with synonyms, references, descriptions, localities, and notes on range, of eight (including one new) species from Barents and Greenland Seas.

Copy seen: DSI-M.

7193. HOEL, ADOLF, 1879-. The coal deposits and coal mining of Svalbard (Spitsbergen and Bear Island). Oslo, J. Dybwad, 1925. 92 p. incl. tables, illus. (maps, diagrs.) 8 plates. (Norway, Norges Svalbard- og Ishavsundersøkelser. Skrifter. Nr. 6)

Contents: A. Situation, shipping conditions, history and exploration. B. 1. Geology. 2. Coal deposits. 3. Coal reserves. 4. History of coal mining. 5. Mining ordinance for Spitsbergen and Bear Island. 6. Coal mining and coal export. 7. Quality of the coal. 8. Markets and uses. Bibliography, p. 89-92.

Copy seen: DGS.

7194. HOEL, ADOLF, 1879-. The coal fields of Svalbard (Spitsbergen and Bear Island). (World Power Conference. 1st, London, 1924. Transactions, 1925. v. 1, p. 1008-1040, illus., fold. table, diagrs.)

Contains a concise, comprehensive presentation of the geology of the coal deposits, the results of analyses of the coal, and the market and uses. Includes tabular data on number of men employed by, and the exports (in tons) of, the important coal companies.

Copy seen: DLC.

7195. HOEL, ADOLF, 1879-. Coal mining in Svalbard. (Polar record, July 1938. No. 16, p. 74-85, plate, sketch map)

Contains mention of the geologic age of various coal fields, notes on national claims of land, a survey of mining companies and history of coal mining, notes on mining markets and uses, with tables of treaty properties, number of men employed, and exports of coal, as of 1937 or 1938.

Copy seen: DLC.

7196. HOEL, ADOLF, 1879-. The discovery of King Karl Land, Spitsbergen. (Geographical review, July 1935. v. 25, p. 476-78)

A review of the early exploration of the region and a translation of Capt. E. Eriksen's letter on the island's discovery in 1859.

Copy seen: DLC.

7197. HOEL, ADOLF, 1879- . Det eldste billede av norsk bebyggelse på Svalbard. (Norsk geografisk tidsskrift, 1934-35, pub. 1935. Bd. 5, p. 367-71, illus.) *Title tr.*: The oldest picture of a Norwegian dwelling on Spitsbergen.

Discussion of a recently discovered drawing by B. M. Keilhau, dated 1827, and depicting the first house built by Norwegians on West Spitsbergen in 1822; description of house and locality on Bear Island quoted from Keilhau's *Reise i Øst- og Vest-Finmarken samt til Beeren-Eiland og Spitsbergen, i aarene 1827 og 1828, 1831* (copies at Brown Univ. and Yale Univ.)

Copy seen: DLC.

7198. HOEL, ADOLF, 1879- . Géologie. Monaco, Impr. de Monaco, 1914. 2 p. l., 63 p., 29 l. 27 plates (part col., part fold. including maps, diagrs.) (Isachsen, G. I. *Exploration du nord-ouest du Spitsberg* [etc.] 3 ptie. Pub. as: Albert I, Prince of Monaco. *Résultats des campagnes scientifiques accomplies sur son yacht. Fasc. 42*) *Title tr.*: Geology. (Exploration of northwest Spitsbergen [etc.])

Based on research by H. Horneman in 1906, and by the author, 1907, in Haakon VII Land, (78°40'-79°40'N. 10°30'-14°30'E.), carried out as part of the Isachsen Expedition. Description of the Archaean terrain, Hecla-Hoek formation, Devonian, Carboniferous, Tertiary and Quaternary systems, and of the glaciers (the principal report on which appears in Isachsen, G. I. and A. Hoel, *Description du champ d'operation*, 1913, q.v.)

Copy seen: DLC.

7199. HOEL, ADOLF, 1879- . Geologiske iagttagelser paa Spitsbergenekspeditionerne 1906 og 1907, udrustede af fyrst Albert af Monaco og ledede af ritmester Isachsen. Foreløbig meddelelse. Kristiania, A. W. Brøgger, 1909. 27 p., 4 plates (incl. map) (Norsk geologisk tidsskrift. Bd. 1, nr. 4) *Title tr.*: Geological observations of the Spitsbergen Expeditions, 1906 and 1907, equipped by Prince Albert of Monaco and led by [G. I.] Isachsen. Preliminary report.

Report on work in the northwesternmost part of West Spitsbergen; remarks on the basement complex, the Hecla-Hoek and Liefde Bay forma-

tions; fossils found; shorelines; movement and ablation of glaciers.

Final geological reports from the expeditions were published in Isachsen, G. I. *Exploration du nord-ouest du Spitsberg*, 1912-14, pt. 3, q.v.

Copy seen: DLC.

7200. HOEL, ADOLF, 1879- . Gunnar Isachsen, (Norsk geografisk tidsskrift, 1940-41, pub. 1941. Bd. 8, p. 1-5, illus.) *Title tr.*: Gunnar Isachsen.

Notes the death of Major Gunnar Isachsen (1868-1939), his contributions to arctic exploration, and to astronomical, geographical, geodetic and hydrographic research, his writings on these subjects, and topographical work.

Copy seen: NNA.

7201. HOEL, ADOLF, 1879- . Isforholdene paa Spitsbergens vestkyst sommeren 1915. (Norske geografiske selskab. Aarbok, 1914-1916, pub. 1916. Bd. 26-27, p. 111-34, illus., maps) *Title tr.*: The state of the ice on the west coast of Spitsbergen during the summer of 1915.

Copy seen: DLC.

7202. HOEL, ADOLF, 1879- . Norske skib leiet av utenlandske ekspedisjoner til polartraktene. Polar-årboken, 1938. p. 19-27, illus.) *Title tr.*: Norwegian ships chartered by foreign arctic expeditions.

Notes ships of Norwegian registry, used by arctic explorers and expeditions from 1827.

Discussion of the history, and method used in the compilation of the gazetteer of Svalbard, published by the Norges Svalbard- og Ishavs-undersøkelser, *The place-names of Svalbard*, 1942, q.v.

Copy seen: DN-HO.

7208. HOEL, ADOLF, 1879- . En slaedetur paa Spitsbergen under ritmester Isachsens ekspedition 1909. (Norske turistforening. Aarbok, 1912,

p. 1-33, illus., sketch maps) *Title tr.:* A sledge journey on Spitsbergen during Captain Isachsen's expedition, 1909.

Account of a trip to make geological investigation of northwestern West Spitsbergen from Lilliehöök Glacier to Red Bay; with descriptive remarks on Lilliehöök and other glaciers, and routes recommended for tourists.

Copy seen: DLC.

7209. HOEL, ADOLF, 1879- . Sovjetunionens arktiske institutt. (Norsk geografisk tidsskrift, 1930-31, pub. 1931. Bd. 3, p. 503-506) *Title tr.:* The Arctic Institute of the Soviet Union.

Description of the establishment, functions and publications of the Arctic Institute of the U.S.S.R.

Copy seen: DLC.

7210. HOEL, ADOLF, 1879- . Svalbardisbrytaren. (Polar-årboken, 1935. p. 48-53, illus.) *Title tr.:* The Svalbard ice-breaker.

Discusses problem of transporting coal from West Spitsbergen; recommends navigation aids, ice-breakers, etc.

Copy seen: NN.

7211. HOEL, ADOLF, 1879- . Verket om stedsnavnene på Svalbard ferdig. (Polar-årboken, 1939. p. 61-71) *Title tr.:* The work on the place-names of Svalbard.

Notes multiple names given by successive explorers, and the work of the committee appointed in 1924 to make decisions on names to be used on Norwegian government maps recently executed.

Copy seen: NN.

7212. HOEL, ADOLF, 1879- . Die Verwendung von Luftfahrzeugen bei der Erforschung der Polargebiete. (Gesellschaft für Erdkunde zu Berlin. Zeitschrift, 1938. p. 161-75) *Title tr.:* The application of aeronautics to the exploration of the polar regions.

Contains a discussion (in brief) of the conditions and uses of flight in the Arctic, and a summary of the flights from various countries into the Arctic.

Copy seen: DLC.

7213. HOEL, ADOLF, 1879- , and ANDERS K. ORVIN. Das Festungsprofil auf Spitzbergen Karbon-Kreide I, Vermessungsergebnisse. Oslo, J. Dybwad, 1937. 59 p. illus., 5 plates (part fold.) diagrs. (Norway. Norges Svalbard- og Ishavs-undersøkelser. Skrifter. Nr. 18)

Title tr.: The Carboniferous-Cretaceous profile on Spitsbergen. 1. Results of measurements.

A description of the geological profile on the south side of the mouth of Ice Fiord, between Festningen and Cape Starotsin, and of its Cretaceous to upper Carboniferous formations, with a bibliography. **Copy seen:** DLC.

7214. HOEL, ADOLF, 1879- , and O. HOLTEDAHL. Les nappes de lave, les volcans et les sources thermales dans les environs de la Baie Wood au Spitsberg. Christiania, J. Dybwad, 1911. 37, [1] p. illus., 8 plates (photos.) 2 maps. (Norske videnskaps-akademi, Oslo. Skrifter. I. Matematisk-naturvidenskapelig klasse, 1911. No. 8) **Title tr.:** The lava deposits, the volcanoes and the thermal springs of Wood Bay region in Spitsbergen. Issued also as: Norske Spitsbergenekspeditioner, 1909-1910. Résultats scientifiques, 1916. T. 2, No. 1.

Based on observations made during the summer 1910, in the Bock Bay region (Wood Bay). Description of the igneous rocks, their chemical composition and occurrence in the region, the surface geology and evidence of volcanic action as shown by glacier moraines and physiography, the age of the volcano, and the hot springs.

7219. HØYGAARD, ARNE, 1906- . Acute epidemic diseases among Eskimos in Angmagssalik. (Lancet, Jan. 28, 1939. v. 236, p. 245-46)

Discussion (based on observations of the Norwegian Medical Expedition in 1936-37) of unsanitary conditions as cause of infections in a number of different diseases; bibliography (9 items).

Copy seen: DLC; NNNStef.

7220. HØYGAARD, ARNE, 1906- . Eskimoenes mentalitet. (Polar-årboken, 1940. p. 77-83, illus.) *Title tr.:* The mentality of the Eskimos.

Discusses briefly the origin and characteristics of the Greenland Eskimos, and the upbringing of their children.

Copy seen: NNA.

7221. HØYGAARD, ARNE, 1906- . De hygieniske forhold i Angmagssalik, Østgrønland. (Grønlandske selskab. Aarskrift, 1938. p. 79-93, illus. tables) *Title tr.:* Hygienic conditions at Angmagssalik.

Account of the author's studies during the Norwegian Medical Expedition of 1936-37, among 756 East Greenland Eskimos; data on Danish influences in housing, lighting and heating, etc.; conditions in various settlements; European foods in relation to infectious diseases; tuberculosis; etc. Includes bibliography and statistics.

Copy seen: NN.

7222. HØYGAARD, ARNE, 1906- . Some investigations into the physiology and nosology of Eskimos from Angmagssalik in Greenland; a preliminary statement. Oslo, J. Dybwad, 1937. 14 p. illus. (incl. map) (Norway. Norges Svalbard- og Ishavs-undersøkelser. Skrifter. Nr. 74)

A statement of the dietetic investigations, the examination of the natives and the laboratory tests made on East Greenland Eskimos during the Norwegian Medical Expedition, 1936-37.

Copy seen: DLC.

7223. HØYGAARD, ARNE, 1906- . Studies on the nutrition and physiopathology of Eskimos, undertaken at Angmagssalik, East-Greenland 1936-1937. Oslo, Jacob Dybwad, 1941. 176 p. 2 plates, tables. (Norske videnskapsakademi, Oslo. Skrifter. Matematisk-naturvidenskapelig klasse, 1940. No. 9)

Results of the Norwegian Medical Expedition, an investigation undertaken by the author's party of six, with headquarters at Tasisaq (about 65° 39'N. 37°35'W.), Aug. 1936-Aug. 1937.

Contains 1. Introductory account of this expedition, equipment, previous exploration of the region and its people. 2. Nutrition of Angmagssalik Eskimos; their fishing, hunting and dietary habits, food requirements, consumption, care, etc. (including poisonous foods p. 28-30). 3. Nutritional and physical condition: development, diseases, skeleton, teeth, etc., scurvy, visual acuity in dim light, fertility, hemoglobin. 4. Metabolism. Bibliography (about 200 items).

Supplement (p. 151-76): Tables of food consumption per family (indicating parts and amounts of various mammals, fishes, plants, etc., also imported food); composition of food, ascorbic acid, calorific value. Tables of physique, metabolism. *Copy seen:* DLC.

7224. HØYGAARD, ARNE, 1906- . Tuberculosis in Eskimos. (Lancet, Sept. 24, 1938. v. 235, p. 758-59)

Result of investigation in Angmagssalik during the winter of 1936-37, by the Norwegian Medical Expedition. Notes on variation of incidence of tuberculosis in a community and in outlying groups; on occurrence of haemoptysis; and on the dying out of tuberculosis in isolated localities.

Copy seen: DLC; NNNStef.

7225. HØYGAARD, ARNE, 1906- . Tuberkulosen hos eskimoer i Angmagssalik, Østgrønland. (Nordisk medicinsk tidsskrift. 1938. Bd. 16, p. 1647-56, fold table) *Title tr.:* Tuberculosis in the Eskimos of Angmagssalik, East Greenland.

Results of the Norwegian Medical Expedition of 1936-37. Detailed report on the incidence of the disease, on the differences in its attack on Eskimos, the lower incidence in isolated localities, and a possible relationship to famine conditions; bibliography (18 items). *Copy seen:* NNN; NNNStef.

7226. HØYGAARD, ARNE, 1906- , and H. W. RASMUSSEN. Vitamin C sources in Eskimos food. (Nature, June 3, 1939. v. 143, p. 943)

Brief report on the study of Angmagssalik Eskimos' nutrition carried out 1936-37; with a table showing vitamin C content in common food of the natives.

Copy seen: DLC.

7227. HØYGAARD, ARNE, 1906- , and MARTIN MEHREN. "Ajungilak," eller Grønland påtvers. Oslo, Gyldendal, 1931. 3 p. l., ix-xiii p., 1 l., 151 p., 1 l. illus., plates, ports., fold. map. *Title tr.:* "Ajungilak"; or, Across Greenland.

Narrative of the authors' crossing of the Greenland icecap from Umanak on the west coast to Franz Joseph Fiord on the east coast, July-Aug., 1931.

Copy seen: DLC.

7228. HØYGAARD, ARNE, 1906- , and MARTIN MEHREN. Tvers over Grønlands innlandsis. (Norsk geografisk tidsskrift, 1932-33, pub. 1933. Bd. 4, p. 1-14, illus., sketch map) *Title tr.:* Across Greenland's inland ice.

Summary account of the authors' sledge journey across Greenland from Umanak on the west coast to Franz Joseph Fiord; with remarks on scientific investigations, equipment, etc.

Copy seen: DLC.

7255. HOLLICK, CHARLES ARTHUR, 1857-1933. Results of a preliminary study of the so-called Kenai flora of Alaska. (American journal of science, Apr. 1911. Ser. 4, v. 31, p. 327-35) Also issued as New York Botanical Garden. Contributions, no. 143.

Discussion of the age, and the association of the fossil flora collected from Alaska Peninsula. *Copy seen:* DLC.

7256. HOLLICK, CHARLES ARTHUR, 1857-1933, and G. C. MARTIN. The Upper Cretaceous floras of Alaska, by Arthur Hollick, with a description of the plant bearing beds, by George C. Martin. Washington, U. S. Govt. Print. Off., 1930. v. 123 p. incl. illus., tables. 87 plates, (incl. fold. map) (U. S. Geological Survey. Professional paper 159)

Contains notes (by Hollick) on previous investigations, and a discussion of stratigraphic, botanic, and phyto-geographic relations of the floras, p. 1-9.

Description (by Martin) of Cretaceous rocks of Alaska, and details of the plant-bearing beds of the Alaska Peninsula, the upper and lower Yukon region, Rampart-Tanana district, and Koyukuk valley, p. 9-37.

List, with descriptions, synonymy, and locations, of two hundred thirty-six (including one hundred fifty new) species and some new varieties of Cretaceous plants. *Copy seen:* DGS.

7257. HOLLICK, CHARLES ARTHUR, 1857-1933, and P. S. SMITH. The Ter-

tiary floras of Alaska, by Arthur Hollick, with a chapter on The geology of the Tertiary deposits, by Philip S. Smith. Washington, U. S. Govt. Print. Off., 1936. iii, 185 p. 122 plates (incl. fold. map, fold. tables). (U. S. Geological Survey. Professional paper 182)

Contains discussion (by Hollick) of the history, the botanic and geologic relations, and the fossil plant localities, p. 1-24. Description (by Smith) of the marine deposits, the terrigenous deposits of Matanuska-Cook Inlet region, Alaska Peninsula, Alaska Range, and the Yukon Basin, also the effusive and intrusive igneous rocks, p. 24-34. List, with descriptions, synonymy and localities, of three hundred eighty-three (including one hundred two new) species and some new varieties of fossil plants. *Copy seen:* DGS.

7261. HOLM, DON. Ghosts of Alaskan commerce. (Alaska sportsman, Sept. 1941. v. 7, no. 9, p. 20-22, 24-27, illus.)

Notes on shipwrecks of southeastern and southern Alaska waters since 1790.

Copy seen: DLC.

7262. HOLM, GERHARD. Försteningar från Lappland, insamlade af E. Mörtzell. (Geologiska föreningen, Stockholm. Förhandlingar, 1890. Bd. 12, p. 259-67) *Title tr.:* Fossils from Lapland collected by E. Mörtzell.

Contains review of previous literature; remarks on fossils found at ten localities in northern Sweden in 1885, with list of forty species of crustaceans and molluscs.

Copy seen: DLC.

7263. HOLM, GERHARD, and A. H. WESTERGAARD. A Middle Cambrian fauna from Bennett Island. Leningrad, 1930. 25 p. 4 plates. (Russkaja poljarnaja ekspeditsiia, 1900-1903. Résultats scientifiques. Sect. C., livr. 8. *Pub. as:* Akademiiã nauk SSSR. Mémoires. Sér. 8, classe physico-mathématique, vol. 21, no. 8)

Based on collections of fossils made by E. V. von Toll, and recovered after his death, by two later expeditions.

Contains a brief characterization of Bennett Island's geologic structure from von Toll's notes; a list, identifying three species of brachiopods, eighteen (including four new) species and two new subspecies of trilobites; and a tabulation of these fauna which shows also the stratigraphic occurrence of identical or similar forms in Scandinavia; bibliography (19 items).

Copy seen: DGS.

7264. HOLM, GUSTAV FREDERIK, 1849-1940. Beskrivelse af ruiner; Julianehaabs distrikt der er undersøgte i aaret 1880. (Meddelelser om Grønland, 1883. 6. hefte, p. 57-145, illus., 34 plates) *Title tr.:* Description of ruins in Julianehaab District, investigated in the year 1880.

Report of the Danish Expedition to Julianehaab District, 1880, to do surveying and investigate Norse ruins at the site of the old colony "Østerbygden". Gives a historical review of Norse colonization in West Greenland; account of the author's trip, 1880, to the southeast coast and information on conditions there; the life of the Norsemen in the colony "Østerbygden"; groups of ruins in various other locali-

ties in the Julianehaab District; and list of archeological objects found. Summary in French, p. 202-213.

Essay on common cultural traits of Eskimos and Indians, comparing the folklore, language, mythology and implements of the Angmagssalik Eskimos with those of the Aztec and Maya Indians.

Copy seen: DLC.

7266. HOLM, GUSTAV FREDERIK, 1849-1940. Eskimoiske "kaart" af trae. (Geografisk tidsskrift, Kjøbenhavn, 1886. Bd. 8, p. 103-105) *Title tr.:* Eskimo "maps" made of tree.

Discussion of "maps," carved in wood by Eskimos of the Angmagssalik region, their interest in geography and cartography.

Copy seen: DLC.

7267. HOLM, GUSTAV FREDERIK, 1849-1940. Ethnologisk sketch of the Angmagssalik Eskimo. (In: Thalbitzer, W. C. The Ammassalik Eskimo, pt. 1, no. 1. *Pub. in:* Meddelelser om Grønland, 1914. Bd. 39, p. 1-147, illus., 20 plates)

Translation of the author's *Ethnologisk skizze av Angmagssalikerne*, q.v., with some additions in the text, including a narrative of the East Greenland Expedition, 1883-1885.

Copy seen: DLC.

7268. HOLM, GUSTAV FREDERIK, 1849-1940. Ethnologisk skizze av Angmagssalikerne. (In: Østgrønlandske expedition, 1883-1885. Beretninger, 2. del, 2. *Pub. in:* Meddelelser om Grønland, 1888. 10. hefte, p. 43-182, illus., 42 plates (incl. fold. map)) *Title tr.:* Ethnological sketch of the Angmagssaliks. Published in English as *Ethnological sketch of the Angmagssalik Eskimo*, 1914.

Description of the Angmagssalik region and its Eskimo inhabitants, their names, distribution, physical characteristics, clothing, dwellings, implements, hunting and fishing, etc., also their family life, childbirth, marriage and mortuary customs; their mythology and beliefs, psychological characteris-

tics, art, songs and dances. Summary in French, p. 367-82.

Copy seen: DLC.

7269. HOLM, GUSTAV FREDERIK, 1849-1940. Geographiske undersøgelser af Grønlands sydligste del. 1881. (Meddelelser om Grønland, 1883, 6. hefte, p. 147-92, illus., plate, tables, fold. map) **Title tr.:** Geographic research in the southern part of Greenland.

Report of the Danish Expedition to South Greenland, 1881, which surveyed and mapped the southwest coast from 61°N. to Cape Farewell, and investigated the drift of the ice in Davis Strait.

Appendices: The extent of drift ice in Davis Strait, summer 1881. Results of astronomical observations made 1880-81. (Geographic positions of fifty-three places).

Map: Details of the coast from 60°15'N. 43°02'W. to 61°15'N. 46°20'W. Summary in French at end of volume.

Copy seen: DLC.

7270. HOLM, GUSTAV FREDERIK, 1849-1940. Gunbjørns-skaer og korsøer, 1940. (Meddelelser om Grønland, 1918. Bd. 56, p. 289-308, 2 maps (1 fold.)) **Title tr.:** Gunbjørn Cliff and Cross Island.

Discussion of the identity of two places (probably in East Greenland) mentioned in Norse literature; with quotations from source material.

Copy seen: DLC.

7271. HOLM, GUSTAV FREDERIK, 1849-1940. De islandske kursforskrifters Svalbarde. (Meddelelser om Grønland, 1925. Bd. 59, p. 273-97, maps) **Title tr.:** The Svalbarde of the Icelandic sailing directions.

Discussion of "Svalbarde" (i.e. the cool coast) mentioned in Norse literature and Icelandic sailing directions; theories of its location on Spitsbergen and the author's theory of its identity with Scoresby Sound, East Greenland. Holm's views are discussed by F. Nansen in his *Svalbard*, 1927, q.v.

Copy seen: DLC.

7272. HOLM, GUSTAV FREDERIK, 1849-1940. De islandske kursforskrifters Svalbarde. (Grønlandske selskab. Aarskrift, 1925-26, p. 5-11, map, table) **Title tr.:** The "Svalbarde" of the Icelandic sailing directions.

Quotes from Icelandic sources to prove that the "Svalbarde" of the sagas and annals refers to East Greenland and not to Spitsbergen.

Copy seen: NNStef.

7273. HOLM, GUSTAV FREDERIK, 1849-1940. Kap Dan's beliggenhed. (Geografisk tidsskrift, København, 1888. Bd. 9, p. 25-29) **Title tr.:** The location of Cape Dan.

Challenge of C. J. O. Kjellström's article *Om læget af Kap Dan*, q.v., concerning variations of the location of Cape Dan on maps of East Greenland made by Holm and Kjellström as results (respectively) of Danish and Swedish expeditions to Greenland, 1883-85.

Copy seen: DLC.

7274. HOLM, GUSTAV FREDERIK, 1849-1940. Konesbaads-expeditionen til Grønlands østkyst, 1883-85. (Geografisk tidsskrift, København, 1886. Bd. 8, p. 79-98) **Title tr.:** The Umiak Expedition to the East Coast of Greenland, 1883-85.

Popular account of the Danish Expedition to East Greenland, 1883-1885 (also called the Konebaad, i.e. women's boat, or umiak, Expedition): the wintering at Angmagssalik, the Eskimos there, outline of previous expeditions to that region.

Copy seen: DLC.

7275. HOLM, GUSTAV FREDERIK, 1849-1940. Legends and tales from Angmagssalik. (In: Thalbitzer, W. C. The Ammassalik Eskimo, pt. 1, no. 5. Pub. in: Meddelelser om Grønland, 1914. Bd. 39, p. 225-305)

Translation, with additional introductory remarks, and two tales added, of Holm's *Sagn og fortællinger fra Angmagssalik*, 1888, q.v.

Copy seen: DLC.

7276. HOLM, GUSTAV FREDERIK, 1849-1940. Liste over den ethnografiske samling fra Angmagssalik. (In: Østgrønlandske expedition, 1883-1885. Beretninger, 2. del, 6. Pub. in: Meddelelser om Grønland, 1888, 10. hefte, p. 347-58, plates V-XXII, XXIV-XXXI) **Title tr.:** List of the ethnological collection from Angmagssalik.

List of implements, clothing, household articles, recreational objects, models, etc., collected in the Angmagssalik region of East Greenland. Summary in French, p. 390.

Copy seen: DLC.

7277. HOLM, GUSTAV FREDERIK, 1849-1940. Liste over stednavne i dansk Østgrønland. (*In*: Østgrønlandske expedition, 1883-1885. Beretninger, 1. del, 8. *Pub.* in: Meddelelser om Grønland, 1889. 9. hefte, p. 341-52) *Title tr.*: List of place names in Danish East Greenland.

Alphabetical list of more than two hundred places indicating the region in which they are located. Summary in French, p. 419-20. *Copy seen*: DLC.

7278. HOLM, GUSTAV FREDERIK, 1849-1940. Oprettelsen af missions- og handelsstationen Angmagssalik paa Grønlands østkyst. (Geografisk tidsskrift, 1893-94, Kjøbenhavn, 1894. Bd. 12, p. 247-55, sketch map) *Title tr.*: The establishment of the mission and trading station Angmagssalik.

Exploration of the Angmagssalik region, the Eskimos there; transportation of goods, building material and personnel (from Copenhagen) in the *Hvidbjørnen*, 1894; the choice of Angmagssalik as site for the East Greenland station, climatological data 1884-85, and remarks on ice conditions off the coast 1786-1894.

Copy seen: DLC.

7279. HOLM, GUSTAV FREDERIK, 1849-1940. Sagn og fortaellinger fra Angmagssalik samlede af G. Holm. (*In*: Østgrønlandske expedition, 1883-1885. Beretninger, 2. del, 5. *Pub.* in: Meddelelser om Grønland, 1888. 10. hefte, p. 235-334) *Title tr.*: Legends and tales from Angmagssalik, collected by G. Holm. Published in English as *Legends and tales from Angmagssalik*, 1914.

Collection of fifty-two tales from the Angmagssalik region of East Greenland; with explanatory remarks to each tale. Comments on the tales, etc., were published by H. Rink as *Bemaerkninger til G. Holms samling*, 1888, q.v.

Copy seen: DLC.

7280. HOLM, GUSTAV FREDERIK, 1849-1940. Small additions to the Vinland problem in consequence of Professor H. P. Steensby's "Norsemen's route from Greenland to Wineland", 1924. (Meddelelser om Grønland, København, 1925. Bd. 59, p. 11-37, sketch map)

Contains (1) discussions of and quotations from Norse literature; (2)

criticism of Steensby's *Norsemen's route from Greenland to Wineland*, q.v.; and (3) the author's conclusions regarding Eric the Red and Thorfinn Karlsefni's voyages to Vinland.

Outline of the physical geography, ice conditions, geology and climate; the Eskimo population: language, clothing, social organization, trade, etc., and material, culture; the Danes: economic activities, administration, the trading and mission station at Angmagssalik; history. Includes sketch maps of various localities.

Copy seen: DLC.

7283. HOLM, GUSTAV FREDERIK, 1849-1940, and V. GARDE. Beretning om Konebaads-expeditionen til Grønlands østkyst, 1883-85. (*In*: Østgrønlandske expedition, 1883-85. Beretninger, 1. del, 2. *Pub.* in: Meddelelser om Grønland, 1889. 9. hefte, p. 53-143, illus., plates XVI-XVII (fold. maps)) *Title tr.*: Report on the Umiak Expedition to the east coast of Greenland, 1883-85. Summary in German of the work of this expedition, appears in *Deutsche geographische Blätter*, 1889, Bd. 12, p. 260-83.

Narrative of the Expedition to East Greenland 1883-1885 (also called Konebaads-Expeditionen), led by G. F. Holm, for mapping and archeological, hydrographic, geological and botanical investigations.

Contains accounts of exploratory trips in umiaks along the coast from Nanortalik, south Greenland to Sermilik Fiord 66°N.; the wintering, 1883-84, at Nanortalik and the winterings in 1884-85 of the main expedition at Angmagssalik (65°36'N.) and of the southern section under T. V. Garde at Nanortalik; also brief discussion of the scientific results. Summary in French, p. 357-69. *Copy seen:* DLC.

7284. HOLM, GUSTAV FREDERIK, 1849-1940, and V. GARDE. Om de geografiske forhold i dansk Østgrønland. (*In:* Østgrønlandske expedition, 1883-1885. Beretninger, 1. del, 3. *Pub.* in: Meddelelser om Grønland, 1889. 9. hefte, p. 145-228, illus., plates VIII-XVI (incl. 2 fold. maps)) *Title tr.:* On the geography of Danish East Greenland.

Physical geography of the east coast of Greenland north to 68°N.; explanatory remarks to accompanying maps and table of astronomical determination and magnetic variation for about fifty places.

Maps: the southernmost part of the east coast of Greenland to 63°45'N., prepared by G. Holm and V. Garde, 1883-85; Greenland's east coast from 63°20' to 66°25'N. prepared by G. Holm, 1884-85. Summary in French, p. 369-83. *Copy seen:* DLC.

Chiefly discussion, based on results from the voyage of the *Dijnphna*, 1882-83, of the distribution and frequency of various forms of marine fauna. Summary in French, 491-501. *Copy seen:* DLC.

7286. HOLM, HERMAN THEODOR, 1854-1932. Beretning om de paa Fylla's togt i 1884 foretagne zoologiske undersøgelser i Grønland. (Meddelelser om Grønland, 1889. 8. hefte, p. 151-71) *Title tr.:* Report on the zoological research carried out on the cruise of the *Fylla* in 1884.

Contains a list of fourteen dredging and plankton stations on the west coast of Greenland, giving type of bottom and nature of hauls with additional taxonomic listing of species taken. Summary in French at end of volume. *Copy seen:* DLC.

7287. HOLM, HERMAN THEODOR, 1854-1932. Carices novae Americae boreali-occidentalis. (Repertorium specierum novarum regni vegetabilis, 1905. Bd. 1, no. 13, p. 193-96) *Title tr.:* New Carices from northwestern America.

Contains Latin diagnoses of eight sedges (*Carex*), including *C. cryptochlaena* from Alaska.

Copy seen: MH-A.

7288. HOLM, HERMAN THEODOR, 1854-1932. Contributions to the morphology, synonymy, and geographical distribution of arctic plants. Ottawa, King's Printer, 1922. 139 p. illus., tables. (Canadian Arctic Expedition, 1913-1918. v. 5: Botany, Pt. B)

Description of one hundred twenty-five separate species of vascular plants gathered from the North American Arctic, with full discussion (including tables) of the entire arctic distribution. Bibliography, p. 136-39.

Copy seen: DSI-M.

7289. HOLM, HERMAN THEODOR, 1854-1932. The earliest record of arctic plants. (Biological Society of Washington. Proceedings, June 1896. v. 10, p. 103-107)

Discussion of Friedrich Martens' 17th century record of plants of Spitsbergen as noted in John Ray's *Historia plantarum*, London, 1704. Martens, as surgeon, accompanied a whaler which visited the region now called Smeerenburg (Amsterdam Island) off north-western West Spitsbergen.

Copy seen: DLC.

7290. HOLM, HERMAN THEODOR, 1854-1932. New plants from arctic North America. (Repertorium specierum novarum regni vegetabilis, 1907. Bd. 3, no. 48-49, p. 337-38)

Contains Latin diagnoses of six new species of herbs from Mansfield (Mansel) Island, Nottingham Island and the coast of Hudson Bay (the mouth of Severn River).

Copy seen: MH-A.

7291. HOLM, HERMAN THEODOR, 1854-1932. Novaia-Zemlia's vegetation, særlig dens phanerogamer. (In: Lütken, C. F. *Dijmphnatogtets zoologisk-botaniske udbytte*, 1887, p. 5-59, plate 1-12) **Title tr.:** The vegetation of Novaya Zemlya, especially its phanerogams.

Contains list, with localities, of one hundred twenty-three species of seed plants and four cryptogams, observed by the author during the *Dijmphna* Expedition, 1882-83; table showing distribution of plants in arctic regions; discussion of the vegetation of the tundra and the rocks of Novaya Zemlya; descriptions of the morphology and anatomy of twenty-five species. French summary of botanical reports, p. 97-107.

7294. HOLM, LENNART. Taxonomical notes on Ascomycetes I. The Swedish species of the genus *Ophiobolus* Riess sensu Sacc. (Svensk botanisk tidskrift, 1948. Bd. 42, häfte 4, p. 337-47, illus. plate)

Contains a key and critical notes on fifteen species of *Ophiobolus*, a genus of sac fungi, including a Latin description of *O. lapponica* n. sp. from Torne Lappmark.

Copy seen: MH-A.

HOLM, THEODOR, *see* HOLM, HERMAN THEODOR, 1854-1932.

7295. HOLM, V. F. En resa i Lapland och Norge. (Botaniska notiser, 1875, no. 3, p. 169-79) **Title tr.:** A journey to Lapland and Norway.

Contains an account of the author's exploring trip to Lule and Pite Lappmark and adjoining regions of Norway, in the summer of 1873, with a general

description of the vegetation and scattered notes on plants observed.

Comment on one of Holm's botanical notes was published by A. N. Lundström, *Om Salix finmarkica*, 1876, q.v.

Copy seen: MH-A.

7296. HOLMBERG, OTTO RUDOLF, 1874-1930. Carices nonnullae hybridae e sectionibus Canescentibus, Tenuifloris, Elongatis. (Botaniska notiser, 1929, häfte 1, p. 10-28, illus.) **Title tr.:** Some *Carex* hybrids of the sections *Canescentes*, *Tenuiflorae*, *Elongatae*.

Contains descriptions of twelve new hybrids of sedges (*Carex*) and critical notes on six others described previously, belonging to the sections *Canescentes*, *Tenuiflorae* and *Elongatis* of the genus, including eight hybrids from Swedish Lapland and three from arctic Norway.

Copy seen: MH-A.

7297. HOLMBERG, OTTO RUDOLF, 1874-1930. Einige *Puccinellia*-Arten und -Hybriden. (Botaniska notiser, 1920, p. 103-111) **Title tr.:** Some *Puccinellia* species and hybrids.

Contains critical notes on nine species (six new comb. and names) of the gramineous genus *Puccinellia*, including *P. reflexa* with two varieties extending from central and northern Europe to Greenland.

Copy seen: MH-A.

7298. HOLMBERG, OTTO RUDOLF, 1874-1930. Die Gattung *Phippsia* und ihre Arten. (Botaniska notiser, 1924, häfte 2, p. 126-34) **Title tr.:** The genus *Phippsia* and its species.

Contains a taxonomic study of this genus of grasses, its five species and forms and two new hybrids (*Phippsia algida* x *concinna* and *P. concinna* x *Puccinellia angustata*), all distributed in the Arctic, some in Sweden and some in West Spitsbergen.

Copy seen: MH-A.

7299. HOLMBERG, OTTO RUDOLF, 1874-1930. Några nya former av skandinaviska gräs. (Botaniska notiser, 1926, häfte 2, p. 181-85) **Title tr.:** Some new forms of Scandinavian grasses.

Contains descriptions of twenty-four new forms of Scandinavian grasses, including *Deschampsia atropurpurea* f. *multiflora* n.f. (Lule Lappmark), *Puccinellia retroflexa* subsp. *borealis* n. subsp. (Greenland, Nordland, Norway)

and *P. retroflexa* var. *virescens* (Finnmark, Norway, Greenland).

Copy seen: MH-A.

7300. HOLMBERG, OTTO RUDOLF, 1874-1930. Neue *Puccinellia*-Arten aus Nord- und Ost-Asien. (Botaniska notiser, 1927, häfte 3, p. 206-210) **Title tr.:** New *Puccinellia* species from northern and eastern Asia.

Contains Latin diagnoses of the grass *Puccinellia sibirica* n. sp. (Yenisey River region, 70°10'N.), *P. sibirica* var. *lenensis* n. var. (Yakutsk), *P. kamtschatica* n. sp. with two new varieties *asperula* and *sublaevis* n. vars., native to Kamchatka Peninsula.

Copy seen: MH-A.

7301. HOLMBERG, OTTO RUDOLF, 1874-1930. Nochmals *Puccinellia*. (Botaniska notiser, 1924, häfte 3, p. 299-310) **Title tr.:** More on *Puccinellia*.

Contains a taxonomic discussion on the validity of the name *Puccinellia* and the affinity of this genus with *Atropis* and *Poa*, two genera of Gramineae; includes references to some arctic species; deals mostly with F. J. v. Ruprecht's arrangement of the genus *Poa* in his work *Flores Samoedorum cisuralensium*, 1845, q.v. Bibliography (16 items).

Copy seen: MH-A.

7302. HOLMBERG, OTTO RUDOLF, 1874-1930. Om *Carex canescens*, dess begränsning och variationer. (Botaniska notiser, 1927, häfte 3, p. 215-23) **Title tr.:** On *Carex canescens*, its limitations and varieties.

Contains a taxonomic discussion on the sedge *Carex canescens*, its systematic content and critical notes on its four varieties and one new form, including varieties *suboliacea* and *subvitis*, native to Swedish Lapland.

Copy seen: MH-A.

7303. HOLMBERG, OTTO RUDOLF, 1874-1930. Om "*Carex macilentia* Fr." dess historia och dess systematiska valär. (Botaniska notiser, 1910, häfte 2, p. 81-90) **Title tr.:** On "*Carex macilentia* Fr." its history and systematic denomination.

Contains a critical revision of the complicated taxonomy of a northern species of sedges, *Carex macilentia* Fr. s. l., including Latin diagnoses of three related hybrids *C. brunnescens* x *lolia-*

cea n. hybr. f. *subbrunnescens*, *C. canescens* x *loliacea* f. *subcanescens* and f. *subloliacea*, native to Swedish Lapland (Lule and Torne Lappmark); bibliography (32 items).

Copy seen: MH-A.

7304. HOLMBERG, OTTO RUDOLF, 1874-1930. Om hybridiseringen hos *Carices canescentes* och närstående grupper. (Botaniska notiser, 1929, häfte 1, p. 1-9) *Title tr.:* On hybridization of *Carices canescentes* and related groups.

Contains a discussion of hybridization of various species of sedges (*Carex*) of the group *Canescentes* and some other related sections of the same genus; includes references to some arctic species.

Copy seen: MH-A.

7305. HOLMBERG, OTTO RUDOLF, 1874-1930. *Sagina linnæi* och dess hybrid med *S. procumbens*. (Botaniska notiser, 1919, p. 263-70, illus.) *Title tr.:* *Sagina linnæi* and its hybrid with *S. procumbens*.

Contains a taxonomic discussion of some controversial plants of the genus *Sagina*, including a hybrid of *S. linnæi* x *procumbens* collected by the writer at Furulund in Nordland, Norway, and described in detail. Summary in English.

Copy seen: MH-A.

7306. HOLMBERG, OTTO RUDOLF, 1874-1930. De skandinaviska formerna av *Carex*-gruppen *Limosae*. (Botaniska notiser, 1929, häfte 4, p. 209-228, illus.) *Title tr.:* Scandinavian forms of *Carex* group *Limosae*.

Contains critical notes on four species and Latin descriptions of some new forms and hybrids of Scandinavian sedges (*Carex*) of the group *Limosae* including at least three native to Swedish Lapland. Summary in German.

Copy seen: MH-A.

7307. HOLMBOE, JENS, 1880-1943. En fjeldform af *Capsella Bursa pastoris*. (Botaniska notiser, 1899, p. 261-65, illus.) *Title tr.:* An alpine form of *Capsella Bursa pastoris*.

Contains a description of *Capsella Bursa pastoris* v. *pigmaca* n. var. occurring in South Varanger region, Norway, and notes on the distribution of *Capsella* in Norway (Finnmark), Finland (Inari Lappmark) and Greenland.

Copy seen: MH-A.

7308. HOLMBOE, JENS, 1880-1943. Nogle ugraesplanter indvandring i Norge. (Nytt magasin for naturvidenskaben, 1900. Bd. 38, hefte 2-3, p. 129-262, text maps) *Title tr.:* Migration of some weeds in Norway.

Contains a study of migration of nineteen weeds (some introduced) of economic importance on account of their rapid spread in Norway, with data on their origin, date of introduction, way of migration, speed of spreading, etc., supplemented by a special study of the expansion of their areals in Norway, based on literature material arranged chronologically for each species; bibliography (113 items). Summary in German.

Copy seen: MH-Z.

7309. HOLMBOE, JENS, 1880-1943. Om "haerbúa" og dens forekomst ved elvene i Trøndelag i sagatiden. (Svensk botanisk tidskrift, 1936. Bd. 30, häfte 3, p. 551-64, illus. text map) *Title tr.:* On "haerbúa" and its occurrence along rivers of Trøndelag in saga times.

Contains a botanico-phytological study of a subshrub, "haerbúa" or *Myricaria germanica*, based on references in old Scandinavian literature, folklore, sagas, etc., and study of its old and present distribution in Scandinavia, including Nordland and Finnmarken provinces of northern Norway; bibliography (23 items).

Copy seen: MH-A.

7310. HOLMBOE, JENS, 1880-1943. Spredte bidrag til Norges flora. I. (Nytt magasin for naturvidenskaben, 1930. Bd. 68, p. 119-49, illus., sketch maps) *Title tr.:* Occasional contributions to the flora of Norway. I.

Contains critical notes on ten species of flowering plants, including *Cornus succica* with a form *stenophylla* n. f., native to Nordreisa, Troms region, and *Conopodium denudatum* from Nordland, Norway; with bibliography (35 items).

Copy seen: MH-Z.

7311. HOLMBOE, JENS, 1880-1943. Spredte bidrag til Norges flora. II. (Nytt magasin for naturvidenskaben, 1932. Bd. 71, p. 147-84, illus., sketch map) *Title tr.:* Occasional contributions to the flora of Norway. II.

Contains critical notes and data on distribution of ten Norwegian flowering plants, including *Nymphaea alba*, native to the Troms region; bibliography (50 items).

Copy seen: MH-Z.

7312. HOLMBOE, JENS, 1880-1943. Spredte bidrag til Norges flora. III. (Nytt magasin for naturvidenskapene, 1934. Bd. 74, p. 71-116, illus., sketch maps) *Title tr.*: Occasional contributions to the flora of Norway. III.

Contains critical notes on ten flowering plants of Norway, including *Ceratophyllum demersum*, native to Finnmark, and *Euphrasia lapponica*, from arctic Norway and Finland; bibliography (72 items). *Copy seen:* MH-Z.

7313. HOLMBOE, JENS, 1880-1943. Spredte bidrag til Norges flora. IV. (Nytt magasin for naturvidenskapene, 1933. Bd. 78, p. 1-35, illus., sketch maps) *Title tr.*: Occasional contributions to the flora of Norway. IV.

Contains critical notes on ten Norwegian flowering plants and vascular cryptogams, including four native to arctic regions of Norway, with data on their distribution; bibliography (46 items). *Copy seen:* MH-Z.

7314. HOLMBOE, JENS, 1880-1943. Spredte bidrag til Norges flora. V. (Nytt magasin for naturvidenskapene, 1941. Bd. 82, p. 9-44, illus.) *Title tr.*: Occasional contributions to the flora of Norway. V.

Contains critical notes on various plants of Norwegian flora, including *Knautia arvensis*, occurring in arctic regions of Norway, Sweden and Finland; bibliography (69 items).

Copy seen: MH-A; MH-Z.

7315. HOLME, RANDLE F. A journey in the interior of Labrador, July to October, 1887. (Royal Geographical Society. Proceedings, Apr. 1888. New ser., v. 10, p. 189-205, fold. map) Paper read before the Society, Feb. 1888, followed by discussion from members, p. 203-205.

Contains the narrative of a boat journey, up Hamilton Inlet, Lake Melville, the navigable stretches of five smaller rivers draining into the lake, and up the Hamilton River as far as Lake Waminikapou (i.e. Winokapau); with discussion of the geographic features of the area as far west as the

divide, and remarks on the Indians, the natural history, and the routes used by natives, traders and missionaries.

Copy seen: DLC.

7316. HOLMEN, BERNARD. Alaska's greatest need. (Alaska life, Aug. 1944. v. 7, no. 8, p. 58-59)

Note on suitability of the western shores of Cook Inlet, Kenai Peninsula, for agricultural development.

Copy seen: DLC.

7317. HOLMES, ARTHUR, 1890- , and H. F. HARWOOD. The basaltic rocks of the arctic region, by Arthur Holmes. With analyses by H. F. Harwood. (Mineralogical magazine, Aug. 1918. v. 18, p. 180-223, 2 plates)

Description, with chemical analyses, of typical rocks from Greenland, Jan Mayen, West Spitsbergen, and Franz Josef Land, with a classification of the rocks, a review of chemical characters, and remarks on petrographic provinces.

Copy seen: DGS.

7318. HOLMES, Mrs. BETTIE (FLEISCHMANN). The log of the "Laura" in polar seas; a hunting cruise from Tromsø, Norway to Spitsbergen, the polar ice off East Greenland and the Island of Jan Mayen in the summer of 1906. Cambridge, Eng. Cambridge University Press, 1907. 4 p. l., 137 p. illus., 23 plates, double map.

Contains a narrative of the trip and tables of game (showing where taken); also meteorological observations twice daily, June 17-Aug. 28.

Copy seen: DLC; NNSef.

7319. HOLMES, HARLAN B. Natural propagation of salmon in Alaska. (Pacific Science Congress. 5th, 1933. Proceedings, 1934. v. 5, p. 3585-92)

Review of investigations carried out by the U. S. Bureau of Fisheries, beginning 1908; the methods and tentative results, including theoretical relation and ratio between escapement and return, fresh and salt-water mortalities, and factors influencing success of propagation.

Copy seen: DGS.

7320. HOLMES, JOHN BECK, Bishop, 1767-1843. Historical sketches of the missions of the United Brethren for propagating the gospel among the heathen, from their commencement to the year 1817. Dublin, Printed by R. Napper, 1818. v. [3], 472 p. "Second

improved edition" (470 p. 1 l.) was published in London, 1827.

Contains chapters on Moravian missions in Greenland, 1732-1817; and in Labrador, 1771-1817.

Copy seen: DLC (2d ed.); NNS Stef (1st ed.).

7321. HOLMES, LEWIS. The arctic whaleman; or, Winter in the Arctic Ocean: being a narrative of the wreck of the whale ship Citizen. Together with a brief history of whaling. Boston, Wentworth, 1857. 296 p. incl. 15 plates. Another edition without change was published in Boston by Thayer & Eldridge, 1861.

Contents (in pt. 1) an account of whaling in Bering and Chukchi Seas; the wreck of the *Citizen* in Sept. 1852; the customs and behavior of natives of the Chukotsk Peninsula near East Cape as experienced by the ship's survivors during a nine-month sojourn there.

Pt. 2 gives history (in general) and details of whaling, the various whales and outfitting.

Copy seen: DLC (1861 edition); NNS Stef (1857 and 1861).

Handlingar. Bd. 8, no. 5) **Title tr.:** Contribution to the knowledge of the insect fauna of Bear Island and Spitsbergen.

List, with descriptions, locations and notes on synonymy, of seventy-one species, from the Swedish North Polar Expedition, 1868. **Copy seen:** DLC.

7324. HOLMGREN, AUGUST EMIL, 1829-1888. Insekter från Nordgrönland, samlade af prof. A. E. Nordenskiöld år 1870. (Svenska vetenskapsakademien. Öfversigt af förhandlingar, 1872, pub. 1873. Årg. 29, no. 6, p. 97-105) **Title tr.:** Insects from North Greenland collected by Prof. A. E. Nordenskiöld in 1870.

List, with synonymy, remarks on the species and some descriptions, of Coleoptera, Hymenoptera (bees, wasps, etc.), Diptera (flies, mosquitoes, etc.), Lepidoptera (butterflies and moths) and Hemiptera (bugs) found in the Disko region of West Greenland.

Copy seen: DLC.

7325. HOLMGREN, AUGUST EMIL, 1829-1888, and **CHR. AURIVILLIUS.** Insecta a viris doctissimis Norden-skiöld illum ducentis sequentibus in insulis Waigatsch et Novaja Semlia anno 1875 collecta. (Entomologisk tidskrift, 1883. Bd. 4, p. 139-94) **Title tr.:** Insects collected by Dr. Nordenskiöld on Waigach Island and Novaya Zemlya during his expedition of 1875.

Contents tr.: Holmgren, A. E. Hymenoptera and Diptera. (Systematic, annotated list, with localities, of forty-six species of hymenopterous, and eighty-one species of dipterous insects.)

Aurivillius, C. Lepidoptera. (Descriptions of a new genus and species of moth *Schöyenia arctica*, and list of nine species of butterflies and moths collected.)

Copy seen: DA.

7326. HOLMQUIST, P. J. Die Hochgebirgsbildungen am Torne Träsk in Lappland. (Geologiska föreningen, Stockholm. Förhandlingar, 1910. Bd. 32, p. 913-83, col. fold. map) **Title tr.:** The high mountain formations at Torne Träsk in Lapland.

Discussion of the composition and structure of the high mountain range at Torne Träsk (lake) in northern Sweden (68°52'N. 24°10'E.); with description of rocks. **Copy seen:** DLC.

7327. HOLMSEN, GUNNAR, 1880-. Lidt om Spitsbergens geologi; foredrag den 18. februar 1909. (Norsk geografisk selskab. Aarbok, 1908-09, pub. 1909. v. 20, p. 1-8) **Title tr.:** A few remarks on the geology of Spitsbergen, a lecture delivered Feb. 18, 1909.

Copy seen: DLC.

7328. HOLMSEN, GUNNAR, 1880-. Ørkindannelser i Polarlandene. (Norsk

geografisk selskab. Aarbok, 1911-1912, pub. 1913. v. 23, p. 77-82, illus.) *Title tr.*: Desert formations in polar regions.

Brief comparison of similarities between certain arctic and desert phenomena, including vegetation, the surface, salts and the forms of the rocks and stones.

Copy seen: DLC.

7329. HOLMSEN, GUNNAR, 1880- . Spitsbergens jordbunds is og de bidrag dens undersøkelse har kunnet gi til forstaelsen av de i arktiske land optraedende varige isleier i jorden. (Norsk geografisk selskab. Aarbok, 1912-1913, pub. 1913. v. 24, p. 1-150, illus., 8 plates (photos.) tables) *Title tr.*: Spitsbergen's subterranean ice and the contribution which research has made to the understanding of the permanent ice layers which occur in the ground of the arctic regions.

Contents include: The morphology of Coles Bay, West Spitsbergen and a detailed study of its subterranean ice, p. 1-33. Results of research on the structure of the ice, p. 38-45. The ice of Novaya Zemlya, Siberia and New Siberian Islands, p. 45-80. "Ground ice" of Alaska and Grinnell Land, p. 80-107. The age of geographic distribution of the ice, p. 107-132. Summary in German, p. 133-44.

Protected flowers in the Junkerdal slope, on Solveigtind and Båtfjell.

Description of a rare flower sanctuary in Saltdalen, northern Norway (about 67°N.); account of botanical investigations made there, and descriptions of rare flowers, with list of sixty-four species.

Copy seen: DLC.

7332. HOLMSEN, HANNA MARIE (RESVOLL), 1873- . Lidt om Spitsbergens plantevekst; foredrag den 18. februar 1908. (Norsk geografisk selskab. Aarbok, 1908-1909, pub. 1909. v. 20, p. 9-17, illus.) *Title tr.*: A few remarks on the vegetation of Spitsbergen; lecture given February 18, 1909.

Description of vegetation of the Cross Bay (79°N. 11°30'E.), Coal Bay (78°N. 14°30'E.) and Ice Fiord regions on the west and northwest coast of West Spitsbergen.

Copy seen: DLC.

7333. HOLMSEN, HANNA MARIE (RESVOLL), 1873- . Observations botaniques. Monaco, Impr. de Monaco, 1913. 2 p. l., 80 p., 2 l. 9 plates. (Isachsen, G. I. Exploration du nord-ouest du Spitsberg [etc.] 5. ptie. Pub. as: Albert I, Prince of Monaco. Résultats des campagnes scientifiques accomplies sur son yacht. Fasc. 44) *Title tr.*: Botanical observations. (Exploration of northwest Spitsbergen (etc.))

Results of the Isachsen expedition 1906-07.

Contents tr.: The vegetation along the west coast of Spitsbergen. Some remarks on autumnal coloration. Discovery of layers of 'peat over fossil ice. The vascular plants. Cryptogams new to Spitsbergen. Includes a list, with locations, of one hundred twenty-four species of vascular plants, and lists of fifty-nine fresh-water algae, two fungi and seven mosses from northwest West Spitsbergen (Haakon VII Land, 78°40'-79°40'N. 10°30'-14°30'E.).

Copy seen: DLC.

7340. HOLTEDAHL, OLAF, 1885- . Bidrag til Finnmarkens geologi. Kristiania, H. Aschehoug & Co., 1918. vii, [1] 314 p. illus., 21 plates (incl. fold. maps, fold. diagr.) tables. (Norges geologiske undersøkelse, nr. 84) *Title tr.*: Contribution to the geology of Finnmark.

Contains a survey of previous investigations of the geological structure of Finnmark province, northern Norway; the author's investigations 1914-17, of the solid rock formations, the late sedimentary series, and fossils; topographic survey of the Alten district, region around Talvik and east of the Alten Fiord, the Pre-Cambrian area south and southwest of Alten Fiord, the region east of Altenbladet and around the head of the Porsanger Fiord, the Varanger Peninsula and the Skipagurra-Skoganvarre region in Finnmark. Describes the Pre-Cambrian group, the fossiliferous lower Cambrian shale-sandstone group, the early, dolomite-bearing sandstone division; the late tillite-bearing sandstone group, and the metamorphic rock formations of the Caledonian mountain chains. Notes previous estimates of the age of the Finnmark geological formations as incorrect; minerals encountered, eruptive rocks, etc. Includes mineralogical, geological, topographic, paleontological and geographical data. Summary in English, p. 299-314.

7341. HOLTEDAHL, OLAF, 1885- . Brief account of the expedition. Kristiania, A. W. Brøgger, 1922. 14 p. illus., plates (photos.) maps (2 fold., 1 col.) (*In*: Norske Novaja Semlja ekspedisjon, 1921. Report of the scientific results. No. 1) Published by Det Norske videnskaps-akademi i Oslo (Videnskapsselskapet i Kristiania).

Narrative of the voyage of the *Blaafjell* along the west coast of Novaya Zemlya from Goose Bay to Pankatev Peninsula, also through Matochkin Shar, with an overland trip from Mashigin Fiord to Zivolka Fiord, July-Aug., 1921.

Maps of Serebryanka Fiord and Matochkin Strait and of Mashigin Fiord showing depths and heights. Notes to maps, p. 11-14. *Copy seen:* DLC.

7342. HOLTEDAHL, OLAF, 1885- . The Cambro-Ordovician beds of Bache Peninsula, and the neighbouring regions of Ellesmere Land. Kristiania, A. W. Brøgger, 1913. 14 p. 4 plates, map. (*In*: Norske videnskapsakademi, Oslo. Report of the Second Norwegian Arctic Expedition in the *Fram*, 1898-1902, v. 4, (no. 28))

Discussion of the beds, based on Schei's *Preliminary account of the geological investigations*, q.v. and of fossil material; with a list of species.

Copy seen: DLC.

7343. HOLTEDAHL, OLAF, 1885- . A crossing of Novaya Zemlya. (Geographical journal, May 1922. v. 59, p. 370-75, sketch map)

An account of a march across the island from Mashigin Fiord to Zivolka Fiord, during the Norwegian Expedition, 1921.

Copy seen: DLC.

7344. HOLTEDAHL, OLAF, 1885- . Ekspedisjonsliv på Novaja Semlja. (Polar-årbooken, 1933, p. 68-79, illus.) *Title tr.*: Expeditionary life in Novaya Zemlya.

Account of the Norwegian Expedition to Novaya Zemlya, 1921, and its botanical, zoological and geographical work. Includes remarks on meeting with Samoyeds at Matochkin Strait, the sledge trip to the head of Zivolka Bay on the east coast, days spent on the southwest coast, voyage home in the *Blåfjeld*.

7350. HOLTEDAHL, OLAF, 1885- . Novaya Zemlya, a Russian arctic land. (Geographical review, Oct. 1922. v. 12, p. 521-31, illus.)

General facts concerning the geography, physiography, plants and animals, and remarks on the Samoyed colonies.

Copy seen: DLC.

7351. HOLTEDAHL, OLAF, 1885- . O nauchnoi ékspeditsii na Novuiu Zemliu. (Akademiia nauk SSSR. Bulletin, jan.-déc., 1921. Sér. 6, t. 15, p. 152-54) *Title tr.:* About a scientific expedition to Novaya Zemlya.

Letter from the leader of the Norwegian expedition of 1921 to the Russian Commissar of Foreign Affairs, outlining itinerary and giving the author's opinion regarding lack of economic value of the Novaya Zemlya mineral deposits.

Copy seen: DLC.

7352. HOLTEDAHL, OLAF, 1885- . On fault lines indicated by the submarine relief in the shelf area west of Spitsbergen. (Norsk geografisk tidsskrift, 1936-37, pub. 1937. Bd. 6, p. 214-21, sketch maps) Reprinted as Norges Svalbard- og Ishavs-undersøkelser. Meddelelse. Nr. 35.

Discussion of the resemblance between longitudinal channels in the shelf area west of West Spitsbergen, 76°30' to 79°38'N. and in a strip of the Norwegian continental shelf, and the evidence of faulting in the Cenozoic.

Copy seen: DLC; DGS (reprint only).

7353. HOLTEDAHL, OLAF, 1885- . On some Ordovician fossils from Boothia Felix and King William Land, collected during the Norwegian expedition of the Gjøa, Captain Amundsen, through the North-West Passage. Kristiania, J. Dybwad, 1912. 11 p. illus., 4 plates. (Norske videnskaps-akademi, Oslo. Skrifter. I. Matematisk-naturvidenskapelig klasse, 1912. No. 9)

List with descriptions, localities and discussion of eight species of fossil invertebrates.

Copy seen: DLC.

7354. HOLTEDAHL, OLAF, 1885- . On the fossil faunas from Per Schei's Series B on south-western Ellesmere-

land. Kristiania, A. W. Brøgger, 1914. 48 p. 8 plates, 2 maps (*In:* Norske videnskapsakademi, Oslo. Report of the Second Norwegian Arctic Expedition in the *Fram*, 1898-1902, v. 4, (no. 32))

Descriptions, with locations and synonymy of specimens representing forty-three (including nine new) species, with references to occurrence in eastern North America.

Copy seen: DLC.

7355. HOLTEDAHL, OLAF, 1885- . On the Paleozoic series of Bear Island, especially on the Heclahook system. (Norsk geologisk tidsskrift, 1919. Bd. 5, p. 121-48, 4 plates)

Discussion of the stratigraphy of the southern part of the island with remarks on the Ordovician fossils and their correlation with American arctic forms, and a table of mineralogical data on three rock specimens from the Heclahook system; based on investigations made in 1916.

Copy seen: DGS.

7356. HOLTEDAHL, OLAF, 1885- . On the rock formations of Novaya Zemlya, with notes on the Paleozoic stratigraphy of other arctic lands. Kristiania, A. W. Brøgger, 1924. 183, [1] p. illus., 44 plates (part fold.; incl. 9 maps) (Norske Novaja Semlja ekspedisjon, 1921. Report of the scientific results. No. 22) Published by Det Norske videnskaps-akademi i Oslo (Videnskapsselskapet i Kristiania).

"The geological structure of Novaya Zemlya, due to an intensive folding of practically all the rock . . . is extremely difficult to decipher . . . The object of my personal work . . . was to try to combine the facts stated before and to get an idea of the distribution of different divisions along the strike and in cross-sections."—Introduction.

Contains results of observations at twenty places, giving notes on the rocks and fossils and cross-section diagrams; a summary of knowledge on stratigraphy, structure and pre-Quaternary geologic history; notes on Paleozoic stratigraphy of other arctic regions; discussion of a possible Paleozoic geosyncline connecting Novaya Zemlya and Alaska; some general remarks on arctic Paleozoic faunas; and a bibliography (188 items).

A modification of these conclusions appears in Ermolaev, M. M. *Geologiya Novoi Zemli*, 2, 1936, q.v.

7357. HOLTEDAHL, OLAF, 1885-. Paleogeography and diastrophism in the Atlantic-Arctic region during Paleozoic time. (American journal of science, Jan. 1920. Ser. 4, v. 49, p. 1-25, diagsr.)

A study of the northwest part of Europe and the Arctic lying north of it.

Copy seen: DLC.

7358. HOLTEDAHL, OLAF, 1885-. A "pipe-rock" in the upper Carboniferous of Bear Island. (Norsk geologisk tidsskrift, 1924-25, pub. 1926. Bd. 8, p. 270-80, illus.)

Description of the rocks, comparison with similar occurrences elsewhere in the world, discussion of possible origin, and brief remarks on the conditions under which the rocks were laid down.

Copy seen: DGS.

7359. HOLTEDAHL, OLAF, 1885-. Some points of structural resemblance between Spitsbergen and Great Britain, and between Europe and North America. Oslo, Jacob Dybwad, 1925. 20 p. sketch maps. (Norske videnskaps-akademi. Avhandlingar. Matematisk-naturvidenskapelig klasse, 1925, no. 4)

Contains discussion of likeness of sedimentary series and structure of the crust in Great Britain and on West Spitsbergen.

Copy seen: DLC.

7360. HOLTEDAHL, OLAF, 1885-. Some remarkable features of the submarine relief on the north coast of the Varanger Peninsula, northern Norway. Oslo, Jacob Dybwad, 1929. 14 p. maps (1 fold.) (Norske videnskaps-akademi. Avhandlingar. I Matematisk-naturvidenskapelig klasse, 1929. No. 12)

Discussion of the character and the geomorphology of the narrow coast platform 30-80 m. below sea level along the northeastern tip of Norway; the fiord basins and moraines, reference to other coastal regions in West Spitsbergen and Alaska showing similar conditions.

Copy seen: DLC.

7361. HOLTEDAHL, OLAF, 1885-. Summary of the geological results. Kristiania, A. W. Brøgger, 1917. 27 p. illus. 5 plates, port. (In: Norske videnskaps-akademi, Oslo. Report of the Second Norwegian Arctic Expedition in the *Fram*, 1898-1902, v. 4, (no. 36))

Summary of geological and paleontological investigations done by Per

Schei, geologist of the Second *Fram* Expedition at Folkefjord (about 78°20' N. 72°30' W. western coast of North Greenland) and on Ellesmere, Axel Heiberg and Devon Islands; also of work on Schei's collections done later by others and published in the Report of this expedition (as no. 1, 7, 22, 28-30, 32-34).

Copy seen: DLC.

7362. HOLTEDAHL, OLAF, 1885-. Tectonics of arctic regions. (Pan-American geologist, Nov. 1926. v. 46, p. 257-72, illus., 2 plates (diagsr.))

Paper presented at the Madrid meeting of the Fourteenth International Geological Congress, 1926, and published in its *Comptes rendus*, 1928. Fasc. 4, p. 1735-48.

Contains data on the structural history of Novaya Zemlya, West Spitsbergen and Bear Island.

Copy seen: DGS.

7363. HOLTEDAHL, OLAF, 1885-. An Upper Cambrian fauna of Pacific type in the European arctic region. (American journal of science, May 1922. Ser. 5, v. 3, p. 343-48, illus.)

Preliminary discussion of the brachiopod and trilobite fossils discovered by the author during the Norwegian Novaya Zemlya Expedition, 1921.

Copy seen: DLC.

7364. HOLTEDAHL, OLAF, 1885-. W. C. Brøgger. (Norsk geografisk tidsskrift, 1940-41, pub. 1941. Bd. 8, p. 6-8, illus.) Title tr.: W. C. Brøgger.

Notes the death of Professor W. C. Brøgger (1851-1940), and his contribution to the sciences, especially geology and mineralogy.

Copy seen: NNA.

7365. HOLTEDAHL, OLAF, 1885-. Zur Kenntnis der Karbonablagerungen des westlichen Spitzbergens. I. Eine Fauna der Moskauer Stufe. Kristiania, J. Dybwad, 1911. 46 p. illus., 5 plates (photos.) (Norske videnskaps-akademi, Oslo. Skrifter. I. Matematisk-videnskapelig klasse, 1911. No. 10) Title tr.: Concerning the Carboniferous deposits of West Spitsbergen. 1. Fauna of the Moscow series. Issued also as: Norske Spitsbergenekspeditioner, 1909-1910. Résultats scientifiques, 1916. T. 2, no. 3.

Based on fossil collections made by the author in 1909, on Schetelig Mt. located on the Brøgger Peninsula,

south of King's Bay. Contains introductory remarks on the Schetelig Mt. horizons and their relationships to the Moscow series; descriptions of forty-three species of fossil corals, crinoids, bryozoans, brachiopods, gastropods, trilobites, and fishes, including a new crinoid and brachiopod species; and a conclusion concerning the certainty of relationship of this Carboniferous fauna to the Russian middle Carboniferous, Moscow series.

7372. HOLZAPFEL, RUPERT. Diskussion der Ergebnisse der meteorologischen Beobachtungen im Bereich der Weststation. (Deutsche Grönland-Expedition Alfred Wegener. 1929 und 1930-1931. Wissenschaftliche Ergebnisse, 1939. Bd. 4, Meteorologie, Halbbd. 2: Die Ergebnisse, p. 137-248, illus., tables, diagrs.) *Title tr.:* Discussion of the results of meteorological

observations taken at the West Station and in its vicinity. (German Greenland Expedition Alfred Wegener, 1929 and 1930-1931)

Includes, besides the results from the West Station on the edge of the inland ice, at 71°12'N. 51°07'42"W., those from the stations at Kamarujuk, 71°09'N. 51°14'W., and at Umanak, 70°40'N. 52°09'W., where simultaneous observations were made, Sept. 1930-Aug. 1931.

Contains an analysis of air temperature at Kamarujuk, West Station, and Umanak, June 1930-Sept. 1931, and a comparison of them according to their average, and frequency values, by monthly, pentadal, daily and bihourly periods, the number of days with maximum and minimum temperatures by five-degree intervals, and the number of hours when the temperature exceeded specified temperature values. Thermograph charts show foehn effect on temperature (p. 137-86).

A comparison and tabulation of the average and extreme monthly pressure at West Station and Umanak, July 1930-Sept. 1931. Bihourly averages, Nov. 1930-Sept. 1931 showing daily course of pressure. Average monthly values and/or daily course values (8, 14, and 21 hours or bihourly values) of humidity, wind direction and speed, and cloudiness during the same period (p. 186-205, 207-22, and p. 326-27).

The results of 24 pilot balloon ascents at West Station, Sept. 17, 1930 to July 21, 1931, tabulated for standard levels up to 10,000 meters (p. 206).

Study of the typical weather situation in connection with the general synoptic weather situation over Greenland. Summary of the general characteristics of weather in a Greenland fiord, on the basis of observations made in Nordost Bugt (p. 222-48).

Copy seen: DSI-M.

7373. HOLZAPFEL, RUPERT. Ergebnisse der Registrierung der Windgeschwindigkeit an der Weststation. (Deutsche Grönland-Expedition Alfred Wegener. Wissenschaftliche Ergebnisse, 1940. Bd. 5, p. 73-91, incl. 14 p. of tables) *Title tr.:* Results of the wind speed records of the West Station. (German Greenland Expedition Alfred Wegener, 1929 and 1930-31)

The West Station was on the edge of the inland ice northeast of Kamarujuk, at about 71°12'N. 51°07'42"W.

Contains hourly data in meters per second, for each day, Aug. 10, 1930–Sept. 16, 1931 (with a few interruptions); mean daily data for each of the same months, taken at Scheideck, 71°10'51"N. 51°08'25"W., and brief discussion. *Copy seen:* DLC.

Wissenschaftliche Ergebnisse, 1939, Bd. 4, Meteorologie, Halbbd. 2: Die Ergebnisse, p. 249–73, incl. 15 p. of tables *Title tr.:* Meteorological observations in Kamarujuk. (German Greenland Expedition Alfred Wegener, 1929 und 1930–1931)

Kamarujuk lies at 71°09'N. 51°14'W., the innermost corner of Kamarujuk (i.e. Qaumarujuk) Fiord, in the Umanak Fiord region. It was a supplies station only, and made meteorological observations incidentally to the planned work of the expedition. This paper gives the results of its daily routine observations of temperature and humidity, wind direction and force and cloudiness at 8, 14 and 21 hours, July 8, 1930 to Sept. 22, 1931 (temperature and humidity only during July 7–Dec. 18, 1930), with weather notes.

Nachträge, Halbbd. 2: Die Ergebnisse, p. 326–28) *Title tr.:* The West Station and Umanak Station. (German Greenland Expedition Alfred Wegener, 1929 und 1930–1931)

Meteorological observations taken at about 71°12'N. 51°05'W. on the edge of the inland ice and at Umanak, 25 meters above sea level, about 70°40'N. 52°09'W.

Contains 1. Tables of daily meteorological observations at 8, 14 and 21 hours at the Umanak station, June 20, 1930 to Sept. 30, 1931 (p. 388–403).

2. Remarks on the methods and equipment of the West Station, and tables of daily observations at 8, 14, and 21 hours, Aug. 10, 1930 to Sept. 19, 1931; pressure records Nov. 10, 1930 to Sept. 19, 1931; two-hourly pressure tables, same dates; two-hourly temperature tables, Aug. 6, 1930 to Sept. 18, 1931; remarks on the weather to accompany these daily observations; upper wind observations from twenty-five aerological ascents (p. 404–69).

3. Radiation observations. Tables of hourly sunshine records, Aug.–Oct.

1930, Feb.-Sept. 1931, with actinograph records; intensity of solar radiation (same dates) and other tables of total intensities and intensities through red filters, monthly heat sums, etc. (p. 469-513).

4. Measurements of the temperature of the snow surface at the winter house, i.e. West Station (p. 513-17).

5. The fluctuation of barometric altitude determination between Umanak and Scheideck (71°10'N. 51°08'W.) (p. 317-22).

6. Simultaneous observations at Scheideck and at the winter house (West Station) which were 2½ kilometers apart at about the same altitude on the west edge of the inland ice. Tables of temperature and wind, for winter and summer, with discussion of conclusions to be drawn from them.

7379. **HOLZWORTH, JOHN MICHAEL,** 1888-. The wild grizzlies of Alaska; a story of the grizzly and big brown bears of Alaska, their habits, manners and characteristics, together with notes on mountain sheep and caribou, collected by the author for the United States Biological Survey. New York, London, G. P. Putnam's Sons, 1930. xxi, p., 1 l., 417 p. col. front., 80 plates, maps on lining-papers.

A plea for protection of the grizzly and big brown bear, based on studies during the summer and fall of 1927-

29, on the Islands of Admiralty, Chichagof, and Baranof (with one fall spent in the interior of Alaska). Includes an account of the author's three expeditions, including a trip to Chickaloon Pass (north of Seward, and east of the Alaska Railway); sections on the classification, description, habits, food, intelligence, popular fallacies concerning, and legal protection of bears; methods of making, and value of motion pictures of bears and large game; and notes on mountain sheep and caribou.

Appendix: Merriam, C. H. *Ursus holzworthi*, a new grizzly from the Talkeetna Mountains, Alaska (p. 409-12). Indexed. *Copy seen:* DSI-M.

7380. **HOMÉN, VIKTOR THEODOR,** 1858-, *editor.* East Carelia and Kola Lapmark, described by Finnish scientists and philologists, Theodor Homén [editor] London, New York [etc.] Longmans, Green and Co., 1921. xiii p., 1 l., 264 p. 61 illus. (music) plates, 14 maps (13. fold.)

A translation, with slight changes, from the Swedish edition which is a translation of the Finnish edition (*Itä-Karjala ja Kuollan Lappi*, Helsinki, [1918]) with the addition of a chapter and map on the claim of Finland to a share in the arctic coast.

A general description of the physical, social, and economic geography of the Kola and Karelia areas before 1917, by J. G. Gravö, O. Lönnroth, and others, under the editorship of V. T. Homén. Includes such topics as vegetation zones, Lapp, Finn, and Russian population, fishing on the Murman and Ter coasts, and history of the Norwegian-Swedish-Russian-Finnish boundaries in the Pechenga area.

Maps include: (1) Norwegian-Russian-Finnish boundaries in the Pechenga area, 1826-1920, scale 1:1,000,000 (fold.); (2) geological map of eastern Karelia and Kola Lapland, scale about 1:2,500,000 (fold.); (3) three maps of northern Fennoscandia and vicinity showing twenty-year mean annual, July, and January isotherms (fold.); (4) vegetation provinces, eastern Karelia and Kola Lapland, scale about 1:5,000,000; (5) three maps of eastern Karelia and Kola Lapland, scale about 1:2,700,000 (fold.), showing distribution of plants of exacting habitats, and distribution of soil according to its

quality as deduced in part from botanical information, (6) eastern Karelia and Kola Lapland, scale 1:2,000,000 (fold.), showing topographic features, political and linguistic boundaries, northern limit of pine and fir, and communes ranked by size of population.

7385. HOOKER, Sir JOSEPH DALTON, 1817-1911. Notes on the plants. (In: Markham, Sir A. H. A polar reconnaissance 1879, pub. 1881. Appendix A. p. 323-32)

Discussion of phytogeographic relationships of West Greenland, West Spitsbergen and Novaya Zemlya; and a catalog, with localities, of eighty-nine species of fungi (one), lichens (thirteen), mosses (seventeen), liverworts (one), and flowering plants (fifty-seven), collected by Markham in Novaya Zemlya, 1879.

Copy seen: DLC; NNS Stef.

7386. HOOKER, Sir JOSEPH DALTON, 1817-1911. On some collections of arctic plants, chiefly made by Dr. Lyall, Dr. Anderson, Herr Miertsching, and Mr. Rae, during the expeditions in search of Sir John Franklin, under Sir John Richardson, Sir Edward Belcher, and Sir Robert M'Clure. (Linnean Society of London. Journal; botany, 1857. v. 1, p. 114-24)

A record of the plant collections of (1) Dr. Lyall, on Sir E. Belcher's expedition, 1852-54, in Disko and Whale Fish Islands, and Cape York (Greenland) and in Lancaster Sound, Beechey Island, Wellington Channel, and Northumberland Sound; (2) M'Clure's expedition, 1850-54, in Banks Island, west coast of Prince of Wales Island, Cape Bathurst, and mainland shore south of Banks Island; (3) Richardson's expedition 1847-50, from Great Bear Lake to Coppermine River mouth, and south shore of Victoria Island. The record lists from (1), one hundred fifty-two species of flowering plants, mosses and liverworts; from (2), one hundred eight flowering plants; and from (3), seventy-nine flowering plants.

Copy seen: DLC.

7387. HOOKER, Sir JOSEPH DALTON, 1817-1911. Outlines of the distribution of arctic plants. (Linnean Society of London. Transactions, 1861. v. 23, p. 251-348, tables, map)

Discussion of about nine hundred species which grow above the Arctic Circle, and a tabular view of their distribution in northern Europe, Asia, western and eastern North America and Greenland, and remarks on slow changes of climate during and since the glacial period as the factor accounting for their distribution.

Copy seen: DSI-M.

A classified catalog, with notes on occurrence, some descriptions and localities, of two hundred fourteen species of flowering plants from the Melville Peninsula and two nearby islands (Winter and Igloodik).

Copy seen: DLC.

7389. HOOKER, Sir WILLIAM JACKSON, 1785-1865. Botany. (*In*: Parry, Sir W. E. Journal of a third voyage . . . 1824-25, *pub.* 1826. Appendix. p. 121-31)

Classified list (with reference to mention by earlier expeditions in the region, localities, and some notes) of sixty-six flowering plants, two ferns, three mosses, and twelve lichens, from Port Bowen (Baffin Island) North Somerset Island or Whale-fish Islands (West Greenland). *Copy seen:* DLC.

7390. HOOKER, Sir WILLIAM JACKSON, 1785-1865. Botany. (*In*: Parry, Sir W. E. Narrative of an attempt to reach the North Pole . . . 1827, *pub.* 1828. Appendix. p. 207-222)

Based on plants collected principally by the men who remained with the *Hecla* at Treurenberg Bay (north coast, West Spitsbergen) but including a few from Ross Islet (the most north-

erly), and other islands of the archipelago. A classified list, with references to occurrences as recorded in narratives of earlier voyages, and localities, of forty species of flowering plants, two ferns, twenty-one species of mosses and liverworts, twenty-three lichens, and two algae (including a discussion of red snow); with an additional list of forty-five species (of all groups) from Hammerfest, Norway.

Copy seen: DLC.

7391. HOOKER, Sir WILLIAM JACKSON, 1785-1865. Flora boreali-americana; or, The botany of the northern parts of British America: comp. principally from the plants collected by Dr. Richardson & Mr. Drummond on the late northern expeditions, under command of Captain Sir John Franklin, R.N. To which are added (by permission of the Horticultural Society of London), those of Mr. Douglas, from North-West America, and of other naturalists. London, H. G. Bohn [1829]-1840. 2 v. v. 1: vii, 351 p., front. (fold. map), 128 plates; v. 2: 328 p., plates 129-238. 30 x 24 cm.

Originally published in parts: v. 1, pt. 1, p. 1-48, 1829; pts. 2 and 3, p. 49-144, 1830; pts. 4-6 concluding v. 1, 1834; v. 2, pt. 7, p. 1-48, 1834; pt. 8, p. 49-96, 1838; pt. 9, p. 97-144, 1838; pt. 10, p. 145-92 [1838]; pt. 11, p. 193-241, 1839; pt. 12, p. 241-end. 1840. (dates given by B. D. Jackson in *Bulletin de l'herbier boissier*, 1893, v. 1, p. 298)

Botany of Canada, Alaska, and Greenland, exclusive of cryptogams except ferns, based upon the collections of the Franklin, Parry, Beechey, and other expeditions, giving description, synonymy, and locality of each species.

Copy seen: DLC.

7392. HOOKER, Sir WILLIAM JACKSON, 1785-1865. List of plants collected by Mr. Richard King, during the progress of the expedition. (*In*: Back, Sir G. Narrative of the Arctic Land Expedition, 1836. Appendix 2, p. 523-31)

List, with localities including Great Slave Lake and Back River.

Copy seen: DLC.

7393. HOOKER, Sir WILLIAM JACKSON, 1785-1865, and G. A. W. ARNOTT. The botany of Captain Beechey's voyage; comprising an account of the

plants collected by Messrs. Lay and Collie, and other officers of the expedition, during the voyage to the Pacific and Behring's Strait, performed in His Majesty's ship Blossom, under the command of Captain F. W. Beechey . . . in the years 1825, 26, 27, and 28. London, H. G. Bohn, 1841. 2 p. l., 485 p. 99 plates.

Includes lists, with discussion, of 115 species of plants found in the Avacha Bay area, Kamchatka (p. 111-20), and 232 species found in the Alaska coastal area from 67°N. to 71°N. (p. 120-34). A more detailed treatment of the Alaskan plants is contained in Hooker's *Flora boreali-americana*, [1829]-1840, q.v. **Copy seen:** DLC.

7394. HOOPER, CALVIN LEIGHTON. Eruption of Bógoslov. (American Geographical Society, N. Y. Journal (Bulletin) 1891. v. 23, p. 582-82)

A letter from the captain of U. S. Revenue cutter *Corwin*, dated St. Paul's Island, Bering Sea, July 13, 1891, reporting on work carried out upon Bógoslov Island, and describing its condition. **Copy seen:** DLC.

HOOPER, CALVIN LEIGHTON, *see also* U. S. Revenue Cutter Service. Report sea-otter banks Alaska. 1897.

7395. HOOPER, WILLIAM HULME, 1827-1854. Ten months among the tents of the Tuski, with incidents of an arctic boat expedition in search of Sir John Franklin, as far as the Mackenzie River, and Cape Bathurst. London, J. Murray, 1853. xv, [1] 417, [1] p. illus., 11 plates (part col.) fold. map.

An account of the expedition of H.M.S. *Plover*, under Capt. T. E. L. Moore, 1848-51, during which the ves-

sel wintered, 1848-49, on the Chukotsk Peninsula (Plover Bay), later to sail north and east through the Beaufort Sea. The author made two trips up the Mackenzie River to Fort Simpson and north again; then returned to England, overland through Canada. He includes in his narrative, detailed descriptions of the life, customs, dwellings, clothing and beliefs of the Chukchis, and (in less detail) of the North Alaska Eskimos; notes on the Mackenzie Eskimos and Indians, and on the sea and river ice, hunting, trapping and character of the territory covered in his journeys. **Copy seen:** DLC; NNSf.

7396. HOPE, C. E., and T. M. SHORTT. Southward migration of adult shorebirds on the west coast of James Bay, Ontario. (Auk, Oct. 1944. v. 61, p. 72-76)

Annotated list of fifteen species, and notes on general observations made, July 15-25, 1942, during a canoe trip from Fort Albany to Moosonee.

Copy seen: DSI-M.

7397. HOPKINS, DAVID M. Thaw lakes and thaw sinks in the Imuruk Lake area, Seward Peninsula, Alaska. (Journal of geology, Mar. 1949. v. 57, p. 119-31, 2 plates, sketch map, diags.)

The lakes and depressions are ascribed to subsidence following the thawing of perennially frozen ground. The author gives notes on geographic and geologic setting, frost riving and soil formation, distribution and character of perennially frozen ground; description of thaw lakes, discussion of their enlargement and eventual drainage; comparison of the origins of drained thaw lakes and thaw sinks; and evidence to show that the present climate of the area is cold enough to form a small thickness of permafrost, but that the present large thickness is probably unstable under existing climatic conditions. **Copy seen:** DGS.

7398. HOPKINS, LEONARD. The Kenai Peninsula, sportsmen's paradise. Alaska life, Mar. 1946. v. 9, no. 3, p. 28, 43)

Description of big game and remarks on fishing. **Copy seen:** DLC.

7426. HOUGH, ALFRED LACEY. An
army officer's trip to Alaska in 1869.
(Pacific Northwest quarterly, Jan.
1949. v. 40, p. 44-64) Edited by Rob-
ert G. Athearn.

Account of an inspection tour, July-
Aug. 1869, by the commander of the
Military Division of the Pacific, whom
the author accompanied. Hough de-
scribes his impressions of the natives,
climate and sealing, during the party's
visits to Sitka, Cook Inlet, and Kenai,
Kodiak, the Aleutian and Pribilof
Islands.

The lamp of the Eskimo. (U. S. Na-
tional Museum. Annual report, 1896,
pub. 1898. p. 1025-57, illus., 24 plates)

Based on the extensive collection in
the National Museum. A study of Es-
kimo lamps, their social significance,
technology and use for cooking, heat-
ing and lighting, their distribution and
form. Descriptions and discussion of
lamps used in Labrador, the Cumber-
land Sound region of Baffin Island,
Greenland, Mackenzie River region,
Point Barrow, west Alaskan coast, St.
Lawrence Island, northeastern Siberia,
south Alaskan coast and Aleutian
Islands; their design, structure and
use.

Copy seen: DLC.

(Meddelelser om Grønland. Bd. 144, nr. 1) Results of Danish East Greenland expeditions, 1926-39, under Lauge Koch. Appendix no. 1.

Description of (1) atmospheric pressure, (2) wind conditions, (3) temperature, and (4) humidity, cloudiness, visibility, and precipitation. Some ex-

amples of typical and extraordinary weather situations are given. Based on observational material from two fixed stations: Scoresbysund (70°29'N. 21°58'W.) 1924-40, and Myggbukta (73°30'N. 21°30'W.) 1922-40; with shorter series from Danmarks Havn (76°46'N. 18°45'W.) 1906-1908, and Sandodden (74°25'N. 20°30'W.) 1929-31. Bibliography (35 items).

Plates 1-11, illustrate atmospheric pressure, June-Sept., in each year, 1929-39, along the stretch Thorshavn to Myggbukta (62°N. 6°48'W.-73°30'N. 21°36'W.). *Copy seen:* DSI-M.

7452. HOWGATE, HENRY W. Congress and the North Pole. An abstract of arctic legislation in the Congress of the United States. [Kansas City, Mo.] Kansas City Review of Science and Industry, 1879. 1 p. l., 43 p.

Excerpts from correspondence and documents concerning various expeditions to the North American Arctic since the disappearance of Sir John Franklin.

Copy seen: DLC.

7453. HOWGATE, HENRY W. Plan for the exploration of the arctic regions. Paper read before the arctic meeting . . . Jan. 31, 1878. (American Geographical Society, N. Y. Journal, 1878. v. 10, p. 279-87)

The so-called "Howgate plan" involved the establishment of a colony at Lady Franklin Bay, Ellesmere Island, as a base from which exploratory work towards the North Pole could be carried on. Howgate describes the types of personnel, equipment, and provisions which (then) seemed necessary to the success of such an undertaking.

Copy seen: DLC.

7454. [HOWGATE, HENRY W.] Polar colonization. Memorial to Congress and action of scientific and commercial associations. [Washington, D. C., Beresford, printer, 1879?] 143 p. 2 plates, fold. map. Preface signed: Henry W. Howgate.

Contains a review of recent expeditions in the Smith Sound region; outline of plan for an expedition to, and establishment of a colony at Lady Franklin Bay on the northeast coast of Ellesmere Island; report on the Howgate Preliminary Arctic Expedition to Cumberland Sound, 1877-78 (preparations, instructions, and progress to Sept. 1877).

Appendix, p. 59-140, contains "Plan for the exploration of the arctic region," a paper read by the author at the American Geographical Society meeting, Jan. 31, 1878, also letters and statements by scientific and commercial organizations, and by various explorers (including Julius Payer, p. 113-27, John Rae, p. 127-32) endorsing Howgate's plan, supplying information and advice on arctic conditions and methods of exploration, equipment, etc.

Copy seen: DLC.

7455. [HOWGATE, HENRY W.] Polar colonization. The preliminary arctic expedition of 1877. Washington, Beresford, printer [1877?] 32 p.

A brief interim report on Howgate's Preliminary Polar Expedition to Cumberland Sound, 1877-78, and discussion of his polar colonization plan, an expedition to Lady Franklin Bay.

Copy seen: DLC.

7456. [HOWGATE, HENRY W.] Polar colonization and exploration. Washington, Beresford, printer [1877] 40 p. map.

Memoir addressed to members of Congress, reviewing previous expeditions and requesting support for the plan to establish "a temporary arctic colony" at Lady Franklin Bay.

Copy seen: DLC.

7457. [HOWGATE, HENRY W.] Proposed legislation, correspondence, and action of scientific and commercial associations in reference to polar colonization. Washington, D. C., Beresford, printer [1877?] 48 p.

Howgate's proposed expedition to establish a temporary colony at Lady Franklin Bay.

7458. HOWORTH, Sir HENRY HOYLE, 1842-1923. The condition of the arctic lands in the so-called glacial age. (Geological magazine, July 1893. New ser., decade 3, v. 10, p. 302-309)

Discussion of the extent of the ice age glaciation in Iceland, Greenland and Spitsbergen.

Copy seen: DGS.

7459. HOWORTH, Sir HENRY HOYLE, 1842-1923. The mammoth age was contemporary with the age of great glaciers. (Geological magazine, Apr. 1894. New ser., decade 4, v. 1, p. 161-67)

The author sets forth his views on the age of mammoths based on evidence in Siberia and Alaska.

Copy seen: DGS.

7460. HOWORTH, Sir HENRY HOYLE, 1842-1923. Recent elevations of the earth's surface in the northern circumpolar regions. (Royal Geographical Society. Journal, 1873. v. 43, p. 240-63)

General discussion of raised shore lines and other signs of elevation, on the islands and mainland throughout the Arctic, drawn from previously published papers.

Copy seen: DLC.

7461. HOWORTH, Sir HENRY HOYLE, 1842-1923. The recent geological history of the arctic lands. (Geological magazine, Nov. 1893. New ser., decade 3, v. 10, p. 495-500)

The author's views on the extent of the ice age in the Arctic, the former warmer climate there, and the evidence of more recent uplift, based on the results of Greenland plant studies; also his conclusions as to the paleogeographic plant distribution.

Henry Woodward's comment on this paper, appeared in the same volume of *Geological magazine*, p. 575-76.

Copy seen: DGS.

7462. HOWORTH, Sir HENRY HOYLE, 1842-1923. The true horizon of the mammoth. (Geological magazine, Apr. 1893. New ser., decade 3, v. 10, p. 161-63)

The author discusses controversial views, held by other scientists, concerning the age of remains found in the tundras overlying paleocrystic ice in northeastern Russia, Siberia and Alaska.

Copy seen: DGS.

7463. HOYT, JOHN CLAYTON, 1874-1946, and F. F. HENSHAW. Water supply of Nome region, Seward Peninsula, Alaska, 1906. Washington, U. S. Govt. Print. Off., 1907. 52, viii p. 6 plates (incl. double sketch map) diagr. (U. S. Geological Survey. Water-supply and irrigation paper no. 196)

Based on investigations, June 11-Oct. 3, 1906, in the placer and mining section of the Nome region. Contains flow data from forty-five gaging stations (with descriptive notes) on Nome, Grand Central, Kruzgamepa, Sinuk, Cripple, Penny, Snake, Flambeau, and Eldorado River drainage basins, on Salmon Lake, and Imuruk basin, and their ditch systems. *Copy seen:* DGS.

Contents: Factors that modify winter run-off. Formation of ice (frazil and anchor). Effect of ice on relation of stage to discharge. Computation of flow of frozen streams. Field methods, etc. *Copy seen:* DGS.

7465. HÖZAWA, SANJI. Report on the calcareous sponges collected during 1906 by the United States fisheries steamer Albatross in the northwestern Pacific. (U. S. National Museum. Proceedings, 1918, *pub.* 1919. v. 54, p. 525-56, illus., plates 84-85)

Full descriptions (with localities of specimens taken) of thirteen (including eleven new) species; with a record of the collecting stations, about half of which were in waters off the Commander and westernmost Aleutian Islands. *Copy seen:* DLC.

7466. HRDLIČKA, ALEŠ, 1869-1943. Alaska—an appraisal. (Alaska sportsman, Feb. 1937. v. 3, no. 2, p. 12, 25-26, illus.)

Friendly and critical remarks on many physical and social characteristics of Alaska. *Copy seen:* DLC.

7467. HRDLIČKA, ALEŠ, 1869-1943. Alaska diary, 1926-1931 [by] Aleš

Hrdlička . . . Published with the permission of the Secretary of the Smithsonian Institution. Lancaster, Pa., Jaques Cattell Press, 1943. xv, 414 p. incl. front., 232 illus. (incl. ports, maps)

Day-to-day notes kept during the author's four journeys in Alaska 1926-31, to make anthropological and archaeological investigations, and to collect evidence on migrations from northeast Asia to America. The notes record the course and happenings of the two journeys up the Yukon River (1926, 1929), up the Kuskokwim River (1930), and the Nushagak (1931), also a trip from Nome, by St. Lawrence Island and the Diomedes to Kotzebue (1926); with remarks on the Indians and Eskimos met from day to day, on the scientific work, the physical characteristics of country traversed and on the islands land bridge between Asia and America, as observed across Bering Strait.

Scientific reports published as results of these journeys are listed, p. 405-406. *Copy seen:* DLC.

7468. HRDLIČKA, ALEŠ, 1869-1943. The Aleutian and Commander Islands and their inhabitants. Philadelphia, Wistar Institute of Anatomy and Biology, 1945. xx, 630 p. incl. front., 239 illus., maps.

Results of expeditions, under auspices of the Smithsonian Institution, to Aleutian and Commander Islands, 1936-38.

Contents: General notes on geology, climate, ice floes and bergs, flora and fauna, human settlements, historical data.

Ethnographical notes from literature on the Aleuts (their language, related peoples, settlements, dwellings, utensils, etc., knowledge, religion, etc., amusements, personal habits, women, etc.); a comprehensive survey of various aspects of material intellectual and social culture as recorded in the literature.

Smithsonian explorations and excavations (day-to-day record of each season's work, 1936-38, on the various islands).

Archaeological remains in the Aleutians (descriptions of the sites, the skeletal material and artifacts, with some summary of the results of the excavations).

Physical anthropology (review of earlier observations and discussion of the author's observations and measurements). (The measurements are published in the author's *Catalog of human crania* [etc.] 1943, 1944, q.v., and his conclusions reviewed by H. B. Collins in *American journal of physical anthropology*, 1945. n.s. v. 3, p. 355-63).

Appendices: 1. The Kagmagil fragments (clothing, etc., discussed by Miss O. Settles and Dr. A. C. Whitford). 2. Animal remains. 3. Games. 4. Bibliography, p. 619-24. **Copy seen:** DLC.

7469. HRDLIČKA, ALEŠ, 1869-1943. The ancient and modern inhabitants of the Yukon. (Smithsonian Institution. Explorations and field-work of the Smithsonian Institution in 1929, *pub.* 1930. Pub. no. 3060. p. 137-46, illus.)

Preliminary account of the trip down the Yukon, from Whitehorse to Marshall, which is described in full in the author's *Anthropological survey in Alaska*, 1930, q.v., and *Alaska diary*, 1943, q.v. **Copy seen:** DLC.

7470. HRDLIČKA, ALEŠ, 1869-1943. Anthropological explorations on Kodiak Island, Alaska. (Smithsonian Institution. Explorations and field-work of the Smithsonian Institution in 1932, *pub.* 1933. Pub. no. 3213. p. 41-44, illus.)

Preliminary report on the second season's excavations at Uyak Bay, described in detail in the author's *Anthropology of Kodiak Island*, 1944, q.v. **Copy seen:** DLC.

7471. HRDLIČKA, ALEŠ, 1869-1943. Anthropological explorations on the Aleutian and Commander Islands. (Smithsonian Institution. Explorations and field-work of the Smithsonian Institution in 1937, *pub.* 1938. Pub. no. 3480. p. 87-94, illus.)

Preliminary account of the author's visit to Bering Island (Commander Islands) July 12-14, of excavations on Amaknak, Agattu and other islands, and exploration of burial caves on Shiprock and Kagamil Islands. A more complete account is given in *The Aleutian and Commander Islands and their inhabitants*, q.v. **Copy seen:** DLC.

7472. HRDLIČKA, ALEŠ, 1869-1943. Anthropological studies in England, Russia, Siberia, and France, 1939. (Smithsonian Institution. Explorations and field-work of the Smithsonian In-

stitution in 1939, *pub.* 1940. Pub. no. 3586. p. 73-78, illus.)

Brief account of the author's trip to Moscow, Leningrad and Irkutsk to study neolithic and later human skeletal remains from Siberia. The results of the study are given in his *Crania of Siberia*, q.v., and the individual measurements presented in full in his *Catalog of human crania in the United States National Museum Collections: non-Eskimo people of the northwest coast, Alaska, and Siberia*, q.v.

Copy seen: DLC.

7473. HRDLIČKA, ALEŠ, 1869-1943. Anthropological survey in Alaska. (U. S. Bureau of American Ethnology. Forty-sixth annual report, 1928/29. Washington, 1930. p. 19-374. 29 illus., 61 plates (incl. ports., maps))

Results of a trip under Bureau of American Ethnology, May-Sept. 1926, to investigate surviving Indians and Eskimos, to trace old settlements and migration, and to collect skeletal and archeological material.

Contains day-to-day notes from the author's diaries, on the country through which he traveled, the populated places and/or persons met; his observations and comments on Indians and Eskimos along the southeast coast and in central Alaska along the Yukon and Tanana Rivers: their settlements, history, present conditions, archeology, physical characteristics and skeletal remains (with measurements). Notes on the western Eskimo along the coast from Prince William Sound and Kodiak Island to Point Barrow, the St. Lawrence and Diomed Islands: a résumé of previous investigations in the region, sites and settlements, archeology, physical characteristics and skeletal remains (with measurements). Origin and antiquity of the Eskimo, a résumé of previous opinions and theories, discussion and conclusions indicated by the present data. Bibliography p. 367-74. **Copy seen:** DLC.

7474. HRDLIČKA, ALEŠ, 1869-1943. Anthropological work in Alaska. (Smithsonian Institution. Smithsonian miscellaneous collections, 1927. v. 78, no. 7, *Explorations and field-work of the Smithsonian Institution in 1926*, p. 137-58, illus.)

Preliminary report on the trip, May-Sept. 1926, of which the results were

published as Hrdlička, A. *Anthropological survey in Alaska*, 1930, q.v. and *Alaska diary*, 1943, q.v.

Copy seen: DLC.

7475. HRDLIČKA, ALEŠ, 1869-1943. Anthropological work in Alaska. (Smithsonian Institution. Explorations and field-work of the Smithsonian Institution in 1931, *pub.* 1932. Pub. no. 3134. p. 91-102, illus.)

Brief account of trip along the Nushagak, Molchatna, and Woods Rivers, Bristol Bay, Kvichak River, and Illiamna Lake, to study present Eskimo population and search for old remains. Described more fully in the author's *Alaska diary*, 1943, q.v. Excavations were begun at Uyak Bay, Kodiak Island, the results of which, extending over a period of five years, are presented in his *Anthropology of Kodiak Island*, 1944, q.v. *Copy seen:* DLC.

7476. HRDLIČKA, ALEŠ, 1869-1943. Anthropological work on the Kuskokwim River, Alaska. (Smithsonian Institution. Explorations and field-work of the Smithsonian Institution in 1930, *pub.* 1931. Pub. no. 3111. p. 123-34, illus.)

Brief description of trip on the Kuskokwim, upstream to Stony River and downstream to Apogak to collect skeletal material and make physical studies of the living Eskimos. The results are presented more fully in the author's *The Eskimo of the Kuskokwim*, q.v. *Copy seen:* DLC.

7477. HRDLIČKA, ALEŠ, 1869-1943. The anthropology of Kodiak Island. Philadelphia, Wistar Institute of Anatomy and Biology, 1944. xix, 486 p. incl. front. (port.) illus. (incl. maps)

This work, one of those resulting from the author's investigations in Alaska, 1926-38, has as object: "to give whatever of note has been preserved on the Kodiak natives by the Russians and others; to detail the results of our surveys and excavations; and to show the essentials relating to the physical characteristics of both the Koniag and the pre-Koniag populations of the region."

Contents: Historical data (excerpts from the literature on the island and its inhabitants, their racial affinities, material and social culture, customs, etc.). Surveys of Kodiak Island and

neighboring mainland. Excavations (day-to-day record of Smithsonian Institution excavations at Uyak Bay, 1931-36). Physical anthropology of Kodiak (descriptions of present-day inhabitants and of skeletal remains excavated by the author, with some comparative discussion of affinities with Eskimos, Indians and Aleuts; also remarks on migration from Asia). (The measurements are published in the author's *Catalog of human crania* [etc.] 1943, 1944, and his conclusions reviewed by H. B. Collins in *American journal of physical anthropology*, 1945. n. s. v. 3, p. 355-63).

Appendix: A. Stone and bone artifacts from Uyak. B. Animal and plant life. Bibliography, p. 480-82.

Copy seen: DLC.

7478. HRDLIČKA, ALEŠ, 1869-1943. Archeological excavations on Kodiak Island, Alaska. (Smithsonian Institution. Explorations and field-work of the Smithsonian Institution in 1934, *pub.* 1935. Pub. no. 3300. p. 47-52, illus.)

Description of the 1934 excavations at Uyak Bay, described in detail in *The Anthropology of Kodiak Island*, q.v. *Copy seen:* DLC.

7479. HRDLIČKA, ALEŠ, 1869-1943. Archeological expedition to Kodiak Island, Alaska. (Smithsonian Institution. Explorations and field-work of the Smithsonian Institution in 1935, *pub.* 1936. Pub. no. 3382. p. 47-52, illus.)

Brief account of the excavations at Uyak Bay, May 27-Aug. 17, 1935, described in *The Anthropology of Kodiak Island*, q.v. *Copy seen:* DLC.

7480. HRDLIČKA, ALEŠ, 1869-1943. Archeological explorations on Kodiak and the Aleutian Islands. (Smithsonian Institution. Explorations and field-work of the Smithsonian Institution in 1936, *pub.* 1937. Pub. no. 3407. p. 57-62, illus.)

Brief account of author's first season's work in the Aleutian Islands, when excavations were made on Amaknak, Atka, Kiska, and Attu, and mummies collected from burial caves on Kagamil. Results are described more fully in *The Aleutian and Commander Islands and their inhabitants*, q.v. *Copy seen:* DLC.

7481. HRDLIČKA, ALEŠ, 1869-1943. Artifacts on human and seal skulls

from Kodiak Island. (American journal of physical anthropology, 1941. v. 28, p. 411-18, 2 plates)

Descriptions of artificially perforated human bones, and of artificial ivory eyes, found in skeletal remains in sites excavated on Kodiak Island, and other Alaskan localities; also note of custom of removing the inner ear of seals.

Copy seen: DLC.

7482. HRDLIČKA, ALEŠ, 1869-1943. Catalog of human crania in the United States National Museum collections: Eskimo in general. (U. S. National Museum. Proceedings, 1942 *pub.* 1943. v. 91, p. 169-429 incl. *illus.* (map) tables)

Contents: Introduction (notes on method of measurement). The groups and territory included. Catalog (with measurements of some two thousand Eskimo crania, mainly from Alaska, with a few specimens from northern Canada, and Greenland).

Copy seen: DLC.

7483. HRDLIČKA, ALEŠ, 1869-1943. Catalog of human crania in the United States National Museum collections: non-Eskimo people of the northwest coast, Alaska, and Siberia. (U. S. National Museum. Proceedings, 1944. v. 94, p. 1-172)

Contents include measurements of crania of Indians of Alaska, the Yukon and Northwest Territories of Canada, Koniags and pre-Koniags of Kodiak Island, Aleuts and pre-Aleuts of the Aleutian Islands; Samoyeds, Ostyaks, Voguls, Tungus, Buryats, Ulchis, Gilyaks, Yakuts, Yukaghirs, Orochis, Koryaks, Lamuts, Kamchadals, Chukchis. The Siberian crania, except for some of the Buryat, are in the museums of Moscow, Leningrad, and Irkutsk, and were measured by Dr. Hrdlička in 1939. *Copy seen:* DLC.

7484. HRDLIČKA, ALEŠ, 1869-1943. Catalogue of human crania in the United States National Museum collections. (U. S. National Museum. Proceedings, 1924. v. 63, art. 12. 51 p. incl. tables)

Contains measurements of crania of Eskimos, Indians and of some northern Asiatic peoples, based on the U. S. National Museum's collection in 1924.

This publication is superseded by the author's *Catalog of human crania, Eskimo in general*, 1943 and *Catalog*

of human crania, non-Eskimo people of the northwest coast, Alaska and Siberia, 1944, q.v. *Copy seen:* DLC.

7485. HRDLIČKA, ALEŠ, 1869-1943. The coming of man from Asia in the light of recent discoveries. (Smithsonian Institution. Annual report, 1935, *pub.* 1936, p. 463-70, plates)

Reprinted with revisions (bringing article up to date) . . . from the American Philosophical Society. Proceedings, 1932. v. 71, no. 6.

Résumé (with map showing sites) of systematic explorations carried on along western coast and islands of Alaska, 1926-35, under auspices of the Smithsonian Institution and summary of resultant conclusions covering migrations of peoples from Asia: their routes, settlements, differentiation in physical characteristics, distribution, culture, languages, etc. Appended is a list of author's (18) contributions to this subject. *Copy seen:* DLC.

7486. HRDLIČKA, ALEŠ, 1869-1943. Contribution to the anthropology of Central and Smith Sound Eskimo. (American Museum of Natural History. Anthropological papers, 1910. v. 5, pt. 2, p. 177-280, 15 plates)

Measurements and descriptions of skeletal remains and of living Eskimos from Southampton Island, Melville Peninsula and Smith Sound regions, the latter group including Eskimos brought by Peary in 1896 to New York.

Copy seen: DLC.

7487. HRDLIČKA, ALEŠ, 1869-1943. Crania of Siberia. (American journal of physical anthropology, 1942. v. 29, p. 435-81, incl. tables)

Discussion with annotated tables of measurements, of neolithic crania and long bones from Lena and Angara River regions, also of other Siberian skeletal remains, in museum collections in Moscow, Leningrad and Irkutsk. Note of the tribal groups represented (including Chukchis, Gilyaks, Koryaks, Ostyaks, Samoyeds, Tungus, Yakuts and Yukaghirs). Comparison of Siberian and North American types, of Chukchis and Eskimos, the Tungus and Aleuts, for evidence of racial affinity. Bibliography, p. 472-73.

Copy seen: DLC.

7488. HRDLIČKA, ALEŠ, 1869-1943. Diseases of and artifacts on skulls

and bones from Kodiak Island. Washington, 1941. 1 p. l., 14 p. 11 plates on 6 l. (Smithsonian Institution. Miscellaneous collections. v. 101, no. 4. Publication 3640)

Describes human skeletal material from a pre-historic Eskimo site on Uyak Bay, Kodiak Island, showing evidence of disease, of trepanation, or of post-mortem drilling, etc. Pathology was limited to senile arthritis. Numerous bones were cut or had been drilled for suspension; some skulls were made into cups or ladles.

7489. HRDLÍČKA, ALEŠ, 1869-1943. An Eskimo brain. (American anthropologist, 1901. New ser., v. 3, p. 454-500, diagr., 4 plates (incl. port.)) Full report; a preliminary report was published in American Medico-psychological Association. Proceedings, 1899.

Description, based on examination in 1896, and re-examination in 1901, of the brain of a Smith Sound Eskimo chief, with some comparative data.

Copy seen: DLC.

7490. HRDLÍČKA, ALEŠ, 1869-1943. The Eskimo child. (Smithsonian Institution. Annual report, 1941, pub. 1942. p. 557-62, 10 plates)

Contains general description of Eskimo custom in bearing and rearing children, and of the children growing up.

Copy seen: DLC.

7491. HRDLÍČKA, ALEŠ, 1869-1943. The Eskimo of the Kuskokwim. (American journal of physical anthropology, 1933. v. 18, p. 93-135, 10 plates)

Discussion and data of physical characteristics (in detail), based on the author's measurements of one hundred eighty-two, and examination of other, Eskimos of the Kuskokwim River region, 1930.

Copy seen: DLC.

7492. HRDLÍČKA, ALEŠ, 1869-1943. Exploration in the Aleutian and the Commander Islands. (Smithsonian Institution. Explorations and field-work of the Smithsonian Institution in 1938, pub. 1939. Pub. no. 3525. p. 79-86, illus.)

Brief account of Dr. Hrdlička's tenth, and last, Alaskan expedition, on which he visited Bering and Copper Islands in the Commander Islands (Aug. 2-6), examined burial caves on Shiprock, Kagamil, Amlia, and Ilak,

and excavated old middens on Amchitka, Umnak, and Amaknak. Described more fully in his *The Aleutian and Commander Islands and their inhabitants*, q.v.

Copy seen: DLC.

7493. HRDLÍČKA, ALEŠ, 1869-1943. Exploration of mummy caves in the Aleutian Islands. Part I. Previous knowledge of such caves. Original explorations. Part II. Further exploration. (Scientific monthly, Jan.-Feb. 1941. v. 52, p. 5-23, 113-30, illus., sketch maps)

Excerpts from publications of explorers and anthropologists describing mummy caves and related mortuary practices; account of the author's investigations 1936-38, and remarks on former mummy practices among natives of Kodiak Island and Prince William Sound region.

Copy seen: DLC; NNSf.

7494. HRDLÍČKA, ALEŠ, 1869-1943. Fecundity of Eskimo women. (American journal of physical anthropology, 1936. v. 22, p. 91-95)

Record and discussion of the number of births among Eskimo women of the Kuskokwim River region.

Copy seen: DLC.

7495. HRDLÍČKA, ALEŠ, 1869-1943. The genesis of the American Indian. International Congress of Americanists. 19th, Washington, 1915. Proceedings, 1917, p. 559-68)

Postulates migration of American Indians and Eskimos from Asia across Bering Strait and Aleutian Islands. Points to Asiatic peoples in Formosa, Philippines, Tibet, China, Mongolia, Japan, and Siberia, who resemble American Indians in physical type. Summary published in *Man*, Feb. 1917, v. 17, p. 29-30.

HUGHES, T. P., *see* Bowden, F. P., & T. P. Hughes. Mechanism of sliding on ice & snow. 1939.

7529. HUISH, ROBERT, 1777-1850, *compiler*. The last voyage of Capt. Sir John Ross, R. N. to the arctic regions; for the discovery of a north west passage; performed in the years 1829-30-31-32 and 33. To which is prefixed an abridgement of the former voyages of Captns. Ross, Parry & other celebrated navigators to the northern latitudes. Compiled from authentic information and original documents, transmitted by William Light, purser's steward to the expedition. Illus. by engravings from drawings taken on the spot. By Robert Huish. London, J. Saunders, 1835. 2 p. l., ii, 716, 44 p. front. (port.), 6 plates, map, fold. tables.

An unofficial narrative of the second Ross voyage in search of the Northwest Passage, 1829-1833. Preceded (p. 1-99) by a summary of previous explorations in search of the Northwest Passage. The narrative (p. 100-694) is apparently based largely upon statements by Mr. Light, of whom Captain (Sir John) Ross had been highly critical (in his *Biography of the "Victory's" crew*, 1835, q.v.) It includes many small incidents and details, particularly concerning the meals of the expedition and the contacts between the crew and Eskimos, and the customs of the Eskimos, with extensive derogatory references to Captain Ross. Vocabulary

(p. 697-703) of about 700 Eskimo words, presumably Netsilik.

Appendix (p. 704-716). General conclusions and correspondence (but not "Minutes of Evidence") from Great Britain, Parliament, House of Commons, Select Committee on the Expedition to the Arctic Seas. Report . . ., [1834], q.v.

Supplement (44 p.) On the position of the North Magnetic Pole. Discussion of the attainment of the Magnetic Pole by Commander J. C. Ross. Includes testimony before the House of Commons Committee on the relative achievements of Captain John Ross and Commander James Clark Ross, and discussion thereof.

Sketch map of known lands in arctic North America. *Copy seen*: DLC.

7530. HUISH, ROBERT, 1777-1850, *compiler*. A narrative of the voyages and travels of Captain Beechey . . . to the Pacific and Behring's Straits; performed in the years 1825, 26, 27 and 28. For the purpose of co-operating with the expeditions under Captains Parry and Franklin. And of Captain Back, R. N., to the Thlew-ee-choh River & the Arctic Sea, in search of the expedition under Capt. J. Ross, R. N., being the conclusion of the series of voyages instituted for the discovery of the North West Passage. Comp. from original and authenticated documents by Robert Huish. London, W. Wright [1836?] 1 p. l., vi, 704 p. front., plates, ports.

Pt. 1 (p. 1-508). Slightly revised version, in the third person, of F. W. Beechey's *Narrative of a voyage to the Pacific and Beering's Strait, 1825-1828*, pub. 1831, q.v.

Pt. 2 (p. 509-704). Condensed version (and lacking scientific appendices) of George Back's *Narrative of the Arctic Land expedition to the mouth of the Great Fish River, 1833-1835*, pub. 1936, q.v. Includes (p. 509-531) introductory information on the purpose and plans of the expedition, and on the British campaign to raise funds for the expedition for relief of the possible survivors of the second Ross expedition.

7538. HULTÉN, ERIC, 1894– Eruption of a Kamtchatka volcano in 1907 and its atmospheric consequences. (Geologiska föreningen. Förhandlingar, 1924. Bd. 46, p. 407–417, illus., map)

Describes results, observed in 1921 and 1922, of the eruption in 1907 of a volcano (called Ksudatch by the au-

thor) near Petropavlosk in southern Kamchatka. Includes note of optical phenomena resulting from this and other volcanic eruptions and a map of southern Kamchatka prepared by the author; bibliography, p. 416-17.

Copy seen: DLC.

7539. HULTÉN, ERIC, 1894- . Finnes *Carex stylosa* C. A. Meyer i Skandinavien? (Botaniska notiser, 1943, häfte 3, p. 428-32, illus. text maps) *Title tr.*: Is *Carex stylosa* C. A. Meyer found in Scandinavia?

Contains a critical study of *Carex stylosa*, a sedge known from Greenland, arctic Asia, Kamchatka and arctic America, and *C. Bigelovii*, an arctic Scandinavian species (Norway, Sweden) often confounded with *C. stylosa*.

Copy seen: MH-A.

7540. HULTÉN, ERIC, 1894- . Flora of Alaska and Yukon. I-IX. Lund, 1941-1949. 1481 p. 5 plates (pt. IX), fold. map. 1096 small sketch maps. (Lund. Universitet. Årsskrift. Ny följd, Avd. 2, Bde. 37, nr. 1; 38 nr. 1; 39 nr. 1; 40 nr. 1; 41 nr. 1; 42 nr. 1; 43 nr. 1; 44 nr. 1; 45 nr. 1) Publication is still in progress.

The author, curator of the herbarium, Botanical Museum, University of Lund, made an expedition to the Aleutian Islands and southern Alaskan coast in 1932, studied material (previously collected from these regions) in several large herbaria in United States and Canada in 1938, also similar collections sent to him from other museums in the United States and Europe. This work is the first "scientific flora treating all species of vascular plants occurring in these two vast territories."

Contains a systematic list, with keys to genera, references to first description and synonyms, notes on habitat, abundance, etc., type locality and geographic distribution (showing reference to records quoted); of one thousand and ninety-six species, arranged as follows:

1. Pteridophyta, Gymnospermae and Monocotyledoneae (Pandanales and Helobiae).
2. Monocotyledoneae (Glumiflorae, Spathiiflorae).
3. Monocotyledoneae (Liliiflorae, Microspermae) Dicotyledoneae (Salicales).

4. Dicotyledoneae (Myricales, Fagales, Urticales, Santalales, Polygonales, Centrospermae, Ranales).

5. Dicotyledoneae. Rhocadales, Sarraceniales, Rosales I (Crassulaceae, Saxifragaceae).

6. Dicotyledoneae. Rosales II (Rosaceae).

7. Dicotyledoneae. Rosales III, Geraniales, Sapindales, Parietales, Myrtiflorae, Umbelliflorae.

8. Dicotyledoneae. Ericales, Primulales, Contortae, Tubiflorae 1, (Pollemoniaceae, Hydrophyllaceae).

9. Dicotyledoneae. Tubiflorae 2 (Boraginaceae, Labiatae, Solanaceae, Scrophulariaceae, Orobanchaceae, Lentibulariaceae), Plantaginales, Rubiales, Campanulatae 1 (Campanulaceae).

7550. HULTÉN, ERIC, 1894- . On the races in the Scandinavia flora. (*Svensk botanisk tidskrift*, 1949. Bd. 43, häfte 2-3, p. 383-406, illus., text maps)

Contains a discussion of the role of geographic races in Scandinavian flora, racial conditions, floral areas and their overlapping, including data on thirty-three species of flowering plants and vascular cryptogams with data on their total distribution.

Copy seen: MH-A.

7551. HULTÉN, ERIC, 1894- . Outline of the history of arctic and boreal biota during the Quaternary period; their evolution during and after the glacial period as indicated by the equiformal progressive areas of present plant species. Stockholm, Bokförlags aktiebolaget Thule, 1937. 168 p. illus., 43 maps on 22 leaves.

A phytogeographic study based on the author's work in Kamchatka and the Aleutian Island, and on the published literature. For about two thousand species of flowering plants, he summarizes his knowledge of their occurrence and distribution, between (roughly) the Lena and the Mackenzie Rivers. He gives an outline of the history of arctic and boreal biota in Quaternary time, based on material comprising all species known from northeastern Asia and northwestern America; a study of the influence of the glacial, warm interglacial, and post-glacial periods on plant distribution, on disjunction and reduction of the areals of various species and the radiation of most arctic plants from the Bering Sea area. Bibliography (130 items).

Copy seen: DLC; MH-A; NNStef.

7552. HULTÉN, ERIC, 1894-. The provenience of *Artemisia verlotorum* Lamolte. (Svensk botanisk tidskrift, 1929, pub. 1930. Bd. 23, häfte 4, p. 496-505, illus.)

Contains a taxonomic discussion in an effort to establish that the home of *Artemisia verlotorum*, a species of herbs occurring in Europe, is Kamchatka Peninsula; with a small bibliography. **Copy seen:** MH-A.

7553. HULTÉN, ERIC, 1894-. *Ranunculus sceleratus* subsp. *reptabundus* inom det fennoskandiska floraområdet. (Botaniska notiser, 1947, häfte 4, p. 350-52, illus.) **Title tr.:** *Ranunculus sceleratus* subsp. *reptabundus* in Fennoscandian floristic region.

Contains some critical notes on the herbaceous genus *Ranunculus sceleratus* subsp. *reptabundus* n. comb. and its distribution in Scandinavia, including Kuusamo, northern Finland, Kola Peninsula and Arkhangelsk.

Copy seen: MH-A.

7554. HULTÉN, ERIC, 1894-. Some geographical notes on the map of south Kamchatka. (Geografiska annaler, 1923. Årg. 5, häft. 4, p. 329-50, illus., maps)

Descriptive of Kamchatka south of 53°N., based on observations made during the Swedish Kamchatka Expedition, 1920-22, with details on volcanoes, hot springs and the population. Bibliography, p. 350.

Map (1:1 million) shows author's emendation of previous maps. Criticism of this paper was published by N. G. Kell' *Po povodu karty ūzhnoi Kamchatki E. Gultena*, 1925, q.v.

Copy seen: DLC.

7555. HULTÉN, ERIC, 1894-. *Stelaria longipes* Goldie and its allies. (Botaniska notiser, 1943, häfte 2, p. 251-70, illus. text maps)

Contains a critical study of *Stelaria longipes* and seven allied plant species, including Latin descriptions of *S. crassipes*, *S. alaskana*, *S. monantha* n. spp. and five new varieties and subspecies, with a list of localities covering all arctic regions.

Copy seen: MH-A.

7556. HULTÉN, ERIC, 1894-. Studies in the *Potentilla nivea* group. (Botaniska notiser, 1945. häfte 2, p. 127-48, illus., text maps)

Contains a critical revision of the group *Potentilla nivea*, with keys to nine species (two new species, two new vars., one new comb.), critical notes, and detailed data on their distribution covering all arctic regions in Europe, Asia, and North America.

Copy seen: MH-A.

7557. HULTÉN, ERIC, 1894-. Two new species from Alaska. Contribution to the flora of Alaska II. (Botaniska notiser, 1939, häfte 4, p. 826-29, illus.)

Contains Latin diagnoses of *Claytonia scammaniana* n. sp. from central Alaska and *Artemisia aleutica* n. sp. native to Kiska, Aleutian Islands.

Copy seen: MH-A.

7558. HULTÉN, ERIC, 1894-. Two new species of *Salix* from Alaska. Contribution to the flora of Alaska III. (Svensk botanisk tidskrift, 1940. Bd. 34, häfte 4, p. 373-76, illus.)

Contains Latin diagnoses of *Salix arctolitoralis* and *S. flagellaris* n. spp., two shrubby willows, native to northern Alaska and Mackenzie District.

Copy seen: MH-A.

7559. HULTÉN, ERIC, 1894-, and H. ST. JOHN. The American species of *Lysichitum*. (Svensk botanisk tidskrift, 1931, pub. 1932. Bd. 25, häfte 4, p. 453-64, illus., 2 plates, text map)

Contains Latin diagnosis of a perennial herb *Lysichitum americanum* n. sp., ("Lysichiton, a later spelling")

with detailed data on its distribution in Alaska and comparison with another closely related species of "skunk cabbage"—*L. camchateense* growing in southwestern Kamchatka Peninsula.

Copy seen: MH-A.

7560. HULTÉN, ERIC, 1894- , and H. ST. JOHN. Notes on *Lysichiton americanum*. (Svensk botanisk tidskrift, 1934. Bd. 28, häfte 2, p. 362)

Contains a brief supplementary note to the authors' *The American species of Lysichiton*, 1932, q.v., designating a type specimen for *L. americanum*, native to Alaska, and stating that the limit of this species should be drawn two degrees farther north, than was indicated in the previous paper's map.

Contains description of the Liard River area from Nelson River to South Nahanni River (with notes on routes); the Norman oil area, Mackenzie River district, (with notes on the rivers and streams, stratigraphic and structural geology); and copper ore from north shore of Great Bear Lake.

Map: geological (scale 5 mi.: 1 in.) Mackenzie River between Norman and Beaver River (65°-66°N.) including Carcajou River. *Copy seen:* DLC.

7565. HUME, GEORGE SHERWOOD, 1893- . Mackenzie River area, District

of Mackenzie, Northwest Territories. (Canada. Geological Survey. Summary report, 1923, *pub.* 1924. Pt. B, p. 1-15, illus. (map, table) plate, fold. map)

Contents geological results of investigation on the geology and oil resources between Wrigley and Norman, including Little Bear River area, and Brackett River-Whitefish Lake area.

Map: geological (scale about 1 in.: 1 mi.) 63°-65°05'N., 123°-127°W.

Copy seen: DLC.

7566. HUME, GEORGE SHERWOOD, 1893-. North Nahanni and Root Rivers area and Caribou Island, Mackenzie River District. (Canada. Geological Survey. Summary report, 1921, *pub.* 1922. Pt. B, p. 67-78, 2 plates)

Contents: General character, general geology and economic geology, p. 67-76. Ball, W. A. Tertiary plant remains collected by G. S. Hume in the Mackenzie River basin, p. 76. Gold prospects on Caribou Island, Great Slave Lake, p. 76-78.

Copy seen: DLC.

7567. HUME, GEORGE SHERWOOD, 1893-. Oil and gas in western Canada. Ottawa, King's Printer, 1928. v. 152 p. incl. illus., tables. fold. map. (Canada. Geological Survey. Economic geology series no. 5)

Contents include chapters on the origin and accumulation of oil and gas; carbon ratios of coal; and geophysical methods of locating oil; descriptions of oil and gas fields, with wells and operators noted (including Mackenzie River basin: Norman area (with map), Great Slave Lake area). Bibliographical notes throughout.

Appendix: List of wells drilled (including Northwest Territories).

Copy seen: DLC.

7568. HUME, GEORGE SHERWOOD, 1893-. Oil and gas in western Canada. (Second edition). Ottawa, King's Printer, 1933. v. 359 p. incl. illus., (maps) tables, diags. (Canada. Geological Survey. Economic geology series no. 5)

Text of first edition, 1928, rearranged slightly, with very brief additional material on the wells of Great Slave Lake area. *Copy seen:* DGS.

7569. HUME, GEORGE SHERWOOD, 1893-. Oil prospects of the Great Slave Lake and Mackenzie River areas.

(Canadian Institute of Mining and Metallurgy. Transactions, 1932. v. 35, p. 92-103, 439-40, illus.)

Descriptions of the geological formations of the Great Slave Lake area, and (with map) of the Fort Norman area, with remarks on the Arctic Red River area; discussion, p. 439-40.

Copy seen: DGS.

7570. HUME, GEORGE SHERWOOD, 1893-. Ordovician and Silurian fossils from Great Slave Lake. (Canada. National Museum. Bulletin, 1926. No. 44; Geology series, no. 46, p. 59-64, 2 plates)

A description of the beds and of six (including three new) species of brachiopods.

Copy seen: DLC.

7571. HUME, GEORGE SHERWOOD, 1893-, and T. A. LINK. Canol geological investigations in the Mackenzie River area, Northwest Territories and Yukon. Ottawa, King's Printer, 1945. 1 p. l, iii, 87 p. illus. (incl. map) 3 fold. maps. (Canada. Geological Survey. Paper 45-16)

Based on compilation of the various geological surveys previously made in the vicinity (reports of the Canol Project, Imperial Oil Ltd., and Canadian Geological Survey); description of the location, accessibility and extent of Canol Project, its general and economic geology, oil seepages, sulphur springs, Norman Wells field and favorable oil structures.

Map: geological map in three sheets, showing Mackenzie portion of Canol road.

Copy seen: DGS.

7572. HUMPHREYS, NOEL. Ellesmere Land and Grinnell Land. Oxford University Ellesmere Land Expedition, I. (Geographical journal, May, 1936. v. 87, p. 386-410)

A narrative of the fall and winter (1934-35) activities at Etah (the base), and the journey southward to Thule; the Ellesmere and Grinnell Land sledge journeys and the last days at Etah before the return home.

Copy seen: DLC.

7573. HUMPHREYS, NOEL. A note on the Oxford University Ellesmere Land Expedition, 1934. (Geographical journal, Mar. 1937. v. 89, p. 254)

Further remarks on the positions of Troll Fiord and Vendom Fiord on Ellesmere Island. *Copy seen:* DLC.

7574. HUMPHREYS, NOEL, and others. Oxford University Ellesmere Land Expedition. (Geographical journal, May 1936. v. 87, p. 385-443, 4 plates, sketch map, fold. map)

Results of an expedition, July 1934-Oct. 1935, sponsored by the Oxford University Exploration Club, and supported by the University, the Royal Geographical Society and private subscribers. The party was based at Etah and its members explored Ellesmere Island and carried out geological, ornithological and archeological work in the region of the base and on Ellesmere Island.

Contents: Summary of the work of the Expedition.

1. HUMPHREYS, N. Ellesmere Land and Grinnell Land.

2. SHACKLETON, E. The Scoresby Bay journey.

3. MOORE, A. W. The sledge journey to Grant Land.

Appendices: 1. BENTHAM, R. Geology.

2. HAIG-THOMAS, D. Ornithology.

3. SHACKLETON, E. Climate.

4. SHACKLETON, E. Clothing and equipment.

5. SHACKLETON, E. Dogs and sledges.

6. Wilmott, A. J. Botany (brief note announcing report to be made later).

Each paper except Appendix 6, appears in this Bibliography under its author's name. *Copy seen:* DLC.

7575. 110 DAGER SOM FANGER PÅ GRÖNLANDS INLANDSIS. BERNT BALCHEN REDDER AMERIKANSKE FLYVERE FRA DØDEN. (Polar-årboken, 1945. p. 38-45, illus. (port)). *Title tr.:* Imprisoned for 110 days on the Greenland inland ice. Bernt Balchen saves American flyers from death.

Describes the tragic events following the crash of a C53, a U. S. Army bomber on the icecap in 1944; the rescue of the surviving men by Bernt Balchen. *Copy seen:* NN.

7576. HUNFALVY, PAUL. Ueber die samojedische Sprache. Mit besonderer Beziehung auf die objective Conjugation derselben. (Archiv für wissenschaftliche Kunde von Russland, 1858. Bd. 17, p. 620-34, incl. table) *Title tr.:* On the Samoyed language. With special reference to its objective conjugation.

From the Hungarian journal, *Magyar nyelvészet*.

The author correlates Samoyed words with Hungarian and German, referring throughout to Matthias Alexander Castrén's *Nordische Reisen und Forschungen*, a series of twelve works published in St. Petersburg, 1849-58.

Copy seen: DLC.

7577. HUNNICUTT, EDWIN W. Bogoslof the moving island. (Alaska life, Apr. 1943. v. 6, no. 4, p. 55-58, map)

Popularly written account of this volcanic island in Bering Sea (53°55'N. 168°W.) which rose out of the water, May 18, 1796.

Copy seen: DLC.

HUNT, GEORGE, see Boas, F. Social organization of Kwakiutl. 1897.

7578. HUNTER, BILL. Let's go crabbing. (Alaska sportsman, Mar. 1945, v. 11, no. 3, p. 18-20, 23, illus.)

Description of fishing and processing crabs commercially in Alaska.

Copy seen: DLC.

7579. HUNTER, FENLEY. Frances Lake Yukon; Dawson 1887, Hunter 1923. Flushing, Long Island, 1924. 103 [1] p. 17 plates, 7 sketch maps.

Journal of a canoe trip during June to Aug. 1923, on Dease Lake and Dease and Frances Rivers to Frances Lake; trips in the surrounding country and return by the same route.

7584. HUSSEY, RUSSELL CLAUDIUS, 1888-. Corals, brachiopods, gastropods and ostracods from Putnam Highland. (In: Gould, L. M., and others. Contributions to the geology of Foxe Land, Baffin Island. *Pub.* in: Michigan. University. Museum of Paleontology. Contributions, 1928. v. 3, p. 71-75, 4 plates)

Descriptions of nine of the thirteen species of fossil invertebrates collected during the Putnam Baffin Expedition, 1927. *Copy seen:* DGS.

7585. HUSTICH, ILMARI. De årliga variationerna i tillväxtföreteelse och Skördevärden i Lappland. (Geografiska annaler, 1943. Årg. 25, p. 105-115) *Title tr.:* The annual variations in the growth and crop values in Lapland.

Author shows radical growth of pines in the regions of forest limit

69°30'-50'N. in Finnish Lapland, and correlates it (by July mean temperature) with relative crop values of cultivated plants (rye); shows that good years are relatively better and poor years poorer in forest limit regions than farther south; discusses briefly great variations in productive capacity of the soil north of the Arctic Circle, the short period of growth, the great intensity of light. Bibliography (17 items). *Copy seen:* DLC.

7586. HUSTICH, ILMARI. En anteckning om fjällemmel (Lemmus lemmus). (Societas pro fauna et flora fennica. Memoranda, 1934-35, *pub.* 1936. v. 11, p. 170-74) *Title tr.:* A note on lemmings (*Lemmus lemmus*).

Contains biological and ecological notes on lemmings (*Lemmus lemmus*), based on the author's observations in the summers of 1932-34, in Kittilä and Muonio parishes, Enontekiö region of Finnish Lapland. *Copy seen:* MH-A.

7587. HUSTICH, ILMARI. Anteckningar om tallen IV. Tallgränsen vid Saltoluokta i Lule Lappmark. (Societas pro fauna et flora fennica. Memoranda, 1947-1948, *pub.* 1947. v. 24, p. 18-24, illus.) *Title tr.:* Notes on conifers IV. Investigation of conifers in Saltoluokta and Lule Lappmark.

Contains observations on the growth rate of coniferous trees in the Saltoluokta (about 67°24'N. 18°33'E.) and Lule regions of Swedish Lapland, with diagrams, tabulated data, etc.

Copy seen: MH-A.

7588. HUSTICH, ILMARI. Botaniska notiser från västra Lappland. 1. Växtlokaler från skogsregionen. 2. Floran kring en timmerkoja i Kittilä Lappmark. 3. Några för alpina regionen på Pallas-och Ounastunturi nya kärlväxter. (Societas pro fauna et flora fennica. Memoranda, 1934-35, *pub.* 1936. v. 11, p. 154-70) *Title tr.:* Botanical notes from western Lapland. 1. Plant localities from the forest region. 2. Flora around a timber camp in Kittilä Lappmark. 3. Some species new to the vascular plant flora of Pallas and Ounastunturi regions.

Contains the results of botanical and geobotanical investigations, carried out by the author in 1932-34, in the Enontekiö and Kemi regions of Finnish Lapland, with a list of localities of sixty-three plants (pt. 1); a geobotani-

cal sketch of the vegetation in Kittilä region (pt. 2); and a list of thirteen species new to the flora of the regions explored (pt. 3). *Copy seen:* MH-A.

7589. HUSTICH, ILMARI. Climatic fluctuations and vegetation growth in northern Finland during 1890-1939. (Nature, Oct. 4, 1947. v. 160, p. 478-79, diagrs.)

Note on the "climatic hazard coefficient" based on data for forest, cereal and potato growth between 69°30'-70°N. *Copy seen:* DLC.

7590. HUSTICH, ILMARI. *Elymus arenarius* lokalerna i det inre av Lappland. (Societas pro fauna et flora fennica. Memoranda, 1935-36 pub. 1937. v. 12, p. 120-30, illus.) *Title tr.: Elymus arenarius* localities in the interior of Lapland.

Contains data on geographical distribution of a rye grass, *Elymus arenarius* (chiefly confined to coastal regions) in the interior of Lapland, mostly in the Enontekis region of Finnish Lapland. *Copy seen:* MH-A.

7591. HUSTICH, ILMARI. On the forest geography of the Labrador Peninsula. A preliminary synthesis. Helsingfors, 1949. 63 p. text figs. incl. 19 sketch maps. (Acta geographica. 10, no. 2)

Based on the author's observations as a member of the Finnish Labrador Expedition in 1937, and of the Canadian-Finnish James Bay-Hudson Bay Expedition in 1947, also on his field work in 1946 and 1948, covering altogether most of the regions of northern Quebec and Labrador. General remarks on phytogeography of the area, description of its tree lines, forest types, phytogeographical regions and forest reserves; bibliography (100 items).

Copy seen: CaMAI; DA.

7592. HUSTICH, ILMARI. Phytogeographical regions of Labrador. (Arctic, May 1949. v. 2, p. 36-42, 4 sketch maps)

Presentation of a new classification system, dividing the Labrador Peninsula (including northern Ontario and Quebec, Ungava and Labrador proper) into eighteen sections. The sections are characterized by their distinctive geologic, biogeographic, forest, and geographic features.

Copy seen: CaMAI; DLC.

7593. HUSTICH, ILMARI. Västra Lapplands nordligaste granlund med två för prov. Le nya växter. (Societas pro fauna et flora fennica. Memoranda, 1933-34, pub. 1935. v. 10, p. 97-98) *Title tr.: Northernmost spruce groves of western Lapland and two plants new to the Enontekis region.*

Contains a study of the northern limit of distribution of spruce, carried out by the author in 1933, in the Enontekis region of Finnish Lapland (68° 12'N.); also notes on two ferns found during the trip, *Athyrium filix femina* and *Struthiopteris filicastrum*, new to the flora of this region.

Copy seen: MH-A.

7594. HUTCHINS, JOHN POWER. Prospecting and mining gold placers in Alaska. (In: U. S. Geological Survey. Mineral resources of Alaska in 1907. Bulletin, 1908. No. 345, p. 54-77)

A technological discussion of factors influencing the success of placer-mining operations: discussion of frozen ground, general conditions of prospecting, operation of churn drills, shaft prospecting, hydraulic mining, open-cut mining, dredging, and drift mining.

Copy seen: DGS.

HUTCHINSON, S. J., *see* Davidson, F. A., & others. Factors influencing upstream migration pink salmon. 1943.

7595. HUTCHISON, ISOBEL WYLIE, 1889- . The Aleutian Islands, America's back door. London and Glasgow, Blackie & Son Ltd. [1942] x, 182 p. col. front, plates, ports, map on lining-papers.

"Cheap edition 1942" of the author's *Stepping stones from Alaska to Asia*, 1937, q.v., with final paragraphs of text changed somewhat, and a few illustrations, the epilogue and appendices omitted.

Copy seen: DLC.

7596. HUTCHISON, ISOBEL WYLIE, 1889- . Flowers and farming in Greenland. (Scottish geographical magazine, July 1930. v. 46, p. 214-30, illus.)

Lecture before the Royal Scottish Geographical Society, based on the author's observations and collections made at Angmagssalik, in East Greenland, and in the Julianehaab District and at

Umanak, West Greenland. Includes lists of ninety-seven species of plants found in southwestern and eastern Greenland, and ninety-nine species found in Umanak District, representing one hundred sixty-eight species in all. *Copy seen:* DLC.

7597. HUTCHISON, ISOBEL WYLIE, 1889-. North to the rime-ringed sun, an Alaskan journey. New York, Hillman-Curl, Inc., 1937. viii, 262 p. col. front., plates (part col.) fold. map. American issue, with new title page, of the item above. *Copy seen:* DLC.

7598. HUTCHISON, ISOBEL WYLIE, 1889-. North to the rime-ringed sun; being the record of an Alaskan-Canadian journey made in 1933-34. London and Glasgow, Blackie & Son Ltd., 1934. viii, 262 p. col. front., plates (part col.) ports., fold. map.

Story of the author's travels to Alaska by the Inside Passage, Fairbanks, Nome, thence to Herschel Island, Aklavik and Edmonton, Canada, and of her collecting of botanical specimens en route.

Appendix: 1. List of curios acquired for the University Museum of Ethnology, Cambridge. 2. List of plants collected in Alaska and Yukon, June-Aug. 1933, for the Royal Herbarium of Kew. (annotated). *Copy seen:* DLC.

7599. HUTCHISON, ISOBEL WYLIE, 1889-. On Greenland's closed shore, the fairyland of the Arctic, with a preface by Dr. Knud Rasmussen. Edinburgh and London, W. Blackwood & Sons, Ltd., 1930. xviii, 395 p. front., plates, ports., map.

Story of the author's visit to Angmagssalik and Julianehaab in 1927, her sojourn at Umanak, 1928-29, and visits to other localities on the west coast of Greenland.

Appendix: A. list of plants found in southern and eastern Greenland. B. List of plants found in Umanak District. (both lists as those in the author's *Flowers in Greenland*, 1930, q.v.)

Copy seen: DLC.

7600. HUTCHISON, ISOBEL WYLIE, 1889-. The riddle of the Aleutians. A botanist explores the origin of plants on ever-misty islands now enshrouded in the fog of war. (National geographic magazine, Dec. 1942. v. 82, p. 769-92, illus.)

Account of the author's botanical trip in the summer 1936, containing general description of the islands, their plants, and Aleut inhabitants. *Illus.* are reproduced from more recent photographs of wartime interest.

Copy seen: DLC.

7601. HUTCHISON, ISOBEL WYLIE, 1889-. Stepping stones from Alaska to Asia. London and Glasgow, Blackie & Son, Ltd., [1937] x, 246 p. col. front., plates (part col.) fold. map, map on lining-papers.

The story of a visit to the Aleutian Islands in 1936 to collect botanical specimens. *Appendix* 1. List of curios acquired for the Royal Scottish Museum. 2. List of plants collected for the British Museum, at Seward, and on Kodiak, the Pribilof and Aleutian Islands, identified by Dr. Eric Hultén.

Copy seen: DLC.

7604. HUTTON, J. E. A history of Moravian missions. London, Moravian Publication Office, [1923] 4 p. l., 3-550 p., 1 l. 7 maps (1 on Arctic)

Includes chapters on Greenland, 1733-74; Labrador, 1752-1804; and Alaska, 1885-1914; with an index and bibliography (45 items on arctic and general work). *Copy seen:* NNNStef.

7605. HUTTON, SAMUEL KING, 1877-

. Among the Eskimos of Labrador; a record of five years' close intercourse with the Eskimo tribes of Labrador. London, Seeley, Service & Co., Ltd., 1912. 4 p. l., xiii-xviii, 21-343 [1] p. 33 plates, incl. ports., 2 maps (1 fold.) Issued also in Philadelphia by Lippincott, 1912.

The author served as a medical missionary on Killinek Island, northernmost Labrador, for seven years, 1908-15. He includes in this record of his life there, a useful and rather detailed account of the material and spiritual culture of the Eskimos.

Copy seen: DLC; NNNStef.

7606. HUTTON, SAMUEL KING, 1877-

. An Eskimo village. London, Society for Promoting Christian Knowledge; New York [etc.] Macmillan Co. [1929] ix, 11-156 p. front., 7 plates, incl. ports.

The author, a medical doctor, worked at the hospital at Okak on Kivalek Island, off the east coast of Labrador. He describes the life patterns of Labrador Eskimos along the coast as he knew them, and their traditions from times before white man's influence affected them.

Copy seen: DLC; NNNStef.

7607. HUTTON, SAMUEL KING, 1877-

. Health conditions and disease incidence among the Eskimos of Labrador. Poole, Eng., J. Looker, Ltd. [1925?] 74 p.

The author discusses the climate, food and habits of the Eskimos, his clinical observations, influenza, syphilis, child mortality, and the future of the Eskimo. *Appendix:* Diseases known to have occurred among the Eskimos of Labrador.

Copy seen: DSI; NN; NNNStef.

7608. HUTTON, SAMUEL KING, 1877-

. Health in northern Labrador. (World's health, Feb. 1927. v. 8, p. 40-44, illus.)

Notes on climate, housing, food, and civilization as they affect the health of the Eskimos.

Copy seen: DLC; NNNStef.

7609. HUTTON, SAMUEL KING, 1877-

. The Labrador Eskimo and his problems. (Hospital social service, 1928. v. 17, p. 373-76)

Notes on diet, disease and hygiene of the natives of northern Labrador.

Copy seen: DSG; NNNStef.

7610. HUUMONEN, M. E. Kasvistoja kasvullisuusmuistiinpanoja luonnontieteellisista maakunnista Lkcm, Ob ja Om. (Societas pro fauna et flora fennica. Meddelanden 1912-1913, pub. 1913. Häfte 39, p. 152-64) *Title tr.:* Floristic and topographical plant notes on Lapponia kemensis, Ostrobothnia borealis and Ostrobothnia media.

Contains a geobotanical study of three natural regions of northwestern Finland, including Kemi Lappmark, with a list of plants for various stations and chief topographical data.

Copy seen: MH.

7611. HUUS, JOHAN. Ascidien aus dem Sibirischen Eismeer. Bergen, John Grieg, 1929. 15 p. illus. (*Maud Expedition*, 1918-1925. Scientific results, v. 5, no. 9) *Title tr.:* Ascidians from the Siberian Arctic Ocean.

List, with synonymy, descriptions, distribution and discussion of varieties, of two species of sea squirts, collected in the East Siberian Sea; bibliography (26 items).

Copy seen: DLC.

7612. HUUS, JOHAN. Über die ausbreitungshindernisse der Meerstiefen und die geographische Verbreitung der Ascidien. (Nytt magasin for naturvidenskapene, 1927. Bd. 65, p. 153-74, text maps) *Title tr.:* Difficulties of spreading in deep sea and geographic distribution of Ascidia.

Contains a study of the distribution of sea squirts (Ascidia) and the influence of various factors such as temperature, currents, etc., on their spreading; data on general distribution of Ascidia including a list of twenty-six Atlantic boreal forms occurring also in arctic regions; bibliography (34 items).

Copy seen: MH-Z.

7613. HUXLEY, Sir JULIAN SORELL, 1887- . Courtship activities in the red-throated diver (*Colymbus stellatus* Pontopp.); together with a discussion of the evolution of courtship in birds. (Linnean Society. Journal; zoology, June 1923. v. 35, p. 253-92, 2 plates)

Results of the Oxford University Expedition to Spitsbergen, 1921. No. 21. Issued also as Oxford University, *Spitsbergen papers*, 1925. v. 1, no. 7.

Copy seen: DLC.

7614. HUXLEY, Sir JULIAN SORELL, 1887- . The Oxford University Expedition to Spitsbergen, 1921. (Queckett Microscopical Club. Journal, Nov. 1922. Ser. 2, v. 14, p. 299-300)

Statement of the objectives of the expedition and notes on its personnel and publications. **Copy seen:** DSI-M.

7615. HUXLEY, Sir JULIAN SORELL, 1887- . Les "sols polygonaux" et l'évolution des phénomènes, de dénudation dans les pays arctiques. (Annales de géographie, Jan. 1925. Ann. 34, p. 60-62, diags.) **Title tr.:** Polygonal soils and the evolution of denudation phenomena in arctic regions.

Description (in brief) of solifluction phenomena with a diagram of the process from rock to soil structure.

Copy seen: DLC.

7616. HUXLEY, Sir JULIAN SORELL, 1887- , and N. E. ODELL. Notes on surface markings in Spitsbergen. Results of the Oxford University Expedition to Spitsbergen, 1921. No. 30. (Geographical journal, Mar. 1924. v. 63, p. 207-28, illus., 2 plates) Issued also as Oxford University, *Spitsbergen papers*, 1925, v. 1, no. 2.

Contents: Terminology. Stone-polygons. Fissure polygons. Arcuate markings. Theoretical. **Copy seen:** DLC.

HUXLEY, Sir JULIAN SORELL, 1887- , see also Oordt, G. J. van, & Sir J. S. Huxley. Some observ. on habits red-throated diver. 1922.

7617. HYATT, ALPHEUS, 1838-1902. Report on the Mesozoic fossils. (*In:* Dall, W. H. Report on coal and lignite of Alaska. *Pub.* in U. S. Geological Survey. Annual report, 1895-96, *pub.* 1896. v. 17, pt. 1, p. 907-908)

A brief report on specimens from six localities (Kodiak, Cape Thompson, Cook Inlet, Kialagvit Bay, Chasik Island, and Cold Harbor) with discussion of their age. **Copy seen:** DGS.

7618. HYATT, ROBERT M. The great trek. (Alaska sportsman, Mar. 1935. v. 1, no. 3, p. 14-15, 26, illus.)

Journalist's account of the drive by Eskimo and Laplanders from Seward Peninsula to the Mackenzie delta 1930-35, of three thousand reindeer, purchased by the Canadian government from the Lomen Reindeer Corporation of Alaska. **Copy seen:** DLC.

7619. HYDE, ALEXANDER, 1814-1881, and others. The frozen zone and its explorers; a comprehensive record of voyages, travels, discoveries, adventures and whale-fishing in the arctic regions for one thousand years. With a . . . history of the late expedition . . . in the ill-fated *Polaris*. Hartford, Conn. [etc.] Columbian Book Co., 1874. xvi, 800 p. incl. illus. (incl. 4 maps) front., 69 plates, incl. ports., fold. map. **Other authors:** A. C. Baldwin, W. L. Gage, and C. W. Shields.

Contains (mainly) a history of exploration and whaling in the North American and European Arctic, with brief chapters on Siberia and Alaska; a useful résumé of the Hall expedition in the *Polaris* 1871-73, and the drift of the ice-floe party; with concluding chapters on late 19th century German and Scandinavian expeditions.

Copy seen: DLC; NNSf.

7620. HYDE, JOHN, 1848-1929. Wonderland; or, Alaska and the inland passage, by Lieut. Frederick Schwatka. With a description of the country traversed by the Northern Pacific Railroad, by John Hyde. [Chicago, Rand McNally & Co., printers] c1886. 96 p. col. front., illus.

Tourist literature, including (p. 60-96) informative description of the attractions of Southeast Alaska, by Schwatka. **Copy seen:** DLC.

7621. HYDE, JOHN, 1848-1929. Wonderland; or, the Pacific Northwest and Alaska; with a description of the country traversed by the Northern Pacific Railroad. [Chicago, Rand, McNally & Co.] c1888. 94 p. front., illus. map on verso of front cover.

Another edition, with the Alaska section, p. 68-94, in conventional travelogue style.

Copy seen: DLC; NNSf.

7622. HYLAND, WILLIAM L., and M. H. MELLISH. Steam heated con-

duits, utilidors, protect service pipes from freezing. (Civil engineering, Jan. 1949. v. 19, no. 1, p. 27-29, 73, illus., diags.)

Note on water supply and disposal in Churchill and Fairbanks, and detailed description of military utilidor systems (with plans and cross-sections) for providing water supply in permafrost regions. **Copy seen:** DGS.

7623. HYLANDER, NILS. *Thlaspi alpestre* L. i Sverige. (Svensk botanisk tidskrift, 1943. Bd. 37, häfte 4, p. 376-402, illus. text maps) **Title tr.:** *Thlaspi alpestre* L. in Sweden.

Contains a taxonomic discussion establishing two races of the herb *Thlaspi alpestre*, including subspecies *silvestre*, native to Norrbotten and Lule Lappmark, ssp. *brachypetalum* v. *suecicum* from Kiruna, Torne Lappmark, with detailed data on distribution of these herbs in Sweden. Summary in German. **Copy seen:** MH-A.

7624. HYLLNINGSSKRIFT TILLÄG-NAD SVEN HEDIN PÅ HANS 70-ÅRS DAG DEN 19 FEBR. 1935 . . . Stockholm, I distribution: Generalstabens litografiska anstalt [1935] xvi, 668 p. illus., plates (part col., part fold.) port., maps (part fold.) diags. (part fold.) Edited by Axel Wallén.

Issued with Geografiska annaler 1935, pub. by the Svenska sällskapet för antropologi och geografi. Årg. 17, 1935. **Title tr.:** Festschrift to Sven Hedin on his 70th birthday, Feb. 19, 1935.

Contents include three papers relating to the North; each appears in this Bibliography under its author's name:

AHLMANN, H. W. Determination of the ablation of snow and ice.

KOCH, L. A day in North Greenland.

SAMOILOVICH, R. L. Exploration of the polar part of U.S.S.R. in 1934.

Copy seen: DLC.

7625. HYLMÖ, D. E. Algenimmigration nach der schwedischen Westküste. (Botaniska notiser, 1933, häfte 1-3, p. 377-90) **Title tr.:** Immigration of algae to the western coast of Sweden.

Contains data on immigration of two species of algae, *Fucus inflatus* (known from Ellesmere Island, Greenland and Jan Mayen), and *Callithamnion rosaceum* (England, France, western Norway) to the western coast of Sweden

(Bohuslan, Halland); bibliography (31 items). **Copy seen:** MH-A.

7626. HYMAN, LIBBIE HENRIETTA, 1888- . North American Rhabdocoela and Allococoela. III. *Mesotoma arctica*, n.sp., from northern Canada. New York, 1938. 8 p. illus. (American Museum of Natural History, N. Y. American Museum Novitates, No. 1005)

Contains full description of anatomy, and note on habitat, of this flatworm, based on specimens from fresh-water pools in the tundra near Churchill, Manitoba. **Copy seen:** DSI-M.

7627. HYNES, FRANK W. Shrimp fishery of Southeast Alaska. (U. S. Fish and Wildlife Service. Report of the U. S. Commissioner of Fisheries, 1929, pub. 1930. p. 1-18, illus. Fisheries document no. 1052)

Contains notes on the development of the fishery since 1915; the methods, appliances, plants and processes, and fishing grounds; discussion of the natural history of the shrimp (list of thirteen species, distribution, relative abundance, size and number of eggs, and seasonal variation), of the conservation problems and regulation of the fishery. **Copy seen:** DF.

Contains brief outline of the activity of V. A. Obruchev in the field of permafrostology, as organizer of the Commission (later Committee and finally the Obruchev Institute) of the Academy of Sciences in carrying out systematic investigation.

Copy seen: NN; DLC.

7656. IANOVSKII, V. K. *Ekspeditiia na reku Pechoru po opredeleniiu iuzhnoi granitsy vechnoi merzloty*. (Akademiia nauk SSSR. Komissiiia po izucheniiu vechnoi merzloty. Trudy, 1933. T. 2, p. 65-149, 40 illus., map) *Title tr.:* Expedition to the Pechora River for the study of the southern limits of permafrost distribution.

Contains a geographical and economic description of the region (detailed map) which includes a series of ground cross sections and data on the flora and climate. Material on the occurrence of permafrost, ground temperature at various depths, temperature curves, and changes with the movement southward are given, as well as the influence of permafrost on the vegetative cover and specific forms of micro-relief (tables and charts). Considerable space is devoted to permafrost as a factor of soil formation, such

as the role of gravitational and supra-permafrost water, and to a mechanical analysis of soils, their chemical composition, etc. The last section discusses characteristics of this region from the engineering construction viewpoint, with examples of deformations caused by permafrost, formulas for the best mechanical composition of the ground for road construction (tables and charts).

7711. INGERSOLL, ERNEST, 1852-, editor. Alaskan bird-life as depicted by many writers. New York, National Association of Audubon Societies, 1914. 72 p. illus., 13 plates.

General sketch of the subject for use in schools and the general reader.

Copy seen: DSI-M.

7712. INGERSOLL, ERNEST, 1852-. Golden Alaska; a complete account to date of the Yukon valley; its history, geography, mineral and other resources, opportunities and means of access. Chicago and New York, Rand, McNally & Co., 1897. v. [4], 8-160 p. incl. illus., plates, maps. front., fold. map. Also issued in an edition of 149 p., without medical section.

Contains brief, but useful, informa-

tion on routes to the Klondike, including the Yukon River; description of the upper Yukon River, the Klondike, the mining methods and laws and outfit required; notes on climate, agriculture and health, with a brief chapter of medical advice, including a list of drugs, by Dr. A. P. O'Brien.

Copy seen: DLC (149 p.); NNStef (160 p.)

7713. INGERSOLL, ERNEST, 1852-, and H. W. ELLIOTT. In richest Alaska and the gold fields of the Klondike; how they were found . . . together with a history of this wonderful land from its discovery to the present day . . . and practical information for gold seekers. Chicago, Dominion Co., [1897] xiv, [2], 15-487 p. incl. plates. front., fold. map. Another edition (xiv, [2], 15-512 p. incl. 32 plates. front.) apparently published about the same time.

Contains information on routes, the conditions in the Klondike, prospector's outfit, history of Alaska, mining in other parts of Alaska, the natives, fur seal islands, reindeer, climate, and scenery.

Copy seen: DLC (487 p.); NNStef (512 p.)

7714. INGIREV, Z. Tvorcheskii put' V. A. Obrucheva. Moskva, Gos. izd-vo geol. lit-ry, 1948. 95 p. ports. *Title tr.*: Creative path of V. A. Obruchev.

Contains sketch of the life and work of a leading Russian geologist and explorer Vladimir Afanas'evich Obruchev, b. 1863. Includes (p. 84-91) an account of the organization of special bodies to study permafrost, under Obruchev's direction.

Copy seen: DLC.

7715. INGLEFIELD, Sir EDWARD AUGUSTUS, 1820-1894. Report on the return of the *Isabel* from the arctic regions. (Royal Geographical Society. *Journal*, 1853. v. 23, p. 136-45, fold. map)

Contains an account of the voyage in 1852 of the Franklin search vessel equipped by Lady Franklin; the trip from Upernavik, northward into Smith Sound, the discovery of Inglefield Gulf and continuation of the voyage north as far as Cape Alexander, and the return by way of Jones and Lancaster Sounds.

Copy seen: DLC.

7716. INGLESFIELD, Sir EDWARD AUGUSTUS, 1820-1894, and others. A summer search for Sir John Franklin; with a peep into the polar basin. By Commander E. A. Inglesfield, R. N. With short notices by Professor Dickie, on the botany, and by Dr. Sutherland, on the meteorology and geology. London, T. Harrison, 1853. xxi, 232 p. front., 3 plates (1 fold.) fold. map.

Narrative of the voyage of Lady Franklin's ship *Isabel* under the author's command, as an independent provision transport, cooperating with the British government's Franklin search squadron. Describes the voyage July-Nov. 1852 through Davis Strait to Disko, thence northward through Melville Bay and Smith Sound to latitude 79°20'N., discovering Inglesfield Gulf; the return voyage, in and out of Jones Sound, through Lancaster Sound and Barrow Strait to Beechey Island, and thence home to England. Includes descriptions of the ice conditions of the sea, the new shores mapped, the Eskimos encountered, and the weather.

Appendices: DICKIE, G. Notes on flowering plants and Algae.

SUTHERLAND, P. C. A few remarks on the physical geography, &c., of Davis Straits, and its east and west shores.

SUTHERLAND, P. C. Meteorology. Abstracts of the three-hourly meteorological register kept . . . in the North Atlantic, Davis Straits and Baffin Bay, July to November, 1852.

Proceedings of Commander E. A. Inglesfield (correspondence with the British Admiralty, etc.)

Papers by Dickie and Sutherland appear in this Bibliography under the author's names. *Copy seen:* DLC.

7723. INGSTAD, HELGE MARCUS, 1899-. Øst for den store bre. Oslo, Gyldendal, 1935. 4 p. l., [11]-182 p., 1 l. plates, 3 maps (2 fold.) Published in English translation as *East of the great glacier*, 1937.

Chronicle of the period 1932-34, which the author spent in Eirik Raudes Land, (71°30'-75°40'N.) and in the region 60°30'-63°40'N. East Greenland, as "governor" of Norwegian-occupied territories, and leader of his own exploring, hunting and trapping expedition.

Contains a summary of the controversy between Norway and Denmark over sovereignty of Greenland ending in 1933; descriptions of the wildlife: seals and musk oxen, hunting adventures, sledge trips north and south of the base camp at Antarctic Harbor; a review of habitation along the east coast north of Scoresby Sound by Eskimos, visits by exploring expeditions, etc., with but brief references to the author's official duties.

Copy seen: DLC.

7724. INGSTAD, HELGE MARCUS, 1899-. Pelsjegerliv blandt Nord-Kanadas indianere. Oslo, Gyldendal, 1931. 3 p. l., 9-245 p., 1 l. plates, fold. map. **Title tr.:** Life of a trapper among Indians of North America. Published in English translation as *Land of feast and famine*, 1933.

Narrative in popular style, of the author's travels 1930-31 in the region of Great Slave Lake and upper Thelon River, his hunting activities, life among the "caribou-eater" Indians of the Barren Grounds (mention of Chipe-wyans, Crees, Dogribs, Yellowknives, Slaves, etc.)

7742. INTERNATIONAL BOUNDARY COMMISSION (U. S., ALASKA AND CANADA). Joint report upon the survey and demarcation of the international boundary between the United States and Canada along the 141st meridian from the Arctic Ocean to Mount St. Elias. In accordance with the provision of Article IV of the convention signed at Washington April 21, 1906 . . . [n.p., 1918] 2 p. l., 7-305 p. incl. front., illus., tables, diagr. 6 fold. plates, 10 maps (2 fold.) and atlas (41 maps) 71x47½ cm.

Contains text of the convention between the United Kingdom and the United States; commission appointments; orders in council, presidential proclamation; explorations and surveys prior to the 1906 convention; narrative

of field work under the convention, 1907-13; list of monuments and description of field methods and equipment.

Appendices: 1. Early explorations and negotiations.

2. Later negotiations leading to the actual demarcation.

3. Descriptions of demarcation stations.

4. Special equipment.

5. Ration lists.

6. Big game seen along the boundary. (Notes on eleven species.)

Maps. Detailed topographic maps in thirty-eight sections, with an index map and one showing neighboring section of the arctic coast.

7743A. INTERNATIONAL GEOLOGICAL CONGRESS. 17th, Moscow and Leningrad, 1937. [Guide-books for the excursions] Leningrad, Chief Editorial Office of the Geological-Prospecting and Geodetic Literature; [etc., etc.], 1937. 25 v. illus., plates, maps, diagrs.

The Seventeenth International Geological Congress (Mezhdunarodnyi geologicheskii kongress, 17aia sessiia, SSSR, 1937) met in Moscow, July 20-29, 1937. Its numerous pre-session and post-session excursions for which guide books were published in Russian, English and French, included three in the North: to Kola Peninsula, July 1-20, to Novaya Zemlya, and to the Ural Mts., Aug. 1-22. Guide books (no. 2, 21-22, and 23) for these three northern trips appear in this Bibliography as follows:

2. POLKANOV, A. A., *editor*. The northern excursion; Kola Peninsula.

21-22. SAMOILOVICH, R. L., and M. M. ERMOLAEV, *editors*. The Novaya Zemlya excursion. Pt. 1-2.

23. ZAVARITSKII, A. N., *editor*. The Uralian excursion; northern part.

Twenty-one papers in these three guide books appear in this Bibliography under their respective authors' names, in Russian and English editions. The French edition of these three guide books has not been located.

7744. INTERNATIONAL POLAR COMMISSION. Communications from the

International Polar-Commission, 1st-7th parts. St. Petersburg [etc.] Pub. by the Imperial Academy of Sciences at St. Petersburg, 1882-1891. 7 nos. (364 p.) illus., tables, diags., sketch map.

Consists of 112 numbered communications, paged continuously, and with text in German (for the most part), French or English. Edited by H. Wild, president of the Commission.

"A special publication . . . to ensure rapid and continuous dissemination of intelligence relating to the International Polar Expeditions projected by the late Lt. Weyprecht . . . [which] will contain the resolutions, instructions, and reports of the Commission . . . reports in progress and condition of the observing parties, as well as some preliminary results of their work."-Preface.

The first international polar conference, Hamburg, 1879, was called by the International Meteorological Congress (later . . . Organization); the second conference met in Bern, 1880; and the third conference in St. Petersburg, 1881. During this third meeting plans were completed for the First International Polar Year expeditions.—From communication no. 1.

The fourth conference convened in Vienna, 1884, and the fifth and final meeting of the commission was held in Munich, 1891.

The Commission's communications include (p. 292-303) results of the Netherlands meteorological observations in Kara Sea, Oct. 1882-July 1883, consisting of daily résumé of meteorological elements (non-synoptic).

File Seen: DLC.

7745. INTERNATIONAL POLAR COMMISSION. Proceedings. Session of 1908. Bruxelles, Hayez, impr., 1908. 110, clxii p. illus., plate. Text in French, English and German.

This commission is the Congrès International pour l'Étude des Régions Polaires, q.v., renamed International Polar Commission on Sept. 11, 1906.

These proceedings record the first official meeting of the commission, May 1908, attended by delegates of twelve countries, with Georges Lecointe as secretary. The proceedings include program, minutes of meetings, appendices consisting of statutes, brief memo-

randa, reports, and plans, also the papers:

DENUCÉ, J. Composition des états-majors scientifiques et maritimes des expéditions arctiques et antarctiques entreprises depuis l'année 1800.

CRUYT, W., and W. VAN BRABANT. *Projet de tracteur auto-polaire*. These papers appear in this Bibliography under the authors' names.

Copy seen: DLC.

7746. INTERNATIONAL POLAR COMMISSION. Procès-verbal de la session tenue à Rome en 1913. Bruxelles, Hayez, impr., 1913. 293 p. *Title tr.*: Proceedings of the meeting held in Rome, 1913.

Contains brief section consisting of minutes, the constitution of the commission, report on status, future nomination of corresponding members, projected program of work and election of a board, also an extensive bibliography on the Antarctic.

Copy seen: DLC.

7747. INTERNATIONAL POLAR EXPEDITION, 1882-1883. Report of the International Polar Expedition to Point Barrow, Alaska, in response to the resolution of the [U. S.] House of Representatives of December 11, 1884. Washington, U. S. Govt. Print. Off., 1885. 2 p. l., 3-695 p. front., plates (part col.) fold. map, plan. (U. S. Signal Office. Arctic series of publications, no. 1) Issued also as House ex. doc. 44, 48th Cong., 2d sess. (v. 23, serial no. 2298)

The expedition, under command of Lieut. P. H. Ray, left San Francisco July 18, 1881, established and maintained a scientific station at Point Barrow, and returned to San Francisco, Oct. 6, 1883.

Contents: Pt. 1. Orders and instructions (including apparatus and books)

Pt. 2. RAY, P. H. Narrative.

Pt. 3. RAY, P. H., and MURDOCH, J. Ethnographical sketch of the natives of Pt. Barrow.

Pt. 4. Murdoch, J. Natural history.

I. MURDOCH, J. Mammals.

II. MURDOCH, J. Birds.

III. MURDOCH, J. Fishes.

IV. MURDOCH, J., and RILEY, C. V. Insects.

V. MURDOCH, J. Marine invertebrates.

VI. DALL, W. H. Mollusks.

VII. MURDOCH, J. Collecting localities and dredging stations.

VIII. GRAY, A. Plants.

Appendix: MURDOCH, J. Notes on surface life under the sea-ice.

Pt. 5. [RAY, P. H.] Meteorology (incl. aurora).

Pt. 6. [SCHOTT, C. A.] Terrestrial magnetism.

Pt. 7. [ANCOR, C.] *and others*. Tides.

Pt. 8. McRAE, A. L. Miscellaneous observations.

Each paper (except Pt. 1) appears in this bibliography under its author's name. *Copy seen:* DLC.

7748. INTERNATIONAL POLAR YEAR. 1st, 1882-1883. BRITISH EXPEDITION TO FORT RAE. Observations of the International Polar Expeditions, 1882-83. Fort Rae, London, Eyre & Spottiswoode for Trübner & Co., 1886. xiv, 326 p. incl. tables. illus. (3 sketch maps) 32 fold. diagrs.

The four-man expedition, under the command of Captain H. P. Dawson, was organized by the Royal Society of London, financed by the government of Great Britain and Canada, and stationed in a Hudson's Bay Company post on the north shore of Great Slave Lake, at 62°38'52"N. 115°43'50"W.

Discussion of the magnetic observations was carried out by H. P. Dawson, and of the meteorology, by R. Strachan and J. A. Curtis.

Contains an account of the organization, program of work and instrumentation; results of hourly observations or registrations, Sept. 1, 1882-Aug. 31, 1883, of meteorological elements; hourly tabulations and journal of occurrences of aurora.

Daily readings of maximum black bulb and minimum thermometers (the latter exposed on the ground to the sky; and daily soil temperatures at 1, 2, 3 and four-foot depths.

Hourly magnetic declination, horizontal and vertical intensity measurements; five-minute and twenty-second readings of these elements on bi-monthly term dates; and the mean diurnal course of the three elements on quiet and disturbed days.

Diagrs.: Graphs of the results of term days and hours of the magnetic elements. *Copy seen:* DLC.

7749. INTERNATIONAL POLAR YEAR. 1st, 1882-1883. DEUTSCHE

POLAR-KOMMISSION. Die Beobachtungs-Ergebnisse der deutschen Stationen. Bd. 1. Kingua-Fjord und die meteorologischen Stationen II. Ordnung in Labrador: Hebron, Okak, Nain, Zoar, Hoffenthal, Rama, sowie die magnetischen Observatorien in Breslau und Göttingen. Berlin, 1886. lxiv, 737 p. incl. tables, 11 plates, 3 charts (2 fold.) map, 41 diagrs. *Title tr.:* The results of observations of the German station. v. 1. Kingua Fiord and the meteorological stations of second order in Labrador: Hebron, Okak, Nain, Zoar, Hopedale, Ramah, as well as magnetic observations in Breslau and Göttingen.

The German Polar Commission, during the First International Polar Year, maintained stations at Cumberland Sound (Baffin Island) and on South Georgia Island (Antarctic). Dr. W. Giese led the northern expedition, with L. Ambronn, astronomer, Dr. W. Schliephake, physician and natural history observer; Capt. A. Mühleisen, meteorologist; H. Abbes, mathematician and physicist, and H. Seemann, mechanic.

The *Germania* sailed from Germany, June 28, 1882. She anchored in Kingua Fiord (the northwestern extremity of Cumberland Sound) Aug. 21, 1882, and remained there until Sept. 17, when she returned to Germany. During July-August 1883, she sailed again to Baffin Island with Dr. Franz Boas, who remained in the expedition's quarters, after they evacuated Kingua Fiord in Sept. 1883.

A supplementary expedition under Dr. K. R. Koch was sent to Labrador, in the *Harmony*, July 17, 1882. Dr. Koch installed meteorological apparatus in Moravian missions at six stations along the coast (55°25'N.-58°48'N.); wintered at Nain and made meteorological and auroral observations, leaving on Sept. 15, 1883.

Meteorological observations were continued at these six Labrador stations for a number of years, the continuing results appear in this Bibliography under Hamburg, Deutsche Seewarte, *Deutsche ucherseeische meteorologische Beobachtungen*, 1887-1900.

Contents tr.: Introduction: Narrative of the Kingua Fiord and Labrador expeditions. Geographic position finding at Kingua Fiord.

1. Meteorological observations: Hourly values of all elements, Sept. 12, 1882-Sept. 9, 1883, at Kingua Fiord, with daily means and extremes, monthly and annual summaries; observations (8 A.M., 2 P.M., and 8 P.M.) at the six Labrador stations.

2. Magnetic observations Kingua Fiord: detailed account of basic determinations of magnetic elements and results of hourly measurements for all days, and five-minute and twenty-second measurements on semi-monthly term dates, of declination and horizontal intensity; thirty-second results of these elements on selected disturbed days; ten- and thirty-second readings of earth currents on selected days.

A detailed journal of individual occurrences of aurora at Kingua Fiord and Nain, including sketches of aurora for certain dates.

Appendices: Eschenhagen, M. On the Lamont-Weyprecht constant for change relationship of variation of geomagnetic horizontal-intensity and inclination.

Eschenhagen, M. Supplement to Dr. Giese's paper on earth currents.

Galle, J. G. Variation of magnetic declination observed at the University of Breslau observatory.

7756. INTERNATIONAL POLAR YEAR. 1st, 1882-1883. *ÉKSPEDITSIA NA NOVUŮ ZEMLĚ.* Trudy Russkoï polhârnoï stantšii na Novoï Zemle. Beobachtungen der russischen Polarstation auf Nowaja Semlja. [St. Petersburg] 1886-91. 2 v. (p. l., xvii, 142 p.; p. l., xvii, 159 p.) 13 plates (incl. 11 diagrs.) tables, 3 maps. *Title tr.:* Observations of the Russian polar station on Novaya Zemlya. Edited by Lenz. Text in Russian and German.

The Russian Geographical Society sponsored, with government aid, a second expedition to cooperate in work of the International Polar Year and to be stationed at Malyy Karmakuly on Novaya Zemlya, 72°22'36"N. 52°45'E. As this party was organized and equipped later and more hastily than the expedition to Lena delta, its results are more limited.

The thirteen-man party, under the leadership of K. P. Andreev, reached the island early in Aug. 1882. Meteorological

logical observations began on Sept. 1, and magnetic observations on Oct. 1, and were continued until Aug. 31, 1883.

Each part (following) includes a sketch of the organization, program and station. *Contents tr.*: Chast' 1 (*pub.* 1891). Andreev, K. P. Magnetic observations. (Results of hourly measurements of horizontal and vertical intensity and declination, five-minute and twenty-second measurements of these elements on semi-monthly term dates, and the diurnal variation of the mean monthly values, Oct. 1, 1882-Aug. 31, 1883).

Chast' 2 (*pub.* 1886). Andreev, K. P. Meteorological observations. (Results of hourly observations or instrumental registering of meteorological elements, of soil temperatures at surface and 0.4 meters depth, and daily soil temperatures at 0.8 and 1.6 meters depths.

7757. INTERNATIONAL POLAR YEAR. 1st, 1882-1883. NORSKE POLARSTATION, BOSSEKOP. Die internationale Polarforschung, 1882-1883. Beobachtungs-Ergebnisse der Norwegischen Polarstation Bossekop in Alten. Im Auftrage des Königl. norwegischen Cultus-Ministeriums, herausgegeben von Aksel S. Steen. Christiania, Grøndahl & Son, 1887-88. 2 v. (3 p. l., viii, 31, 100 p. incl. tables. 4 plates; 2 p. l., 73, 90, 128 p. 27 plates) *Title tr.*: Results of observations at the Norwegian polar station Bossekop in Alten, under direction of the Royal Norwegian Minister of Education, edited by Aksel S. Steen.

The Norwegian station, located on Altenfjord, Norway, at 69°58'N. 23°15'E., was occupied by five men under the direction of meteorologist A. S. Steen. *Contents tr.*: Pt. 1 (*pub.* 1887). Historical introduction, astronomy, meteorology. Pt. 2 (*pub.* 1883). Terrestrial magnetism, aurora.

The introduction outlines the Norwegian participation in the First International Polar Year activities; the organization, personnel and instrumentation of the Bossekop station.

Astronomy: determination of time, longitude, latitude and azimuth.

Meteorology: results of hourly observations or registrations of meteorological elements; and monthly deep-sea temperature measurements in Altenfjord, Aug. 1, 1882-Sept. 30, 1883. Diurnal course of several meteorological elements have been graphed for the four seasons.

Terrestrial magnetism: results of hourly measurements of horizontal and vertical intensities, and of five-minute and twenty-second measurements of these elements on semi-monthly term dates; the diurnal variations for both total days and quiet days, Aug. 1, 1882-Aug. 31, 1883. The course of the magnetic elements on term dates have been graphed and presented in plates.

Aurora: a journal of detailed descriptions of aurora and clouds during individual occurrences, and tables of hourly scalar values of the various characteristics of aurora, Aug. 1, 1882-Aug. 31, 1883.

7758. INTERNATIONAL POLAR YEAR. 1st, 1882-1883. ÖSTERREICHISCHE POLAREXPEDITION NACH JAN MAYEN. Beobachtungs-Ergebnisse; die Österreichische Polarstation Jan Mayen, ausgerüstet durch Graf Hanns Wilczek, geleitet vom Emil Edlen von Wohlgemuth, herausgegeben von der Kaiserlichen Akademie der Wissenschaften. Wien, K. K. Hof- und Staatsdruckerei, 1886. 3 v. illus. plates, maps (part. fold) *Title tr.*: Results of observations, Austrian Polar Station Jan Mayen, equipped, outfitted and sponsored by Count Hanns Wilczek, led by Emil Edlen von Wohlgemuth.

The Austrian First International Polar Year expedition left Pola in the Steamship *Pola* April 2, 1882, completed outfitting in Norway, left Norway May 25 with Wilczek on board in an attempt to reach Jan Mayen, turned back as result of ice barriers, set forth again from Norway June 21 without Wilczek, and this time reached Jan Mayen and set up an observation station of substantial buildings in Wilczek Valley. Scientific observations were made at this station and elsewhere on the island from July 1882-Aug. 1883, and other observations were made during the sea voyages to and from the island.

INTERNATIONAL POLAR YEAR. 2d, 1932-1933

7760. INTERNATIONAL POLAR YEAR. 2d, 1932-1933. FINNISCHE POLARJAHR-OBSERVATORIUM ZU PETSAMO. Ergebnisse der magnetischen Beobachtungen des Polarjahr-Observatoriums zu Petsamo ($\delta = 69^\circ 32'$, $1^\circ N$, $\lambda = 31^\circ 14' .9^\circ E$ Gr.) im Polarjahre 1932-1933. Helsinki, Suomalainen tiedeakatemia [1937] 56 p. incl. tables, illus. (Suomalainen tiedeakatemia, Helsingfors. Petsamo observatorium. Veröfentligungen. Nr. 1) *Title tr.:* Results of magnetic observations of the Polar Year Observatory at Petsamo ($69^\circ 32' 01'' N$, $31^\circ 14' 09'' E$) during the Polar Year 1932-1933. By Mauri Tommila.

The Observatory Committee of the Finnish Academy of Sciences organized, and the author as a member of that Committee, directed the work carried out at Petsamo.

Contains description of the site and instrumentation; an account of the organization; results of hourly registrations and daily extreme values of the magnetic elements and their diurnal course for all days, quiet and stormy days; and tabulations of the daily variation of the northerly and easterly components and inclination for all days, quiet, and stormy days, Aug. 1, 1932-Aug. 31, 1933. *Copy seen:* DLC.

7761. INTERNATIONAL POLAR YEAR. 2d, 1932-1933. MORSKIE EKSPEDITSII. *Gidrologicheskie nablūdeniā morskikh ekspeditīi 2-go MPG. Tablit'sy. (In: Kireev, I. A., editor. Karskoe more s prolivami i more Laptevskh, 1937. p. 33-144, 2 fold. maps)*

Contains (p. 34-130) tables of deep sea observations made in Kara Sea 1932-33, by the *Knipovich*, *Sibirskov*, *Severoid No. 5*, *Rusanov*, *Lenin*, *Taimyr*, *Voronov*, *Lomonosov*, *Belukha*, and *Krasin*; and (p. 132-44) in Laptev Sea 1932-33, by the *Sibirskov* and *Krasin*. These tabular data cover temperatures, chlorinity, salinity, density, and various chemical results at several depths; included also is note of (some of) wind, atmospheric pressure, precipitation, swell, transparency, depth, bottom, etc., at the stations. Table of observations on the color of the sea water by the scale of Forell-Uhle, made in Kara and Laptev Seas, Aug.-Oct. 1932-33, by the *Persei*, *Rusanov* and *Krasin* (p. 131). *Copy seen:* DLC.

7762. INTERNATIONAL POLAR YEAR. 2d, 1932-1933. MORSKIE EKSPEDITSII. *Gidrologicheskie nablūdeniā morskikh ekspeditīi 2-go MPG. Tablit'sy. (In: Kireev, I. A., editor. Vostochno-Sibirskoe i Chukotskoe moriā Beringov proliv i Beringovo more, 1936. p. 60-180, fold. map)*

Tables of observations reported from various ships in eastern waters of the Soviet Arctic as part of the Second International Polar program (for which the stations are shown on fold. map following the tables).

Contains (p. 60-61) a few days' deep sea observations in temperature, salinity, chemistry, with note of precipitation, wind, pressure, transpar-

ency, swell, ice, bottom, etc., taken from the *Litke* in the region 70°05'N. 170°22'E.-69°46'N. 162°24'E.; similar observations (p. 62-111) in Bering Sea and Strait and Chukchi Sea (between 52°24'N. 158°36'E. and 67°08'N. 168°39'W.) taken from the trawler *Dalnevostochnik* 1932; similar (but more detailed) observations (p. 112-64) by the trawler *Krasnoarmeets* 1933, in the same region; further observations (p. 165-69) from the *Litke* 1932, in Bering Sea and Strait, and Chukchi Sea; and (p. 169-79) similar observations taken in (roughly) the same waters by the *Sovet* 1932. Summary in English, p. 36-59. *Copy seen:* DLC.

7763. INTERNATIONAL POLAR YEAR. 2d, 1932-1933. NIEDERLANDSCH EXPEDITION. *Aerologische Beobachtungen und Terminbeobachtungen in Angmagssalik während des Internationalen Polarjahres, 1932-1933. Rijksuitgeverij's-Gravenhage, 1934. [v] 19 p. plate. (Netherlands. Meteorologisch institut. Ergebnisse aerologischer Beobachtungen, 22A) Title tr.: Aerological and terminal [synoptic] observations at Angmagssalik, during the Second International Polar Year, 1932-1933.*

Contains a brief account of the Netherlands' part in the Second International Polar Year program, organizing a station at Angmagssalik, the personnel, location, and scientific work. Tables (p. 2-4), show the results of individual pilot balloon ascents made at Angmagssalik during May-Aug. 1933. Values of direction and speed are given by 0.5 km. intervals up to 4.05 km. A supplementary table (p. 5) gives results of ascents by 0.5 km. intervals up to 11.05 km. during June to Aug. 1933. International code of daily synoptic meteorological observations at 1300, 1900 and 2,200 hours GMT at Angmagssalik during the period Sept. 1, 1932-Aug. 31, 1933 is given p. 2-19. *Copy seen:* DLC.

7764. INTERNATIONAL POLAR YEAR. 2d, 1932-1933. NORSKE INSTITUTT FOR KOSMISK FYSIKK.

Norwegian publications from the International Polar Year 1932-33, no. 2. Work on terrestrial magnetism, aurora and allied phenomena. Bergen, J. Grieg, 1935. 35 p. and 32 p. of tables and diagrs. 2 plates. (Norske institutt for kosmisk fysikk. Publikasjoner. Nr. 6)

The Norwegian program, originally included magnetic auroral studies at Bear Island and in East Greenland. These plans were abandoned and the Polar Year program finally consisted of (1) the regular work on aurora, terrestrial magnetism and earth currents, at the Auroral Observatory, Tromsø, with the addition of continual rapid magnetic records of the three magnetic elements.

2. Magnetic measurements and records at the Dombås station were kept as usual.

3. Auroral investigations in southern Norway were continued by Störmer.

4. At Bossekop, ordinary 24-hour records as well as rapid magnetic records were made and absolute measurements occasionally made. Earth-current registrations were made on two lines (N-S and E-W).

5. Ordinary and rapid magnetic records, with some absolute measurements at a station near Bodø.

The results of magnetic and auroral observations from Tromsø and Dombås were published in the magnetic yearbooks of the two observatories, published as Norske institutt for kosmisk fysikk, 1934-36, in its *Publikasjoner*, Nr. 4-5, 9. The reports from the Tromsø station appear in this Bibliography as the Institute's *The auroral observatory at Tromsø*.

The results in the polar year publication are limited to the treatment of perturbations only.

Contents: Pt. 1. The executive committee. The Norwegian programme.

Pt. 2. Harang, L., and E. Tonsberg. Results of magnetic observations at the two Norwegian recording stations at Bossekop and Bodø.

Pt. 3. Harang, L. Report on sinusoidal oscillations which occurred on the rapid registration records in Bossekop, Tromsø and Bodø.

Tables, etc. Mean hourly values, Oct. 1932-Aug. 1933, of the three magnetic elements at Bossekop and Bodø, with

monthly means; vector diagrams of monthly means, and graphs of absolute storminess. *Copy seen:* DLC.

7766. INTERNATIONAL POLAR YEAR. 2d, 1932-1933. SWEDISH EXPEDITION TO SPITZBERGEN. Swedish Polar Year Expedition, Sveagruvan, Spitzbergen. General introduction; terrestrial magnetism. Stockholm, Swedish National Committee for Geodesy and Geophysics, 1939. 77 p. incl. tables. illus. (2 sketch maps, diagrs.) plate.

The Swedish Expedition occupied two stations; one party under Dr. F. Lindholm, leader of the whole expedition, made magnetic, aurora and aerological observations at Sveagruvan, 77°54'N. 16°45'E., 941 meters above Braganza Bay, on Van Mijen Bay (Bell Sound).

The second party, in charge of H. Olsson, made meteorological observations on Mt. Nordenskiöld, 1050 meters above, and southwest of Longyearbyen, Advent Fiord. Results of the second party's work appear in this Bibliography as Olsson, H. *Meteorological observations at Mount Nordenskiöld*, 1936, q.v.

Contents: General introduction; brief account of the two expedition sections.

Lindholm, F. Terrestrial magnetism. Results of hourly measurements of the three magnetic elements, Sept. 1, 1932-Aug. 31, 1933.

7767. INTERNATIONAL SOCIETY FOR THE EXPLORATION OF THE ARCTIC REGIONS BY MEANS OF AIRCRAFT. Das Luftschiff als Forschungsmittel in der Arktis; eine Denkschrift, mit vier Anlagen. [Berlin, Gedruckt bei Otto v. Holten, 1924] 1 p. l., 5-61, [1] p., 1 l. 11 plates (maps, charts, diagrs.) *Title tr.:* The airship as a means of research in the Arctic. A memoir, with four additional papers.

Contains (in German) a general discussion of the history of airship travel in the Arctic, of the problems of weather, unknown routes, construction of the ships, and the scientific contributions which such research could make; also a list of members of the society.

Appendices tr.: 1. Schneider, K., and others. The meteorological conditions. (Problems of wind, need for weather charts, a list of polar stations, and atmospheric pressure distribution) with an addendum: Breitfus', L. L. Extracts from observations (temperature, winds, and weather elements) on the north coast of Russia. (Various years Mar.-July 1876-1917)

2. Boykow, J. M., and others. Navigation in the Arctic.

3. Harbich, and others. The adaptation of radio for navigation and the transmission of information.

4. Finsterwalder, R. On the use of the airship for photogrammetric surveying.

7769. INTERNATIONAL SOCIETY FOR THE EXPLORATION OF THE ARCTIC REGIONS BY MEANS OF AIRCRAFT. Verhandlungen der II. ordentl. Versammlung in Leningrad, 18.-23. Juni 1928. Hrsg. im Auftrage der Gesellschaft von A. Berson und L. Breitfuss. Gotha, Justus Perthes, 1929. 76 p. illus., 11 plates (incl. 2 fold. maps, fold. diagrs.) (Petermanns geographische Mitteilungen. Ergänzungsheft, No. 201) *Title tr.:* Proceedings of the second regular meeting in Leningrad, June 18-23, 1928, edited under direction of the Society by A. Berson and L. Breitfus.

Contents: 1. Proceedings of the general assembly.

2. Papers: Knipovich, N. M. Biological research in the Arctic (*in German*).

Wilkins, G. H. Observations of ice conditions made on an airplane flight from Pt. Barrow, Alaska to Spitzbergen, 1928.

Vorob'ev, B. N. Declaration of the 2d general assembly (*in French*).

Bleistein, W. Anchoring airships in the open (*in German*).

Hobbs, W. H. The aerological weather station on Mt. Evans in southwestern Greenland.

Kaminski, A. A wind-divide in northern Asia (*in German*).

VIZE, V. I. U. Some hydrologic and meteorologic problems of the Arctic (*in German*).

ROSE, N. On the construction of magnetic charts for the arctic zone of U.S.S.R. (*in German*).

Schulz, B. Hydrography of the western Barents Sea based on observations made during the summers of 1926-27 (*in German*).

Molchanov, P. A. Problems and methods of research on the atmosphere in arctic regions (*in German*).

Freimann, J. On the radio transmitter as a distance indicator of meteorological elements (*in German*).

WEGENER, A. L. Remarks on astronomical position-finding in airships (*in German*).

MATUSEVICH, N. N. The geophysical observatory "Matochkin Shar" on Novaya Zemlya (*in German*).

Tolmachov-Karpinski, E. On the newest polar research of the (U.S.S.R.) Academy of Science (*in German*).

AKHMATOV, V. The cartography of the Soviet Arctic (*in German*).

RODEWALD, M. Weather conditions in the Arctic during the Wilkins flight from Alaska to Spitzbergen, Apr. 16, 1928 (*in German*).

Papers by Akhmatov, Matusevich, Rodewald, Rose, Vize, and Wegener appear in this Bibliography under the author's name. *Copy seen:* DGS.

7770. IOFFE, SEMEN SAMOILOVICH. The Northern Sea Route as a transport problem. Moscow, U.S.S.R. Council, Institute of Pacific Relations, 1936. 1 p. l., 27 p. (U.S.S.R. Council papers, no. 5) Prepared for the Sixth Conference of the Institute of Pacific Relations, Yosemite Park, California, Aug. 15-29, 1936, and printed in the United States.

Contains an historical sketch of the search for a Northeast Passage from the 16th to 19th centuries, and of the efforts made by the Soviet Northern Sea Route Administration 1919-35, to open the route for transport passage.

Tables: 1. Kara Sea operations, 1920-35. Number of ships and freight, in tons.

2. Northeastern arctic trips, 1911-35; voyages from Vladivostok to the Kolyma, the Lena and Wrangel Island. Number of ships, destination, length of stay in the Arctic, amount of freight.

3. Through passage of ships from Novozemelskie Straits (Karskiye Voroata and Yugorskiy Shar) to Bering Strait, 1878-1935.

Contains materials collected by S. A. Novgorodov and edited by the author; texts with Russian translation of the ceremonial address to these spirits, their attributes and their various names are given. *Copy seen:* DLC.

7773. IONOV, V. Medved' po vozzreniām iakutov. (Zhivaia starina, 1915, v. 24, vyp. 3, Prilozhenie, p. 051-058) *Title tr.:* The bear according to the Yakut beliefs.

Contains materials on the Yakut beliefs and their attitude toward the bear with several folk-tales and incantations. *Copy seen:* DLC.

7774. IONOV, V. Obzor literatury po verovaniām iakutov. (Zhivaia starina, 1914, v. 23, vyp. 3-4, p. 317-72) *Title tr.:* A review of the literature on the beliefs of the Yakuts.

Contains an extensive review and critical analysis on two works by V. L. Seroshevskii: *Iakuty*, 1895, q.v. and "What Yakuts Believe In".

The reviewer deals with the inadequacy of Seroshevskii's transcriptions, inaccuracy of his data on clan and social organization, and on religion. *Copy seen:* DLC.

7775. IRMINGER, CARL LUDWIG CHRISTIAN, 1802-1888. The arctic current around Greenland. (Royal Geographical Society. Journal, 1856. v. 26, p. 36-43, incl. table) A communication read before the Society, April 1856, and reprinted in Royal Geographical Society, Arctic geography and ethnography, 1875.

Contains the first (apparently) correct statement of the course of the East Greenland Current (which carries ice around Cape Farewell and up Davis Strait); based on the author's study of logbooks for five years' voyages from Denmark to West Greenland. Includes a brief note on the Irminger Current, a branch of the Gulf Stream which turns north-northwest as the Stream flows past Iceland.

Copy seen: DLC.

7776. IRMINGER, CARL LUDWIG CHRISTIAN, 1802-1888. Den engelske nordpolarexpedition under kaptajn Nares. (Geografisk tidsskrift, Kjøbenhavn, 1877. Bd. 1, p. 2-6, map) *Title tr.:* The English Arctic Expedition under Captain Nares.

Account of this expedition of 1875-76 to northwest Greenland, and brief discussion of its scientific results.

Copy seen: DLC.

7777. IRMINGER, CARL LUDWIG CHRISTIAN, 1802-1888. Die Strömungen und das Eistreiben bei Island. (Gesellschaft für Erdkunde. Zeitschrift, 1861. Bd. 11, p. 191-211) *Title tr.:* Currents and drift ice around Iceland.

Translation in French was published in Revue maritime et coloniale, nov. 1861 and feb. 1862, t. 3, p. 238-55; t. 4, p. 419-20 (errata).

Discussion of the North Atlantic and Greenland Sea currents as they affect the amounts of ice from year to year, around Iceland. *Copy seen:* DLC.

7778. IRMINGER, CARL LUDWIG CHRISTIAN, 1802-1888. Die Temperatur im Nördlichen Atlantischen Meere und der Golfstrom. (Petermanns geographische Mittheilungen, 1870. Bd. 16, p. 244-49, incl. tables) *Title tr.:* The temperature of the North Atlantic Ocean and the Gulf Stream.

Translation in English was published in: U. S. Hydrographic Office, *Papers on the eastern and northern extensions of the Gulf Stream*, 1871, p. 92-103.

Contains general remarks (with only a few data) on the temperature of the North Atlantic section of the current, and casual mention of the extension of these waters in the Cape Farewell, Denmark Strait, and Barents Sea regions. *Copy seen:* DLC.

7779. IRMINGER, O. Aeldre beretninger om østkysten af Grønland. (Geografisk tidsskrift, Kjøbenhavn, 1884. Bd. 7, p. 117-21) *Title tr.:* Earlier reports on the east coast of Greenland.

Text, with remarks, of two manuscripts in the Icelandic State Library, describing an Icelander's journey to East Greenland in 1756, and the drifting of a Danish ship from Iceland to Greenland's east coast in 1748.

man against the North, by David
Irwin, with Franklin M. Reck; fore-
word by Lowell Thomas. New York,
Thomas Y. Crowell Co. 1940. 3 p. l.,
244 p. front. (port.) illus. (incl. maps)

Also published in London by R. Hale,
1942 (256 p. plates, ports.)

The author traveled from Barter
Island (off the Alaskan arctic coast)
eastwards across the Barren Grounds
of Canada to Baker Lake (a 3600-mile
trek) Jan. 1933-Feb. 1935. He visited
the North Magnetic Pole area on King
William Island, lived among the Eski-
mos, fed and traveled according to
their custom. He gives an entertaining
and sympathetic account of Eskimo
life, of his dogs, the hardships and
joys of living off the country in all
seasons. *Copy seen:* DLC; NNS Stef.

Nordpolen? (Norsk geografisk tids-
skrift, 1926-27, *pub.* 1927. Bd. 1, p.
100-04, sketch map.) *Title tr.*: Did
Peary reach the North Pole?

Summary account of the Peary Ex-
pedition, 1908-1909, and discussion of
distance per day covered on Peary's
sledge journey to the Pole; compari-
son with the Second *Fram* Expedition,
with the author's conclusions that
Peary's claims were reasonable and
probably authentic. *Copy seen*: DLC.

7802. ISACHSEN, GUNNERIUS ING-
VALD, 1868-1939. The hydrographic
observations of the Isachsen Spitsber-
gen Expedition 1909-10. Christiania,
J. Dybwad, 1912. 36 p. illus., 11 plates,
fold. chart. (Norske videnskaps-akad-
emi, Oslo. Skrifter. I. Matematisk-
naturvidenskapelig klasse, 1912. No.
14)

Issued also as Norske Spitsbergen-
ekspeditioner, 1909-1910. Résultats sci-
entifiques, 1916. T. 1, no. 7

Contains explanatory remarks on
charts of eight fairways and harbors,
including new place names; and sailing
directions for bays and harbors of
northwestern Spitsbergen; with notes
on Prince Charles Foreland and Norske
Hamna on Bear Island.

Copy seen: DLC (large fold. chart
is bound in the Academy's *Skrifter*,
No. 15).

plates, diagrs. [Publikasjon nr. 6 fra
kommandør Chr. Christensen hval-
fangstmuseum i Sandefjord] *Title tr.*:
Around the globe to hunt the blue
whale.

Describes whaling by Norwegians in
the Antarctic since 1898, and the vir-
tual extinction of former whaling
fields in the Arctic; modern methods in
whaling; the author's participation
antarctic whaling trips, comparative
ice conditions in the two polar areas,
icebergs, ice-breakers and modern whal-
ing ships; scientific cookery, flensing
and oil-producing methods; blue whales
and other species; nationalities en-
gaged in whaling. British licensing of
whalers; construction of whaling ships
in Norway. *Copy seen*: DLC; NN.

pelig klasse, 1912. No. 15) *Title tr.:*
Report of Isachsen Expedition to Spits-
bergen, 1909-1910.

Issued also as: Norske Spitsbergen-
ekspeditioner, 1909-1910. Résultats sci-
entifiques, 1916. T. 1, no. 9.

Report on the expeditions which
embarked both summers from Chris-
tiania in the *Farm*, a navy transport
ship. Outline of the surveys and studies
made, June-Sept. 1909, in fiords and
along the coasts of West Spitsbergen,
from Green Harbor on the west coast
to Red Fiord on the north coast, in-
cluding the eastern shores of Prince
Charles Foreland; work during the
same months of 1910, when a southern
group studied in the region of Green
Harbor, and that between Ice Fiord
and Bell Sound, and northern group
worked between King's Bay, Cross Bay,
Red Fiord and Wood Fiord, on Rein-
deer Peninsula and in Andrée Land.
Includes a description of the expedi-
tion's organization and personnel, re-
ports of four division leaders, brief
summary of results of work, and a
list of publications.

Quarterly journal, May 1855. v. 11, p. 497-520, fold. map) Also published in *American journal of science*, May 1856, Ser. 2, v. 21, p. 313-38.

Contains explanatory remarks to a geological sketch map which summarizes the (then) published observations on the area from the U.S.-Canadian boundary to the Arctic Ocean. Includes a bibliography, and geologic notes on the basins of Hudson Bay, Mackenzie River and Great Slave Lake.

Copy seen: DGS.

7836. ISBISTER, ALEXANDER KEN. NEDY, 1822-1883. Some account of Peel River, N. America. (Royal Geographical Society. Journal, 1845. v. 15, p. 332-45, fold. map)

Based on observations made by the author, 1840-41, as a Hudson's Bay Co. fur trader in the region between the Red, Peel, and Rat Rivers, tributaries of the lower Mackenzie. General descriptions of the physical features, natural history and geology of the country north and west of Fort Good Hope (66°17'N. 128°40'W.).

Copy seen: DLC.

7837. ISELIN, COLUMBUS O'DONNELL, 1904-. A report on the coastal waters of Labrador. Based on explorations of the "Chance" during the summer of 1926. (American Academy of Arts and Sciences. Proceedings, Oct. 1930, pub. 1932. v. 66, p. 1-37, tables, diags.)

The explorations of the *Chance* included three cross sections of the Labrador Current, the first off Cape Race, Newfoundland, the second off Sandwich Bay, Labrador (54°N.) and the third off Nachvak Bay (59°N.). This report contains discussion of the *Chance* profiles, the Davis Strait sector, the Labrador Current, the bays and fiords of Labrador, also the phytoplankton, with

an annotated list of forty-three species. Includes a bibliography, and tables of oceanographic data.

Copy seen: DLC.

7838. ISELIN, COLUMBUS O'DONNELL, 1904-. A study of the northern part of the Labrador Current. (American Geophysical Union. Transactions, 1927. v. 8, p. 217-22; also, National Research Council. Bulletin, 1927. No. 61, p. 217-22)

Discussion of temperature, salinity and velocity of the Labrador Current, as shown by two profiles, one off Nachvak Bay, the other south of Hamilton Inlet, result of the cruise of the *Chance*, 1926.

Copy seen: DLC.

Discussion of occurrence of fresh water supply in shallow wells near Indiga and on the Kanin Peninsula, and in the form of nales' near Pechora estuary.
Copy seen: DLC.

7856. ĬUR'EV, B. N. Rekognosti-rovochnoe obsledovanie Kolokolkovoï guby v iûle 1934 g. (Vsesoiûznoe geograficheskoe obshchestvo. Izvestiâ, 1935. T. 67, vyp. 1, p. 37-53, illus. (maps)) **Title tr.:** Reconnaissance of Kolokolkova Bay in July 1934.

Description of the Kolokolkova Bay region (on the coast of Archangel district at about 68°32'6"N. 52°12'5"E.)

as the possible location for a settlement, its waters, ice conditions, climate, etc.

Copy seen: DLC.

7857. ĬUR'EV, D. Topograficheskoe opisanie Sïvernago Urala i riêk ego oboikh sklonov. (Vsesoiûznoe geograficheskoe obshchestvo. Zapiski, 1852. Kn. 6, p. 265-382) **Title tr.:** Topographic description of the Northern Ural and the rivers of both its slopes.

Detailed descriptions of the area from 61°N. to the sea as observed during Ural Expedition of 1847-48 (Cherdyn' to Berezovo) by a topographer who worked with group led by Strazhevskii. Includes a sketch of the way of life of the Ostyaks, and a list of generic geographic terms in Vogul, Ostyak, Samoyed, Zyryan, and Russian dialects (p. 268-71). Author's diary of June 29 - Aug. 29, 1848, describing great loss among the reindeer, is given (p. 338-82) to justify expedition's failure to complete assignment.

Copy seen: DLC.

7858. ĬURGENS, N. D. Êkspeditshiâ k ust'û riêki Leny s 1881 goda po 1885 god. (Vsesoiûznoe geograficheskoe obshchestvo. Izvestiâ, 1885. T. 21, p. 249-302, 2 fold. maps, tables) **Title tr.:** The expedition to the estuary of the River Lena, from 1881 till 1885.

Account by the leader, of the work of a group consisting of himself, Dr. A. A. Bunge, A. G. Eigner, and five members of the armed forces, who established a station (at 73°22'8"N. 126°35'E.) on Sagastyr' Island as required by the program of the First International Polar Year.

Contains information on the organization and equipment of the expedition, the trip down the Lena from Yakutsk (with description of the river), the arrival at Kytakh settlement (Aug. 7, 1882), and the construction of the Sagastyr' Station nearby; on the work at the station (according to the program from the middle of November), the Yakuts of the delta (p. 263-67), Dr. Bunge's trip to Cape Bykov (1883) to collect information regarding how mammoths are preserved; on the work in 1884, including Eigner's trip to Ust'-Yansk to make additional meteorologic observations and astronomic determinations, and the excavation of a mammoth some twenty miles from the station (p. 275-77). On July 1, 1884,

the observations at the station stopped, and the party retraced its steps to Yakutsk, where Dr. Bunge joined them after completing his excavations. In addition to the meteorologic and magnetic observations required, work was done on tides, specific gravity and temperature of water, auroras, ground temperature at depths of 80 and 160 cm., topography, and determinations of geographic coordinates.

Appendix 1. Coordinates for nine places in the area (p. 285).

Appendix 2. Daily averages (Sept. 1, 1882–Aug. 31, 1883) for barometric pressure, air temperature, absolute and relative humidity, cloudiness, force of wind, land surface and snow surface temperatures, temperature at depth of 0.40 meters. Monthly averages at each hour for the same categories. Monthly duration of wind (by directions) and average velocity.

Map of Lena delta, shows astronomic and magnetic determinations, the winter route from Ketakh (Kytakh) to Bulun, and the tree line. Scale about 1:950,000.

Plan of the Sagastyr' Station.

Copy seen: DLC (maps at end of volume).

7859. FÜRGENS, N. D. Magnitnyia nabludeniia na stantsii v ust'akh r. Leny. Magnetische Beobachtungen der Station an der Lenamündung. (*In:* International Polar Year. 1st, 1882–1883. Ekspeditiia k ust'fu reki Leny, 1882–1884. Trudy Russkoi polarnoi stantsii, 1895. Chast' 1, p. 40–88, and 166 p. of tables and remarks) **Title tr.:** Magnetic observations at the Lena delta station. Text in Russian and German.

Report from the station of the Russian International Polar Year Expedition located at Sagastyr' Island, 73°22'8"N. 126°35'E., giving the results of hourly measurements of horizontal and vertical intensity and declination; five-minute and 20-second measurements of these three elements on semi-monthly term dates and the diurnal variation of the mean monthly values of these elements, Nov. 1882–June 1884.

The journal of aurora observations contains tabulations of individual occurrences with symbols indicating form, direction, intensity, light motion, and height.

7932. JACKSON, A. RANDELL. On a collection of spiders made in 1928 by Dr. Sig Thor in Spitsbergen. (Norsk entomologisk tidsskrift, 1934. Bd. 3, p. 332-56, plate)

Besides the collection of Sig Thor, the author reports on three species collected by the Cambridge Expedition

to Edge Island, 1927. He gives an annotated list, with localities and dates, of thirteen (including with description, one new) species and two new varieties, of which three are new to Spitsbergen; some general notes on spiders of the Arctic and discussion of distribution on West Spitsbergen and elsewhere in the Arctic; bibliography (35 items).

7938. JACKSON, A. ALEXANDER YOUNG, 1882- . Banting as an artist, by A. Y. Jackson, with a memoir by Frederick W. W. Hipwell. Toronto, Ryerson Press, 1943. 37, [1] p., 1. incl. front. (port.) illus. 18½ x 14 cm. (The Canadian art series)

Outline of Dr. Banting's life and avocation, with list of his paintings, etc., and some reproductions. Includes record of his sketching in the Canadian Eastern Arctic on the cruise of the *Beothic*, 1927, and in the Great Slave Lake region. *Copy seen:* DLC.

7939. JACKSON, A. ALEXANDER YOUNG, 1882- . The far North; a book of drawings by A. Y. Jackson, with an introduction by Dr. F. G. Banting, and descriptive notes by the artist. Toronto, Rous & Mann Ltd. [1927?] [11] p. illus. (incl. sketch map), 17 plates. "First edition of one thousand copies of which fifty, edition de luxe, are printed on *Carlyle japan* and signed by the author."

Black-and-white reproductions of drawings from sketches made by Jackson during a cruise of the *Beothic* in summer 1927. Includes land- and sea-scapes and scenes of Eskimo life, sketched along the ship's course to Godhavn, westward through Lancaster

Sound and return, northward to Etah and Bache Peninsula, then southward; calling at Royal Canadian Mounted Police posts on North Devon, Ellesmere and Baffin Islands, Ungava and Labrador Peninsulas. *Copy seen:* NN.

7940. JACKSON, FREDERICK GEORGE, 1860-1938. The great frozen land (Bolshaia zemelskija tundra) narrative of a winter journey across the tundras and a sojourn among the Samoyads, by Frederick George Jackson. Ed. from his journals by Arthur Montefiore. London and New York, Macmillan & Co., 1895. xviii, 297 p. incl. front., illus. 3 fold. maps.

In the fall of 1893 the author went to Vaygach Island, explored it and spent a year living and traveling among the Samoyeds using reindeer and ponies for sledge hauls. He traversed the arctic coast from Vaygach to the Pechora; ascended that river to Ust Tsilma; traveled westward to the Mezen, thence via the Pinega to Archangel, thence eastward around the White Sea, and north across the Kola Peninsula to Varanger Fiord. This journey was undertaken to learn winter travel methods and gather information from the natives, in preparation for the author's Franz Josef Land expedition begun later in the year 1894.

This narrative gives an account of the journey; notes on iceblink and ice in Barents Sea, the tundra, the Samoyeds' appearance, ways of life, language, folk-tales, character, food, travel methods, beliefs and diseases; remarks on the natural history, weather, rivers, and camping; and on the Lapps' costume, deer and sledge; also notes on scurvy and frostbite.

Appendices: A. Jeaffreson, J. R. Notes on the ornithological results of Mr. Jackson's journey.

B. Weather observations, Sept. 1893-Jan. 1894, including twice-daily barometer, maximum and minimum temperature, and wind direction.

C. Topographical notes to accompany the map of the Great Tundra.

D. The Jackson-Harmsworth Polar Expedition: its object, method, and equipment. *Copy seen:* DLC; NNStef.

7941. JACKSON, FREDERICK GEORGE, 1860-1938. The Jackson-Harmsworth polar expedition. (Geographical journal, Aug. 1894. v. 4, p. 141-47)

Paper read at the Royal Geographical Society, June 1894, describing the plans, routes, outfit, equipment, food, and the ship, *Windward*, which transported the party to Franz Josef Land.

Copy seen: DLC.

7942. JACKSON, FREDERICK GEORGE, 1860-1938. The lure of unknown lands; North Pole and Equator. London, G. Bell and Sons, Ltd., 1935. xii, 342 p. front., plates, ports., fold. maps.

Autobiography of the explorer of Franz Josef Land who spent three years there, 1894-97, as leader of the Jackson-Harmsworth Expedition.

Copy seen: DLC; NNSStef.

7943. JACKSON, FREDERICK GEORGE, 1860-1938. A thousand days in the Arctic, by Frederick G. Jackson . . . with preface by Admiral Sir F. Leopold McClintock . . . Illustrated from photographs by the author and drawings by R. W. Macbeth, Clifford Carleton, Harry C. Edwards, E. F. W. Frohawk . . . with five original maps. New York and London, Harper & Brothers, 1899. xxiii, 940 p. incl. front., illus., port. 15 plates (1 fold.) port., 5 fold. maps.

Narrative of the Jackson-Harmsworth Expedition, financed by Alfred C. Harmsworth, organized and equipped by Montefiore Brice, and led by Jackson. The expedition sailed in the *Windward* to Franz Josef Land, established winter quarters at Cape Flora, Northbrook Island, Sept. 1894, and remained for three years. When the ship supplied this base in July 1896, F. Nansen and F. H. Johansen (passing through the camp from the *Fram* expedition) sailed home with her to Norway. In the summer of 1897 the vessel called and took the expedition home. Throughout this period the party made sledge journeys in the archipelago, surveyed, made scientific collections, and kept a meteorological record.

The author's journal (p. 5-775) records day by day, July 12, 1894-Sept. 3, 1897, the course and events of the expedition, describes in detail the hunting, weather, ice conditions, the polar night and its effects, pony and dog sledging, the terrain, health, food, etc. Includes a chapter on scurvy, p. 776-85.

Appendices (17 in all) give data on birds and eggs, botany, geology, fossils,

declination, soil and fresh-water temperatures, tides, wind, weather, geographical positions, and meteorological tables (monthly résumé of Cape Flora observations. Sept. 1894-Sept. 1896, and a daily journal of weather, ice conditions and auroral observations, p. 818-62).

Maps: one shows Franz Josef Land as known in 1894, and four show results of explorations in western Franz Josef Land, 1894-97.

Copy seen: DLC; NNSStef.

7944. JACKSON, FREDERICK GEORGE, 1860-1938, and others. Three years' exploration in Franz Josef Land. (Geographical journal, Feb. 1898. v. 11, p. 113-38, illus., fold. map)

Account, by the leader, of the Jackson-Harmsworth Expedition to Franz Josef Land, 1894-97; life at the base camp (a log hut built at Archangel for the purpose) on Cape Flora, the sledge trips (using Russian ponies as well as dogs), the explorations, surveying and scientific work carried out.

Appendix (general statements without data): Armitage, Lt. Meteorological, magnetic, and astronomical observations.

Koettlitz, R. Brief sketch of the geology.

Fisher, H. Flora of Franz Josef Archipelago.

Bruce, W. S. The zoology of the expedition.

7945. JACKSON, HARTLEY HARRAD THOMPSON, 1881- , and others, comp. Literature on the natural history of the arctic region with special reference to Alaska and Canada. Washington, 1949. 48 p. process print. (U. S. Fish and Wildlife Service. Wildlife leaflet, 317) *Other compilers:* E. M. Charters, A. J. Duvall, and S. F. Hildebrand.

A list compiled during World War II for use by various government agencies, of the more important publications relating "more specifically to the vertebrates," and not including botanical publications. It contains nearly four hundred references to papers in journals and to books and sections of books published in the 19th and 20th centuries, with data on the occurrence of birds, mammals and fishes of Canada and Alaska.

Copy seen: DF.

7946. JACKSON, J. R. On ground-ice in the Siberian rivers. (Royal Geographical Society. Journal, 1836. v. 6, p. 416-18)

Contains discussion of the occurrence and mode of formation of anchor ice.

Copy seen: DLC.

7947. JACKSON, NAOMI. With the "doctor boat" along the Greenland coast. (Geographical review, Oct. 1943, v. 33, p. 545-68, 2 maps)

Description, by a Canadian artist, of the landscape, coastal waters, Eskimos and their homes, clothes, settlements, etc., in the Godthaab District of West Greenland; with emphasis on the medical service maintained for the Greenlanders, and on their health, and fisheries. Illustrated with reproductions of photographs and of the author's paintings.

A loan collection of the author's paintings is in the Arctic Institute of North America, Montreal.

Copy seen: DLC.

7948. JACKSON, R. M. A traverse from Ice Fiord to Wijde Bay, Spitsbergen. (Geographical journal, Sept. 1931. v. 78, p. 277-83, 4 plates, sketch map).

Account of journeys by foot across the glacier during the Cambridge Spitsbergen Expedition, 1930, which had as its purpose the mapping of the Mittag-Leffler Glacier, and exploration of its branches.

Copy seen: DLC.

7949. JACKSON, SHELDON, 1834-1909. Alaska, and missions on the North Pacific coast. New York, Dodd, Mead & Co. [c1880] ix, [13]-327 p. incl. illus., 34 plates, incl. ports. fold. map.

Contains brief description of the physical features of Alaska; notes on population and tribes of Indians, on their religious beliefs, customs, and the status of women. Includes history of early missions, especially in southeast Alaska.

Copy seen: DLC; NNSf.

7956. JACOBSEN, JOHAN ADRIAN, 1853- . Captain Jacobsen's Reise an der Nordwestküste Amerikas, 1881-1883, zum Zwecke ethnologischer Sammlungen und Erdkundigungen, nebst Beschreibung persönlicher Erlebnisse, für den deutschen Leserkreis bearbeitet, von A. Woldt. Leipzig, M. Spohr, 1884. viii, 431 p. illus., 3 maps (1 fold.) *Title tr.:* Captain Jacobsen's journey to the northwest coast of America, 1881-1883, for collecting ethnological materials and information, with a description of personal experience, edited for German readers by A. Woldt.

Describes expedition to Alaska and British Columbia undertaken by Jacobsen with the financial aid of the Hilfs-Comites zur Beschaffung ethnologischer Sammlungen für das Berliner Königlicher Museum (Aid-Committee for Providing Ethnological Collections for the Royal Museum of Berlin). Gives a running account of travel problems, weather, and geographical observations.

Principal trip was a six-month sledge trip in winter of 1882-83, along south side of Seward Peninsula to Bering Strait; across base of Seward Peninsula to Kobuk River on Kotzebue Sound; across Yukon delta; along lower Kuskokwim River; and southeast to Togiak Bay. A steamer trip was made up the Yukon River to the Tanana and return; an umiak trip from Bristol Bay to and along Cook's Inlet via Iliamna Lake; and a short visit to the Copper River delta.

Chief collections (of which numerous illus.) were made from West Alaska Eskimos and Ingalik Indians; lesser ones from northern Tlingit and other nearby tribes. Includes detailed descriptions of shamanistic performances and festivals, and other varied ethnologic data. Archeologic excavations were made at a village site (Soonroodna) on Kenai Peninsula. Sea-otter hunting reported from Kenai Peninsula.

Maps: all show Jacobsen's routes (1) Yukon delta, scale 1:3,000,000 (inset, Iliamna Lake, scale 1:3,500,000); (2) base of Seward Peninsula, hachure relief, scale 1:2,360,000; (3) land between Kuskokwim Bay and Togiak Bay; hachure relief, scale 1:1,700,000; (4) location map (fold.), northwestern North America, scale 1:11,500,000.

The author was a member of the Massachusetts Institute of Technology Expedition, 1907. This expedition started to Alaska in April, to study volcanoes of the Aleutian Islands, and was able to study the new McCulloch Cone which arose in Dec. 1906 and disappeared Sept. 1, 1907. He gives here a full description of Bogoslof Island, as of the date visited, a discussion of the volcano's past activity, and a strong plea for the establishing of a research center on the Aleutians for volcanic study. *Copy seen:* DLC.

(Die Strandterrassen des Arfersiorfik-Fjordes als Zeugnis der diluvialen und postdiluvialen Vertikalbewegungen West-Grönlands). (Czasopismo geograficzne, 1938. T. 16, p. 307-324, illus., 2 sketch maps) *Title tr.:* The shore terraces of Arfersiorfik Fiord as traces of Diluvial and Post-Diluvial uplift. Text in Polish; summary in German.

The author was geomorphologist of the Polish Greenland Expedition, 1937, which made its base on the west coast at about 68°N. He gives here a description of the ice abrasion terraces on the outer coast at Godthaab and Egedesminde; a comparison of these with the marine terraces within the fiord, which extend inland to a point beyond the present edge of the icecap; and discussion of these phenomena in relation to similar forms on the Scandinavian coast and to the different limit of the icecap at the time the uplift was occurring.

7979. JAMES, JAMES ALTON, 1864-. The first scientific exploration of Russian America and the purchase of Alaska. Evanston and Chicago, Northwestern University, 1942. xii, 276 p. plates, ports., double map. (Northwestern University Studies in the Social Sciences, no. 4)

A study to ascertain the specific contributions made by Robert Kennicott and James M. Bannister, to Senator Sumner's knowledge of Alaska, hence their influence on the acquisition of Alaska by the United States in 1867.

Contents: 1. Introduction: A. Robert Kennicott. (Outline of his life, his first expedition to Russian America 1859-62).

B. Project for an overland telegraph line between western and eastern continents. (Kennicott's work as chief of explorations on the Western Union Telegraph Co. Expedition 1865 till his death 1866).

C. Treaty for cession of Russian Territory to the U. S.

D. Contemporary knowledge of Alaska, 1867. (Analysis of Sumner's speech of April 9, to show sources of his information on Alaska).

E. Testimony of H. M. Bannister (who participated in the Western Union Telegraph Expedition 1865-67; analysis of his journal to show his contributions to Sumner's and Seward's information on Alaska).

2. Journal of Robert Kennicott, May 19, 1859-Feb. 11, 1862.

3. Bibliography of writings of R. Kennicott.

4. Journal of H. M. Bannister, Mar. 21, 1865-Jan. 20, 1867.

5-6. Letters from Bannister and Kennicott.

The journals of Kennicott and Bannister appear in this Bibliography under their author's names.

8013. JELSTRUP, HANS SEVERIN, 1893- . Déterminations astronomiques pour Norges geografiske opmåling. Oslo, J. Dybwad, 1928. 27 p. illus., diagrs. (Norway. Norges Svalbard- og Ishavs-undersøkelser. Skrifter. Nr. 16) *Title tr.*: Astronomical determinations for the Norwegian Geographical Survey.

Description of the instruments, the methods and the astronomical station at Green Harbor, and a report on the determinations made in 1922, for geographic positions. *Copy seen:* DLC.

8014. JELSTRUP, HANS SEVERIN, 1893- . Nogen trekk fra to astronomiske stedsbestemmelser på Øst-Grønland. (Norsk geografisk tidsskrift, 1934-35, pub. 1935. Bd. 5, p. 110-16) *Title tr.*: On two astronomical determinations of places in East Greenland.

General remarks on astronomical determinations of places and Wegener's continental drift theory; account of the author's observations in Myggbukta in 1931, and at Germania Harbor on Sabine Island in 1932, during the Norwegian Expeditions to East Greenland, with remarks on scientific results.

Copy seen: DLC.

8015. JELSTRUP, HANS SEVERIN, 1893- . Sravnenie starykh i novykh astronomicheskikh dolgotnykh opredelenii na o. Sabina (Vost. Grenlandiia) kak kriteriihipotezy Vegenera. (Vsesoiuznoe geograficheskoe obshchestvo. Izvestiia, 1947, T. 79, vyp. 6, p. 647-52) *Title tr.*: A comparison of old and new determinations of longitude on Sabine Island (East Greenland) as a criterion of the Wegener hypothesis.

An original article in the Russian language based on author's observations in 1932, confirming the probable correctness of Wegener's continental drift theory.

Copy seen: DLC.

8016. JENKINS, DALE W. Ecological observations on the blackflies and punkies of central Alaska. (Mosquito news, Dec. 1948. v. 8, p. 148-54, diagrs.)

Results of the Alaska Insect Control Project, 1947, in the area defined in the author's *Ecological observations on the mosquitoes*, 1948, q.v., during the period May 5-Aug. 24, 1947.

Report on preliminary observations of distribution, habitats, abundance and biting habits of twenty species of blackflies (Simuliidae) and eight species of *Culicoides* ("no-see-ums", or "mosquito-flies").

Copy seen: DLC.

8017. JENKINS, DALE W. Ecological observations on the mosquitoes of central Alaska. (Mosquito news, Dec. 1948. v. 8, p. 140-47, illus. (tables, diagrs.))

Results of the Alaska Insect Control Project, 1947, during which the Biology section made observations from Anchorage to Fairbanks and Circle, and from there to Tok and Valdez along the highways and railroads. (Special trips were made to Nome, Mt. McKinley National Park and Adak Island, but Anchorage was the only area extensively studied.) Author reports on distribution, succession of species during larval breeding season, larval habitats, and natural control; and field notes on eighteen species.

8018. JENKINS, JAMES TRAVIS, 1876- . A history of the whale fisheries, from the Basque fisheries of the tenth century to the hunting of the finner whale at the present date. London, H. F. & G. Witherby, 1921. 336 p. 12 plates, map.

Includes notes on migrations and species of whales, regulations for their protection, and the history of various countries' whalers in Spitsbergen waters, Greenland Sea, Davis Strait, Okhotsk, and Beaufort Seas. Bibliography p. 315-31.

Copy seen: DF.

8019. JENKINS, JAMES TRAVIS, 1876- . Whales and modern whaling. London, H. F. & G. Witherby [1932] 239 p. 22 plates.

Includes a chapter on the natural history of whales and their protection; and one on the Greenland right whale which is circumpolar in distribution.

Copy seen: DLC; NNS Stef.

8020. JENKINS, THOMAS, *Bishop*, 1871-. The man of Alaska, Peter Trimble Rowe, by the Right Reverend Thomas Jenkins, D.D., retired Bishop of Nevada. New York, Morehouse-Gorham co., 1943. xvi p., 1 l., 340 p., 1 l. col. front., plates, ports., map on lining-papers.

The life and work of the first Episcopal Church bishop of Alaska who went there in 1895, and served throughout the Territory until 1912, continuing as bishop until his death in 1942.

Copy seen: DLC; NNSf.

8021. JENNESS, DIAMOND, 1886- , *editor*. The American aborigines, their origin and antiquity; a collection of papers by ten authors, assembled and edited by Diamond Jenness; published for presentation at the Fifth Pacific Science Congress, Canada, 1933. [Toronto] University of Toronto Press, 1933. 396 p. illus. (maps).

Contents include: JOHNSTON, W. A. Quaternary geology of North America in relation to the migration of man.

BOAS, F. Relationships between north-west America and north-east Asia.

JENNESS, D. The problem of the Eskimo.

These papers, relating particularly to northern regions, appear in this Bibliography under their author's name. Other papers referring to the Arctic as to other regions only in general discussion, or relating entirely to non-Arctic regions do not appear in this Bibliography. *Copy seen:* DLC.

8022. JENNESS, DIAMOND, 1886- . An archaeological collection from the Belcher Islands in Hudson Bay. (Pittsburgh. Carnegie Institute. Museum. Annals, Feb. 1941. v. 28, p. 189-206, illus., 9 plates)

Contains a report on a collection of about a thousand artifacts collected by the Carnegie Museum Expedition to Hudson Bay 1938 and deposited in the National Museum of Canada: hunting and fishing weapons, household tools and ornaments, are described and figured. The author concludes that the specimens represent an Eskimo community in the later stages of Thule culture, showing influence from Southampton Island in ornaments and of the Dorset culture in some implements.

Copy seen: DLC.

8023. JENNESS, DIAMOND, 1886- . Archaeological investigations in Bering Strait, 1926. (*In:* Canada. National Museum. Bulletin, no. 50. Annual report for 1926, pub. 1928. p. 71-80, 3 plates)

Contains report on archeological excavations at Wales, and the Diomed Islands, and on linguistic data collected at four places in the summer of 1926, with some discussion of evidences of Eskimo migration and culture origins. Reports the discovery of the Old Bering Sea culture on the Diomedes and of a Thule culture at Wales.

Copy seen: DLC.

8024. JENNESS, DIAMOND, 1886- . Arrow-straighteners, thong-smoothers, and bâtons-de-commandement. (Man; a monthly record of anthropological science, May 1937. v. 37, p. 73-74, plate)

Descriptions of bone, ivory, and wood arrow-straighteners, thong-smoothers, and bow-adjuster, now in the National Museum of Canada, collected from the North Alaska, Copper, and Greenland Eskimos. Comparison of these with similar implements from other areas.

Copy seen: DLC.

8025. JENNESS, DIAMOND, 1886- . The "blond" Eskimos. (American anthropologist, 1921. New ser., v. 23, p. 257-67)

Discussion of physical characteristics of Copper Eskimos in comparison with other Eskimo tribal groups and in connection with infusion of European racial stocks. Further discussion, followed, by L. R. Sullivan and H. H. Noice, (*The Blond Eskimo, a question of method*) in American anthropologist, 1922. New ser., v. 24, p. 225-32.

Copy seen: DLC.

8026. JENNESS, DIAMOND, 1886- . Canada's Indian problems. (Smithsonian Institution. Annual report, 1942, pub. 1943. p. 367-80, 4 plates on 2 l.) "Reprinted . . . from the America indigena, v. 2, no. 1, 1942."

A survey of effects upon Indians and Eskimos of their contacts with Europeans in North America.

Copy seen: DLC.

8027. JENNESS, DIAMOND, 1886- . Comparative vocabulary of the Western Eskimo dialects. Ottawa, King's Printer, 1928. 134 p. (Canadian Arctic

Expedition, 1913-18. Report. v. 15: Eskimo language and technology, Pt. A)

Contains a list of about two thousand words, with meanings and dialect variants, from Eskimos of Coronation Gulf, Mackenzie delta, North and West Alaska (Barrow, Wales (Bald Head), Inglestat and Nunivak Island) and East Cape (mys Dezhneva) on Chukotsk Peninsula (through observations); and from Greenland and Labrador Eskimos (through literature), with some introductory discussion. *Copy seen:* DSI-M.

8028. JENNESS, DIAMOND, 1886-. The Copper Eskimos. (Geographical review, Aug. 1917, v. 4, p. 81-91, illus., map)

A report, submitted to the Canadian government, and dated July 18, 1916, H. M. S. Alaska, Young Point, N.W.T., on the author's studies among the Eskimos, 1914-16, while he was with the southern party of the Canadian Arctic Expedition 1913-18. The author outlines the geographic distribution of five groups (with map) and describes their customs. *Copy seen:* DLC.

8029. JENNESS, DIAMOND, 1886-. The cultural transformation of the Copper Eskimo. (Geographical review, Oct. 1921, v. 11, p. 541-50, sketch map)

History of these natives' encounters with explorers, from Hearne in 1771, to Barnard in 1914; discussion of their old culture and their acculturation. *Copy seen:* DLC.

8030. JENNESS, DIAMOND, 1886-. Eskimo art. (Geographical review, Apr. 1922, v. 12, p. 161-74, illus.)

Contains discussion of Eskimo drawing in general, and especially of examples from Smith Sound, region of northwest Greenland, Great Whale region of Hudson Bay, and Cape Prince of Wales, northern Alaska. *Copy seen:* DLC.

8031. JENNESS, DIAMOND, 1886-. Eskimo string figures. (Journal of American folk-lore, 1923, v. 36, p. 281-94)

Designed as appendix to the author's *Eskimo string figures*, 1924, *q.v.*, this paper contains a discussion of Eskimo beliefs concerning string figures, also of distribution of Eskimo string figures. *Copy seen:* DLC.

8032. JENNESS, DIAMOND, 1886-. Eskimo string figures. Ottawa, King's Printer, 1924. 192 p. illus., map. (Canadian Arctic Expedition, 1913-18. Report. v. 13: Eskimo folk-lore, Pt. B.)

Contains descriptions, illustrations and discussion of one hundred fifty-six string figures, known among North Alaska, Mackenzie and Copper Eskimos; also table showing distribution among the Chukchis, and the Eskimos of Siberia, west and north coast of Alaska, and the Mackenzie, Coppermine and Hudson Bay regions. *Copy seen:* DSI-M.

8033. JENNESS, DIAMOND, 1886-. The Eskimos of northern Alaska: a study in the effect of civilization. (Geographical review, Feb. 1918, v. 5, p. 89-101, illus., map)

Contains a discussion of changes in hunting implements, population distribution, social and family life, and social system (morality, hygiene, etc.); the missionary influence, trapping as an economic readjustment, education and future prospects. *Copy seen:* DLC.

8034. JENNESS, DIAMOND, 1886-. Ethnological problems of arctic America. (In: American Geographical Society, N. Y. Problems of polar research, 1928, p. 166-75)

Brief statement of work remaining to be done on the early Eskimo cultures (Thule, Cape Dorset, and Bering Sea cultures) and on archeology, and physical anthropology. *Copy seen:* DLC.

8035. JENNESS, DIAMOND, 1886-. Ethnology and archaeology. (In: A program of desirable scientific investigations in arctic North America. *Pub. as:* Arctic Institute of North America. Bulletin, Mar. 1946. No. 1, p. 57-59)

Suggests need for archeological studies at specific places in Alaska, in central Arctic, and Labrador, and for linguistic socio-economic, and ethno-medical studies in the Arctic. *Copy seen:* DLC; DSI-M; CaMAL.

8036. JENNESS, DIAMOND, 1886-. Grammatical notes on some Western Eskimo dialects. Ottawa, King's Printer, 1944. 34 p. (Canadian Arctic Expedition, 1913-18. Report. v. 15: Eskimo language, Pt. B.)

Contents: Barrow dialect, p. 5-29. Other Western dialects, p. 29-34. *Copy seen:* DLC.

8037. JENNESS, DIAMOND, 1886- .
A Hare Indian dog. (Canadian field naturalist, Apr. 1937. v. 51, p. 47-50, illus.)

Description quoted from Sir John Richardson's *Fauna boreali-americana*, 1829, of the breed of dogs found around Great Bear Lake, and discussion of the apparently similar breed recently encountered in northern British Columbia.

Copy seen: DLC.

8038. JENNESS, DIAMOND, 1886- .
The Indians of Canada. Ottawa, King's Printer, 1932. x, 446 p. col. front. illus. col. plates, maps (incl. 1 fold.) (Canada. National Museum. Bulletin 65)

Basic work, based on the author's field investigations, study of the literature, museum specimens, etc.

Contains chapters on language, economic conditions, food resources, hunting and fishing, dress, dwellings, transportation, trade, social life and organization, religion, folklore, art, archeology; on Indian origins and relations with white people; also chapters on tribal groups individually including Montagnais and Naskapi, Cree, Tlingit, Sikani, Beaver, Chipewyan, Yellowknife, Slave, Dogrib, Hare, Nahani and Kutchin Indians, and Eskimos. Bibliography, p. 430-36.

Map: Aborigines of Canada, linguistic families and tribal locations, scale 1:12,500,000.

Copy seen: DLC.

8039. JENNESS, DIAMOND, 1886- .
The Indians of Canada. Second edition. Ottawa, King's Printer, 1934. x, 446 p. col. front. illus. col. plates, maps (incl. 1 fold.) (Canada. National Museum. Bulletin 65)

Another printing of the item above, with some topographical errors corrected and errata slip inserted at p. 401.

Copy seen: CaO.

8040. JENNESS, DIAMOND, 1886- .
The Indians of the Northwest Territories and Yukon. (*In:* Bethune, W. C., and others. Canada's western northland, 1937. p. 49-60, illus., sketch map)

Contains a succinct account of the nine tribes of Athapaskans, with a map of approximate distribution; and notes on their material culture, status of women, customs, and amusements.

Copy seen: DLC.

8041. JENNESS, DIAMOND, 1886- .
The life of the Copper Eskimos. Ottawa, King's Printer, 1922. 277 p. illus. (diags. and photos.), 9 plates (photos), maps. (Canadian Arctic Expedition, 1913-18. Report. v. 12: The Copper Eskimos, [Pt. A])

A detailed study of Eskimos of Coronation Gulf region, their social and spiritual culture. *Contains* chapters on the country, population, trade, dwellings, social organization, food, winter and summer life, hunting and fishing, marriage and children, sickness and death, religious beliefs, shamanism, amusements, psychology and morality. Bibliography, p. 250-51.

This part is indexed in General index to volume 12, The Copper Eskimos, in: Cameron, J. *Osteology of Western and Central Eskimos*, 1923.

Copy seen: DSI-M.

8042. JENNESS, DIAMOND, 1886- .
Little Diomed Island, Bering Strait. (Geographical review, Jan. 1929. v. 19, p. 78-86, illus.)

A description of archeological material (dwellings and artifacts) resulting from excavations during the summer 1926, and a discussion of its relationship to the Thule culture, with notes on the flora, fauna, physical characteristics and inhabitants of the island.

Copy seen: DLC.

8043. JENNESS, DIAMOND, 1886- .
Material culture of the Copper Eskimo. Ottawa, King's Printer, 1946. 148 p. col. front., 189 illus. and plates (partly col.) Canadian Arctic Expedition, 1913-18. Report. v. 16)

Contains chapters (with introductory discussions and descriptions of specimens) on material resources, dress and adornment, household furniture, tools and weapons, miscellaneous (sleds, harness, packs, kayaks), playthings.

Copy seen: DSI-M.

8044. JENNESS, DIAMOND, 1886- .
Myths and traditions from northern Alaska, the Mackenzie delta, and Coronation Gulf. Ottawa, King's Printer, 1924. 90 p. (Canadian Arctic Expedition, 1913-18. Report. v. 13: Eskimo folk-lore, Pt. A)

Introductory discussion and texts of ninety-four stories in English translation, of which thirteen are given also

in Eskimo dialect with word-for-word rendering into English.

Copy seen: DSI-M.

8045. JENNESS, DIAMOND, 1886- . A new Eskimo culture in Hudson Bay. (Geographical review, 1925. v. 15, p. 428-37, illus.)

A discussion of the Cape Dorset culture, here described for the first time, in relation to the Thule culture, based on collections from the Hudson Bay region.

Copy seen: DLC.

8046. JENNESS, DIAMOND, 1886- . Notes on the phonology of the Eskimo dialect of Cape Prince of Wales, Alaska. (International journal of American linguistics, 1927. v. 4, p. 168-80)

Describes the Eskimo dialect of Cape Prince of Wales, and compares it (in a comparative vocabulary of over 200 words) with dialects of Barrow, the Mackenzie River delta, Coronation Gulf, and Greenland. All vocabularies except that of Greenland were collected in the field by Jenness from 1913 to 1923.

Copy seen: DLC.

8047. JENNESS, DIAMOND, 1886- . Origin of the Copper Eskimos and their Copper culture. (Geographical review, Oct. 1923. v. 13, p. 540-51, illus., sketch map)

Contains remarks upon the ancient population in Coronation Gulf, the western derivation of its archeological remains, and a full discussion upon the author's thesis that present day Copper Eskimos represent migration from the east. Includes discussion of their intellectual culture and its affiliations, the origin of the copper culture, and remarks on migration of Eskimos.

Copy seen: DLC.

8048. JENNESS, DIAMOND, 1886- . The people of the twilight, by Diamond Jenness; drawings by Claude Johnson. New York, Macmillan Co., 1928. 3 p. l., xi-xii p., 3 l., 247 p. illus., 16 plates, map, maps on lining-papers. Also published in German and (in preparation) Spanish translations.

During the Canadian Arctic Expedition, the author spent three years, 1914-17, among the Copper Eskimos of Bernard Harbour and Coronation Gulf. Here he tells of his life with one family, of their seasonal patterns of life, hunting trips, and beliefs.

Copy seen: DLC; NNSf.

8049. JENNESS, DIAMOND, 1886- . Physical characteristics of the Copper Eskimos. Ottawa, King's Printer, 1923. 65 p. 12 plates (photos), tables. (Canadian Arctic Expedition, 1913-18. Report. v. 12: The Copper Eskimos, Pt. B)

Contains field data on individuals and their measurements, and discussions. Covers Eskimos of the Dolphin and Union Strait and Coronation Gulf region (mainland and Victoria Island), also a few of Mackenzie River and Hudson Bay regions.

This part is indexed in General index to volume 12, The Copper Eskimos, in: Cameron, J. *Osteology of Western and Central Eskimos*, 1923.

Copy seen: DSI-M.

8050. JENNESS, DIAMOND, 1886- . The problem of the Eskimo. (In: Jenness, D., ed. The American aborigines, their origin and antiquity; a collection of papers . . . for presentation at the Fifth Pacific Science Congress, Canada, 1933. Toronto, 1934, p. 371-96)

Contains discussion of racial origin, language, and culture, a review of the results of research in physical anthropology, linguistics, and archeology.

Copy seen: DLC.

8051. JENNESS, DIAMOND, 1886- . Schneehütten-Völkchen, ein Reisebericht aus der Arktis. Wiesbaden, H. Hartmannshenn [1947] 139 p. *Title tr.*: Snowhouse people, account of a journey in the Arctic.

Translation of his *People of the twilight*, 1928, q.v.

Copy seen: DLC.

8052. JENNESS, DIAMOND, 1886- . The village of the crossroads. (Forest and outdoors, Jan. 1936. v. 32, p. 14, 20)

Popular account of Pond Inlet, northern Baffin Island, at a "crossroads" of Eskimo migration routes through the region.

Copy seen: DA.

8060. JENNOV, J. G. Østgrønlandsk fangstkompagni Nanok A/S. København, Ejnar Munksgaard, 1939. 123 p. illus., 27 plates, 5 maps. (Dansk og norsk fangstvirksomhed paa Østgrønland, del C. *Publ. in Publikationer om Østgrønland*, nr. 8) *Title tr.*: East Greenland Trapping and Sealing Company "Nanok" [i.e. "Polar bear"]

Account of the establishment of the "Nanok" Company in 1929, to develop economic possibilities and carry on trade and shipping; its activities, 1929-39, in East Greenland 73°45'-77°N.; Norwegian interests in, and occupation of, part of East Greenland; decision, 1933, of the International Court regarding sovereignty of East Greenland in favor of Denmark; remarks on Danish trapping and conservation regulations, occurrence of musk oxen, foxes, reindeer, etc., in East Greenland; also (p. 123) list of stations, huts, etc., erected by the company.

Illustrations and plates show more than 100 drawings and photographic views of animals, plants, trading posts, personnel, etc. *Maps* show regions of interest, posts, etc. of the "Nanok" Trapping Co. *Copy seen:* DSI-M.

8061. JENNOV, J. G. Østgrønlandsk fangstkompagni "Nanok's" "Gefion" ekspedition til Danmarkshavn og Hvalrosodden juli-september 1932 og nogle iagttagelser vedrørende isforhold ved den grønlandske nordøstkyst. København, Levin & Munksgaard, 1935. 54 p. illus. 4 charts. (Publikationer om Østgrønland, nr. 2) *Title tr.*: The East Greenland Trapping Company "Nanok" Expedition in the *Gefion* to Danmark Harbor and Walrus Point, July-September 1932, and some observations regarding ice conditions on the northeast coast of Greenland.

Report of the Danish *Gefion* Expedition, 1932, to take possession of Danmark Harbor and Walrus Point on Dove Bay and establish stations there.

Contains excerpts of the author's diary, describing the trip through the ice belt to Danmark Harbor and other points on Dove Bay; the unloading of equipment, building of stations, and oceanographic observations made, etc.

Remarks on the *Gefion* Expedition 1932 (and others' previous) observations of ice conditions in Dove Bay and elsewhere along the northern parts of the East Greenland coast.

Tables of ice reports from the "Nanok" Trapping Co. stations at Germania Harbor, 1934, Hochstetter Foreland and Bessel Fiord, 1932-34, Walrus Point, 1932-34.

Tables of soundings and position of reefs at various localities in East Greenland waters 75°38'-76°54'N.

Bathymetric and ice charts of Dove Bay and offshore waters.

8062. JENSEN, ADOLF SEVERIN, 1866-. Concerning a change of climate during recent decades in the arctic and subarctic regions, from Greenland in the west to Eurasia in the east, and contemporary biological and geophysical changes. København, E. Munksgaard, 1939. 75 p. 2 charts. (Danske videnskabernes selskab, Biologiske meddelelser. Bd. 14, nr. 8)

"Many southern species of animals, including mammals, birds, fish and invertebrates, have in recent years been able to extend their area of distribution farther north, whilst . . . the southern limit of certain northern species has retreated northwards. The cause of these zoogeographical changes is sought in the fact . . . that the temperature of the sea and air has risen . . . there has been a retreat of the ice-boundary in arctic seas, whilst on land the glaciers and tundras have diminished and retreated."—Summary.

The author reviews the hydrographic conditions, air temperatures and ice conditions from Greenland to Northern Land (Severnaya Zemlya), and notes changes in glaciers and tundras.

8063. JENSEN, ADOLF SEVERIN, 1866-. Contributions to the ichthyofauna of Greenland, 1-3. Copenhagen, 1942. 44 p. illus., 8 plates. (Copenhagen. Universitet. Zoologiske Museum. Skrifter. 2. Spolia Zoologica Musei Hauniensis II)

Contents: 1. The northern species of the genus *Paralepis*.

2. The Greenland species of the genera *Leptagonus* and *Aspidophoroides*.

3. The Greenland species of the genus *Phobis*.

Descriptions, notes on distribution of juvenile and adult stages, guarding of eggs (etc.) of eleven species from waters of Davis and Denmark Straits.

Copy seen: DSI-M.

8064. JENSEN, ADOLF SEVERIN, 1866-. The fauna of Greenland. (In: Greenland. Copenhagen, 1928. v. 1, p. 319-55, illus.)

Remarks on the number of species and their range (land and marine mammals treated individually); mammals, birds, fishes and invertebrates, with a bibliography. **Copy seen:** DLC.

8065. JENSEN, ADOLF SEVERIN, 1866-. Fishes. Kristiania, A. W. Brøgger, 1910. 7 p. (Norske videnskapsakademi i Oslo. Report of the Second Norwegian Arctic Expedition in the *Fram*, 1898-1902. v. 3, no. 25)

List, with localities and notes and measurements of eleven species from the Jones Sound region and Smith Sound. **Copy seen:** DLC.

8066. JENSEN, ADOLF SEVERIN, 1866-. The fishes of East-Greenland. (In: Amdrup, G. C. Carlsbergfondets expedition til Øst-Grønland, 3. del, nr. 7. Pub. in: Meddelelser om Grønland, 1909, 29. hefte, p. 211-76, plates XVI-XVIII)

List, with references to literature, synonymy, localities, descriptions and remarks, of thirty-six species, including two fresh-water species and comprising all known fishes from the east coast of Greenland. **Copy seen:** DLC.

8067. JENSEN, ADOLF SEVERIN, 1866-. En folkefest i Grønland. (Grønlandske selskab. Aarskrift, 1915. p. 102-106) **Title tr.:** A people's festival in Greenland.

Describes a community gathering at Lichtenau, Julianehaab District, with kayak games, competitions, etc., in harpooning and other feats of physical prowess, or skill. **Copy seen:** DLC.

8068. JENSEN, ADOLF SEVERIN, 1866-. Fortegnelse over skaller af bivalve grundtvandsmollusker fra de store havdyb mellem Jan Mayen og Island. (Dansk naturhistorisk forening. Videnskabelige meddelelser, 1902. Bd. 54, p. 43-45) **Title tr.:** List of shells of bivalve marine mollusks from the deep waters between Jan Mayen and Iceland.

Supplement to the author's *Om levninger af grundtvandsdyr paa store havdyb mellem Jan Mayen og Island*, 1901, q.v., containing list with descriptive remarks and localities, of shells of nine species found by the *Ingolf* Expedition, 1896. **Copy seen:** DLC.

8069. JENSEN, ADOLF SEVERIN, 1866-. The Greenland halibut (*Reinhardtius hippoglossoides* (Walb.)) its development and migrations. København, Levin & Munksgaard, 1935. 32 p. illus., 4 plates, 6 charts. (Danske videnskabernes selskab. Skrifter; naturv. og math. Afd. Række 9, Bd. 6, nr. 4)

Contains discussion of the reproduction, the migrations connected therewith and occurrence of the larvae (west coast between 60°-68°N.), nursery grounds of young halibut, dimensions, metamorphosis and later changes. **Copy seen:** DF.

8070. JENSEN, ADOLF SEVERIN, 1866-. Grønlands fauna; et forsøg paa en oversigt. København, B. Luno, 1928. 87, [1] p. fold. map. **Title tr.:** The fauna of Greenland. An attempt at a survey.

Special publication of the University of Copenhagen, in honor of His Majesty the King's birthday.

Contains a discussion of the origin of the land and fresh-water fauna of Greenland; data on mammals, birds, fishes and invertebrates; notes on the distribution of the species; household animals: dogs, horses, cattle, sheep, goats, etc.; extinction of certain species through ruthless hunting; measures for preservation of wildlife; hunting of the seal, eider-duck and fur-bearing animals, etc. Includes list of species, bibliography (p. 84-87), map showing the peregrinations of the Greenland whale (*Balaena mysticetus*) to its breeding places, also the distribution. **Copy seen:** NN.

8071. JENSEN, ADOLF SEVERIN, 1866-. Hvorfra stamme otolitherne i "Ingolf's bundprøver? (Dansk naturhistorisk forening. Videnskabelige meddelelser, 1900, pub. 1901. Bd. 52, p. 251-54) **Title tr.:** What is the origin of the *Ingolf's* bottom samples?

Rectification, based on investigation of distribution of cod by the *Michael Sars* Expedition, 1900-1901, of the author's theory (discussed in his *Om levninger af grundtvandsdyr paa store havdyb mellem Jan Mayen og Island*, 1901, q.v.) regarding the origin of cod otoliths ("ear stones") found in the deep waters between Jan Mayen and Iceland by the *Ingolf* Expedition, 1896. **Copy seen:** DLC.

8072. JENSEN, ADOLF SEVERIN, 1866-. Investigations of the "Dana" in West Greenland waters, 1925. (International Council for the Study of the Sea. Rapports et procès-verbaux, 1926. v. 39, p. 85-102, incl. 3 sketch charts)

Report on the main object of the cruise which "was to form an idea as to the occurrence of the cod on the banks in Davis Strait, and to investigate the breeding conditions of this species." Includes also remarks (with lists of fishes) on the difference in the fish fauna south and north of the Greenland-Baffin Land ridge.

Appendix: List of fishes of Greenland (one hundred species).

Copy seen: DF.

8073. JENSEN, ADOLF SEVERIN, 1866-. Klimasvingninger over arktis og deres følgevirkninger, med særligt henblik paa Grønland. (Grønlandske selskab. Aarsskrift. 1944. p. 7-19, map) Title tr.: Climatic changes in the Arctic and their subsequent effects, especially with relation to Greenland.

Notes a rise in winter temperature of air and water in arctic regions during the recent decades; its influence on ice conditions, wildlife, and, especially on the cod, its migration and periodic abundance in Greenland waters; notes extended season of navigation in Spitsbergen and other arctic areas. Includes statistics and map of regions mentioned by the author.

Copy seen: NN.

8074. JENSEN, ADOLF SEVERIN, 1866-. Lamellibranchiata. (Part I). Copenhagen, B. Luno, 1912. 2 p. l., 119 p. 4 plates, table. (Ingolf-expedition, 1895-1896. [Reports] v. 2, pt. 5)

Based on collections of the cruiser *Ingolf* in Davis and Denmark Straits and Greenland Sea, and upon many other collections, especially from Iceland and Faeroe Islands waters. Contains a revision of the species; and detailed discussion of taxonomy, distribution and habitats in waters of Iceland and The Faeroes, arctic distribution in general, and localities of the *Ingolf* Expedition collections, in a classified list of forty-nine (including with description, one new) species of bivalve mollusks (clams).

Copy seen: DSI-M.

8075. JENSEN, ADOLF SEVERIN, 1866-. The marsipobranchs of Greenland. (Dansk naturhistorisk forening. Videnskabelige meddelelser, København, 1941. Bd. 105, p. 55-57)

Discussion of a hag-fish and sea-lamprey and deletion from the record of one river lamprey, all of West Greenland.

Copy seen: DSI-M.

8076. JENSEN, ADOLF SEVERIN, 1866-. Naturforskeren Otto Fabricius. (In: Kornerup, B. Biskop dr. theol. Otto Fabricius, 3. del. Pub. in: Meddelelser om Grønland, 1923. Bd. 62, p. 331-400) Title tr.: Otto Fabricius as a natural scientist.

Contains discussion of Fabricius' *Fauna groenlandica*, q.v. (with a section on his contribution to the knowledge of Greenland whales), of his *Udførlig beskrivelse over de grønlandske sæler* (complete description of the Greenland seals), and of other papers based on his observations in Greenland, Norway and Denmark; also discussion of his ethnographical and anthropological papers and his paper on the Greenland drift ice. Bibliography of the scientific works of Fabricius, p. 396-99.

Copy seen: DLC.

8077. JENSEN, ADOLF SEVERIN, 1866-. A new deep sea berycoid fish from Davis Strait *Caristius groenlandicus* n.sp. (Dansk naturhistorisk forening, København. Videnskabelige meddelelser, 1941. Bd. 105, p. 49-53, plate)

Copy seen: DSI-M.

8078. JENSEN, ADOLF SEVERIN, 1866-. The North-European and Greenland Lycodinae. Copenhagen, B. Luno, 1904. 2 p. l., 99 p. illus., 10 plates. (Ingolf-expedition, 1895-1896. [Reports] v. 2, pt. 4)

Based largely on the collections of the cruiser *Ingolf* in waters of Davis and Denmark Straits and Greenland Sea; with specimens from Kara Sea and Svalbard waters included. Contains discussion of distribution, a key to the species, and a fully annotated, classified list of twelve species of these fishes, including notes on their occurrence, distribution, reproduction, morphology and taxonomy.

Copy seen: DSI-M.

8079. JENSEN, ADOLF SEVERIN, 1866- . Om de for aarene 1908-09 planlagte fiskeriundersøgelser ved Grønland. (Grønlandske selskab. Aarskrift, 1907, p. 79-99) *Title tr.*: Concerning the Greenland fishery investigations planned for the years 1908-09.

Report on investigations planned in Greenland and methods to be used. Suggests replacing traditional by modern methods, based on biological research; discusses importance of sealing as livelihood for Eskimos; need for its (also fishing's) extension by new methods, new fishing waters; various fishes, distribution, spawning areas. Need for fisheries research vessels; purpose of investigations planned: to discover economically profitable fishes and fishing grounds for the Greenlanders.

Copy seen: NNNstef.

8080. JENSEN, ADOLF SEVERIN, 1866- . Om levninger af grundtvandsdyr paa store havdyb mellem Jan Meyen og Island. (Dansk naturhistorisk forening. Videnskabelige meddelelser, 1901. Bd. 52, p. 229-39) *Title tr.*: On remains of shallow-water animals in the deep seas between Jan Mayen and Iceland.

Discussion of shells of shallow-water molluscs and otoliths of shallow-water cod found by the *Ingolf* Expedition, 1896, in the deep waters between Iceland and Jan Mayen; also theories on their origin, including the possibility of a gradual subsidence of the ocean floor; with list and sketch map of stations supplemented by the author's *Hvorfra stamme otolitherne i "Ingolf's bundprøver?* 1901, and *Fortegnelse over skaller af bivalve grundtvandsmollusker*, 1902, q.v.

Discussed in A. C. Johansen's *Om aflejring af molluskernes skaller*, 1902, q.v. and his *On the hypotheses on the sinking of sea beds*, 1902, q.v.; O. B. Bøggild's *Om en formodet sænkning af havbunden mellem Island og Jan Mayen*, 1902, q.v., and in W. C. Brøgger's *Landets høide over havet under den store nedisning*, 1900, q.v.

Copy seen: DLC.

8081. JENSEN, ADOLF SEVERIN, 1866- . On the fishery of the Greenlanders. København, C. A. Reitzel, 1925. 39 p. incl. map. illus. (Denmark Kommissionen for havundersøgelser. Meddelelser; ser.: fiskeri. Bd. 7, nr. 7)

The leader of the Danish fishery investigations, with the brig *Tjalfe*, 1908-09, which cruised West Greenland waters from Cape Farewell to Umanak, investigating fiords and coasts, the banks and deep sea, gives here a description of the state of the fishery at the beginning of the century; the results of investigations on halibut, shark, cod, salmon, herring, haddock, and several other fishes, 1908-09; and the development of the Eskimos' fishery after 1909. Includes details of Eskimo fishing methods and implements, and of curing the fish.

Copy seen: DF.

8082. JENSEN, ADOLF SEVERIN, 1866- . On the Mollusca of East-Greenland. I. Lamellibranchiata. With an introduction on Greenland's fossil mollusc-fauna from the Quaternary time, 1905. (*In:* Amdrup, G. C. Carlsbergfondets expedition til Øst-Grønland, 3. del, nr. 9. *Pub.* in Meddelelser om Grønland, 1909. 29. hefte, nr. 9, p. 287-362, illus.)

Discussion of previous literature on the fossil molluscan fauna of Greenland, and list, with localities and remarks of forty-one (including twelve new) species of oysters, clams, etc., collected in East Greenland waters; also remarks, with localities, of fossils found in East Greenland.

Copy seen: DLC.

8083. JENSEN, ADOLF SEVERIN, 1866- . Quaternary fossils collected by the *Danmark* Expedition. Danmarksekspeditionen til Grønlands nordøstkyst, 1906-1908. Bd. 3, nr. 21. (Meddelelser om Grønland, 1917. Bd. 43, p. 619-32)

Contains a list of eighteen molluscs, one serpulid, one barnacle and one echinoderm; a list of the localities from Koldewey Island, and Germania, Holm's, Amdrup's, and Peary Lands, with remarks on the altitudes (up to 125 meters) where found, and one species of *Pecten* not previously found so far north, all pointing to shifts in the climate and shorelines.

Copy seen: DLC.

8084. JENSEN, ADOLF SEVERIN, 1866- . Remarks on the Greenland eel, its occurrence and reference to *Anguilla rostrata*. København, C. A. Reitzel, 1937. 8 p. illus. (sketch map). (Meddelelser om Grønland. Bd. 118, nr. 9)

Records of the American eel which occurs nowhere else so far north as in southwest Greenland. Why it is the species which is found in the rivers and lakes there, rather than the European eel, is an open question.

Copy seen: DSI-M.

8085. JENSEN, ADOLF SEVERIN, 1866-. Researches on the distribution, biology, and systematics of the Greenland fishes. (Dansk naturhistorisk forening. Videnskabelige meddelelser, 1922. Bd. 74, p. 89-109)

Based on investigations by the author during the *Tjalfe* Expedition in Davis Strait, 1908-09, and on a study of museum collections. This is the first of a series of detailed studies of certain species. It contains a report on distribution, propagation, growth, catch and use, food, East Greenland occurrence, systematic remarks and description of young stages of *Sebastes marinus* L., the "Norway haddock".

Copy seen: DSI-M.

8086. JENSEN, ADOLF SEVERIN, 1866-. Two new West Greenland localities for deposits from the ice age and the post-glacial warm period. København, E. Munksgaard, 1942. 35 p. illus., 3 sketch maps. (Danske videnskabernes selskab. Meddelelser. Bd. 17, nr. 4)

Based on a study of Quaternary shells from raised beaches of North and South Strømfjord, which form the northern and southern limits of Holsteinsborg District. Descriptions of the two localities; a discussion of the present day circumpolar distribution and ecology of *Portlandia* (*Yoldia*) *arctica* and why it is extinct along West Greenland waters; the distribution of *Pecten groenlandicus*, and notes on other molluscs and a barnacle found at the southern locality.

Copy seen: DSI-M.

8087. JENSEN, ADOLF SEVERIN, 1866-. Udviklingen af Grønlandernes fiskeri 1910-1925. (Grønlandske selskab. Aarskrift, 1925-26. p. 15-38, illus., tables) *Title tr.*: The development of the Greenlanders' fishery, 1910-1925.

Summarizes development of fisheries in West Greenland, following investigations in the *Tjalfe*, 1908-09; contains statistics on halibut, cod, salmon, and shark fishery; also on shark liver

production, etc. Includes recommendations for future development. Criticism in O. Bendixen, *Grønlandernes fiskeri*, 1926-27, q.v.

Copy seen: NNStef.

8088. JENSEN, ADOLF SEVERIN, 1866-, and P. M. HANSEN. Investigations on the Greenland cod (*Gadus callarias* L.) with an introduction on the history of the Greenland cod fisheries. (International Council for the Study of the Sea. Rapports et procès-verbaux, 1931. v. 72, no. 1, p. 1-41, incl. tables, 3 sketch maps, diags.)

Contains remarks on spawning conditions, age and growth, fluctuations in the composition of the stock, food, migrations, time of appearance on the banks, and changes in the marine fauna of southwest Greenland coinciding with mass occurrence of cod; bibliography.

Copy seen: DF.

8089. JENSEN, ADOLF SEVERIN, 1866-, and P. M. HANSEN. Undersøgelser over den Grønlandske torsk (*Gadus callarias* L.) med en inledning om de Grønlandske torskfiskeriers historie. København, Universitetsbogtrykkeriet, 1930. 55 p. illus., tables, 2 sketch maps, diags. *Title tr.*: Investigations of the Greenland cod (*Gadus callarias* L.) with an introduction to the history of Greenland's cod fisheries.

Contains a study of migration, age groups, distribution, fluctuation, food and marking experiments; with a bibliography (15 items).

8103. JENSEN, POUL VALENTIN. Om faert og faertorganer hos dyr. (Grønlandske selskab. Aarskrift, 1942. p. 80-92, illus. diagrs.) *Title tr.:* About scent and the organs of scent in animals.

Discusses organs of scent, and glands of various species of mammals, found in Greenland.

Copy seen: NN.

8104. JENSEN, SØREN, 1873-1902. Mammals observed on Amdrup's journeys to East Greenland, 1898-1900. (*In*: Amdrup, G. C. Carlsbergfondets expedition til Øst-Grønland. 3. del, nr. 1. *Pub.* in Meddelelser om Grønland, 1909. 29. hefte, p. 1-62, illus.)

Discussion, with localities, of sixteen land and sea mammals observed in East Greenland and coastal waters.

Copy seen: DLC.

8105. JENSEN, THEODOR. Eventyrferden med motorskibet "Elisif" langs Sibirkysten; et blad av norske sjøfolks historie. (Polar-årboken, 1941, p. 30-67, illus.) *Title tr.*: The adventurous voyage of the motor ship *Elisif* along the coast of Siberia; a leaf from the history of Norwegian seamen.

Popular account of the trip of the freighter *Elisif* from Norway (via Panama) to Seattle and the Siberian North Cape; her forced wintering there in the ice Sept. 1928-Aug. 5, 1929, her wreck near Cape Billings (mys Shmidt) Aug. 11; the rescue of crew and cargo. Includes remarks on trading with Eskimos, hunting, etc.

8106. JENTINK, FREDERICUS ANNA. On *Cuniculus torquatus*, Pallas. [Leiden, etc. 1881] 2 p. (Zoologischen Ergebnisse . . . "Willem Barents", 1878-79. Nr. 14. *Pub.* in Niederländisches Archiv für Zoologie. Supplement-Bd. I)

Remarks on a rodent species from Novaya Zemlya. *Copy seen:* DSI-M.

8107. JÉRÉMIE, NICOLAS, 1669?-1732. Twenty years of York Factory, 1694-1714; Jérémie's account of Hudson Strait and Bay, translated from the French edition of 1720, with notes and introduction by R. Douglas, . . . and J. N. Wallace, . . . Ottawa, Thorburn and Abbott, 1926. 42 p. 2 plates, 3 maps (1 fold.) First published in J. F. Bernard's *Recueil de voyages du nord*, Amsterdam, 1720, v. 6. Reprinted in French as *Relation du détroit et de la baie d'Hudson* in Société historique de Saint Boniface. Bulletin, 1912. v. 2. 23 p.

Contains historical introduction on the author's identity, personalities of his time, etc., and narrative of Jérémie, a Quebec-born employee of the fur-trading Compagnie du Nord. He records his experiences with d'Iberville's

expedition against the English at Fort York on Hudson Bay, the fort's capture 1694, surrender 1696, recapture 1697 by the French; description of the region around Hudson Bay, Indian customs and activities of the French until the cession of the fort to the English after the Treaty of Utrecht.

8110. JESPERSEN, ERIK, 1875-. Lidt om kvaegavl i Julianehaabs distrikt. (Grønlandske selskab. Aarskrift, 1915. p. 74-82, tables) *Title tr.*: Brief comments on cattle breeding in Julianehaab District.

Historical and statistical data; costs and profits on a sheep raising venture, 1912-13; preferred locality for livestock.

Copy seen: NN.

8111. JESPERSEN, ERIK, 1875-. Nyopdagede nordbo-ruiner, Julianehaab-distrikt. (Meddelelser om Grønland, 1911, *pub.* 1912. Bd. 50, p. 97-104, diagrs.) *Title tr.*: Newly discovered Norse ruins in the Julianehaab District.

Account of the finding of Norse ruins and brief description of them, by the minister of the Lutheran Church at Julianehaab.

Copy seen: DLC.

8112. JESPERSEN, POUL, 1891-. Dr. Thorild Wulff's plankton-collections in the waters west of Greenland. Metazoa, by P. Jespersen. 1923. (*In*: Thule ekspeditionen til Grønlands nordkyst.

2d, 1916-1918. [Beretninger] nr. 4. *Pub.* in Meddelelser om Grønland, 1927. Bd. 64, p. 101-160, sketch map, tables)

Discussions of the horizontal and vertical distribution of forty-three species of plankton collected in the waters surrounding Disko, and in Baffin Bay, with list of stations; bibliography, p. 148-52. *Coppy seen:* DLC.

8113. JESPERSEN, POUL, 1891-. The Godthaab Expedition 1928. Copepoda. København, C. A. Reitzel, 1934. 166 p. illus., maps, tables (1 fold.) diagsr. (Meddelelser om Grønland. Bd. 79, nr. 10)

List, with synonymy, occurrence and discussions, of a hundred and twelve species of copepods from the waters west of Greenland with zoogeographical remarks; bibliography, p. 161-66.

Coppy seen: DLC.

8114. JESPERSEN, POUL, 1891-. Investigations on the copepod fauna in East Greenland waters. København, C. A. Reitzel, 1939. 106 p. illus. (sketch maps, tables, diagsr.) (Meddelelser om Grønland. Bd. 119, nr. 9)

Results of the Three-Year Expedition to Christian X's Land, 1931-34. Collections from Franz Joseph Fiord and Scoresby Sound waters, summers 1932 and 1933, also material from the Scoresby Sound Committee's 2nd East Greenland Expedition, 1932, and from Dana cruises, 1931-33, in Denmark Strait and the southeastern Greenland waters.

Contains a systematic account of about forty-four species, showing quantitative distribution, relative quantity of various stages, variation in size, general distribution, etc.; a chapter on quantity of copepods and its composition in various parts of the two fiord systems, plankton tables for various stations, and a bibliography (61 items).

Coppy seen: DSI-M.

8115. JESPERSEN, POUL, 1891-. Investigations on the quantity and distribution of zooplankton in Icelandic waters. København, C. A. Reitzel, 1940. 76 [1] p. diagsr. (Denmark. Kommissionen for Danmarks fiskeri- og havundersøgelser. Meddelelser; ser.: plankton. Bd. 3, nr. 5)

Contains discussion of importance of zooplankton as food, the quantity in general, and the quantity and distribution of some of the zooplankton ele-

ments, which includes the waters of Denmark Strait, July-August.

Coppy seen: DF.

8116. JESPERSEN, POUL, 1891-. On changes in the distribution of terrestrial animals in relation to climatic changes. (*In:* Rolfeisen, G., and others. Climatic changes in the Arctic (etc.), 1949. *Pub.* in: International Council for the Study of the Sea. Rapports et procès-verbaux. v. 125, p. 36-39, diagsr.)

Notes on changes in bird populations in North Atlantic countries, including Greenland.

Coppy seen: DF; DGS; DLC.

8117. JESPERSEN, POUL, 1891-. Statistical survey of the halibut fishery in the waters round the Faeroes, Iceland and Greenland. København, C. A. Reitzel, 1938. 37 p. diagsr. (Denmark. Kommissionen for Danmarks fiskeri- og havundersøgelser. Meddelelser. Bd. 10, nr. 5)

Contains data for The Faeroes and Iceland, 1906-35, and for Greenland waters, 1928-35, with discussion and comparison between relative quantities taken in the different waters.

Coppy seen: DF.

8118. JESPERSEN, POUL, 1891-. The zoology of East Greenland. Copepods. København, C. A. Reitzel, 1939. 66 p. illus. (maps) (Meddelelser om Grønland. Bd. 121, nr. 3)

Based on published records of copepods from the coastal waters (within 1000 meter curve), a systematic account with East Greenland records and occurrence, distribution and biology, of eighty-four species of Copepoda nantia and Copepoda parasita et hemiparasita; remarks on their zoogeography and a bibliography (124 items).

Coppy seen: DGS; DSI-M.

8119. JESSEN, AXEL HANS, 1868-. Geologiske iagttagelser. (*In:* Moltke, C. P. O. Opmaalingsexpeditionen til Julianehaabs-distrikt, 1894, 4. *Pub.* in: Meddelelser om Grønland, 1896. 16. hefte, p. 123-69, col. fold. map, plate) *Title tr.:* Geological observations.

Discussion of the geology of the coast and offshore islands south of Julianehaab; of the hot springs on Unartok Island, glaciers, raised shore lines and the "storis" along the coast.

Coppy seen: DLC.

JESSEN, AXEL HANS, 1868-, see also Moltke, C. P. O., & A. H. Jessen. *Undersøgelser af Nordre-Sermilik Brae*. 1896.

Description of the beliefs and practice of the Koyukon and Ingalik Indians in connection with spirits, omens, spells, songs, amulets, puberty, childbirth, death, mourning anniversaries and shamanism. Most data apparently refer to Koyukon Indians.

Copy seen: DLC.

8123. JETTÉ, JULIUS. *L'organisation sociale des Ten'as*. (International Congress of Americanists. 15th, Quebec, 1906. [Compte rendu] *pub.* Quebec, 1907. v. 1, p. 395-409) **Title tr.:** The social organization of the Ten'as.

On the basis of eight years of firsthand observation, Father Jetté describes what he terms the "anarchistic communism" of the Ten'as (apparently Koyukons) of western Alaska, and their associated psychological and judicial traits.

Copy seen: DLC.

8124. JETTÉ, JULIUS. Riddles of the Ten'a Indians. (*Anthropos*. *Ephemeris*. 1913. Bd. 8, p. 181-201, 630-51, 6 illus.)

Description of the psychology of riddles among the Koyukon Indians of the middle Yukon valley, with examples of one hundred ten riddles in native dialect, literal translation, and free translation. **Copy seen:** DLC.

8125. JEWELL, WILLARD BROWN. ELL, 1899- Mineral deposits of the Hyder district, southeastern Alaska. (*Economic geology*, 1927. v. 22, p. 494-517, illus.)

Results of a laboratory study of field data secured by the author, 1925, in the Salmon River section of the Hyder district. **Copy seen:** DGS.

8126. JOCHELSON, VLADIMIR IL'ICH, 1855-1937. The Aleut language and its relation to the Eskimo dialects. (International Congress of Americanists. 18th, London, 1912. Proceedings. London, 1913. p. 96-104)

Contains a brief description of the system of sounds and the grammatical structure of the eastern Aleut dialect spoken in Alaska, Unalaska, Umnak, Akutan, and the Pribilof Islands. Includes a survey of the noun, pronoun, and verb and of the part they play in the sentence. **Copy seen:** DLC.

8127. JOCHELSON, VLADIMIR IL'ICH, 1855-1937. Aleutskii iazyk v osvieshchenii grammatiki Veniaminova. (*Akademiia nauk SSSR. Bulletin, fév, mars-avril*, 1919. Sér. 6, t. 13, p. 133-54, 287-315, tables) **Title tr.:** The Aleutian language in the light of Veniaminov's grammar.

Declensions of nouns and conjugation of verbs in the indicative mood, with corrections of Veniaminov's mistakes. Material drawn from the eastern dialect of the Aleuts, as written down by the author during the Riabushinskii Expedition, 1908-10.

Copy seen: DLC.

8128. JOCHELSON, VLADIMIR IL'ICH, 1855-1937. The ancient and present Kamchadal and the similarity of their culture to that of the northwestern American Indians. (International Congress of Americanists. 23rd, New York, 1928. Proceedings. New York, 1930. p. 451-54)

Sketches the history of contacts between Russians and Kamchadals in

Kamchatka, and the resulting psychological, numerical, and health changes among the latter. Calls attention to similarity between the Kamchadals and the Indians of the northwest coast of North America, in respect to mythology, salmon catching and preparation, and language structure.

8129. JOCHELSON, VLADIMIR IL'ICH, 1855-1937. Archaeological investigations in Kamchatka. Washington, 1928. 2 p. l., iii-viii, 88 p. 83 illus., 19 plates, maps (1 fold.) (Carnegie Institution of Washington. Publication no. 388)

A Russian translation was published in *Vsesoiuznoe geograficheskoe obshchestvo. Izvestiia*, 1930 (t. 62, vyp. 3, p. 199-242; vyp. 4, p. 351-85) under title *Arkhologicheskie issledovaniia na Kamchatke* (copy in DLC).

Results of archaeological excavations in the summers of 1910 and 1911 as part of the Riabushinskii Kamchatka Expedition. Excavations were made at archeological sites near Avacha Bay in southeastern Kamchatka, Kulki and Kavan Rivers in the northwest, and the vicinity of Kuril Lake in the south. Largest collections were made at the two last-mentioned localities.

Contains (1) sketch of the history of early explorations to Kamchatka; (2) summary of Japanese shipwrecks on Kamchatka and of Russian fur tribute regulations; (3) sketch of economic life, health conditions, and population distribution of present-day Kamchadals; (4) monthly summaries of temperature of air and of soil to depths of two meters at Petropavlovsk, Kluchevskoye, and Tigil, with observations on the depth of thawing at various seasons, based chiefly upon data from Vlasov's meteorological division of the Expedition; (5) summary of knowledge of stone, bronze, and iron age archeology in Siberia and Kamchatka; (6) description of the sites excavated by Jochelson in Kamchatka, lists of the artifacts found at each site, and incidental notes on bears and salmon fishing; (7) detailed analysis of the stone lamps and pottery found in the Kamchatka excavations, and discussion of the relation of the pottery to Ainu pottery; (8) bibliography, p. 79-82.

Maps: (1) Kamchatka Peninsula location map, scale about 1:4,000,000; (2)

northern Asia (fold. map) showing archeologic sites of Paleolithic, Neolithic, bronze, and iron ages; (3) fifteen detail sketch maps showing excavations made on this expedition; (4) Kuril Lake, scale about 1:100,000, showing location of hot springs and ancient village sites.

Copy seen: DLC.

8130. JOCHELSON, VLADIMIR IL'ICH, 1855-1937. Archaeological investigations in the Aleutian Islands. Washington, 1925. ix, 145 p. 110 illus., 28 plates, maps (1 fold.) (Carnegie Institution of Washington. Publication no. 367)

An account of the archeological work and results of the ethnological division of the Riabushinskii Kamchatka Expedition in the Aleutian Islands in 1909-10.

Contains (1) summary of the organization, personnel, and purposes of the expedition; (2) description of the boat trip to the islands and difficulties of navigation in small boats; (3) enumeration and description of the thirteen prehistoric village sites and two caves excavated on Attu, Atka, Umnak, Amaknak, and Hog Islands (the last two near Unalaska Island), with lists of species of mammals, birds, fish, and molluscs found in the excavations; (4) description of the human remains found; (5) description of the archeological objects found, including detailed studies of rock types used for different types of artifacts as ascertained from living Aleuts, incised patterns of decorative and useful functions, and ornaments such as labrets; (6) critique of earlier work in Aleutian archeology by Pinart and, especially William Dall, including consideration of Dall's discussion of sea urchins as food and as indicators of length of human occupancy; (7) analysis of evidence as to duration of Aleut occupancy of the islands, portion of stone age represented, and cultural affiliation of Aleut culture with that of neighboring primitive peoples; (8) bibliography, p. 124-28; (9) glossary of about three hundred Aleut words related to archeological work and finds; (10) detailed index.

Maps include sketch maps of Attu, Atka, Umnak, and Amaknak Islands, showing location of archeological sites; and folding map of northeastern Asia and northwestern North America, 126°

E. to 126°W., scale about 1:20,000,000, showing distribution of native peoples, and Jochelson's routes on the Riābushinskii Kamchatka Expedition (1908-11), to the Jesup North Pacific Expedition (1900-1902), and the Sibirīakov Ethnological Expedition (1894-97) (dates of author's participation).

Contains a Russian translation (with a few omissions) of the author's *Archaeological investigations in Kamchatka*, 1928, q.v. *Copy seen:* DLC.

8132. JOCHELSON, VLADIMIR IL'ICH, 1855-1937. Belokurye ėskimosity i novaia ėkspeditsiia na poliarnyi sever kanadskikh vladenii. (Ėtograficheskoe obozrēnie, 1913, no. 1-2, p. 236-41) *Title tr.:* Blond Eskimos and the new expedition to the polar North of the Dominion of Canada.

Evaluation of the reported discovery of blond Eskimos on Victoria Island by V. Stefansson. *Copy seen:* NN.

8133. JOCHELSON, VLADIMIR IL'ICH, 1855-1937. Brodiachie rody tundry mezhdū rekami Indigirkoī i Kolymoi, ikh ėtnicheskii sostav, narechie, byt, brachnye i inye obychai i vzaimodeistvie razlichnykh plemennykh ėlementov. (Zhivaiia starina, 1900. v. 10, vyp. 1-2, p. 151-93, illus.) *Title tr.:* Nomadic tribes of the tundra between the Indigirka and Kolyma Rivers, their ethnic composition, dialects, mode of life, marriage and other customs, and the inter-relationship of various tribal elements.

Contains text of the author's report to the session of the Imperial Geographical Society held on Oct. 28, 1899, which dealt primarily with the Yakuts and Yukaghirs. A general description of the terrain is given, division of Yukaghir clans and their territories, role of their chiefs, occupations, modes of transport, food, trade with the Russians and the Chukchis, marriage, position of women, and religion. Comparative data on the mode of life of the Arctic Yakuts and the Chukchis supplement the text. *Copy seen:* DLC.

8136. JOCHELSON, VLADIMIR IL'ICH, 1855-1937. History, ethnology and anthropology of the Aleut. Washington, 1933. v p., 1 l., 91 p. (Carnegie Institution of Washington. Publication no. 432)

A continuation of Jochelson's reports on the work of the ethnological division of the Riābushinskii Kamchatka Expedition in the Aleutian Islands, in 1909 and 1910 (see also his *Archaeological investigations*, 1925).

Contains (1) historical sketch of the Aleutian Islands, based upon article by L. S. Berg, in *Zemlevedenie*, 1924, v. 26, pt. 1-2; (2) notes, from early records, on the Aleuts, physical geography, climate, arctic foxes, and sea otters of Bering Island, based upon L. S. Berg, *Otkrytie Kamchatki i kamchatskie ėkspeditsii Beringa*, 1924, q.v.; (3) de-

scription of modern fur-seal industry of Pribilof Islands, Aleut fishing and bird hunting, and Aleut kayaks and umiaks; (4) description of grass weaving among the Aleuts, list of grasses, account of native and adopted Aleut games such as ring-and-pin, cat's cradle, and chess, and list of names of design elements used in decorative art; (5) description of Aleut relationship terms and individual names; (6) notes on Aleut mythology and amulets, with text of a narrative from the Pribilof Islands; (7) characterization of Aleut physical types, particularly as to cephalic index; (8) lists of Aleut time and space terms. Bibliography, p. 87-91. *Copy seen:* DLC.

8137. JOCHELSON, VLADIMIR IL'ICH, 1855-1937. The Koryak. (Jesup North Pacific Expedition Publications, v. 6) Leiden, E. J. Brill; New York, G. E. Stechert, 1905-1908. xv, 842 p., illus., 40 plates, fold. map. (American Museum of Natural History. Memoirs, v. 10)

Contents: Pt. 1. (p. 1-382, pub. 1905). *Religion and myths*, contains chapters on history, charms, shamanism, festivals, birth and death, view of nature; also myths of Koryaks and Kamchadals, and comparison with those of Chukchis, Yukaghirs, etc.

Pt. 2 (p. 383-842, pub. 1908). *Material culture and social organization*, contains chapters on the country, tribe, name, health, physical and mental characteristics, language, habitat and habitation, reindeer and dog breeding, hunting, fishing and war, utensils, food, clothing, manufactures and art; family life, social life, contacts with other peoples; with a list of Koryak and allied names, p. 813-816.

Index to v. 6, pt. 1-3, p. 817-842.

Bulletin, déc., 1918. Sér. 6, t. 12, p. 1979-2003) *Title tr.:* List of V. I. Jochelson's folklore and linguistic materials in the Asiatic Museum of the Russian Academy of Sciences.

Descriptive list of materials on the Aleuts, consisting of texts of tales and lore materials for dictionary (mainly a revision of Veniaminov's Aleut-Russian dictionary), and materials on grammar, resulting from an eighteen-months' stay on the Aleutian Islands as a member of the Riabushinskii Expedition (1908-1910). Part 1 of a projected series to acquaint scholars with Jochelson's work then in the course of publication. *Copy seen:* DLC.

8142. JOCHELSON, VLADIMIR IL'ICH, 1855-1937. Peoples of Asiatic Russia. [New York] The American Museum of Natural History, 1928. 1 p. l., 259 p. illus., 5 fold. maps.

Basic handbook on the native peoples of Asiatic U.S.S.R. and northern Europe. Chapters 1 to 7 group the tribes according to their ethnic affiliations,

with delimitation of the individual "tribes" and brief characterization of each. Chapters 8 to 10 describe the separate anthropologic and ethnic traits and their distribution.

Contains: Chap. 1. *The Mongoloids of Asia and Europe*. Includes Finns, Lapps, Samoyeds, Yakuts, and Tungus.

Chap. 2. *The Americanoids of Siberia*. Includes Chukchis, Koryaks, Kamchadals, Yukaghirs, Chuvantzy, Gilyaks, Asiatic Eskimos, and Commander Islands Aleuts.

Chap. 3. *Siberians* of undetermined anthropological position. Includes Yeniseians.

Chap. 8. *Somatology*. Describes the distribution of stature, cephalic and facial indexes, and derivatives thereof.

Chap. 9. *Mode of life*. Includes dwellings, dress, ornament, art, religion, music, dancing, and poetry.

Chap. 10. *Migrations and history*. Includes summary of archeologic knowledge, historical migrations, and classification and groupings of the tribes according to religion and to language. Bibliography, p. 251-59.

Maps include: 1. Ethnographic map of Asiatic U.S.S.R. (fold.) 2. Former administrative divisions of Asiatic Russia (fold.) 7. Distribution of stature. 8. Distribution of cephalic index. 9. Mode of economic life (fold.) 10. Distribution of religions (fold.)

8143. JOCHELSON, VLADIMIR IL'ICH, 1855-1937. Scientific results of the ethnological section of the Riabouschinsky expedition of the Imperial Russian Geographical Society to the Aleutian Islands and Kamchatka. (International Congress of Americanists. 18th, London, 1912. Proceedings. London, 1913. p. 334-43, 5 illus., 2 plates)

A preliminary report on the activities and results of the ethnological section of the Riabushinskii Expedition to the Aleutian Islands and Kamchatka, 1908-1911. Includes a brief history of the expedition, description of the Aleutian Islands, notes on the archeology and ethnology of the Aleuts; and briefer notes on the work in Kamchatka.

Copy seen: DLC.

8144. JOCHELSON, VLADIMIR IL'ICH, 1855-1937. Über asiatische und amerikanische Elemente in den Mythen der Koriaken. (International Congress of Americanists. 14th, Stuttgart, 1904.

[Verhandlungen] Stuttgart, 1906. p. 120-27) Also published in Russian in *Zemlevēdenie*, 1904, pt. 3, p. 33-41. *Title tr.:* On Asiatic and American elements in the myths of the Koryaks.

Contains a statistical comparison of North American, Eskimo, and Mongol-Turkic elements contained in 139 Koryak tales, many gathered on the Jesup North Pacific Expedition (later published in Jochelson's *The Koryak*, 1908). Includes percentage evidence indicating the great preponderance of Athapaskan and Tlingit elements in Koryak myths.

Copy seen: DLC.

8145. JOCHELSON, VLADIMIR IL'ICH, 1855-1937. The Yakut. (American Museum of Natural History. Anthropological papers, 1933. v. 33, pt. 2, p. 35-225, 107 illus., 3 fold. maps)

Basic work results of the author's observations over an extended period, including field study with the Yakut Expedition under auspices of the Russian Imperial Geographical Society, financed by I. M. Sibirskov, 1894-96, and Jesup North Pacific Expedition, 1900-1902.

Contains chapters on origin, traditions, migrations, history; habitat (Yakutsk province, its physical geography, flora and fauna, population, climate); physical characteristics; language; calendar; religion (shamanism); material culture (dwellings, clothing, utensils, agriculture, transportation, domestic animals); art; kumiss festivals; leprosy; contact with Russians.

Copy seen: DLC.

8146. JOCHELSON, VLADIMIR IL'ICH, 1855-1937. The Yukaghir and the Yukaghirized Tungus. Jesup North Pacific Expedition. v. 9, pt. 1-3. Leiden, E. J. Brill; New York, G. E. Stechert, 1910-26. xvi, 469 p. 28 plates, fold. map. (American Museum of Natural History. Memoir, v. 13, pt. 1-3)

Based on studies made during the Sibirskov Yakut Expedition, 1895-96, and Jesup North Pacific Expedition, 1901-02.

Contents: Pt. 1. Description of the region (boundaries, orography, hydrography, climate, flora and fauna); the tribe, names, physical and mental characteristics, villages, clans and family life; social life, hunting and games.

Pt. 2 (p. 135-342). Religion, shamanism, birth, death and burial cus-

toms and beliefs; folklore, discussion and tales including some texts in the vernacular, songs, riddles, vocabulary.

Copy seen: DLC.

This article is stated (in footnote, p. 149) to be a condensation of one published in the journal *Pamiĕtnaiĕ knizhka Iakutskoi oblasti*, 1895. It includes some material which appears also in the author's paper (with similar title) in *Zhivaiĕ starina*, 1895.

Copy seen: DLC.

Contains a series of general descriptions (written from Yakutsk, Apr. 10, 1894) of the various national groups inhabiting the Yakut region, intended originally as a part of the Yakut Almanac: Russians, Yakuts, Tungus and Lamuts, Chuvantzy and Yukaghirs, Chukchis. Each group is described according to physical type, the salient features of material and social culture, and the results of Russian influence on the natives.

8154. JØRSTAD, IVAR, 1887- . Adventive elementer og nyttilgang på verter innenfor vår rustoppflora. (Nytt magasin for naturvidenskapene, 1938. Bd. 78, p. 153-200) *Title tr.*: Introduced rusts in Norway and local rusts infecting introduced species.

Contains a study of infection of introduced plants by introduced and local

rusts, with an enumeration of forty-one species of rusts, arranged under four groups, including arctic species, and a list of fifty rust fungi, occurring on introduced plants with their hosts and corresponding rust races; bibliography (85 items). Summary in English.

Copy seen: MH-Z.

8155. JØRSTAD, IVAR, 1887- . Chytridineae, Ustilagineae and Uredineae from Novaya Zemlya. Kristiania, 1923. 12 p. illus. (Norske Novaja Semlja ekspedisjon, 1921. Report of the scientific results. No. 18) Published by Det Norske videnskaps-akademi, Oslo (Videnskapsselskapet i Kristiania).

List, with synonyms and localities, of one Chytridineae, six species of smuts, and seven (including with descriptions, two new) species of rusts.

Copy seen: DLC.

8156. JØRSTAD, IVAR, 1887- . Microcyclic Uredineae on Geranium and Solidago. (Nytt magasin for naturvidenskapene, 1948. Bd. 86, p. 1-30, illus. text maps)

Contains description of four microcyclic rusts: *Puccinia morthieri* and *P. leveillei* on Geranium, and *Uromyces solidaginis* and *Puccinia virgaureae* on Solidago; with notes on origin and habitat and very detailed data on geographic distribution in Norway, including the arctic region. Includes a general bibliography on rusts (40 items).

Copy seen: MH-A.

8157. JØRSTAD, IVAR, 1887- . Notes on some heteroecious rust fungi. (Nytt magasin for naturvidenskapene, 1937. Bd. 77, p. 105-119, illus. text maps)

Contains critical notes on various heteroecious rust fungi, including *Puccinia festucae* alternating on *Festuca* and *Lonicera*, three rust species of the genus *Chrysomyxa* (on *Ledum* and *Picea*) in Finnmark, Norway; and various rusts in the high mountains of Norway. Summary in Swedish.

Copy seen: MH-Z.

8158. JØRSTAD, IVAR, 1887- . Notes on Uredineae. (Nytt magasin for naturvidenskapene, 1931. Bd. 70, p. 325-406, illus.)

Contains critical revision of nineteen species of rust fungi (Uredineae) with synonymy, critical notes, data on host plants, geographic distribution throughout the world, including arctic regions;

a general bibliography on fungi (126 items).
Copy seen: MH-Z.

8159. JØRSTAD, IVAR, 1887-. A study of Kamchatka Uredinales. Oslo, Jacob Dybwad, 1934. 183 p. illus. (Norske videnskaps-akademi, Oslo. Skrifter. I. Matematisk-naturvidenskapelig klasse, 1933, no. 9)

Detailed review of some ninety known rust species of Kamchatka Peninsula in comparison with similar and allied forms from other regions of the Northern Hemisphere. Based on collections made mainly by the Swedish Kamchatka Expedition, 1920-22.

Contains key to genera and species (p. 11-19); enumeration (p. 20-153) with synonymy, descriptive notes, hosts, total geographical distribution and comparison with geographical area of known or possible hosts, discussion of critical or less known forms, some descriptions of spore forms, a few new species fully described. General remarks (p. 154-70) on life cycle, heteroecism, horizontal, vertical and total distribution of Kamchatka rusts; with indexes to literature (about 200 items) host plants, and rust species.

Copy seen: DLC.

8160. JØRSTAD, IVAR, 1887-. Uredinales of northern Norway. Oslo, Jacob Dybwad, 1940. 145 p. (Norske videnskaps-akademi, Oslo. Skrifter. I. Matematisk-naturvidenskapelig klasse, 1940, no. 6)

Contains summary of previous research; enumeration and discussion (with synonymy, localities, etc.) of about one hundred fifteen species of rust fungi; the biology and distribution of rusts of northern Norway; index of hosts; bibliography (about 150 items).

Copy seen: DLC.

8161. JØRSTAD, IVAR, 1887-. The ustilagineous genus *Tubercinia* in Norway. (Nytt magasin for naturvidenskapene, 1943. Bd. 83, p. 231-46)

Contains a revision of the genus *Tubercinia* of myxomycetous fungi parasitic on plants, with an enumeration of twenty-one species with keys, synonymy, critical notes, host plants and data on distribution in Norway; includes some arctic species; bibliography (23 items).

Copy seen: MH-A; MH-Z.

8162. JOESTING, HENRY ROCHAMBEAU. Magnetometer and direct-current resistivity studies in Alaska. New York, 1941. 20 p. (American Institute of Mining and Metallurgical Engineers. Technical publication no. 1284)

Discussion of the problems involved in geophysical prospecting, including magnetic minerals in placers, bedrock, variations in the earth's field, and permanently frozen ground.

Copy seen: DGS.

8163. JOESTING, HENRY ROCHAMBEAU. Strategic mineral occurrences in interior Alaska. College, Alaska, 1942. 3 p. l., 46 p. incl. 5 sketch maps. (Alaska. Dept. of Mines. Pamphlet No. 1)

Contains prices, modes of occurrence, and localities of antimony, chromium, nickel, platinum, mercury, molybdenum, tin, tungsten, asbestos, mica, and quartz crystals.

Copy seen: DGS; NNStef.

8164. JOESTING, HENRY ROCHAMBEAU. Supplement to . . . Strategic mineral occurrences in interior Alaska. College, Alaska, 1943. 2 p. l., 28 p. incl. sketch map. (Alaska. Dept. of Mines. Pamphlet. No. 2)

Contains information gathered during 1942 on occurrences, prospecting, and development of antimony, mercury, molybdenum, tin and tungsten deposits.

Copy seen: DGS; NNStef.

Discussion of vertical distribution of fresh-water and marine molluscs and the transportation by drift ice, current, etc. of mollusc shells; with remarks on A. S. Jensen's *Om levninger af grundtvandsdyr paa store havdyb mellem Jan Mayen og Island*, q.v.

Copy seen: DLC.

8167. JOHANSEN, A. C. On the hypotheses on the sinking of sea-beds based on the occurrence of dead shallow-water shells at great depths in the sea. (Naturhistoriske forening. Videnskabelige meddelelser, 1902. Bd. 54, p. 393-435)

Discussion of J. W. [i.e. W. C.] Brøgger's *Landets høide over havet*, 1900, q.v.; A. S. Jensen's *Om levninger af grundtvandsdyr paa store havdyb mellem Jan Mayen og Island*, 1901, q.v. and his *Fortegnelse over skaller af bivalve grundtvandsmollusker*, 1902, q.v.; H. Friele's *Catalog der auf der norwegischen Nordmeeresexpedition bei Spitzbergen gefundenen Mollusken*, 1879, q.v.; and H. Friele and J. A. Grieg's *Mollusca*. III, 1901, q.v., also of other literature dealing with the occurrence of shallow-water mollusc shells in deep seas and theories on their occurrence in these waters through transportation of ice or through a possible subsidence of the ocean floor. *Copy seen*: DLC.

8168. JOHANSEN, BERTINE. Som fangstkvinnne på Svalbard. (Polar-år-boken, 1940. p. 34-47, illus.) *Title tr.*: A huntress in Svalbard.

Recounts her experiences in Svalbard since 1920; her feats as a seal hunter; her heroic saving of human lives; and her death.

Copy seen: NNA.

8169. JOHANSEN, FRITS, 1882- . The crustacean life of some arctic

lagoons, lakes and ponds. Ottawa, King's Printer, 1922. 31 p. incl. 7 plates (map). (Canadian Arctic Expedition, 1913-1918. Report. v. 7: Crustacea, Pt. N)

Ecological notes on the fresh and brackish waters examined at Teller, Alaska, on the coast east of Pt. Barrow, and in the vicinity of Bernard Harbour, N.W.T., giving information to supplementary parts E, G, H, I, & J, of v. 7: Crustacea.

Copy seen: DSI-M.

8170. JOHANSEN, FRITS, 1882- . Description of the country and vegetation at Port Churchill, Man., in arctic Canada. (Nytt magasin for naturvidenskapene, 1933. Bd. 73, p. 221-57, illus., sketch map)

Contains detailed description (based on a visit in 1929) of the surface feature of the country from Cape Merry to Fort Prince of Wales Peninsula and the approach along the Hudson Bay Railway to Churchill; with notes on the vegetation, as introduction to P. Størmer's *Plants collected by F. Johansen in 1929*, 1933, q.v., and annotated bibliography (7 items).

Copy seen: DGS; NNStef.

8171. JOHANSEN, FRITS, 1882- . Euphyllopoda. Ottawa, King's Printer, 1922. 34 p. illus. (Canadian Arctic Expedition, 1913-1918. Report. v. 7: Crustacea, Pt. G)

Descriptions, with field notes, notes on biology, habits, and distribution of five (including one new) fresh-water species based on the expedition's collection and older records, with a bibliography.

Copy seen: DSI-M.

8172. JOHANSEN, FRITS, 1882- . Fishes and marine invertebrates collected during the cruise of the "Arctic" in 1923. (Canadian field naturalist, Dec. 1925, v. 39, p. 203-204)

List of pteropods, schizopods, amphipods, decapods and fishes from Davis Strait, Baffin Bay (Melville Bay), Eclipse Sound (Ponds Inlet) and Labrador Sea (Gready Island Harbour).

Copy seen: DLC.

8173. JOHANSEN, FRITS, 1882- . The fishes of the Danmark Expedition collected and described by Frits Johansen. Danmark-ekspeditionen til Grønlands nordøstkyst, 1906-1908. Bd. 5, nr. 12. (Meddelelser om Grønland.

1912. Bd. 45, p. 631-75. illus. (incl. 3 sketch maps) plates xlv-xlvi (2 col.)

Contains description of the bathymetric characteristics, the type of bottom (hard or soft) the vegetation, and hydrographic relationships of Danmarks Havn (northeast part of Dove Bugt waters) as typical of northeast Greenland inshore waters. Includes extensive remarks on the depths where specimens found, the size, occurrence of larvae, color, food, etc., of twelve species of fish, taken in Danmarks Havn and the waters nearby.

Copy seen: DLC.

8174. JOHANSEN, FRITS, 1882- . The forest's losing fight in arctic Canada. (Forest and outdoors, July 1919. v. 15, p. 303-305, illus.)

Observations made by the southern party of the Canadian Arctic Expedition, 1913-18; in the region south of Coronation Gulf.

Contains description of white spruce growth and insect threat along the Coppermine River. *Copy seen:* DA.

8175. JOHANSEN, FRITS, 1882- . Freshwater life in north-east Greenland, by Frits Johansen. 1911. Danmark-ekspeditionen til Grønlands nordøstkyst, 1906-1908. Bd. 5, nr. 6. (Meddelelser om Grønland, 1912. Bd. 45, p. 319-37, sketch map)

Contains hydrographic descriptions of typical fresh-water and brackish lakes on Germania Land, in which results of vertical temperature and salinity measurements are given; general description of true lakes, melted snow waters in streams, lakes and bogs; and discussion of the plankton, including full ecological notes on three typical species of crustaceans.

Copy seen: DLC.

8176. JOHANSEN, FRITS, 1882- . General observations on the vegetation. Ottawa, King's Printer, 1924. 85 p. incl. 14 plates (incl. maps) (Canadian Arctic Expedition, 1913-1918. Report. v. 5: Botany, Pt. C) The topography, climate and vegetation of the arctic coast between Pt. Barrow, Alaska, and Bathurst Inlet, N.W.T., including Wolaston Peninsula, Victoria Island.

Copy seen: DSI-M.

8177. JOHANSEN, FRITS, 1882- . Insect life on the western arctic coast

of America. Ottawa, King's Printer, 1921. 61 p. incl. map, 10 plates. (Canadian Arctic Expedition, 1913-1918. Report, 1921. v. 3: Insects, Pt. K)

A description of the natural conditions and the insect life in the localities of Teller, Camden Bay and Demarcation Point, Alaska, Herschel Island, Yukon, and on the peninsula south of Dolphin and Union Strait and the lower part of Coppermine River, Northwest Territories.

Copy seen: DSI-M.

8178. JOHANSEN, FRITS, 1882- . The larger freshwater Crustacea of Canada and Alaska. (Canadian field naturalist, Oct. 1920-21. v. 34, p. 126-32, 145-48; v. 35, p. 21-30, 45-47, 88-94)

Discussion of the occurrence of these forms and their biology, and the need for further research and collecting. Includes notes (in detail) on the occurrence of the amphipods, isopods, fairy shrimps, tadpole shrimps and clam shrimps, across arctic North America and further south in Canada; with bibliographies.

Copy seen: DLC.

8179. JOHANSEN, FRITS, 1882- . Meagre forest resources bordering James and Hudson Bays. (Forest and outdoors, Apr. 1921. v. 17, p. 201-203, illus.)

Notes on the kinds of trees found northward along the eastern shores of these bays to about 56°N. during the author's visit, summer 1920.

Copy seen: DA.

8180. JOHANSEN, FRITS, 1882- . Observations on seals (Pinnipedia) and whales (Cetaceae) made on the Danmark-Expedition, 1906-08. Danmark-ekspeditionen til Grønlands nordøstkyst, 1906-1908. Bd. 5, nr. 2. (Meddelelser om Grønland, 1912. Bd. 45, p. 201-224. illus.)

Based on observations made by sledge parties and at the base, covering the sea and fiord coasts and waters, from about 76°N. to 82°N. (Independence Fiord) on the east coast of Greenland. Notes on habits, occurrence, food, etc., of the walrus, the bearded, Greenland (harp) fiord, and crested seals, the Greenland and caaing whales, rorqual, norwhal, and grampus.

Copy seen: DLC.

3181. JOHANSEN, FRITS, 1882- . Vascular plants collected during the Canadian Hudson Strait Expedition in 1927. (Canadian field naturalist, Nov. 1934. v. 48, p. 126-31)

List of fifty-two plants from Port Burwell, thirty-three plants from Lake Harbour, Baffin Island, seventy species from Wakeham Bay, fifty-six species from Eric Cove, Ungava, and forty species from Nottingham Island, representing over one hundred species in all.

Copy seen: DLC.

8182. JOHANSEN, FRITS, 1882- , and J. C. NIELSEN. The insects of the "Danmark" Expedition, by Fritz Johansen and I. C. Nielsen. 1910. Danmark-ekspeditionen til Grønlands nordøstkyst, 1906-1908. Bd. 3, nr. 2. (Meddelelser om Grønland, 1917. Bd. 43, p. 33-68, illus., plates vii-viii)

Contents: 1. Johansen, F. General remarks on the life of insects and arachnids in North-East Greenland. (Description of seasonal changes in the landscape).

2. Nielsen, J. C. A catalogue of the insects of North-East Greenland with descriptions of some larvae. (Forty species including twelve butterflies).

The localities of the collection were all near Danmarks Havn, on the southern shore of Germania Land, 76°46'N. 18°45'W.

Copy seen: DLC.

8184A. JOHANSEN, HARALD. Mean upper air data obtained from soundings at Tromsø during the years 1941-44. Oslo, 1949. 28 p. illus., tables. (Geofysiske publikasjoner. v. 17, no. 4)

"From data obtained at Tromsø during 1636 radiosonde ascents made between May 1941 and October 1944 by the German Air Forces. Mean monthly and annual pressures; actual, potential and equivalent potential temperatures; lapse rates; relative and specific humidities are calculated for each standard level up to 25 km. Methods of calculating and smoothing are discussed; results at Tromsø compared with those from Abisko, and afternoon soundings made during 14 months compared with early morning soundings to show the radiation error in the former. The average height of the tropopause varied from 8.8 gkm. (March) to 10.1 gkm. (July and August), a range of only 1.3 gkm. Many carefully drawn isopleth charts and detailed tabular data makes this a model monograph on upper air climatology."—Meteorological abstracts and bibliography, Nov. 1950, v. 1, no. 11, p. 727-28.

List, with synonymy and descriptions, of fifteen (including three new) species of fish leeches from the arctic collections of the Stockholm Zoological Museum.

Copied seen: DLC.

8190. **JOHANSSON, KARL,** 1856-1928. Diagnoser och anmärkningar till några sällsyntare svenska Hieracium-former. (Botaniska notiser, 1914, häfte 2, p. 65-87) *Title tr.:* Diagnoses and critical notes on some rare Swedish species of *Hieracium*.

Contains an enumeration of twenty-one species and forms of herbaceous genus *Hieracium*, rare to Sweden, with Latin descriptions of fourteen new species, including at least ten species occurring in Swedish Lapland.

Copied seen: MH-A.

8191. **JOHANSSON, KARL,** 1856-1928. *Hieracia vulgata* Fr. från Torne Lappmark. Uppsala & Stockholm, Almqvist & Wiksell, 1908. 48 p. 5 plates. (Arkiv för botanik, 1908. Bd. 7, no. 12) *Title tr.:* *Hieracia vulgata* Fr. from Torne Lappmark.

Contains an enumeration of thirty-five (including twenty-three new) species of the herbaceous genus *Hieracium*, collected by the author on his trips to Kiruna and other localities in this northern section of Sweden in 1904 and 1906.

Copied seen: MH.

8192. **JOHANSSON, KARL,** 1856-1928. Svenska *Hieracia tridentata* Fr. Stockholm, Almqvist & Wiksell, 1929. 41 p. (Arkiv för botanik, 1929. Bd. 22A, no. 12) *Title tr.:* *Hieracia tridentata* Fr. of Sweden.

Contains a critical revision of about one hundred ten species of herbaceous genus *Hieracium* with synonymy, descriptions of some new species, critical notes and data on distribution in Scandinavia, including at least six species from Torne Lappmark; bibliography (43 items).

Copied seen: MH.

8193. JOHANSSON, KARL, 1856-1928. Västgeografiska spörsmal rörande den Svenska Hieraciumfloran. (Svensk botanisk tidskrift, 1923. Bd. 17, häfte 2, p. 175-214, text maps) *Title tr.*: Geobotanical problems concerning *Hieracium* flora of Sweden.

Contains detailed data on geographical distribution of herbaceous genus Hieracium in Sweden, including Swedish Lapland, with text maps, tabulated statistical data for various regions, etc.; bibliography (27 items).

Copy seen: MH-A.

8194. JOHANSSON, KARL, 1856-1928. Verzeichnis der bisher beschriebenen schwedischen *Hieracia vulgaris* Fr. Stockholm, Almqvist & Wiksell, 1927. 98 p. (Arkiv för botanik, 1928, pub. 1927. Bd. 21A, no. 15) *Title tr.*: An enumeration of previously described Swedish *Hieracia vulgaris* Fr.

Contains a systematic enumeration of over nine hundred species of herbaceous genus Hieracium of the section vulgaris, with synonymy, critical notes and Latin descriptions of new species, including some native to arctic Sweden, and H. jebronsense and H. nordstroemi n. spp. from Torne Lappmark; bibliography (over 100 items).

Cloud observations are compared with sunshine durations at meteorological stations throughout Scandinavian Peninsula.

Copy seen: DA.

8199. JOHN, OSCAR. A new Platythrips from Siberia. (Annals and magazine of natural history, Jan. 1924. Ser. 9, v. 13, p. 142-44)

Full description of new Thysanopterous species from the lower Yana River, 71°N. 135°E. Yakutia.

Copy seen: DSI-M.

8200. JOHNSEN, OSCAR ALBERT. Et traek af den dansk-norske regjeringens handelspolitik under Kristian III og Fredrik II. Christiania, Jacob Dybwad, 1909. 22 p. (Norske videnskapsakademiet, Oslo. Forhandlinger, 1909, no. 3) *Title tr.*: A feature from the commercial policy of the Dano-Norwegian government under Kristian III and Fredrik II.

Concerning Norway's participation in European trade with the White Sea region of Russia in the 16th century, and the policy of the Danish-Norwegian government regarding the trade route to Russia by way of Norway.

Copy seen: DLC.

8201. JOHNSEN, P. Ångaren Oscar Dicksons sibiriska resa 1880-1881. (Ymer, 1881. Årg. 1, p. 70-88) *Title tr.*: The steamer Oscar Dickson's Siberian voyage, 1880-1881.

Account of the trip across Kara Sea, the drift along the Siberian coast, the wintering at Gydan Bay, Oct. 23, 1880-April 23, 1881; the homeward journey of five members of the ship's party with a Samoyed relief party to Obdorsk (Salekhard, near mouth of Ob River),

thence to St. Petersburg. Includes meteorological journal kept during the wintering at Gydan Bay.

Copy seen: DLC.

8202. JOHNSEN, SIGURD. Notes on the birds of Svalbard (Bear Island and Spitsbergen). Bergen, J. Grieg, 1934. 53 p. illus. (Bergen. Museum. Aarbok, 1933. Naturvidenskapelig rekke, nr. 3)

Based on specimens in the Bergen Museum, a list, with lengthy notes on skins, habits, occurrence, localities, etc., of ten species; notes on twenty-two species recorded earlier, and a list in tabular form showing distribution of the fifty-four species known from Bear Island, and sixty-four species known from West Spitsbergen; with a bibliography.

Copy seen: DLC.

8203. JOHNSEN, SIGURD. Remarks on the Svalbard ptarmigan (*Lagopus mutus hyperboreus* Sundev.). Bergen, J. Grieg, 1942. 29 p. incl. tables. 1 plate. (Bergen. Museum. Aarbok, 1941. Naturvidenskapelig rekke, nr. 8)

Covers changes of plumage in the male and female, winter plumage, tail, moult of claws and bill, notes on size, weight, and habits, annual cycle of plumages, nomenclature of plumages, and tables of observations on West Spitsbergen and Bear Island, with a bibliography.

Copy seen: DLC.

8204. JOHNSON, C. B. Anticyclogenesis in eastern Canada during spring. (American Meteorological Society. Bulletin, Feb. 1948. v. 29, p. 47-55, 5 maps)

Discussion of cold low-level anticyclones, affecting circulation over the United States, which develop during spring months in the Hudson Bay region where the radiational cooling is greatest.

Copy seen: DLC.

8205. JOHNSON, BERTRAND LEROY, 1882-. The central and northern parts of Kenai Peninsula. (In: Martin, G. C. Geology and mineral resources of Kenai Peninsula, Alaska. Pub. in U. S. Geological Survey. Bulletin, 1915. No. 587, p. 113-208)

Description of stratigraphy, minerals, gold lodes and placers, with detailed descriptions of mines and prospects.

Copy seen: DGS.

8206. JOHNSON, BERTRAND LEROY, 1882-. Retreat of Barry Glacier, Port

Wells, Prince William Sound, between 1910 and 1914. (In: U. S. Geological Survey. Shorter contributions to general geology, 1916. Professional paper, 1917. No. 98, p. 35-36, illus., 4 plates)

Describes the changes as shown by earlier observers and by photographs taken by the author in 1913-14.

8210. JOHNSON, FREDERICK, 1904-
An archaeological, botanical and geological expedition to the southwestern Yukon, 1948. (American Philosophical Society. Year book, 1948, *pub.* 1949, p. 203-204)

Brief report (of the author and H. M. Raup) on activities of the Andover-Harvard Yukon Expedition, summer 1948, along the Alaska Highway between Champagne and the northwestern end of Kluane Lake, and (for three weeks) in the mountains north of the lake.

Copy seen: DLC.

8211. JOHNSON, FREDERICK, 1904-
An archaeological survey along the Alaska Highway, 1944. (American antiquity, Jan. 1946, v. 11, p. 183-86, 3 plates)

Brief, preliminary report by the archeologist of a party under Dr. H. M. Raup, investigating in collaboration the botany, geology and archeology of the region, in summer 1944. The author mentions various prehistoric camp sites found, notes the artifacts excavated at Kluane Lake and surface discoveries in Alsek River valley (100 miles west of Whitehorse) and elsewhere. He concludes that the sites are chiefly significant at the moment, in their evidence that this practical route from Alaska to the Plains was occupied in prehistoric times.

8212. JOHNSON, HARVEY F. Development of ice-breaking vessels for the U. S. Coast Guard. (Society of Naval Architects and Marine Engineers. Transactions, 1946. v. 54, p. 112-51, illus., diags.) Abstract was published in Shipbuilding and shipping record, 1948. v. 71, no. 10, p. 285-87; no. 11, p. 319-22.

Discussion in brief of kinds of ice met by ice-breakers; trends of foreign designs and development of U. S. Coast Guard ice-breaker design; selection of machinery; propellers and shafting; operation difficulties; subdivision of the ship; healing and trimming arrangements; steering gear and rudders; towing arrangements; and topside icing and insulation.—*Engineering index*.

Tables: 1. Characteristics of various

ice-breakers 1899-1944. 2. Relative strength of certain ice-breakers.

Copy seen: DBS; DLC (abstract).

8213. JOHNSON, MARTIN WIGGO, 1895- The production and distribution of zooplankton in the surface waters of Bering Sea and Bering Strait, with special reference to copepods, echinoderms, mollusks and annelids. (*In:* U. S. Coast Guard. Report of oceanographic cruise U. S. Coast Guard cutter Chelan 1934, *pub.* 1936. Pt. 2, p. 45-82, incl. tables, 2 fold. charts)

The stations and hydrographic data for the cruise, covering the eastern part of Bering Sea, Bering Strait, and north to the Arctic Circle, are given in Pt. 1 of this Report. Pt. 2 contains analyses of net plankton from one hundred two stations, discussion of their proportion and significance in the population, a correlation of the plankton with hydrographic features, notes on their distribution, and tables of species showing numbers of individuals in the 25-0 meter hauls for each station, with a special table showing occurrence of *Eucalanus bungii* (Copepoda) at thirty-nine of the stations; bibliography (13 items).

Charts: Quantitative distribution of (1) *Eucalanus bungii* and (2) of five other important species.

Copy seen: DLC.

8214. JOHNSON, ROBERT E., and R. M. KARK. Feeding problems in man as related to environment. An analysis of United States and Canadian Army ration trials and surveys, 1941-1946. Chicago, [1946] [viii], 94 p. illus., tables, diags.

Published by U. S. Army Medical Nutrition Laboratory and Quartermaster Food and Container Institute for the Armed Forces. Includes information on ration trials and surveys, and on special feeding problems, in arctic and subarctic regions.

Copy seen: DP.

JOHNSON, ROBERT E., *see also* Kark, R. M., & others. Defects of permican. 1945.

8215. JOHNSTON, ASHTON WILLIAM, 1910- Preliminary report on a geological exploration on Seal River, northern Manitoba. Ottawa, 1935. 1 p. l., 3 l., fold. map. (Canada. Geological Survey. Paper 35-2)

Report concerns eastern section of river, from Shethanei Lake (59°N. 97°W.) eastward to Hudson Bay, its rocks and mineral possibilities.

Copy seen: DGS.

8216. **JOHNSTON, C. E.** Special cruise—ice observation. Report July 9 to July 28—ice observation by the "Seneca". (*In:* U. S. Coast Guard. International ice observation and ice patrol service, 1914. *Pub* as its: Bulletin, 1915. No. 3, p. 33-35)

Account of a "cruise in waters adjacent to Labrador and Greenland for the purpose of observing conditions governing the origin of the ice which annually appears on the Banks of Newfoundland." This was the first time such an investigation was ordered by the Ice Observation Service. Similar special research was done in 1923 by the *Marion* and *General Greene*, and in 1940 by the *Northland*. Includes brief notes on the icebergs at the lower end of Davis Strait, and the ice conditions which were so severe as to prevent the *Seneca* from reaching Greenland.

8233. JOLLIFFE, ALFRED WALTON, 1907- . Mineral possibilities of the Northwest Territories. (Canadian Institute of Mining and Metallurgy. Transactions, 1937. v. 40, p. 663-77, illus., maps)

Contains a sketch of the history and general geology, and a list of all mineral occurrences, with locations, arranged by minerals, with description (in more detail) of gold, silver and uranium.

Copy seen: DGS.

8234. JOLLIFFE, ALFRED WALTON, 1907- . Quyt Lake and parts of Fishing Lake and Prosperous Lake areas, Northwest Territories. Ottawa, King's Printer, 1940. iii, 9 p. (Canada. Geological Survey. Paper 40-14)

Contains descriptions of the geological formations, faults, and gold deposits of the area, 62°40'-63°05'N. 114°-114°30'W. Preliminary maps for these areas were published as Canada, Geological Survey, Paper 39-6.

Copy seen: DGS.

8235. JOLLIFFE, ALFRED WALTON, 1907- . Rare-element minerals in pegmatites, Yellowknife-Beaulieu area, Northwest Territories. Ottawa, 1944. [3], 23 p. 7 plates (diags., part fold., map) (Canada. Geological Survey. Paper 44-12)

Contains mimeographed notes on the geology and pegmatites, descriptions of the rare-element minerals (tantalum, columbium, lithium, beryllium, tin), treatment of the ores, and descriptions of the deposits.

Map: geology of area, 62°-63°10'N. 112°-114°30'W. (scale about 5 mi.: 1 in.) showing winter tractor roads from Yellowknife Bay, Great Slave Lake, to Gordon Lake, and to Thompson-Lundmark, and from François Bay to Ruth (François Lake region).

Copy seen: DGS.

8236. JOLLIFFE, ALFRED WALTON, 1907- . Structures in the Canadian Shield. (American Geophysical Union.

Transactions, 1942. v. 23, p. 699-707, illus.)

Description, with air photographs, of faults in the region between Great Slave and Great Bear Lakes.

Copy seen: DLC.

8237. JOLLIFFE, ALFRED WALTON, 1907- . Yellowknife Bay-Prosperous Lake area, Northwest Territories. Preliminary report. Ottawa, 1938. 2 p. l., 41 l., fold. map. (Canada. Geological Survey. Paper 38-21)

Preliminary report on detailed geological mapping and study of some of the gold deposits made in the area on north arm of Great Slave Lake during 1936-37. Includes data on structural geology, description (in detail) of the mining properties, notes on other minerals and on ore genesis.

Copy seen: DLC.

8238. JOLLIFFE, ALFRED WALTON, 1907- . Yellowknife faults and ore bodies. (Pre-Cambrian, May 1945, v. 18, no. 5, p. 6-11, 21, illus., 3 sketch maps)

Discussion of the relation of the gold deposits of the Yellowknife field and a system of late major faults, in which the author revises opinions expressed in Henderson, J. F., and A. W. Jolliffe, *Relation of gold deposits to structure* (etc.) 1939, q.v.

Copy seen: DGS.

8239. JOLLIFFE, ALFRED WALTON, 1907- . Yellowknife River area, Northwest Territories. Ottawa, 1936. 1 p. l., 10 l., fold. map. (Canada. Geological Survey. Paper 36-5)

Contains a preliminary report and map for prospectors for an area north of the north and east arms of Great Slave Lake, giving the general geology and descriptions of known mineral deposits (including mines) with notes on economic possibilities.

Copy seen: DGS.

Report on a special investigation, under the direction of the Secretary of Commerce, May-Oct., 1914, with the Bureau of Fisheries steamer *Albatross*. Includes descriptions of the trapping, seining, and netting of salmon, curing methods, streams and enemies of the salmon; brief note on the halibut, cod, herring and whaling industries; discussion of taxation, vessels, hatchery work, laws, labor questions, and pollution by canneries. Includes mention of fox farming and fur-bearing animals and full discussion of natives of the Pribilof Islands, their condition and occupations.

Written by one of Italy's aeronautic experts, using the pseudonym, Jotti da Badia Polesina, an historical study of aeronautic exploration of the polar regions with notes and diagrams of earlier aircraft and expeditions, a critique of the Nobile flight, 1928, and a technical note on the N-1 (*Norge*) dirigible.

Copy seen: DLC.

8267. JOUBERT, Sir PHILIP, and A. R. GLEN. High latitude flying by coastal command in support of convoys to north Russia. (Geographical journal, July-Dec. 1946. v. 108, p. 1-23, 3 plates, illus. (maps), diagrs. (incl. 1 fold.))

Contains: 1. Joubert, Sir P. Strategic aspects of air operations in high northern latitudes.

2. Glen, A. R. The battle for the convoy route in 1942. Discussion.

The first section is a general account of R. A. F. operations from Iceland and other bases, and note of need for continued study of air navigation, etc., in high latitudes. The second section discusses in some detail the allied reoccupation of Spitsbergen; reconnaissance of sea ice by R. A. F. Coastal Command (in Greenland and Barents Seas, and Bear Island channel); the summer convoys of 1942 (on the Murmansk Run). Discussion presents arguments for and against high latitude flying for strategic purposes.

Fold. diagram shows limits of drift ice in the Greenland-Barents Sea region.

Bd. 3, p. 18-40, illus.) *Title tr.*: The glaciological observations at the West Station. German Greenland Expedition Alfred Wegener 1929 and 1930-1931

Contents tr.: 1. General remarks (on Alfred Wegener's research).

2. The firn region free of crevasses.

3. The crevasse zone.

4. The situation of the winter house (relative to the local glaciers)

5. Observations on Kangerdluarsuk Glacier.

6. Observations on Kamarujuk Glacier.

7. Observations in the shaft under the winter house: construction of the shaft, air pressure of enclosed air bubbles in ice, density determinations, temperature observations, and temperature gradient.

List, with synonymy, references to literature, localities and discussions, of three (including one new) species of polyps. Summary in French, p. 515.

Copy seen: DLC.

8293. JUNGENSEN, HECTOR FREDERIK ESTRUP, 1854-1917. On the appendices genitales in the Greenland shark, *Somniosus microcephalus* (Bl. Schn.), and other selachians. Copenhagen, B. Luno, 1899. 2 p. l., 88 p. illus., 6 plates (Ingolf-expedition, 1895-1896. [Reports] v. 2, pt. 2).

Detailed descriptions of the anatomy of genital appendages of twenty-six species of sharks, skates, etc., from Greenland and Icelandic waters.

Copy seen: DSI-M.

8294. JUNGENSEN, HECTOR FREDERIK ESTRUP, 1854-1917. Pennatulida. Copenhagen, B. Luno, 1904. 2 p. l., 95 p. illus., 3 plates, chart, table (Ingolf-expedition, 1895-1896. Reports, v. 5, pt. 1).

Based on the cruiser *Ingolf's* and later collections from Davis and Denmark Straits, Greenland Sea and adjacent regions. Remarks on the systematic classification of the sea pens, and a revision of species; a list, with synonymy, references, discussion of localities and distribution, of nineteen (including with descriptions, two new) species; a general review of the occurrence and distribution of northern forms; and a bibliography (101 items).

Copy seen: DSI-M.

8295. JUPP, DOROTHY M. Crossing the "Run". (Among the deep sea fishers, Apr. 1949. v. 47, no. 1, p. 18-20, sketch map)

Popular article on the seasonal state of ice in the waters between Battle Harbour, (an islet 52°16'N. 55°35'W.) and the mainland of Labrador.

Copy seen: CaOGB.

8296. K., B., and N. B. Bukhta Tikhaya. (Sovetskaya Arktika, 1936, no. 2, p. 67-70, illus., map) *Title tr.*: Tikhaya Bay.

Brief historical sketch of expeditions to Franz Josef Land, description of Hooker Island, work at the Tikhaya Bay (80°20'N. 52°50'E.) polar station during seven winterings, 1929-1935.

Copy seen: DLC.

8297. K., B., and N. B. Ostrov Belyi. (Sovetskaya Arktika, 1936, no. 2, p. 77-

78, illus., map) *Title tr.*: Belyi Island.

Brief description of this island off Yamal Peninsula (73°10'N. 70°45'E.) and its polar station.

Copy seen: DLC.

8298. K., B., and N. B. Ostrov Uedineniia. (Sovetskaya Arktika, 1936, no. 5, p. 75-77) *Title tr.*: Uyedineniya Island.

Brief historical sketch and general description of "Lonely" Island in Kara Sea (77°28'N. 82°28'E.)

Copy seen: DLC.

8299. K., M. Observatoriia "Dezhnev". (Klimat i pogoda, 1934. No. 3, (54), p. 9-17, illus.) *Title tr.*: "Dezhnev" observatory.

The voyage from Vladivostok to Cape Dezhnev (East Cape, Bering Strait) on the *Yuanta*, during the early summer of 1932 is described. The establishment of this geophysical observatory on the Chukotsk Peninsula, its aims and its work during the first year of operation are discussed. General physio-geographical aspects of the region and living conditions are sketched.

Description and discussion of marine erosion of the coastal permafrost regions as observed by the author, 1933-34. Bibliography, p. 1019.

Copy seen: DLC.

8306. KACHURIN, S. P. Instruktsiia po izucheniiu termokarsta, proval'nykh i osadochnykh iavlenii (In: Akademiia nauk SSSR. Komitet po vechnoi merzlote. Sbornik instruktsii i programmykh ukazanii, 1938, p. 103-112) **Title tr.:** Instruction for the study of thermokarst, sinking and settling of the ground.

Contains description of various forms of thermokarst phenomena (sinking of the ground, cracks, shallow depressions, sunken lakes, "drunken forest"), and their effect on construction (deformation of buildings, etc.); instructions for field work, including gathering of data intended to explain the genesis of thermokarst. Bibliography (16 items). **Copy seen:** DLC.

8307. KACHURIN, S. P. Opyt raionirovaniia sezonnogo promerzaniia gruntov na territorii evropeiskoi chasti SSSR. (In: Tsytovich, N. A., and others. Glubina zalozheniia fundamentov malotazhnykh zdani. 1946, p. 43-62, 3 maps) **Title tr.:** An attempt to divide the territory of the European part of the U.S.S.R. into regions according to the seasonal freezing of the ground.

Contains explanation of a system of dividing territory according to the seasonal freezing of the ground by a new method, which combines cartographical data, relief, lithology, vegetation, and a geographical interpretation of climatic conditions, with material on the depths of ground freezing. On the basis of this method a schematic map of ground freezing for the European part of the U.S.S.R. was made at a scale of 1: ten million (3 maps).

Contains description of forms of relief, and micro-relief typical for the area of permafrost distribution. One of the most important is thermokarst, the type of ground-sinking resulting from changes in thermal conditions of the ground and its causes. A variety of thermokarst forms are described. Solifluction under permafrost conditions and forms of relief it produces are subdivided into several specific groups. Finally are described polygonal soils, and the causes of their formation, and three major types of ground relief connected with ground swelling: (1) peat mounds, (2) "burial" mounds composed primarily of mineral ground, and (3) "bulgunniakh", exceptionally large type of naled'. Bibliography (48 items). *Copy seen:* DLC.

Contains discussion of major difficulties encountered in engineering and construction work under permafrost conditions. Nine subdivisions include data on earth works, drilling, mining, building, water supply, hydro-technical constructions, road building, agriculture. Methods of thawing of frozen ground, or "freezing" when permanently frozen ground contains water-bearing unfrozen layers are discussed, as well as problems of ground swelling and settling, and resulting deformation of buildings. Bibliography (9 items). *Copy seen:* DLC.

Issued also as: Wissenschaftliche Ergebnisse der finnischen Expeditionen nach der Halbinsel Kola in den Jahren 1887-1892. A, I [pt. 1]

Narrative of a natural history expedition organized by the Finnish scientific society, Societas pro fauna et flora fennica, the University of Helsingfors, and some private supporters; one party of the expedition traveling with reindeer packs and Lapp guides during June-Sept. 1887, in the northern central interior of the Kola Peninsula, while another section explored along the southern coasts. The narrative of the journeys includes brief descriptions of the more important physical features of the peninsula.

Map bound in with no. 6 of this volume.

(Zemlevedenie, 1934. T. 36, vyp. 3, p. 211-58, illus., tables, 2 sketch charts) *Title tr.:* Geomorphological and hydrological observations made on the expeditionary ship *Al'batros* during the summer of 1932 in the region of the Ob'-Yenisey Gulf and the adjacent parts of the Kara Sea.

Report, by the head of the scientific party, of an expedition to investigate marine mammals and fishes in the lower Yenisey River and Yenisey Gulf to Dikson Island in the summer of 1932. General remarks (with diagrams) on land forms and geological structure, permafrost depths and ground ice on Dikson Island. Discussion of the relatively rapid changes of the coast line of Kara Sea, especially on the Kanin Peninsula - Pechora coast, White Island (Belyy Ostrov), and Yamal Peninsula; the processes which cause the changes, i.e. storm waves and ocean currents, geologic work of sea ice, and the thawing of permafrost along the shores; description of the present shores and the shallow depths of southeastern Barents and southwestern Kara Seas; also a hydrological sketch of Yenisey Gulf.

Tables: Hydrologic data, Aug. 1-Sept. 4, on weather, depths; and (a few data) on transparency, water temperatures, bottom sediments; also data on fauna and trawling.

Maps: Bathymetric chart of southeastern Barents and southwestern Kara Seas.

The author notes that due to shipwreck on the return voyage, most data from the expedition were lost. Appended (p. 250-55) is account of the wreck by F. S. Valiāvkin; and bibliography (19 items). Summary in English.

Komissia po izucheniiu Iakutskoi Avtonomnoi Sovetskoi Sotsialisticheskoi Respubliki. Trudy. T. 5.) *Title tr.*: Materials on the climatology of the northern coast of Asia.

Contains (p. iii-lxxvi) introductory matter in which the organization, instrumentation and program of the meteorological work of the Baron von Toll Expedition, 1900-1903, is described and illustrated, and results of observational data are discussed.

Tables (p. 1-69) of daily routine meteorological observations at 07, 13 and 21 hours, hourly recordings of pressure, temperature, relative humidity, wind direction and speed, cloudiness, precipitation, fog and other phenomena, at Nablyudeniy Island (76°8' N. 95°4'E.) off the Taymyr Peninsula during the period Oct. 1900-Aug. 1901. Observations are summarized with discussion of results.

Daily observations (p. 70-71) at 07, 13 and 21 hours, of the ground temperature at depths of 0.2 m. and 0.4 m. and at 13 hours at 0.8 m. and at 1.6 m. on Nablyudeniy Island during the period Dec. 1900-Aug. 1901.

Daily routine meteorological observations (p. 72-131, 134-43, 182-85) at 07, 13 and 21 hours, and hourly recordings of pressure, temperature, relative humidity, wind direction and speed, cloudiness, precipitation, fog and other phenomena at Nerpicha Bay on Kotel'nyy Island, during the period Oct. 1901-June 1902. Daily routine observations at 07, 13 and 21 hours at Mikhailov, June-Oct. 1901, and at Birrula Stan, May 27-Dec. 3, 1902, and Mar. 21-Dec. 4, 1903; and on overland trips in Mar. and Dec. 1903.

Daily observations (p. 132-33) of ground temperatures at 07, 13 and 21 hours at depths of 0.2 m., 0.4 m., and 0.8 m. at Nerpicha Bay, during the period Nov. 1901 July 1902.

Daily routine meteorological observations (p. 144-45, and 167-82) at Tiksi Bay, during the period May-July 1903, and on overland trips out of Kazach'ye (about 71°N. 136°E.) intermittently during the period Apr. 11, 1901-Mar. 7, 1903.

Daily routine observations (p. 146-

63) taken on board the yacht *Zariā* en route from Ekaterinskaya Gavan' on Kola Peninsula through the Barents and Kara Seas to waters off the Taymyr Peninsula, during the period July 24-Oct. 1, 1901; en route thence to Nerpicha Bay on Kotel'nyy Island Aug. 25-Sept. 30, 1901, and to other islands of the New Siberian archipelago; thence to Tiksi Bay Aug. 1-Sept. 12, 1902.

Translation (introductory matter and tabular explanations throughout) in German.

Plates are illustrations from photographs of the sites and equipment of the expedition's work.

(Outing adventure library. [no. 5])

"The following pages comprise chapters 20 to 46 of Dr. Kane's work 'The U. S. Grinnell expedition in search of Sir John Franklin: a personal narrative' (London and New York, 1854) omitting nothing but some scientific observations."—Introd.

Copy seen: DLC.

8373. KANE, ELISHA KENT, 1820-1857. Arctic explorations: the Second Grinnell Expedition in search of Sir John Franklin, 1853, '54, '55. Illustrated by upwards of three hundred

engravings, from sketches by the author. Philadelphia, Childs & Peterson; [etc., etc.] 1856. 2 v. v. 1: 1 p. l., 464 p. illus. (incl. music), 12 plates, port., 3 maps (incl. 1 fold.); v. 2 1 p. l., 457 p. illus. 8 plates, port., map, fold. diagr. Added engraved title-page with vignette.

This work was reissued with imprint date, 1857. Narrative of the Second Grinnell Expedition on the *Advance*, 1853-1855, Dr. Kane in command, under auspices of the U. S. Navy and various scientific institutions, to search for the Sir John Franklin Expedition, to explore, and to make scientific investigations and collections in the region north of Smith Sound.

Contains an account of the organization and course of the expedition based on "passages of [Kane's] journal of interest to the general reader": the voyage to Smith Sound, the wintering at Rensselaer Harbor on the northwest coast of Greenland, the making of observations, sledge journeys, explorations, surveys, etc.; notes upon the Eskimos, flora and fauna, Humboldt and other glaciers, ice, etc.; the abandonment of the *Advance*, and the party's return to Upernavik in small boats.

Appendices: No. 1. Instructions of the Secretary of the Navy to Kane.

No. 2-3. Preliminary report of Kane to the Secretary of the Navy (a summary of the work and events of the expedition) with appended documents.

No. 4. Letter from the Secretary of the Navy ordering the rescue or relief of Dr. Kane and his party, with appended reports on the progress of the rescue ship.

No. 5. Journals and field notes of various exploring parties of the expedition 1853-54, with record of some observations.

No. 6. Table of geographical positions determined by the expedition (northeast coast of Ellesmere Island, northeast coast of Greenland, about 78°-82°N.) with notes on some positions.

No. 7. Abstract of the log book of the *Advance*, June-Sept. 1853.

No. 8-9. Astronomical observations at Van Rensselaer Harbor, by August Sonntag.

No. 10. Methods of survey (of the coasts of Smith Sound, and, of the

Greenland coast southward to Melville Bay).

No. 11. Determination of temperature with tables of readings, etc.

No. 12. Meteorological abstracts.

No. 13-14. Contributions on climate, by A. Schott.

No. 15-17. Magnetic observations.

No. 18. Enumeration of plants, collected by Dr. E. K. Kane, on the first and second expeditions to the polar regions, with descriptions and remarks by E. Durand.

Review and discussion of this publication (1857 issue) *Arctic Explorations*, by Dr. Elisha K. Kane, by J. D. Dana, in American journal of science, 1857. Ser. 2, v. 24, p. 235-51.

Copy seen: DLC.

8374. KANE, ELISHA KENT, 1820-1857. Astronomical observations in the arctic seas, made during the Second Grinnell Expedition in search of Sir John Franklin, in 1853, 1854, and 1855, at Van Rensselaer Harbor, and other points in the vicinity of the northwestern coast of Greenland. Reduced and discussed, by Charles A. Schott. [Washington, Smithsonian Institution, 1860] 3 p. l., 49 p. front. (map) diagrs. (Smithsonian contributions to knowledge. v. 12, art. 2. Smithsonian Institution publication 129).

Contains description of instruments and (in appendix) of sites and methods of survey; observations (made by Augustus Sonntag) and results.

Map 1:2,500,000, northwest coast of Greenland and northeast coast of Ellesmere Island, "newly projected from revised astronomical reductions."

Copy seen: DLC.

8375. KANE, ELISHA KENT, 1820-1857. Kane, der Nordpolfahrer. Arktische Fahrten und Entdeckungen der zweiten Grinnell-Expedition zur Aufsuchung Sir John Franklin's in den Jahren 1853, 1854 und 1855 unter Dr. Elisha Kent Kane. Beschrieben von ihm selbst. 2. verm. Aufl. Mit 120 in den Text gedruckten Abbildungen, acht Tondrucktafeln und einer Karte der nordamerikanischen Polarländer. Leipzig, O. Spamer, 1859. xii, 288 p., illus., 8 plates (incl. front.) fold. map. Title tr.: Kane the north polar explorer. Arctic explorations and discoveries of the Second Grinnell Expedition in search of Sir John Franklin, in the

years 1853, 1854, and 1855, under Dr. Elisha Kent Kane, written by himself. 2d enlarged edition with 120 illustrations in the text, eight plates and a map of the North American polar regions.

A translated and highly condensed account, adapted by Fr. Kiesewetter from Kane's *Arctic explorations*, q.v., with preliminary chapters on northern exploration, the Northwest Passage, nature and man in north polar travel, life of Dr. E. K. Kane.

Copy seen: DLC.

8376. Reduced and discussed, by Charles A. Schott.* [Washington, Smithsonian Institution, 1859] 4 p. l., [3]-66 p. diags. (Smithsonian contributions to knowledge. [v. 10, art. 3] Smithsonian Institution publication 97)

Contains notes on instruments, and methods used, with tables of results of observations made by August Sonntag: magnetic declination, 1854, inclination, 1853-55, intensity, 1854-55.

Copy seen: DLC.

8377. KANE, ELISHA KENT, 1820-1857. *Meteorological observations in the arctic seas, made during the Second Grinnell Expedition in search of Sir John Franklin, in 1853, 1854, and 1855, at Van Rensselaer Harbor, and other points on the west coast of Greenland. Reduced and discussed by Charles A. Schott* [Washington, Smithsonian Institution, 1859] 4 p. l., 112 p., diags. (Smithsonian contribution to knowledge. [v. 11, art. 5] Smithsonian Institution publication 104).

Contains notes on instruments and methods used; record and discussion of temperatures, direction and force of wind, and of atmospheric pressure.

Copy seen: DLC.

8378. KANE, ELISHA KENT, 1820-1857. *Physical observations in the arctic seas, made during the Second Grinnell Expedition in search of Sir John Franklin, in 1853, 1854, and 1855, at Van Rensselaer Harbor, and other points on the west coast of Greenland.*

Reduced and discussed, for the Smithsonian Institution. By Charles A. Schott. Washington, Smithsonian Institution, 1859-60. [339] p. chart, diags. (Smithsonian contributions to knowledge) Smithsonian Institution publication 198.

A separate issue, bound together in one volume with new general title-page added, of the author's four papers: *Magnetical observations 1859, Meteorological observations 1859, Astronomical observations 1860, Tidal observations, 1860*, q.v.

Copy seen: DLC.

8379. KANE, ELISHA KENT, 1820-1857. Report to the Secretary of the United States Navy, at Washington, of the Expedition in search of Sir John Franklin, during the years 1853-4-5, with a chart showing the discoveries made in the arctic regions. (Royal Geographical Society. Journal, 1856. v. 26, p. 1-18, fold. map)

Contains an account (in brief) of the Second Grinnell Expedition, during which the coast of northwest Greenland was explored from Prudhoe Land to Washington Land, as was the Ellesmere Island coast from Cape Sabine northward along Kane Basin.

Copy seen: DLC.

8380. KANE, ELISHA KENT, 1820-1857. *Tidal observations in the arctic seas, made during the Second Grinnell Expedition in search of Sir John Franklin, in 1853, 1854, and 1855, at Van Rensselaer Harbor. Reduced and discussed, by Charles A. Schott.* [Washington, Smithsonian Institution, 1860] 3 p. l., 82, [2] p. diags. (Smithsonian contributions to knowledge. [v. 13, art. 2]) Smithsonian Institution publication 130.

Contains notes on instrumentation and methods; record and reduction of tides at Rensselaer Bay (78°37'N. 71°W.) northwest Greenland.

Appendix: Tidal observations made on board HMS *North Star*, Commander Saunders, Wolstenholme Fjord Nov. 1849-July 1850.

Copy seen: DLC.

8381. KANE, ELISHA KENT, 1820-1857. *The U. S. Grinnell Expedition in search of Sir John Franklin. A personal narrative.* New York, Harper & Brothers, 1853. xi, 13-552 p. incl. illus., tables, front., 11 plates, maps (1 fold.) Reissued with imprint date, 1854.

Narrative (by the surgeon) of the First Grinnell Expedition under Lt. DeHaven, on the *Advance* and the *Rescue*, to the Lancaster Sound—Wellington Channel region, 1850–51. Contains account (based mainly on Kane's day-to-day journal) of the organization and course of the expedition to Lancaster Sound, Barrow Strait, Wellington Channel, the drift in ice in that region, Sept. 1850–June 1851, with comments on the Eskimos, animal life, hunting, ice conditions.

Appendices: A. Instructions of the Secretary of the Navy to Lt. DeHaven.

B. Lt. DeHaven's official report of the American Arctic Expedition.

C. Meteorological abstract (daily, May 1850–Sept. 1851, record of variation, current, drift, wind, temperature, etc., in Davis Strait, Baffin Bay, Lancaster Sound, Wellington Channel, Barrow Strait, etc.)

D–E. Winds [etc.]

F. Lecture on the access to an open polar sea . . . read before the American Geographical and Statistical Society by Dr. Kane, Dec. 14, 1852. (general discussion of the arctic seas, the Franklin search, and of plans for Kane's Second Grinnell Expedition, 1853–55). **Copy seen:** DLC.

8400. KARDAKOVA - PREZHENTSOVA, E. A. Vodoroslevaiia rastitel'nost' Komandorskikh ostrovov. (Vladivostok. Tikhookeanskii nauchno-issledovatel'skii institut rybnogo khoziaistva i okeanografii. Izvestiia, 1938. T. 14, p. 77-108, illus.) **Title tr.:** The seaweeds of Commander Islands.

Results of the author's study, 1928-32, containing a description of algae found in the littoral zone of the islands,

and a list of seventy-five species, with brief notes on their distribution. Summary in English. *Copy seen:* DLC.

8401. KARELIN, D. B. Aisbergi v poliarnom basseine. (Vsesoiuznoe geograficheskoe obshchestvo. Izvestiia, 1945. T. 77, p. 169-71, sketch map) *Title tr.:* Icebergs in the Arctic Basin.

Report on icebergs observed during author's aerial reconnaissance in the N-311, I. I. Cherevichnyi piloting, Mar.-Apr., 1943, position given as 84°N.-84°30'N., north of Franz Josef Land and just south of the arctic pack. With the aid of his 1942 observations in the Kara Sea, author conjectures concerning the probable direction and rate of drift. *Copy seen:* NNA.

8402. KARELIN, D. B. Izokhrony zamernaniia i vskrytiia pribrezhnoi zony poliarnykh morei Soiūza v zimu 1934-35 goda. (Severnyi morskoi put', 1937. No. 6, p. 88-97, maps) *Title tr.:* Freezing and opening isochrons of the coast region in the polar seas of U.S.S.R. in the winter 1934-35.

A study, based on observations of polar stations of the Main Administration of the Northern Sea Route, presenting the focal points and the chronology of freezing and opening along the northern coast of the U.S.S.R., 1934-35.

Copy seen: DLC.

8403. KARELIN, D. B. Izuchenie granits mnogoletnego l'da v poliarnom basseine. (Vsesoiuznoe geograficheskoe obshchestvo. Izvestiia, 1947. T. 79, vyp. 4, p. 481-82, map) *Title tr.:* The study of pack ice limits in the polar sea.

A brief account of the progress of exploration work to determine the extent of pack ice north of the U.S.S.R., during the years 1940-46, with indication of ten outstanding flights into the region.

Copy seen: DLC.

8404. KARELIN, D. B. K. diskussii po ledovym prognozam. (Problemy Arktiki, 1940, no. 7-8, p. 13-20) *Title tr.:* On the discussion on ice forecasting.

On relation between theory and practice with regard to the debate upon ice forecasting in progress in the pages of *Problemy Arktiki*.

Copy seen: DLC.

8405. KARELIN, D. B. Ledovaia sluzhba v vostochnom sektore Arktiki v 1939 g. (Sovetskaiia Arktiki, 1940,

no. 4, p. 39-43, illus.) *Title tr.:* Ice service in the eastern sector of the Arctic in 1939.

Description of work in ice forecasting for East Siberian and Chukchi Seas in 1939. *Copy seen:* DLC.

8406. KARELIN, D. B. Ledovye nabludeniia poliarnykh stantsii. (Sovetskaiia Arktika, 1938, no. 2, p. 51-52) *Title tr.:* Observations on ice conditions at polar stations.

Theoretical discussion of the importance of a systematic ice service conducted by polar stations.

Copy seen: DLC.

8407. KARELIN, D. B. Ledovyi pokrov poberezh'ia Sovetskoi Arktiki. (Meteorologiia i gidrologiia, 1937, no. 2, p. 43-50, map) *Title tr.:* Ice cover of the Soviet Arctic coast.

The apparent wave propagation process of ice breaking up and freezing along the shores of the Soviet Arctic may furnish a new basis of ice forecasting in this area. The author indicates seven centers and the direction of the propagation from them on the basis of ice conditions observed (from polar stations) in 1934 and 1935, along the Northern Sea Route.

8447. KATS, NIKOLAI IAKOVLE-VICH, 1894-. Bolota evropeiskoi chasti Soiuza SSR. I. Tipy torfianobolotnykh obrazovaniï i ikh geografi-cheskoe raspredelenie. II. Vodnye i bolotnye rastitel'nye tsenozy i zakonomernosti ikh struktury. (Botanicheskii zhurnal, 1936. T. 21, no. 3, p. 293-343, text maps; T. 21, no. 4, p. 431-72) *Title tr.:* Marshes of the European part of the U.S.S.R. I. Types of peat bog formations and their geographical distribution. II. Aquatic and marsh phyto-cenoses and the natural laws of their structure.

Contains a study of the marshes and peat bogs, which are divided by the author into eight principal types on the bases of their vegetation, geographical distribution, including arctic regions of European U.S.S.R., characteristics of various phytocenoses, and bibliographies at the end of both parts (140 items). The corrected map is inserted at the end of T. 22, no. 1, 1937 of this journal. Summary in German.

Contains classification of lowland marshes, chiefly peat bogs, according to vegetation and (to a lesser degree) microrelief. Includes (p. 388-424) a list of swamp types (oligotrophic, mesotrophic, eutrophic and mixed) with a detailed description of each type. Chapter 2 shows the geographical extent of different peat-bog formations in European U.S.S.R., and gives full description and location of four zones and subzones in the European North. Bibliography (includes 11 items concerning the North).

Map shows the location and limits of marsh zones and regions in European U.S.S.R.

8452. KATŠ, NIKOLAI ĬAKOVLEVICH, 1894- . Zur Kenntnis der Moore des Fernen Ostens. (*Deutsche botanische Gesellschaft. Berichte*, 1932. Bd. 50, Heft 6, p. 273-88) *Title tr.*: To the knowledge of the marshes of the Far East.

Contains a study of distribution of peat bogs and their vegetative cover in Kamchatka Peninsula, based on the results of the investigation by various members of the Expedition of the Torf (Peat) Institute in 1931.

Copy seen: MH-A.

8453. KATŠ, NIKOLAI ĬAKOVLEVICH, 1894- , and TŠ. I. MINKINA. Torfiānye bolota severnoi chasti basseina reki Pechory. (*Moskva. Tsentralnaia torfiānaia opytnaia stantsiia. Trudy*, 1936. T. 1, p. 103-125, illus., maps, tables) *Title tr.*: Peat bogs of northern parts of the Pechora River basin.

Based on Pechora Peat Expedition under the first author's leadership in 1932. Description of four types of peat bogs in the region under investigation (62°30'-68°10'N.), their general characteristics, vegetation cover and quality of peat. Map shows route of the expedition and the areas investigated. Tables show botanical composition of the peat, its ash content, calorific value, degree of disintegration, thickness of deposits in various areas. Summary table of peat resources and technical characteristics of peat. Summary in English.

Vsesoiuznyi arkticheskii institut. Trudy. T. 87, chast' 2) *Title tr.*: The description of the geographical basis to the geological map of the northern part of the U.S.S.R. and the index to this map.

A short description of source material used in preparation of the geological map, 1:2,500,000, with an index of place-names, p. 13-57.

Copy seen: DLC.

8476. KEELE, JOSEPH, 1863-1923. The Duncan Creek mining district (Stewart River, Yukon Territory). (Canada. Geological Survey. Summary

report, 1904, pub. 1905. p. 18-42, fold., col. map)

Contains a description of the topography, drainage, general geology, and (in detail) the many creeks with their gold occurrences and prospecting, in the area of Stewart River and its tributaries from Mayo eastward (Mayo Lake, Rupe River, Nelson Creek, Mayo River, Duncan Creek and tributaries).

Map: outline (scale 5 mi.: 1 in.) portion of Duncan Creek mining district (about 63°16'-64°10'N., 134°45'-137°10'W.).

Copy seen: DLC.

8477. KEELE, JOSEPH, 1863-1923. Forests of the Yukon Territory. (Forest and outdoors, Apr. 1905. v. 1, p. 65-69, plate)

Notes on composition of the stands between the Pelly and McQuestion Rivers.

Copy seen: DA.

8478. KEELE, JOSEPH, 1863-1923. Mesozoic clays and sands in northern Ontario. (Canada. Geological Survey. Summary report, 1920, pub. 1921. Pt. D, p. 35-39, illus. (sketch map))

Description of Cretaceous deposits on Missinaibi River.

Copy seen: DLC.

8479. KEELE, JOSEPH, 1863-1923. Mesozoic clays in northern Ontario. (Canada. Geological Survey. Summary report, 1919, pub. 1920. Pt. G, p. 13-23)

Contents: Clays on Missinaibi and Mattagami Rivers; age of fire-clays; origin of clays; interglacial lignites and clays; index for this paper and for M. Y. Williams' *Palaeozoic rocks*, 1920.

Copy seen: DLC.

8480. KEELE, JOSEPH, 1863-1923. A reconnaissance across the Mackenzie mountains on the Pelly, Ross, and Gravel rivers, Yukon and North West Territories. Ottawa, Govt. Print. Bur., 1910. 54, 7 p. 10 plates, fold. map.

Report on investigations and a preliminary survey made July 1907-July 1908. Describes the topography, drainage, climate, fauna, fur trade, forests, transportation, general and economic geology of the region (roughly 62°-64°N. 125°-135°W.).

Map: preliminary topographic map (scale 1:506,880) of the region near these rivers, with descriptive notes. Gravel River was subsequently named Keele River.

Copy seen: DLC.

8481. KEELE, JOSEPH, 1863-1923. Report on the upper Stewart River region, Yukon. Ottawa, King's Printer, 1906. 23 p. 4 plates, fold., col. map. (Canada. Geological Survey. Annual report, 1904. New ser., v. 16, pt. C)

Contains a geological and topographical description of area above Fraser Falls, including the Hess, Lansing, Ladue, Beaver, and Rackla Rivers, with notes on the formations, fossils, igneous rocks, the glacial and economic geology.

Appendix: List of twenty-one butterflies and eight moths, determined by James Fletcher.

Copy seen: DLC.

8482. KEELER, CHARLES. Days among Alaska birds. (*In:* Dall, W. H., and others. History, geography, resources. Harriman Alaska series, 1902. v. 2, p. 205-234, 16 plates)

An informal account of the author's observations of the habits, songs and calls, habitats and associations of the birds, made during the cruise and on shore trips of the expedition.

Copy seen: DLC.

8483. KEELER, NICHOLAS EDWIN, 1851- . A trip to Alaska and the Klondike in the summer of 1905. Cincinnati, Ebbert & Richardson Co., 1906. 115 p. 9 plates, incl. port.

The author toured the Inside Passage, crossed White Pass on the railway, visited Dawson, cruised around Alaska to St. Michael and Nome, and took a river boat up the Yukon to Nulato.

Copy seen: DLC; NNSStef.

8484. KEELY, ROBERT NEFF, 1860-, and G. G. DAVIS. In arctic seas. A narrative of the voyage of the Kite with the Peary Expedition to North Greenland. Philadelphia, E. Stern & Co., 1892. 215 p. incl. front., illus. 6 plates, incl. ports., fold. map.

The expedition of 1891-92, sponsored by the Academy of Natural Sciences of Philadelphia, was under command of Peary until he left the ship, then under Prof. A. Heilprin. The personnel included zoologists and botanists, with the authors of this narrative as surgeons. They give here an account of

the Kite's passage via West Greenland ports to McCormick Bay in Murchison Sound, North Greenland, and return, June-Aug. 1891; with informative details on Polar Eskimos' utensils, tools, sledges and clothes, and on sights along West Greenland coast. Includes notes on ice in Baffin Bay.

Copy seen: DLC; NNSStef.

8485. KEELY, ROBERT NEFF, 1860-, and G. G. DAVIS. In arctic seas. The voyage of the "Kite" with the Peary Expedition, together with a transcript of the log of the "Kite". Philadelphia, R. C. Hartranft, 1892. vii, 524 p. illus., 32 plates, 2 maps (1 fold.)

Another edition, of the preceding item, with the addition of a log of the second, or relief expedition of the Kite, July 4-Sept. 22, 1892; a narrative of the relief party's activities at McCormick Bay and on the inland ice; of Mrs. Peary's winter; and results of Peary's trans-Greenland march. Reissued in Philadelphia and London, 1893.

Copy seen: DLC; NNSStef.

8486. KEEN, A. MYRA. Molluscan species common to western North America and Japan. (Pacific Science Congress. 6th, Berkeley, Stanford University, and San Francisco, 1939. Proceedings, pub. Berkeley and Los Angeles, 1940. v. 3, p. 479-83)

Methodologic discussion of the question of past migrations of molluscs between North America and Asia by way of Aleutian waters, using as evidence lists of species checked as to their regional distribution.

Copy seen: DLC.

8487. KEENLEYSIDE, HUGH LLEWELLYN, 1898- . Recent developments in the Canadian North. (Canadian geographical journal, Oct. 1949. v. 39, p. 156-76, illus., double-face map)

"Based on the alumni lecture delivered at McMaster University, 14th May, 1949." Summary, in general terms, of social services and scientific research now carried on in the Canadian arctic and subarctic regions.

Copy seen: DLC.

8488. KEILHAU, BALTAZAR MATHIAS, 1797-1858. Notes in regard to the geology of Cherry Island and Spitzbergen. (Edinburgh new philosophical

journal, Oct.-Dec. 1829, *pub.* 1830. v. 8, p. 144-46)

Remarks delivered at a meeting of naturalists in Berlin, 1828, on the geologic relationship of Bear (Cherry) Island and West Spitsbergen.

Copy seen: DLC.

Discussion of shamanism in South-east Alaska Indian tribes.

Copy seen: DLC.

8496. **KEITHAHN, EDWARD LINNAEUS, 1900-** . Hunting without a gun. (Alaska sportsman, Jan. 1937. v. 3, no. 1, p. 6-7, illus.)

Random notes on things to be seen and found along the beaches and byways of Northern Alaska, "from fossils and mineral deposits to ghost towns and primitive implements."

Copy seen: DLC.

8497. **KEITHAHN, EDWARD LINNAEUS, 1900-** . The husky is much the larger breed. (Alaska sportsman, Nov. 1943. v. 9, no. 11, p. 18-20, 23-24, illus.)

Discussion of breeds and strains of sledge dogs, with quotations from earlier literature on dogs of the Arctic.

Copy seen: DLC.

8498. **KEITHAHN, EDWARD LINNAEUS, 1900-** . Let's lease an island. (Alaska sportsman, June 1941. v. 7, no. 6, p. 14-15, 27-29, illus.)

General notes on the islands of Alaska, especially the Alexander Archipelago in Southeast Alaska, with mention of Aleutians, Pribilofs, St. Lawrence, Kodiak, and others. *Copy seen:* DLC.

8499. KEITHAHN, EDWARD LIN-
NAEUS, 1900-. The petroglyphs of
southeastern Alaska. (American an-
tiquity, Oct. 1940. v. 6, p. 123-32, illus.,
plate)

Based on observations 1928-39, by a
worker of U. S. Office on Indian Affairs,
later teacher of native craft, at Wrang-
ell Institute, Wrangell, Alaska. A
study of inscriptions on boulders, etc.,
in the Tlingit territory, to show (1)
that "these petroglyphs originated from
(a) natural effects and (b) depressions
worn in rock in the process of tool-
making; (2) that they came to have a
definite and important religious func-
tion; and (3) that the Northwest Coast
decorative art had its origin in them."

NAEUS, 1900-. The secret of the
petroglyphs. (Alaska sportsman, Mar.
1939. v. 5, no. 3, p. 8-9, 22-23, illus.)

Discussion of the antiquity, location
near salmon streams, and possible sig-
nificance of prehistoric carvings or
inscriptions upon rocks in Southeast
Alaska.

Copy seen: DLC.

8502. KEITHAHN, EDWARD LIN-
NAEUS, 1900-. The story of the
Lincoln totem. (Alaska sportsman,
May 1943. v. 9, no. 5, p. 8-9, 23, illus.)

In discussing the Tlingit totem
erected to Abraham Lincoln's memory,
the author remarks on the caste sys-
tem characteristic of Southeast Alas-
kan Indian society in former times.

Copy seen: DLC.

8503. KEITHAHN, EDWARD LIN-
NAEUS, 1900-. There's magic in the
Arctic. (Alaska sportsman, July 1942.
v. 8, no. 7, p. 12-13, 25-27, illus.)

Notes on the auroras, mirages, sun
halos, frost quakes, noises from frozen
sea and lake, and other phenomena.

Copy seen: DLC.

8504. KEITHAHN, EDWARD LIN-
NAEUS, 1900-. A tribute to old man

raven. (Alaska sportsman, June 1937.
v. 3, no. 6, p. 8-9, 17, 19, illus.)

Detailed account of the acumen of
the Alaska raven, its habits and (in
less detail) its place in native myth-
ology.

Copy seen: DLC.

8505. KEITHAHN, EDWARD LIN-
NAEUS, 1900-. When animals were
people. (Alaska sportsman, May 1940.
v. 6, no. 5, p. 18-20, 22, illus.)

Discussion of the art of Haida and
Tlingit Indians, and the primitive so-
cial organization, unwritten literature,
and religion as source of native art in
this culture area of Southeast Alaska.

Copy seen: DLC.

8506. KEITHAHN, EDWARD LIN-
NAEUS, 1900-. Willi Waw, the
Kodiak man. (Alaska sportsman, June
1948. v. 14, no. 6, p. 28-29, 36-37,
illus., map)

Discussion (in general terms) of a
skull unearthed at Kodiak in 1941, its
apparent antiquity and possibility of
its Pleistocene origin, with remarks on
early migrations across the Bering Sea
region.

8523. KENDALL, WILLIAM CONVERSE, 1861- . The fishes of Labrador. (Portland Society of Natural History, Proceedings, 1909. v. 2, p. 207-43)

Based on a collection of the Bowdoin College Expedition to Labrador, 1891. Annotated list of twenty-five species of fishes from the Hamilton Inlet-Lake Melville region; a simple list, with records of occurrence, of seventy-three species known from Labrador; a chronological bibliography and list of collections.

Copy seen: DSI-M.

8524. KENDALL, WILLIAM CONVERSE, 1861- . Report on the fishes collected by Mr. Owen Bryant on a trip to Labrador in the summer of 1908. (U. S. National Museum, Proceedings, 1911. v. 38, p. 503-510, plate 30)

Annotated list of fourteen species, of which twelve were taken from waters off the coast of Labrador, including two species not previously reported from that region. *Copy seen:* DLC.

8525. KENNAN, GEORGE, 1845-1924. A dog-sledge journey in Kamchatka and north-eastern Siberia. (American Geographical Society, N. Y. Journal, 1876 (2d ed.) pub. 1890 v. 8, p. 96-130)

Based on the author's experiences as a member of the four-man exploring party sent out in 1865, by the Western Union Telegraph Co., in preparation for laying a telegraph line across Bering Strait.

Contains a description for the general reader, of the inhabitants, their customs, clothing, dwellings, etc.; the villages, and the physical features of the country from Petropavlovsk northward through Kamchatka to the Chukotsk Peninsula, where the party began work on the line. Includes considerable comment on traveling conditions during the overland sledge trips, on climate, the auroras and the behavior of the natives, during the party's two and a half years of camping and working in the region.

Copy seen: DLC.

8526. KENNAN, GEORGE, 1845-1924. Siberia—the exiles' abode. (American Geographical Society, N. Y. Journal, 1882. v. 14, p. 13-68)

Based on the author's observations while working for the Western Union Telegraph Co., 1865-67, and on statistics from publications of the Russian Geographical Society.

Contains a description (in brief) of the tundra in summer and winter, and a full discussion of the exile system in Russia, with closing remarks on the improbability of the *Jeannette* party's being able to stay alive through a winter season on the tundra. Much of this paper concerns regions of Siberia south of the 62°N. parallel.

Copy seen: DLC.

8527. KENNAN, GEORGE, 1845-1924. Tent life in Siberia, a new account of an old undertaking; adventures among the Koraks and other tribes in Kamchatka and northern Asia. New York and London, G. P. Putnam's Sons, 1910. xix, 482 p. front. (port.) plates, fold. maps.

Revised and enlarged edition, with parts of the text expanded from material not used in the 1870 edition, and with new illustrations including some based on photographs taken by Jochelson and Bogoraz on the Jesup

North Pacific Expedition, 1897-1902; also drawings of utensils, etc. This edition includes account of the author's sledge trip westward from Okhotsk via Yakutsk to Nizhni Novgorod.

Copy seen: DLC; NNS Stef.

8528. KENNAN, GEORGE, 1845-1924. Tent life in Siberia and adventures among the Koraks and other tribes in Kamchatka and northern Asia. New York, Putnam; London, S. Low, Son & Marston, 1870. ix, 425 p. fold. map. Reissued several times before 1910. Also published in Russian translation as: *Stepnaia zhizn' v Sibiri; stranstvovaniia mezhdur korakami i drugimi plemenami Kamchatki i sivernoi Azii*. Sanktpeterburg, Tip. M. Khana, 1871 (252, 2 p.); and in German translation as: *Sibirien!* Berlin, Cronbach, 1890 (ix, 267 p.). In these translations, the text is abridged to eliminate matter considered unessential, or of interest mainly to American readers.

Record of the author's experiences and observations in Kamchatka and the northwesterly neighboring region, 1865-67, while with the Siberian section of the Western Union Telegraph Co. expedition to survey a possible route for connecting the telegraph systems of North America and Europe via Alaska, Bering Strait and north-eastern Asia. Includes account of the journey from Petropavlovsk northward through Kamchatka Peninsula to Anadyrsk, a youthful traveler's impressions of the country traversed, the native and Russian population, the tribes of the Penzhina and Anadyr River regions; notes on Koryak customs, beliefs, language, living conditions and methods of travel, use of dogs and reindeer; the author's sledge trip from Anadyrsk to the Bering Sea coast and return; the survey party's life in Gizhiga and on the trail. Includes remarks on weather, travel facilities, prospects for success of the survey, news from home of abandonment of the project.

Copy seen: DLC (also Russian and German translations); NNS Stef.

8529. KENNEDY, GEORGE CLAYTON, 1919-. The nickel-copper deposits on the west coast of Chichagof Island, southeastern Alaska. Washington, 1944. 5 p. 7 maps (2 fold.), fold. diagr. (U. S. Geological Survey. Min-

eral deposits of Alaska. Short preliminary reports) Mimeographed.

Based on new information obtained by diamond drilling in 1942, and supplementary to W. T. Pecora, *Nickel-copper deposits*, [etc.], 1942.

Notes on concentrated-sulfide deposits on Fleming Island and near the head of Davidson Bay, on their origin and reserves, including (in brief) disseminated-sulfide deposits, in the area between 57°47'–48°N. 136°18'–20°W.

T. 65, vyp. 1, p. 70-95, illus.) *Title tr.:* Geological essay and useful minerals of northwestern part of Lovozero-tundra (Lujavr-Urt).

Contains orographic and geological sketch of northwestern part of Lovozero massif (central Kola Peninsula), and data on petrology of the region; based on works of A. E. Fersman, B. M. Kuplet'skii, O. A. Vorob'eva and other Russian explorers; useful minerals include eudialite and loparite containing rare earths, tantal, niobium and zirconium. Summary in English.

Copy seen: MH-Z.

8593. Khibinskii Apatity. Leningrad, Goskhimtekhnizdat, 1931-34. T. 2-5, 7. illus., tables, maps (incl. fold.) diagrs. *Title tr.:* Khibina apatite.

A series of volumes containing papers on theoretical and practical aspects of apatite-nepheline and related minerals. The series was edited by A. E. Fersman and published under the auspices of the All-Union Chemical Industry Association and later by the Apatite Northern Mining and Chemical Trust. Of the seven volumes presumably published 1931-34, five are analyzed here. In the introduction to v. 7, the editor states that this series will be continued with volumes on Moncha Tundra and Trans-Imandra regions.

Of the 133 papers in the five volumes available, eighty-seven, relating direct-

ly to the Khibina region of Kola Peninsula, are listed here and described in detail under their respective authors' names in this Bibliography; the forty-six other papers on technical problems and industrial utilization of apatite, nepheline etc., not particularly connected with northern regions, are not specifically indicated here.

Contents tr. include: Tom 2. Khibina apatite. 453 p. pub. 1932:

KONDRIKOV, V. I. Present state and development of construction in the Khibina mining region.

SOLOV'YANOV, G. N. Main premises of the development of Khibina industrial construction.

VOL'FKOVICH, S., and others. Processing of Khibina apatite into fertilizers.

CHISTIAKOV, A. I. Development and organization of apatite mining.

BRAND, V. I., and G. F. SMIRNOV. A project for a plant for Khibina apatite concentration, testing the project, and consultations in America.

VORONTSOV, N. N. Construction in Khibina region.

MUNTS, O. P. Khibinogorsk City and its planning.

TIKHOMIROV, A. I. Work conditions in various branches of transportation in Khibina.

IL'IN, A. M. Construction of a branch line from Murmansk railroad to the Khibina mines.

KOBOZEV, P. A. Historical course and main stages of colonization of Kola Peninsula.

OSTROVETSKII, K. L., and G. N. SOLOV'YANOV. Results of a preliminary survey of Kola Peninsula.

STEPANCHENKO, M. K. Utilization of the hydraulic power of the Niva River.

VOVKUCHEVSKII, I. D. The hydraulic power base for a group of chemical plants in Kandalaksha.

RIKHTER, G. O. Geological and morphological characteristics of the Niva River valley.

TIKHOMIROV, I. K. Climate of the Kola Peninsula.

PALLON, L. O. Hydrological investigation of Lake Bol'shoy Vud'yavr.

KROGIUS, F. V. Hydrological investigation of Lake Umb-ozero (Ump'yavr).

FERSMAN, A. E. Investigation of the Khibina apatite region of the Kola Peninsula in the summer of 1930.

VOIN, I. TS. Account of topographic and geodetic work in the region of apatite occurrence.

FIVEG, M. P., and others. Exploration of the Kukisvumchorr and Yukspor lens.

MURZAEV, P. M. Account of the pyrrhotite survey party of the expedition in Khibina.

LABUNTSOV, A. N. Account of geochemical investigations and prospecting of the Takhtarvumchorr region.

KOSTYLEVA, E. Account of the work of the Lovozero survey party.

A study and discussion of the drift of the ice-breaker *Chelĭuskin* and of Camp Shmidt built on an ice floe of Chukchi Sea, 1933-34. Summary in English. *Copy seen:* DLC.

8596. KHMYZNIKOV, PAVEL KONSTANTINOVICH, 1896-. Hidrografogidrologicheskie raboty na "Chelĭuskiĭ". (Sovetskaiĭa Arktika, 1936, no. 4, p. 58-64) *Title tr.*: Hydrographic-hydrological work on the *Chelĭuskin*.

Description of scientific work, 1933-34, on board the *Chelĭuskin* and at Camp Shmidt on the ice floe in Chukchi Sea, by the hydrologist of the expedition. Includes data on ice conditions, temperature-salinity rĕgime, alkalinity, currents, results of soundings, etc., in the Kara, Laptev, East Siberian and Chukchi Seas. *Copy seen:* DLC.

8597. KHMYZNIKOV, PAVEL KONSTANTINOVICH, 1896-. Hidrologiĭa basseĭna reki ĭAny. Leningrad, 1934. 251, 1 p. illus., plates, map, diagra. (Akademiĭa nauk SSSR. Sovet po izuchenĭu proizvoditel'nykh sil. Trudy. Seriĭa ĭakutskaiĭa, vyp. 19) *Title tr.*: Hydrology of the Yana River basin.

Report by the leader of the Yana Hydrological party of the Yakutia Expedition, 1927-29, with a map showing routes followed.

Contents: 1. Morphology and hydrography of Yana River basin.

2. Climatic factors and permafrost (based on rĕgime of meteorological elements at Verkhoyansk and Kazache prior to 1929, and on observations of permafrost depths, soil thaw and freeze there in summer and autumn of 1927).

3. Water level of the river.

4. Water discharge of unfrozen river.

5. Water temperatures.

6. River ice cover.

7. Water discharge of the frozen river.

8. Opening and freezing.

8626. KIAER, HANS, 1865-1931. Om kvartærtidens marine afleiringer ved Tromsø. (Tromsø, Norway. Museum. Årshefter, 1902, pub. 1908. Bd. 25, p. 17-44) **Title tr.:** On the Quaternary marine deposits in the Tromsø region.

Contains discussion and lists of species of molluscs and foraminifera of late glacial times (*Yoldia* and *Arca* clays) found as high as sixty-six meters above sea level; of the post-glacial deposits (shell banks at Tromsø clay beds in Bals Fjord; and fossil shells in the littoral region); and of recent deposits (shells found in calm bays and deep water channels of the fjords, not known as living on the muddy bottom); with a bibliography (27 items). Summary in English, p. 43-44.

Copy seen: DLC; DSI-M.

8627. KIAER, HANS, 1865-1931. Om Tromsøundets fiske. En oversigt over deres udbredelse og biologi. (Tromsø, Norway. Museum. Årshefter, 1904, pub. 1906. Bd. 27, p. 127-69, illus.) **Title tr.:** Fishes of Tromsø Sound. Review of their distribution and biology.

Contains notes on the sound as habitat, its bottom, currents, temperature, etc., annotated list of forty-four species of fishes, and some results of bottom trawls at various depths. Summary in English, p. 166-69.

Copy seen: DLC; DSI-M.

8628. KIAER, HANS, 1865-1931. On the bottom deposits from the Second Norwegian Arctic Expedition in the *Fram*. Kristiania, A. W. Brøgger, 1909. 8 p. (Norske videnskapsakademi, Oslo.

Report of the Second Norwegian Arctic Expedition in the *Fram*, 1898-1902, v. 3, whole series no. 17)

Contains list of stations; description of bottom deposits with foraminifera listed and other content noted; remarks on species of foraminifera.

Copied seen: DLC.

8629. KIAER, HANS, 1865-1931. Thalamophora. Christiania, Grøndahl & Søn, 1899. 2 p. l., 13 [1] 1 l. plate, map, (Den Norske Nordhavs-expedition, 1876-1878. Bd. 7, Zoology, hefte. 4)

A list with four descriptions and notes on distribution, of one hundred sixty-six (including two new) species of Foraminifera in bottom samples from dredgings of the Norwegian and Greenland Seas, with a discussion of the clays in which they were found.

Copied seen: DLC.

8630. KIAER, HANS, 1865-1931. Uebersicht der phytophagen Hymenopteren des arktischen Norwegens. (Tromsø, Norway. Museum. Årshæfter, 1896, pub. 1898. Bd. 19, p. 15-111, plate) *Title tr.:* Review of the sawflies of arctic Norway.

Contains a brief characterization of the region north of the Arctic Circle, with a list of localities; a systematic list, with taxonomic notes and distribution, of one hundred six (including with descriptions, four new) species; a section discussing Norwegian and circumpolar distribution; and a bibliography (73 items).

Copied seen: DSI-M.

KIAER, HANS, 1865-1931, *see also* Friese, H. F. A., & others. Hymenoptera. 1923.

KIAER, HOLGER SVERDRUP, 1856-1928, *see* No. 8314.

8631. KIAER, JOHAN ASCHEHOUG, 1869-1931. A bothriolepis fauna from Arkhangel Bay, Novaya Zemlya. Oslo, 1926. 11, [1] p. 2 plates. (Norske Novaja Semlja ekspedisjon, 1921. Report of the scientific results. No. 32) Published by Det Norske videnskaps-akademi, Oslo (Videnskapsselskapet i Kristiania).

On fossil fish and brachiopod remains from the Middle Devonian.

Copied seen: DLC.

8632. KIAER, JOHAN ASCHEHOUG, 1869-1931. *Ctenaspis* a new genus of Cyathaspidian fishes. A preliminary report. Oslo, J. Dybwad, 1930. 7 p. illus. (Norway. Norges Svalbard- og Ishavsundersøkelser. Skrifter. Nr. 33).

Fossil fish from Spitsbergen's Downtonian Red Bay Series.

Copied seen: DLC.

8633. KIAER, JOHAN ASCHEHOUG, 1869-1931. The Downtonian and Devonian vertebrates of Spitsbergen IV. Suborder *Cyathaspidia*. Oslo, J. Dybwad, 1932. 26 p. illus., 11 plates (Norway. Norges Svalbard- og Ishavsundersøkelser. Skrifter. Nr. 52)

"A preliminary report, ed. by A. Heintz", comprising a taxonomic study of fossil fishes.

Copied seen: DGS.

8634. KIAER, JOHAN ASCHEHOUG, 1869-1931. The lower Silurian at Khabarova. [Christiania (etc.), J. Dybwad, 1904] 16, [2] p. illus., 1 plate. (Nansen, Fridtjof, ed. Norwegian Polar expedition 1893-96. Scientific results. v. 4, no. 12)

Based on the fossil specimens brought back by Nansen from the Yugor Strait region.

Copied seen: DLC.

8635. KIAER, JOHAN ASCHEHOUG, 1869-1931. Upper Devonian fish remains from Ellesmere Land, with remarks on *Drepanaspis*. Kristiania, A. W. Brøgger, 1915. 56 p. illus., 8 plates, map (Norske videnskaps-akademi, Oslo. Report of the Second Norwegian Arctic Expedition in the *Fram* 1898-1902, v. 4, (no. 33))

Descriptions and notes on eight new species and on specimens collected, with discussion of occurrence.

Copied seen: DLC.

8636. KIAER, JOHAN ASCHEHOUG, 1869-1931, and ANATOL HEINTZ. The Downtonian and Devonian vertebrates of Spitsbergen V. Suborder *Cyathaspidia* Pt. I. Tribe *Poraspidae*, Family *Poraspidae* Kiaer. Oslo, J. Dybwad, 1935. 138 p. illus. (incl. map) 40 plates, tables, diagrs. (Norway, Norges Svalbard- og Ishavsundersøkelser. Skrifter, No. 40)

The material on fossil fishes described in this paper was collected by Norwegian expeditions, 1906-1928, exclusively in Red Bay region of northern West Spitsbergen. Bibliography, p. 134-38.

Copied seen: DLC.

8637. KIDD, DESMOND FIFE, 1905- . The Great Bear Lake - Coppermine River district. (Canadian Mining journal, Jan. 1932. v. 53, p. 5-12, 3 sketch maps)

Based on a geological survey by the author, in 1931, a description of general geology and the copper deposits of Coppermine River region and the silver and pitchblende deposits of the Great Bear Lake region.

Copy seen: DGS.

8638. KIDD, DESMOND FIFE, 1905- . Great Bear Lake area, Northwest Territories. (Canada. Geological Survey. Summary report, 1932, *pub.* 1933. Pt. C, p. 1-36, illus., 2 plates, diagrs., fold., col. map)

Contains chapters on general, structural and economic geology of the Echo Bay area, including deposits of silver, uranium, gold, and coal. *Map:* Geological, 296A, Great Bear Lake (McTavish Arm), scale 1:253,440, 65° 30'-66° 50' N. 116° 15'-118° 45' W.

Copy seen: DLC.

8639. KIDD, DESMOND FIFE, 1905- . Great Bear Lake - Coppermine River area. (Canadian mining and metallurgical bulletin, Sept. 1932. No. 245, p. 512-26, illus.)

Contains a report (p. 512-23, with discussion (p. 253-26) on the geological features of the part of Mackenzie District between Labine Point and Hunter Bay and northwest to the head of McTavish Arm, along the Sloan River, and the region north of Dismal Lakes and west of the Coppermine River; description of the rocks and the mineral deposits, including copper, pitchblende and silver.

The general character, topography and climate are discussed in: McDonald, R. C. *Surveys at Great Bear Lake*, 1931, *pub.* 1932, q.v.

Copy seen: DGS.

8640. KIDD, DESMOND FIFE, 1905- . Great Bear Lake-Coppermine River area, Mackenzie District, North West Territories. (Canada. Geological Survey. Summary report, 1931, *pub.* 1932. Pt. C. p. 47-69, illus., plate, fold. map, diagrs.)

Contents: Information on weather conditions, access, travel routes (with map); description of the physical features, general and economic geology (copper, silver, and uranium-radium

of the shore area and islands from Labine Point to the head of McTavish Arm, including a part of Sloan River entering Hunter Bay, Great Bear Lake.

Copy seen: DLC.

8641. KIDD, DESMOND FIFE, 1905- . Pitchblende deposits at Great Bear Lake. (*In:* Ellsworth, H. V. Rare-element minerals of Canada. *Pub.* in Canada. Geological Survey. Economic geology ser., 1932. No. 11, p. 139-46, incl. sketch map)

Description of the rocks, their geology and associated minerals especially silver, and of the claim zones, with analyses of uranium and radium content.

Copy seen: DGS.

8642. KIDD, DESMOND FIFE, 1905- . A pitchblende-silver deposit, Great Bear Lake, Canada. (Economic geology, Mar.-Apr. 1932. v. 27, p. 145-59, illus.)

Description of the deposit at Labine Point, Echo Bay, and the minerals found there, with remarks on general geology.

Copy seen: DGS.

8643. KIDD, DESMOND FIFE, 1905- . Rae to Great Bear Lake, Mackenzie District, N.W.T. Ottawa, King's Printer, 1936. 2 p. l., 44 p. incl. tables. 3 fold. maps (in pocket). (Canada. Geological Survey. Memoir 187)

Description of the physical features (including notes on access and canoe routes), general geology, and economic geology, including copper, pitchblende, silver and gold, with description of properties.

Maps: Geological maps (scale 1:253,440): 331 A, between Rae (on northern Great Slave Lake) and Faber Lake, 62° 45'-64° N., 115° 45'-117° 45' W.; 332A, between Faber Lake and Hottah Lake, 64°-65° N., 117°-119° W.; 332A, between Faber Lake and Hottah Lake, 64°-65° N., 117°-119° W.; 333A, between Hottah Lake and Richardson Island, 65°-65° 45' N., 117°-119° W.

Copy seen: DLC.

8644. KIDD, DESMOND FIFE, 1905- , and M. H. HAYCOCK. Mineragraphy of the ores of Great Bear Lake. (Geological Society of America. Bulletin, June 1935. v. 46 p, 879-959, illus., 16 plates)

Results of a joint study in 1932, of the silver and pitchblende ores from the Eldorado mine, located in the Echo Bay area, at the east end of Great Bear

Lake, Mackenzie District. Includes notes on the general and structural geology and mineralization of the area around Eldorado, and of the mine itself; description (in detail) of the pitchblende, iron, cobalt-nickel, bismuth, copper, silver, manganese, and other minerals in the ores, with discussion of ore genesis.

Copy seen: DGS.

"Report on the main results of a complete treatment of all the observations available from the Greenland seas from about 1880 till today, with special regard to verification of the regular annual variations in the hydrographic conditions near the coastal banks off West Greenland." — Introduction.

Contents: 1. Characteristics of the most important water masses. Cold water. A. East Greenland Current. B. Canadian polar current (Labrador Current). C. Cold water from the winter. Warm water. A. Undercurrent in Greenland Sea. B. Irminger Current. Mixed water.

2. Survey of hydrographic conditions. A. Polar Sea, Greenland Sea, Denmark Strait, and waters around south Greenland. B. Davis Strait, Disko Bay, and Baffin Bay. Depth off West Greenland. Cold and warm water. Velocity of West Greenland current. Tables and discussion of variations of conditions 1883-1938. Bibliography.

Illus., diagrs., etc.: Vertical temperature, salinity and current section. Topography of sea surface. Horizontal current charts for surface, 200 and 500 meters. *Copy seen:* DF.

8652. KIILERICH, ALF BENTHIN, 1902- . Nordland, Severnaya Zemlja; opdagelse og udforskning med særlig henblik paa russisk arbejde i de seneste aar. (Geografisk tidsskrift, København, 1932. Bd. 35, p. 36-53, illus. sketch map) *Title tr.:* Northern land, Severnaya Zemlya; discovery and exploration, with special reference to Russian work during recent years.

Historical account of expeditions along northern Siberian waters, searching for a trade route to China, and for land north of Cape Chelyuskin; the discovery of Severnaya Zemlya by the Russian Hydrographic Expedition of 1913, under Boris Vil'kitskii, and further exploration of the islands sponsored by the Arctic Institute of U.S.S.R. Includes comments on the *Maud* Expedition, 1918, and the Noble (1928) and *Graf Zeppelin* (1931) flights; also de-

scription of the islands. Summary in English. *Copy seen:* DLC.

8653. KIILERICH, ALF BENTHIN, 1902- . Nordvandet; forsøg paa en forklaring af det isfri havområde i Smith sund. (Geografisk tidsskrift, København, 1933. Bd. 36, p. 53-61, diagrs.) *Title tr.:* The northern water; an attempt to explain the ice-free area in Smith Sound.

Discussion, based on observations of the *Godthaab* Expedition in 1928, of a region in Smith Sound remaining free of ice through the winter, and theories in explanation of this phenomenon. Summary in German. *Copy seen:* DLC.

8654. KIILERICH, ALF BENTHIN, 1902- . Ny maaling af Moltkes gletsjer. (Geografisk tidsskrift, København, 1929. Bd. 32, p. 181-82) *Title tr.:* New measurement of Moltke Glacier.

Measurement of the movements of Moltke Glacier, in the Thule region of northwest Greenland, done during the *Godthaab* Expedition, 1928.

Copy seen: DLC.

8655. KIILERICH, ALF BENTHIN, 1902- . On the hydrography of the Greenland Sea. København, C. A. Reitzel, 1945. 63 p. illus. (diagrs., 8 charts) 3 fold. charts. (Meddelelser om Grønland. Bd. 144, nr. 2)

Results of Danish expeditions to East Greenland, 1926-39, under Lauge Koch. Appendix no. 2. Data upon which this paper is based, are derived from the work of seventeen ships.

Contents: Delimitation and exploration of the Greenland and Norwegian Seas. The hydrography: The polar sea (oceanographic sketch). Depths of Greenland Sea (including longitudinal section showing major topography). East Greenland Polar Current. Atlantic undercurrent. Water transport of the currents. Cold deep water in Greenland and Norwegian Seas. Denmark Strait (including a hydrographic section across the northern part). Bibliography (59 items). *Copy seen:* DGS.

(Washington Academy of Sciences, Proceedings, Nov. 1900. v. 2, p. 367-88, 5 plates) Reprinted in 1904 in: Ashmead, W. H., and others. Insects, part I. Harriman Alaska series, v. 8, p. 187-210.

Descriptions of the larvae of nine species of beetles. *Copy seen:* DLC.

8664. KINCAID, TREVOR. The Sphegoidea and Vespoidea. Papers from the Harriman Alaska Expedition. XIV. Entomological results (8). (Washington Academy of Sciences. Proceedings, Dec. 1900. v. 2, p. 507-510) Reprinted in 1904 in: Ashmead, W. H. and others. Insects, part II. Harriman Alaska series. v. 9, p. 107-112.

List, with synonymy and localities, of nine (including, with descriptions, two new) species of wasps from southern and southwestern Alaska.

Copy seen: DLC.

8665. KINCAID, TREVOR. The Tenthredinoidea. Papers from the Harriman Alaska Expedition. VII. Entomological results, 1. (Washington Academy of Sciences. Proceedings, Nov. 1900. v. 2, p. 341-65) Reprinted in 1904 in: Ashmead, W. H., and others. Insects, part II. Harriman Alaska series. v. 9, p. 79-105.

List, with synonymy and localities, of fifty-six (including, with descriptions, thirty new) species of sawflies from southern and southeastern Alaska.

Copy seen: DLC.

8666. KINCER, J. B. Does the formation of abnormally heavy ice in the Bering Sea cause famine in northern Japan? A review. (U. S. Weather Bureau. Monthly weather review, Nov. 1922. v. 50, p. 582-83)

The significance of the effects of the accumulation of ice over the Bering Sea on the temperatures of the "Oyashio" (cold) current and subsequently the summer air temperatures over Japan, is considered. *Copy seen:* DLC.

8667. KINDBERG, NILS CONRAD, d. 1910. Enumeratis muscorum (Bryenorum et Sphagnaceorum), qui in Groenlandia, Islandia et Faeroer occurrunt. (Naturhistoriske forening. Videnskabelige meddelelser, 1887, pub. 1888. Aarg. 39, p. 293-304) *Title tr.*: Enumeration of mosses (Bryales and Sphagnales), occurring in Greenland, Iceland and the Faeroes.

Table showing geographic distribution of these mosses in North America, Greenland, Iceland, the Faeroes, West Spitsbergen and Norway.

Copy seen: DLC.

8668. KINDBERG, NILS CONRAD, d. 1910. Novitiet för Sveriges och Norges moss-flora. (Botaniska notiser, 1882, p. 143-47) *Title tr.*: Novelty for Swedish and Norwegian moss-flora.

Contains a list of about seventy-five mosses new to bryological flora of Sweden and Norway, with localities, literary sources and synonymy (in a few cases); includes some arctic species; based chiefly on Lindberg's and Schimper's works.

Copy seen: MH-A.

8669. KINDBERG, NILS CONRAD, d. 1910. En ny mossart från Spetsbergen. (Botaniska notiser, 1892, p. 258-59) *Title tr.*: A new moss species from Spitsbergen.

Contains a Latin description of a new moss, *Timmia arctica* found in West Spitsbergen by Dr. R. Gyllencreutz in 1883, and comparison with related species *T. austriaca* known also from West Spitsbergen, Bear Island and Greenland.

Copy seen: MH-A.

8670. KINDBERG, NILS CONRAD, d. 1910. Om *Grimmia funalis* och närstående arter. (Botaniska notiser, 1882, p. 184-87) *Title tr.*: On *Grimmia funalis* and related species.

Contains descriptions of *Grimmia funalis* and three related species of the same moss genus, including *G. tenera* native to Alten, Finnmark, Norway.

Copy seen: MH-A.

8671. KINDBERG, NILS CONRAD, d. 1910. Om några skandinaviska mossarter. (Botaniska notiser, 1896, p. 189-97) *Title tr.*: On some Scandinavian moss species.

Contains critical notes on twenty-two Scandinavian species of mosses (one new), including five native to Swedish Lapland and northern Norway and data on distribution in other arctic regions (Siberia, Greenland).

Copy seen: MH-A.

8672. KINDLE, EDWARD DARWIN, 1906- . Dezadeash map-area, Yukon (preliminary account). Ottawa, 1947. 1 p. l., [1], 16 p. fold. map. (Canada. Geological Survey. Paper 47-15)

Contains mimeographed notes on routes, previous explorations, and physical features; descriptions of the geological formations, the structural geology, and the gold placer and lode deposits, with a bibliography.

Copy seen: DGS.

8673. KINDLE, EDWARD DARWIN, 1906- . Dezadeash map-area, Yukon (second preliminary account). Ottawa, 1949. 2 p. l., 34 p. fold. map. (Canada. Geological Survey. Paper 49-24)

Based on field work during 1946-48 in a 4,200-square mile area, 60°-61°N. 136°-138°W., lying 39 miles by road west of Whitehorse. Notes on its accessibility by the Alaska Highway, roads, trails, rivers and lakes; on the natural resources, previous explorations, and physical features; and (in more detail) a summary of the general geology, petrology, mineralogy, structural geology, gold placer and lode deposits, (slight) coal deposits, and prospecting possibilities; bibliography (17 items).

Map: Preliminary geological map 49-24A, scale 1:253,440.

Copy seen: CaMAI.

8674. KINDLE, EDWARD DARWIN, 1906-. The Dezadeash area, Yukon. (Western miner, Oct. 1947. v. 20, no. 10, p. 48-50)

Based on field work, during 1946 in the map area between 60°-61°N. 136°-138°W.; description of access by highway, air and water, history of exploration and notes on structural geology and gold deposits; bibliography (18 items). Excerpt from the author's work of the same title, published in 1947 as Canada, Geological Survey, paper 47-15.

Copy seen: DGS.

8675. KINDLE, EDWARD DARWIN, 1906-. Geological reconnaissance along Fort Nelson, Liard, and Beaver Rivers, northeastern British Columbia and southeastern Yukon. Ottawa, 1944. 1 p. l., 19 p. fold. map. (Canada. Geological Survey. Paper 44-16)

Contains a mimeographed report on the physical features, stratigraphy, structure, and oil possibilities, with a bibliography and a preliminary map.

Copy seen: DGS.

8676. KINDLE, EDWARD DARWIN, 1906-. Geological reconnaissance along the Canol Road, from Teslin River to Macmillan Pass, Yukon. 2d ed. Ottawa, 1946. 2 p. l., 29 p. fold. map. (Canada. Geological Survey. Paper 45-21) Second edition, somewhat enlarged and superseding the first edition (not listed in this Bibliography).

Contains a bibliography, mimeographed notes on access, history of exploration; description of the topography and glaciation, the rocks and geological formations, the placer and lode deposits, and the mining claims.

Copy seen: DGS.

8677. KINDLE, EDWARD MARTIN, 1869-1940. Arrival and departure of winter conditions in the Mackenzie River basin. (Geographical review, Dec. 1920, v. 10, p. 388-99, illus., sketch map).

Description of conditions during each of four seasons, and of the break-up of the ice.

Copy seen: DLC.

8678. KINDLE, EDWARD MARTIN, 1869-1940. Canada north of fifty-six degrees. The land of long summer days.

(Canadian field naturalist, Mar. 1928. v. 42, p. 49-86, illus. (1 map) 20 plates (1 map))

The prize-winning essay in a competition on the geography and resources of Canada, north of 56°N. Contains descriptions and discussion of the physical features, the people, historical development and future possibilities, of Labrador, northwestern Canada (including Yukon), Arctic Islands; also fisheries, oceanography and marine transportation, and settlement. *Copy seen:* DLC.

8679. KINDLE, EDWARD MARTIN, 1869-1940. Diatomaceous dust on the Bering Sea ice floes. (American journal of science, Aug. 1909. Ser. 4, v. 28, p. 175-79, illus.)

Discussion of the ice conditions in 1908, the dust on the floes, with list of fifteen diatoms, and the affinity of these species to diatoms from the Arctic Ocean and the Pacific.

Copy seen: DLC.

8680. KINDLE, EDWARD MARTIN, 1869-1940. The discovery of a Portage fauna in the Mackenzie River valley. (Canada. Geological Survey. Museum bulletin, 1919. No. 29; Geological ser. no. 36, p. 1-8, 2 plates)

Results of a Canadian Geological Survey field trip in 1917, when the Devonian shales on the northeastern bank of the Mackenzie River, opposite Simpson and below it were discovered to hold a Portage fauna. Includes descriptions of eleven (three new) species of fossil molluscs and one new fossil brachiopod, with a correlation with the New York Portage fauna.

Copy seen: CaOG.

8681. KINDLE, EDWARD MARTIN, 1869-1940. The faunal succession in the Port Clarence limestone, Alaska. (American journal of science, Nov. 1911. Ser. 4, v. 32, p. 335-49)

Gives the order of succession and correlation of the several faunas known in the formation (ranging in age from Cambrian to Devonian or Carboniferous) on the Seward Peninsula; with preliminary lists of invertebrate species represented.

Copy seen: DLC.

8682. KINDLE, EDWARD MARTIN, 1869-1940. Geography and geology of Lake Melville district, Labrador Peninsula. Ottawa, King's Printer, 1924. 1 p. l., ii, 105 p. 17 plates (incl. front.)

maps (1 fold.) tables. (Canada. Geological Survey. Memoir 141; Geological series, no. 120)

Contains chapters on history (exploration, with bibliography); geography (topography, drainage, climate, provisional list of land plants of Lake Melville and Hamilton Inlet district, water plants (of fresh, salt and brackish waters), forests, and inhabitants); hydrography (rivers, bays, lakes, intertidal fauna and marine invertebrates, temperature and density of the waters); stratigraphic geology (including terraces, and notes on Goose Bay); economic geology.

Appendix: Meteorological observations, July–Sept., 1921, Carter Basin (approx. 53°29'N., 59°52'W.).

Copy seen: DLC.

8683. KINDLE, EDWARD MARTIN, 1869–1940. Geologic reconnaissance of the Porcupine valley, Alaska. (Geological Society of America. Bulletin, Oct. 1908. v. 19, p. 315–38)

Description of the structure and stratigraphy, and lists of the faunas, based on a field study in 1906 of the valley of this right tributary of the Yukon (at about 66°35'N. 145°28'W.).

Copy seen: DGS.

8684. KINDLE, EDWARD MARTIN, 1869–1940. Geology of a portion of the northern part of Moose River basin, Ontario. (Canada. Geological Survey. Summary report, 1923, pub. 1924. Pt. C 1, p. 21–41, 3 plates)

Contains report on topography, stratigraphic geology, and structure; also a summary of other papers (with bibliographic footnotes) on the economic geology of the James Bay region.

Copy seen: DLC.

8685. KINDLE, EDWARD MARTIN, 1869–1940. Geology of the arctic archipelago and interior plains of Canada. (*In:* Ruedemann, R., and R. Balk, eds. Geology of North America. (Geologie der Erde). Berlin, 1939. v. 1, p. 176–231, illus.)

Contains description of physiography, stratigraphy and structure of the Canadian Arctic Islands, Hudson Bay region, Manitoba lowland, and Mackenzie basin, with bibliographies.

Copy seen: DGS.

8686. KINDLE, EDWARD MARTIN, 1869–1940. The James Bay coastal plain;

notes on a journey. (Geographical review, 1925. v. 15, p. 226–36, illus.)

A description of the topography and climate of the Ontario section of James Bay region.

Copy seen: DLC.

8687. KINDLE, EDWARD MARTIN, 1869–1940. The Labrador environment. (Canadian magazine, Dec. 1924. v. 63, p. 471–77, illus.)

Popular, and very general description of the peninsula, especially the Hamilton Inlet region, its physiography, climate, vegetation and natives.

Copy seen: DLC.

8688. KINDLE, EDWARD MARTIN, 1869–1940. Mackenzie River driftwood. (Geographical review, Jan. 1921, v. 11, p. 50–53, illus.)

The author believes that the Mackenzie contributes much driftwood to the arctic coast, and discusses here the occurrence, action and sources of such driftwood in and along the river.

Copy seen: DLC.

8689. KINDLE, EDWARD MARTIN, 1869–1940. The Mackenzie River oil region. (Canadian mining and metallurgical bulletin, Apr. 1921. No. 108, p. 306–311)

Brief general notes on river transportation, climate, physical geography, and geology.

Copy seen: DGS.

8690. KINDLE, EDWARD MARTIN, 1869–1940. Note on a mammoth tusk from the arctic archipelago. (American journal of science, Aug. 1924, Ser. 5, v. 8, p. 183–85, illus.)

Description of a fragment collected by the Canadian Arctic Expedition in 1913–18, on Banks Island, with notes on other specimens from Alaska.

Copy seen: DLC.

8691. KINDLE, EDWARD MARTIN, 1869–1940. A note on the migration of the Barren Ground caribou. (Canadian field naturalist, Dec. 1917. v. 31, p. 107–09)

A letter to the author concerning the caribou east of Great Slave Lake in winter 1917, and remarks on the migrations in general.

Copy seen: DLC.

8692. KINDLE, EDWARD MARTIN, 1869–1940. Notes on Devonian faunas of the Mackenzie River valley. (American journal of science, Sep. 1916. Ser. 4, p. 42, p. 246–48)

Notes on a fossil coral from Gull Lake (within seventy miles of the arctic coast) placing the Devonian much farther north than previously known. Includes lists of invertebrate fossils from thirty miles northwest of Hope and from south shore of Great Slave Lake.

Copy seen: DLC.

8693. KINDLE, EDWARD MARTIN, 1869-1940. Notes on sedimentation in the Mackenzie River basin. (Journal of geology, May-June 1918. v. 26, p. 341-60, illus.)

Results of field work in summer 1917, on Slave River; Great Slave Lake and upper Mackenzie River. Includes a description of the material of the valley floors, relative turbidity, work of the rivers (and the ice of the Mackenzie River) and lake filling.

Copy seen: DGS.

8694. KINDLE, EDWARD MARTIN, 1869-1940. Notes on the forests of southeastern Labrador. (Geographical review, Jan. 1922. v. 12, p. 57-71, illus., sketch map) Also published (without illus. and map) in *Canadian forestry magazine* (later called *Forest and out-doors*) June-July, 1922. v. 18, p. 830-31, 902-904.

Observations from a journey in 1921, in the region of Lake Melville and Hamilton River, with references to information in other publications, and remarks on the natives of the area.

Copy seen: DLC.

8695. KINDLE, EDWARD MARTIN, 1869-1940. Notes on the Paleozoic faunas and stratigraphy of southeastern Alaska. (Journal of geology, May-June 1907. v. 15, p. 314-37, illus.)

Remarks on the stratigraphic succession and discussion (with lists) of the invertebrate fauna (largely Brachiopoda) found at various places along the coast and in the Alexander Archipelago.

Copy seen: DGS.

8696. KINDLE, EDWARD MARTIN, 1869-1940. Notes on the Point Hope spit, Alaska. (Journal of geology, Feb.-Mar. 1909. v. 17, p. 178-89, illus.)

Description of the spit (about 68°20' N. 166°45' W.) and a discussion of the marine agents involved in building and shaping it and the northern coast of Alaska (waves, tides, currents, and the pack ice).

Copy seen: DGS.

8697. KINDLE, EDWARD MARTIN, 1869-1940. Observations on ice-borne sediments by the Canadian and other arctic expeditions. (American journal of science, Apr. 1924. Ser. 5, v. 7, p. 251-86, illus.)

Notes on the "tundra climate" prevailing in the North American Arctic, on wind transportation of sediment to sea ice, difference in the melting of sea and fresh-water ice, on floe and berg ice (including its occurrence, behavior and geologic work), life on sea ice.

Copy seen: DLC.

8698. KINDLE, EDWARD MARTIN, 1869-1940. Occurrence of the Silurian fauna in western America. (American journal of science, Feb. 1908. Ser. 4, v. 25, p. 125-29)

Includes lists of invertebrate fossils from the lower ramparts of the Porcupine River, and from Kuiv Island, southeastern Alaska.

Copy seen: DLC.

8699. KINDLE, EDWARD MARTIN, 1869-1940. Range and distribution of certain types of Canadian Pleistocene concretions. (Geological Society of America. Bulletin, Sept. 1923, v. 34, 609-648, 8 plates)

Includes description of Labrador concretions in the clays of Red River, about twenty-five miles northeast of Grand Lake, in the Lake Melville district of Labrador.

Copy seen: DGS.

8700. KINDLE, EDWARD MARTIN, 1869-1940. The section at Cape Thompson, Alaska. (American journal of science, Dec. 1909. Ser. 4, v. 28, p. 520-28)

Description of the formations, lists of fossil plants and invertebrates, and discussion of the age of the beds.

Copy seen: DLC.

8701. KINDLE, EDWARD MARTIN, 1869-1940. The terraces of the Lake Melville district, Labrador. (Geographical review, Oct. 1924. v. 14, p. 597-602, illus.)

Part of a study published in full as Kindle, E. M., *The geography and geology of the Lake Melville district, Labrador Peninsula*, 1924, q.v. This part contains discussion of the formation of the terraces and description of their occurrences around the lake, its rivers, and the Backway portion of the lake.

Copy seen: DLC.

8702. KINDLE, EDWARD MARTIN, 1869-1940. Unusual type of sandbar. (Pan-American geologist, Feb. 1923. v. 39, p. 15-16, plate)

In Red (now called Red Wine) River, a branch (at 53°35'N. 61°W.) of the Nascaupi River, Labrador.

Copy seen: DGS.

KINDLE, EDWARD MARTIN, 1869-1940, *see also* Brooks, A. H., & E. M. Kindle. Paleozoic & associated rocks upper Yukon. 1908.

8703. KING, ALEXANDER, and J. N. JENNINGS. The Imperial College Expedition to Jan Mayen Island. (Geographical journal, Aug. 1939. v. 94, p. 115-34, illus. (sketch map), 4 plates (part fold.) fold. map)

This first expedition to be financed and sent out by the University of London, was carried out under the author's leadership during July-Aug. 1938. He gives here notes on the history of Jan Mayen and a table showing fox-hunting parties, 1906-27, and their results; an account of the 1938 expedition, the ascent of Haakon and Hakluyt Peaks on Beerenburg, a circuit of the mountain, and brief summary of the scientific work in surveying, glaciology, geology, botany, ornithology, marine biology, and cosmic radiation.

Appendices: 1. New place-names on Jan Mayen and corrections to the map (including huts on Jan Mayen).

2. JENNINGS, J. N. The glaciers of Jan Mayen. (This paper appears in this Bibliography under its author's name).

Copy seen: DLC.

KING, ALEXANDER, *see also* Russell, R. S., & others. Physiological & ecological studies. 1940.

8704. KING, RICHARD, 1811?-1876. Containing the temperature of animals, birds, fish, trees, and earth at different times and places. (*In:* Back, Sir G. Narrative of the Arctic Land Expedition, 1836. Appendix 6. p. 590-94) Also published as *Temperature of quadrupeds, birds* [etc.] in Edinburgh new philosophical journal, July 1836. v. 21, p. 150-51, table.

Table listing temperatures measured inside specified types of animals, trees and ground under given meteorological conditions, at Great Slave Lake and the arctic estuary of Back River.

Copy seen: DLC.

8705. KING, RICHARD, 1811?-1876. The Franklin Expedition. To his Grace the Duke of Newcastle; a letter of appeal. London, J. Churchill, 1860. 4 p. l., [4]-112, [6] p. incl. 2 maps.

A plea from Dr. King for further search for the Franklin party; with newspaper articles of 1859-60 on the history of the search to that date.

Copy seen: NNSf.

8706. KING, RICHARD, 1811?-1876. The Franklin Expedition from first to last. London, J. Churchill, 1855. xxxviii, [3]-224 p. front., plates, 3 maps.

Correspondence between the author and the British Admiralty and Colonial Office, regarding Dr. King's offers to aid, and his views on, the search for the lost Franklin party; with other letters and newspaper articles, and with excerpts from King's earlier account (1836) of his trip down the Fish (Back) River. Includes considerable comment on the geography, importance of the Back River route to find Franklin, conditions of travel in the region, and on the activities of those (in northern Canada and in London) involved in the Franklin search.

Copy seen: DLC; NNSf.

8707. KING, RICHARD, 1811?-1876. The industrial arts of the Esquimaux. (Edinburgh new philosophical journal, Jan. 1847. v. 42, p. 112-35)

Description of the highly developed manual skill of the Eskimos, especially as represented in their dwellings, and (more briefly) their clothing, weapons, sledges, boats, etc. *Copy seen:* DLC.

8708. KING, RICHARD, 1811?-1876. Narrative of a journey to the shores of the Arctic Ocean, in 1833, 1834, and 1835, under the command of Capt. Back, R.N. London, R. Bentley, 1836. 2 v.: xv, 1, 312; viii, 321 p., 2 fronts., 2 plates incl. map.

King, surgeon and naturalist of the Back expedition that descended the Back River to the arctic coast of Canada, includes much material similar to that contained in Sir George Back's *Narrative of the Arctic Land Expedition*, 1836, q.v., with additional detail on birds, mammals, and fishes, especially as observed near Fort Reliance, and with brief narrative of trip from Lake Winnipeg to York Factory on Hudson Bay on return trip to England.

Includes notes on character, habits, and economic aspects of whitefish (v. 1, p. 144-46), caribou (v. 1, p. 149-56), moose (v. 1, p. 194-98), bears (v. 2, p. 152-77), marmots (v. 2, p. 232-48), beavers (v. 2, p. 249-63), and birds (v. 2, p. 270-84); descriptions of physical geography of areas traversed; notes on the Chipewyan Indians: hunting and fishing methods, food shortage in winter (v. 1, p. 100-176), manufacture of snowshoes and sledges (v. 1, p. 181-84), influence of Hudson's Bay Co. on their welfare (v. 2, p. 49-64), and creation myths (v. 2, p. 109-112); discussion of types of clothing needed for warmth (v. 1, p. 198-201); description of the aurora borealis (v. 2, p. 90-105); and presentation of arguments in favor of the author's proposal for a new land expedition to the Arctic via rivers and lakes reported to lead northeastward from Lake Athabaska (v. 2, p. 285-321).

Map sketches water bodies reported by Indians northeast of Lake Athabaska and shows King's proposed route.

Copy seen: DLC.

8709. KING, RICHARD, 1811?-1876. On the industrial arts of the Esquimaux. (Ethnological Society of London. Journal, 1848. v. 1, p. 277-300)

A description, based upon the arctic literature, of the material culture of the Eskimos. Some mention is made of regional divergencies in culture traits.

Copy seen: DLC.

8710. KING, RICHARD, 1811?-1876. On the intellectual character of the Esquimaux. (Ethnological Society of London. Journal, 1848. v. 1, p. 127-53)

An essay designed to disprove claims that people of the North, and in particular Eskimos, are intellectually and morally inferior. Adduces evidence in the form of statements from the arctic literature dealing with such subjects as honesty, intelligence, friendliness, and the position of women among the Eskimos.

Copy seen: DLC.

8711. KING, RICHARD, 1811?-1876. Polar sea expeditions and polar land journeys. [London, 1844-45] 11 p. map.

Three letters to Sir John Barrow as Secretary to British Admiralty, dated London Dec. 21, 1844, Jan. 8, 1845, and Jan. 31, 1845, respectively. They give King's analysis of English expeditions' unsuccessful attempts to discover a

Northwest Passage; with remarks on the Canadian Arctic Islands, the currents of their waters, and the need for land expeditions; also plan for the latter to explore northern coast of Canada.

Copy seen: DLC (Physical pamphlets, v. 25, no. 14)

8723. KIREEV, I. A. Nekotorye geologicheskie geomorfologicheskie pokazateli v dele gidrograficheskogo izucheniia Karskogo moriia. (Severnii morskoi put', 1940. No. 15, p. 25-35, illus., map) **Title tr.:** Some geological and geomorphological evidence from the hydrological study of Kara Sea.

A short geological description of several Kara Sea islands (based on observations made by S. V. Kalesnik, during the voyage of the ice-breaker *Malygin*, 1937), given as indications of the general geological structure of the sea bottom.

Copy seen: DLC.

8724. KIREEV, I. A. Obshchee opisanie rabot gidrograficheskoi gruppy. (Leningrad. Vsesoĭuznyi arkticheskii institut. Trudy, 1937. T. 83, p. 7-19, illus. (maps)) **Title tr.:** A general description of work done by the hydrographic group.

A description of work done during the Arctic Institute of U.S.S.R. expedition on the ice-breaker *Sedov*, 1934; with information on surveying the islands Vize and Uyedineniya in Kara Sea.

Copy seen: DLC.

8725. KIREEV, I. A. Povedenie magnitnogo kompasa v vysokikh shirotakh. (Po nablūdeniiaim v ėkspeditšii na l/p "Malygin" v 1937 godu). (Severnii morskoi put', 1940. No. 16, p. 5-34, diagrs.) **Title tr.:** Behavior of the magnetic compass in high latitudes (from observations by the expedition on the ice-breaker *Malygin* in 1937).

A discussion of magnetic compass deviations, their irregularities, with data in tabular and diagrammatic form.

Copy seen: DLC.

8726. KIREEV, I. A. Schislenie pri gidrograficheskikh rabotakh v Arktike. (Severnii morskoi put', 1937. No. 6, p. 53-80, maps, diagr.) **Title tr.:** Dead reckoning in connection with the hydrographical work in the Arctic.

A discussion of difficulties, peculiar to the Arctic, in establishing exact geographic locations; with some tables and examples for corrective calculations in establishing the exact coordinates, and (as an illustration) remarks on the discrepancies in the location given for Uyedineniya Island. Summary in English.

Copy seen: DLC.

8727. KIREEV, I. A. Vetrovoi dreif ledokol'nogo parokhoda "Sedov" pri plavanii v razrezhennoi l'du. (Severnii morskoi put', 1936. No. 4, p. 5-35, diagrs.) **Title tr.:** Winddrift of the ice-breaker "Sedov" while navigating sparse ice.

Analytical calculation of the wind-drift factors during the voyage of the ice-breaker *Sedov*, 1934, the wind's influence on the ship (1) when under power, and (2) with engines stopped. Summary in English.

8728. KIREEV, I. A., editor. Vostochno-Sibirskoe i Chukotskoe moriia, Beringov proliv i Beringovo more. Leningrad, Red.-izd. otd. TSUEGMS, 1936. 179, [1] p. maps (part fold) tables. (International Polar Year. 2d, 1932-1933. Gidrologicheskie nablūdeniia morskikh ėkspeditšii 2-go MPG. Vyp. 6-7) **Title tr.:** East-Siberian and Chukchee Sea, Bering Strait, and Bering Sea. (Hydrological observations of the Second International Polar Year Sea Expeditions in 1932-1933, v. 6-7)

Seven reports (p. 5-35) with maps on ice conditions observed from various Russian ships in this region; and tabular data (p. 60-180) giving results of

oceanographic work carried on from the same (and a few other) vessels. Included in the volume is a folded map showing locations of the Second International Polar Year hydrological stations in these waters. **Contents tr.:**

EVGENOV, N. I. State of ice in the East-Siberian Sea in 1932-33.

PROTOPOPOV, I. State of ice in the East-Siberian Sea in 1932.

RATMANOV, G. E. State of ice in the Bering Strait and Chukchi Sea in 1932.

RATMANOV, G. E. State of ice in the Chukchi Sea in 1933.

EVGENOV, N. I. State of ice in the Bering Strait and Chukchi Sea in 1932-33 on the way to the mouth of River Kolyma.

PROTOPOPOV, I. D. State of ice in the Chukchi Sea and in the Bering Strait in 1932.

GRUM-GRZHIMAILO, M. M. State of ice in the Bering Strait and Chukchi Sea in 1932.

INTERNATIONAL POLAR YEAR. 2d, 1932-33. Gidrologicheskie nablüdeniia morskikh ekspeditiï 2-go MPG. Tablitsy.

Each paper appears in this bibliography under its author's name. Summary in English (p. 36-59).

8729. KIREEVA, M. S., and T. F. SHCHAPOVA. Otchet o statSIONarnykh rabotakh po izucheniiu iodynykh vodoroslei, proizvedennykh otdelom donnykh vodoroslei Gosudarstvennogo okeanograficheskogo instituta v 1931 g. (Gosudarstvennyi okeanograficheskii institut. Moskva. Trudy, 1933. T. 3, vyp. 3, p. 29-49, illus. (maps), tables, diagrs.) **Title tr.:** Report on stationary work in the study of iodine-bearing algae undertaken by the Department of Bottom Algae of the State Oceanographic Institute in 1931.

A study of the rate of growth and the speed of reproduction of iodine-bearing algae, made at Kola Bay and off Kildin Island in Barents Sea. Summary in English. **Copy seen:** DLC.

8730. KIREEVA, M. S., and T. F. SHCHAPOVA. Temp rosta, vozrast i sporonoshenie *Laminaria saccharina* i *Laminaria digitata* Kol'skogo zaliva. (Moskva. Vsesoiuznyi nauchno-issledovatel'skii institut morskogo rybnogo khoziaistva i okeanografii. Trudy, 1938.

T. 7, p. 29-58, map, diagrs.) **Title tr.:** Rates of growth, age and spore-bearing of *Laminaria saccharina* and *L. digitata* in Kola Fjord.

Results of field studies made for the Moscow Oceanographic Institute in 1931 in Kola Bay, Barents Sea, containing information on the reproduction and growth of these algae with some discussion of factors influencing the processes. Bibliography (25 items). Summary in English.

Copy seen: DLC.

8731. KIRICHENKO, ALEKSANDR NIKOLAEVICH, 1884-. Poluzhestkokrylyia (Hemiptera-Heteroptera). Petrograd, 1916. 11 p. illus. (Ekspeditiia brat'ev Kuznetsovykh na poliarnyi Ural, 1909. Resultats scientifiques. Livr. 19, Pub. as: Akademiia nauk SSSR. Memoires. Ser. 8, classe physico-mathematique, vol. 28, no. 19) **Title tr.:** The true bugs (Hemiptera-Heteroptera). (Scientific results of the Expedition of the Kuznetsov Brothers to the Arctic Ural, 1909).

A systematic list, with references, localities, of eighteen species of true bugs collected by the Kuznetsov Expedition, followed by discussion of the distribution of the bugs, with brief list of species found by others elsewhere in the Arctic, (forty-three in all). Selected bibliography (7 items) and bibliographical footnotes.

8735. KIRK, EDWIN, 1884-. *Bathmopterus*, a new fossil gasteropod genus from the Silurian of Alaska. (*In*: U. S. National Museum. Proceedings, 1929. v. 74, art. 18. 4 p., plate)

Description of a new species based on specimens from Willoughby Island, Glacier Bay, southeastern Alaska.

Copy seen: DLC.

8736. KIRK, EDWIN, 1884-. *Brooksina*, a new pentameroid genus from Upper Silurian of southeastern Alaska. (*In*: U. S. National Museum. Proceedings, 1922. v. 60, art. 19. 8 p., plate)

Full description of a new genus and type species of fossil brachiopod, with some discussion of its faunal affinities, and of the horizon in which the numerous specimens were found (on Kosciusko and Heceta Islands).

Copy seen: DLC.

8737. KIRK, EDWIN, 1884-. *Cymbidium*, a new genus of Silurian pen-

tameroid brachiopods from Alaska. (*In*: U. S. National Museum. Proceedings, 1927. v. 69, art. 23. 5 p., plate)

Discussion of the faunal sequence in southeastern Alaska, and descriptions of the new genus represented by two species of which specimens were collected by the author on Kosciusko Island. *Copy seen*: DLC.

8738. KIRK, EDWIN, 1884-. *Harpidium*, a new pentameroid brachiopod genus from southeastern Alaska. (*In*: U. S. National Museum. Proceedings, 1925, pub. 1926. v. 66, art. 32. 7 p., 2 plates)

Descriptions of three species of this new brachiopod found in the limestone series (on Heceta and Kosciusko Islands, southeastern Alaska) characterized by another new brachiopod described in the author's *Brooksina*, 1922, q.v. *Copy seen*: DLC.

8739. KIRK, EDWIN, 1884-. Notes on an early collection of Paleozoic fossils from Ellesmereland. (*American journal of science*, Nov. 1925. Ser. 5, v. 10, p. 445-47)

Notes on the possible age of four Ordovician and six Devonian invertebrates collected by Dr. Hayes on the west shore of Kennedy Channel, and described by F. B. Meek in 1865.

Copy seen: DLC.

8739A. KIRK, EDWIN, 1884-. Ordovician, Silurian, and Devonian of Alaska. (*In*: Paleontological Society. Symposium on arctic and sub-arctic geology and paleontology, 1928. *Pub. in*: Geological Society of America. Bulletin, Mar. 1929. v. 40, p. 227-29) Abstract of a paper read before the Paleontological Society, Dec. 1928.

Description in brief of stratigraphic units represented and comparison of them in Seward Peninsula, the Yukon-Porcupine area, and in southeastern Alaska, with discussion of Paleozoic geography of the northeastern Pacific Ocean. *Copy seen*: DGS.

8740. KIRK, EDWIN, 1884-. *Pycnodesma*, a new molluscan genus from the Silurian of Alaska. Washington, U. S. Govt. Print. Off., 1927. 9 p. 2 plates. (U. S. National Museum. Proceedings. v. 71, article 20)

Descriptions of *Pycnodesma giganteum* and *P. benjamini*, n. g. and n. spp. from the "uppermost stratigraphic

unit of the Silurian in Southeast Alaska", sediments occurring also on Seward Peninsula and "probably in the upper Yukon Valley in the Fairbanks region".
Copy seen: DLC.

8741. KIRK, ROBERT C. Twelve months in Klondike. London, W. Heinemann, 1899. xii, 273 p. illus., 24 plates, incl. map., port.

Story of the Klondike Gold Rush, 1897, with description of the White and Chilkoot Pass trails, of Dawson, the gold fields, dogs and other means of transportation, the Indians, hunting, fishing, and geographic features.

Copy seen: DLC; NNStef.

8742. KIRKPATRICK, R. Notes on the tunicata *Rhizomolgula globularis* Pallas. Results of the Oxford University Expedition to Spitsbergen, 1921, no. 24. (Zoological Society of London. Proceedings, Apr. 1923. p. 155-57, plate) Issued also as Oxford University, *Spitsbergen papers*, 1925. v. 1, no. 14.

Contains description, and discussion of distribution, of a species (twenty-six specimens) collected at Klaas Billen Bay, just above low-tide mark.

Copy seen: DLC.

8743. KIRKPATRICK, R., and A. K. TOTTON. Appendix. Polyzoa, Tunicata, Hydroida. (In: Oxford University. *Spitsbergen papers*, 1925. v. 1, no. 33, 2 p.) Results of Oxford University Expedition to Spitsbergen, 1921.

Contents: Kirkpatrick, R. Polyzoa (list with locations, of sixteen species of bryozoans). Tunicata (four species from Bear Island).

Totton, A. K. Hydroida (list, with habitats and locations, of four species).

Localities listed include Walrus Bay on Bear Island, Richard Lagoon and Freshwater Bay, Prince Charles Foreland, and head of Klaas Billen Bay.

8747. KIRSCHNER, CHARLES E. 1920-. The geology and petroleum possibilities of the Iniskin Peninsula, Alaska. Washington, 1948. 27 l. 2 fold. diagrs., fold. map. (U. S. Geological Survey. Reports; open file series. No. 8) Typescript.

Contains note on development of petroleum in the area 59°35'-50'N. 153°-153°25'W. (on west side of Cook Inlet), description of its stratigraphy, intrusive rocks, structure, petroleum source rocks, reservoir beds and accumulation.

Copy seen: DGS.

8748. KIRSCHNER, CHARLES E. 1920-, and D. L. MINARD. Geology of the Iniskin Peninsula, Alaska. Washington, 1949. Map with text. (U. S. Geological Survey. Oil and gas investigations; preliminary map no. 95)

Based on the author's field work. May-Sept. 1946, in an area on the west side of Cook Inlet, about 59°39' to 50'N. 153° to 153°25'W., and on previously

published literature. Contains text on stratigraphy, structure, petroleum development and possibilities, and geologic map, scale about 1:50,000 with columnar and cross sections (in detail).

Copy seen: DGS.

8749. KISELEV, IVAN ALEKSANDROVICH, 1888- . Fitoplankton Belogo moriâ. (Issledovaniâ morei SSSR, 1925. Vyp. 2, p. 1-43, illus. 3 plates, map) **Title tr.:** Phytoplankton of the White Sea.

Contains historical data on the exploration of the microflora of the White Sea, an ecological study of plant associations, a comparison of phytoplankton of the White Sea and a systematic enumeration of one hundred forty-seven forms, including some new ones; based on material collected from thirty-nine stations by the White Sea expedition of Prof. K. M. Deriugin in 1922-23; bibliographical references in footnotes. Summary in German.

8762. KITCHENER, L. D. The fighting "earth movers." (Alaska life, July 1944. v. 7, no. 7, p. 3-16, incl. 6 p. of illus.)

General account of work done by U.S. Army Engineers building air bases, roads, and railroad beds in Alaska and the Aleutian Islands during World War II.

Copy seen: DLC.

8763. KITTL, ERNST. Die Triasfossilien vom Heureka Sund. Kristiania. A. W. Brøgger, 1907. 44 p. 3 plates. (Norske videnskaps-akademi, Oslo. Report of the Second Norwegian Arctic Expedition in the *Fram*, 1898-1902, v. 2, whole series, no. 7) **Title tr.:** Triassic fossils from Eureka Sound.

Descriptions of the beds, and list, with references to literature, localities and descriptions, of thirty (including

one new) species collected on southwest Ellesmere Island and small adjacent islands. *Copy seen:* DLC.

8764. KITTLITZ, FRIEDRICH HEINRICH, Freiherr von, 1799-1874. *Denkwürdigkeiten einer Reise nach dem russischen Amerika, nach Mikronesien und durch Kamtschatka.* Gotha, J. Perthes, 1858. 2 v.: xvi, 383 p.; 2 l., 463 p. fronts., illus., 4 plates. *Title tr.:* Reminiscences of a journey to Russian America, Micronesia and through Kamchatka.

The author was ornithologist of the Litke round-the-world voyage, 1826-29, in the *Seniavin*. During the summer of 1827 the vessel visited Sitka, cruised west to the Aleutian Islands, the seal islands, St. Matthew and Commander Islands, finally reaching Petropavlovsk-Kamchatskiy, where it remained Sept.-Oct., 1827. In June 1828 they again visited Kamchatka, where the author traveled extensively until November in the mountains and along the rivers of the south central region. His reminiscences include descriptions of the marine fauna and birds, the vegetation, countryside and peoples of Sitka and Kamchatka. *Copy seen:* DLC; NNStef.

8765. KITTLITZ, FRIEDRICH HEINRICH, Freiherr von, 1799-1874. Twenty-four views of the vegetation of the coasts and islands of the Pacific, with explanatory descriptions taken during the exploring voyage of the Russian corvette "Senjavin" under the command of Capt. Lütke, in the years, 1827, 1828, & 1829. London, Longman, Green, Longman, and Roberts, 1861. x, 68 p. 24 plates. Translated from the German and edited by Berthold Seeman.

Contains an introduction by the translator, and text to explain the plates. Includes (p. 53-65, and plates 17-22) Kamchatka: meadow in the Avacha River district, forest on the upper Kamchatka River, pine and deciduous forests on the central Kamchatka River, woody mountains, and grassy plains in the Bolshaya River district. *Copy seen:* DLC; NNStef.

"Submitted by the American Council as a document of the eighth conference of the IPR to be held in December, 1942." Also published as, *The U. S.-Canadian Northwest*, 1943.

The area of the project covers Alaska, Yukon Territory, adjoining parts of Northwest Territories and Alberta, and that part of British Columbia north of the Canadian National Railway.

This document discusses the problems, international collaboration, and future fields of collaboration in national security, transportation, settlement, industry, agriculture, and trade; gives a statement of the organization and objectives of the planning project; and a brief sketch of geography, resources, and economy of the North Pacific area (Alaska and British Columbia).

Account of method and instruments used in observation of specific gravity, hardness, and other physical characteristics of each layer in the snow-cover, at ten stations throughout Canada, with results for 1947, including

Churchill, Gander, Goose Bay, Moosonee and Whitehorse.

Published also in International Geodetic and Geophysical Union. Association of Scientific Hydrology. Assemblée générale d'Oslo, 1948. Procès-verbaux. T. 2. Travaux de la Commission de la neige et des glaciers, pub. 1950? p. 138-52 (Copy in DGS).

Discussion of "the conditions and features of the snow which determine its properties", and description of "standardized methods and instruments for measuring these characteristics".

Copy seen: CaMAI.

8807. KLEIN, GEORGE J. The snow characteristics of aircraft skis. Ottawa, National Research Council of Canada, 1947. 17 p. illus., diagrs. (Aeronautical report. AR-2; Division of Mechanical Engineering, Report MM-57)

"A large number of measurements of adhesion and sliding resistance were made on approximately half scale model skis of various shapes and surfaced with various materials. The tests were carried out over a large range of temperature and snow conditions and over a large range of unit loading. Highly loaded skis, surfaced with bakelite and having comparatively high aspect ratio and small bow angle are shown to be much superior to present-day skis".—Author's summary.

8809. KLEINSCHMIDT, SAMUEL PETRUS, 1814-1886. Grammatik der grönländischen Sprache, mit theilweisem Einschluss des Labradoridiakts. Berlin, G. Reimer, 1851. x, 182 p.

Title tr.: Grammar of Greenlandic language, with partial inclusion of the Labrador dialect.

Basic reference work by noted linguist. In the foreword, the author states that owing to the slight difference between Labrador and Greenlandic grammar, parts 1-2 may serve as a Labrador Eskimo grammar also. He notes differences in northern and southern West Greenlandic, and linguistic affinity of East Greenland Eskimos with those of northern rather than southern West Greenland.

Contents tr.: Introduction. Pt. 1. Forms of inflection. Pt. 2. Syntax. Pt. 3. Composite words.

Copy seen: DLC; NN; NNStef.

Ser. 5, t. 12, p. 419-69, fold. table) *Title tr.:* A brief survey of the work of the expedition for the scientific study of Murmansk.

On the preparations for, and the course of the exploratory expedition (May 10, 1898-May, 10, 1899), and the first expedition (summer 1899), by the zoologist in charge of the whole enter-

prise. The work consisted of collecting specimens of the marine fauna of Barents Sea in order to determine the quantity and geographical extent of commercially valuable fishes, and other types of fauna, studying the environment from the point of view of ocean temperature, food and breeding. Results are stated briefly. Ocean temperatures at fifty meter intervals (to 250 m.) for 1898-1900 are given.

xii, 1510 p. tables. (Vsesoiuznoe geograficheskoe obshchestvo. Zapiski. T. 42) *Title tr.*: Foundations of the hydrology of the European Arctic Ocean.

Based on the published results of the Russian expedition for scientific and applied investigation on the Murman coast, 1898-1901, on simultaneous investigations of the *Ermak* under Admiral S. O. Makarov, on the author's work, 1891-95, and some subsequent research by the Russian Hydrographic Department in the Barents and White Seas.

Contains a comprehensive presentation of the temperature-salinity relationships, the water layers and masses and their movements, conditioned by currents and submarine topography; the nitrogen and oxygen conditions, transparency and color of the sea water, current measurements and distribution of ice in connection with them; the biological conditions and distribution of fauna, and the geological question of simultaneous formation of different deposits and of geologic climate.

Tables of temperature, salinity, currents and transparency observations appear throughout the text. Summary in German, p. 1401-1510. An abstract was published as the author's *Hydrologische Untersuchungen im Europäischen Eismeer*, 1905, q.v.

8890. KNOTHE, HERBERT, 1898-. Spitzbergen; eine landeskundliche Studie. Gotha, J. Perthes, 1931. 109, [1] p. 8 plates (incl. fold. map, charts, fold. diags.) (Petermanns geographische Mitteilungen; Ergänzungsheft nr. 211) *Title tr.:* Spitsbergen; a geographical study.

Results of the author's observations during the Second Hamburg Spitsbergen Expedition, 1927, and on a study of the published literature.

Contents tr.: 1. Position. 2. Size. 3. Boundaries (the coasts and Northeast

Land). 4. Structure (topography and glaciation, geologic structure).

5. The waters around Spitsbergen. North polar basin, Greenland Sea, Spitsbergen fords, Barents Sea, and ice conditions.

6. The climate. Climatic characteristics at Green Harbour; simultaneous comparative observations from other localities; climatic divisions; and relation to other regions.

7. Morphologic landforms dependent upon climate: structural soils, weathering and soil formation.

8. Vegetation. Ecologic, edaphic, and biotic factors.

9. Animal life. Land mammals, birds and lower forms. Marine mammals, fish and invertebrates. Animal ecology.

10. Man on Spitsbergen. History of exploration; whaling, hunting, mining, trade, and sovereignty.

11. Spitzbergen's landscapes. (Regional descriptions). Bibliography (249 items).

8900. KNUDSEN, MARTIN HANS CHRISTIAN, 1871-. Dr. Thorild Wulff's hydrographical investigations in the waters west of Greenland; report worked out by Martin Knudsen in August 1918. 1923. (*In:* Thule ekspeditionen til Grønlands nordkyst, 2d, 1916-1918. [Beretninger] nr. 3. Pub. in Meddelelser om Grønland, 1927. Bd. 64, p. 89-100, sketch map, diagr.)

Discussion and tables of oceanographic observations made on the west coast of Greenland from Disko Bay to Smith Sound, July-Nov. 1916.

Copy seen: DLC.

8901. KNUDSEN, MARTIN HANS CHRISTIAN, 1871-. Hydrography. (Ingolf-expedition, 1895-1896. [Reports] 1899. v. 1, pt. 1, p. 23-161, incl. tables. 27 plates (26 diagrs.) 7 charts (2 fold.))

The Danish cruiser *Ingolf* made oceanographic investigations in Davis Strait as far north as about 67°30'N., in Denmark Strait to about Angmagssalik, and in Greenland Sea between Iceland and Jan Mayen, during May-Aug. in both years, 1895, 1896. Author gives here discussion of methods; tables of wind, surface and deep-water temperature, salinity, chlorinity, gases (oxygen and nitrogen) and specific gravity; descriptions of hydrographic sections which include the East Greenland Polar Current, the Irminger Current, and the water masses of both straits.

Illus., etc.: vertical temperature-salinity diagrams, surface isohalines and isotherms.

Copy seen: DSI-M.

Account of the French Trans-Greenland Expedition, 1936, by one of its members. Describes the ascent and crossing of the icecap to Basehut, near Angmagssalik in 48 days; with summary of the party's observations on altitudes, temperature, wind, magnetic variation, etc. Includes tables, statistics, route maps.

Copy seen: DLC; NNStef.

8909. KNUTH, EIGIL, Greve, 1903-. Grønlandske billeder. (Grønlandske selskab. Aarsskrift, 1948. p. 61-80, illus.) *Title tr.*: Greenlandic pictures.

Contains a critical review of the work of Aron the Greenlandic painter of Kangeq; notes his woodcuts and water-

colors in the national museums in Copenhagen and Oslo, his illustrations for Dr. Rink's books, and for Lars Møller's Greenlandic newspaper.

Copy seen: NN.

8910. KNUTH, EIGIL, Greve, 1903-. Report on the expedition and on subsequent work at the Mørkefjord station. København, C. A. Reitzel, 1942. 159, [1] p. incl. illus. (incl. plan, 7 sketch maps) port., tables. fold. map. (Meddelelser om Grønland. Bd. 126, nr. 1)

The Danish Northeast Greenland Expedition, 1938-39, sent out by Alf Trolle, Ebbe Munck and Eigil Knuth, in memory of the *Danmark* Expedition of 1906-1908, under the joint leadership of Ebbe Munck and Eigil Knuth, had its headquarters at Mørkefjord, 76°56.1'N. 20°18.2'W. Its program called for research in meteorology, geology, and biology, with geographic exploration.

Contains a detailed account of the scope, plans, finances and organization of the expedition; its personnel, refitting of a ship, the airplane used for ice scouting, the food, clothing and equipment (listed according to use) the dogs and their food.

Description of ice conditions during the voyage; the station and other camps and their equipment, permanent huts constructed.

Sketch of the activities during the wintering, the spring sledge journeys northward to 81°50'N.; detailed lists of equipment for these journeys, and brief reports from them.

List of one hundred fifty-six geographic names proposed by the expedition; and summary of winterings subsequent to the expedition, 1939-40, 1940-41, and 1941-42, by small groups of men.

Map: Northeast Greenland from 76°-83°N. scale 1:2,000,000, with corrections sketched from sledge journey observations.

A second Danish edition was issued in 1914 (same pagination). Also published in German as *Durch die weisse Wüste*, 1919.

Narrative of the Danish Expedition to Queen Louise Land and across northern Greenland, 1912-1913, under J. P. Koch, to make glaciological and meteorological investigations on the inland ice and its border region.

Contains account of the transportation of supplies by motor boat, barge and pack horses from Denmark Harbor (76°45'N.) to Borg Fiord; the wintering in its vicinity near Storstrømmen Glacier; the trip to Queen Louise Land and the horse and sledge journey across Greenland to Prøven (72°45'N.) on the west coast. Includes descriptions of gla-

ciers and the inland ice and the calving of Brede Glacier.

Copy seen: DLC (1913); NNA (1914).

8925. KOCH, JOHAN PETER, 1870-1928. Om fremtidige topografiske arbejder og gletsjermaalinger i Grønland, belyst ved en kritik af dr. M. C. Engells ekspedition i 1902. (Geografisk tidsskrift, 1905-06. København, 1905. Bd. 18, p. 155-64) *Title tr.:* On future topographical works and glacier measurements in Greenland, illustrated through a criticism of Dr. M. C. Engell's expedition, 1902.

Criticism of topographical and glaciological work done in the Jakobshavn Ice Fjord region by the Surveying Expedition to North Greenland, 1902; recommendations on methods to be used in the future.

Engell replied to this criticism in his *Om fremtidige gletsjermaalinger i Grønland*, 1905, q.v.

8928. KOCH, JOHAN PETER, 1870-1928, and A. WEGENER. Wissenschaftliche Ergebnisse der Dänischen Expedition nach Dronning Louises Land und quer über das Inlandeis von Nordgrønland 1912-13 unter Leitung von Hauptmann, J. P. Koch. [København, C. A. Reitzel, 1930.] 2 v. in 1. 676 p. illus., plates (1 fold.) port., maps (part fold.) tables, diagrs. (1 fold.) (Meddelelser om Grønland. Bd. 75) *Title tr.:* Scientific reports of the Danish Expedition to Queen Louise Land and the traverse across North Greenland's inland ice, under the leadership of J. P. Koch.

Report of the Danish Expedition to Queen Louise Land in 1912-1913, under J. P. Koch, to cross the still unexplored central section of Greenland, to winter on the inland ice and make glaciological and climatological investigations.

Pt. 1. *The journey* (p. 11-47). Account of plans and preparations; the trip in the *Godthaab* via Iceland to East Greenland 76°45'N., the wintering at Storstrømmen Glacier and sledge trips

made from there; the pack horse and sledge trip April-July, 1913, across Greenland to 72°45'N. on the west coast; also discussion of the motor boat and barge, the pack horses and their feed, the ski sledges and other equipment used.

Pt. 2. *Geography* (p. 48-101). Description of geodetic instruments; discussion, with tables, of astronomical determination of places and barometric altitude measurements on Queen Louise Land and the inland ice.

Pt. 3. *Glaciology*. A. Discussion of observations made in the eastern border region, including general description of glaciation in Queen Louise Land and of Storstrømmen Glacier; calving; glacier movement; ice temperatures; crevices and blue bands; ablation; physical properties, p. 102-316.

B. Observations of the firn on the inland ice; thickness; formations; intermittent compression; temperature of the firn ice, p. 316-54.

C. Observations of the snow cover on the inland ice; density and texture; transformation of the new snow into firn; ablation and accumulation of the inland ice, p. 354-82.

D. Remarks on glaciological observations in West Greenland, p. 382-91 (and Iceland, p. 391-404).

Pt. 4. *Meteorology*. The instrumentation and its calibration and exposure at Borg (76°41.3'N. 22°25'W.) are discussed, p. 405-441. The results of daily meteorological observations at 0800, 1400 and 2100 hours, and hourly registering of pressure at Borg during the period Oct. 1, 1912-Apr. 19, 1913, are tabulated, p. 442-63. The course of the various meteorological elements during this period are chronicled, and stormy periods are compared with those of previous expeditions at Danmarkshavn in 1906-08, and at Pustevig in 1907-08; the results of meteorological observations made on the journey over inland ice are tabulated and discussed with emphasis placed on temperature and wind conditions (p. 538-82); analyses and photos of various types of snow and ice crystals are presented (p. 582-608); mirage and optical phenomena at Borg have been catalogued and photographed (p. 609-630); polarization of sky light is discussed on basis of polarization measurements made during Feb. 6-Apr. 16, 1913 (p. 631-61); characteristics

of aurora at Borg in 1912-13 are described and photographed, p. 662-76.

8932. KOCH, LAUGE, 1892-. Carboniferous and Triassic stratigraphy of East Greenland. København, C. A. Reitzel, 1931. 99 [1] p. incl. illus., (incl. profiles) plate, tables, 5 col. maps (3 fold.) (Meddelelser om Grønland. Bd. 88, nr. 2)

Summary of previous expeditions' work and results of Koch's mapping and stratigraphic survey (while on the East Greenland Expedition to Christian X's Land, 1930) in the localities: (1) Cape Stosch and vicinity, the Spath Plateau, Mt. Steensby; (2) the southern coast of Clavering Island; (3) Cape Franklin. Bibliography, p. 100.

Maps: topographic and geological maps, sketch maps, etc.

8933. KOCH, LAUGE, 1892-. Contributions to the glaciology of North Greenland. (In: Thule ekspeditionen til

Grønlands nordkyst. 2d, 1916-1918 [Beretninger] nr. 15. *Pub.* in Meddelelser om Grønland, 1928. Bd. 65, p. 181-464, 140 illus., 5 fold. plates, fold. map)

Based on the author's work during the Second Thule Expedition, 1916-1918, and the Jubilee Expedition, 1920-1923. Descriptions of glaciers in the Melville Bay and Cape York regions in Ingfield Land, the glaciers at the head of Independence Fiord and in Peary Land, and description of the great inland ice glaciers on the north coast; (2) comparison between the ice in North Greenland and in Antarctica; (3) remarks on the physical conditions of North Greenland glaciers; (4) history of inland ice journeys with summary of results; also discussion of altitudinal conditions of the inland ice; (5) conclusions and bibliography.

Maps, etc. As the author's topographical maps (1:300,000) of North Greenland, (which this work was designed to accompany as description of the observations on the inland ice and glaciers embodied in the maps) were delayed in publication, this work itself includes in the text numerous sketch maps, drawings and illustrations from photographs, also 5 folded plates of profile sketches and photographs, and a folded map (1:3,500,000) "Altitudinal conditions of the inland ice in North Greenland," with explorers' travel routes indicated.

8938. KOCH, LAUGE, 1892-. The East Greenland ice. København, C. A. Reitzel, 1945. 373 [1] p. illus. (incl. maps) fold. plate (diags.) (Meddelelser om Grønland. Bd. 130, nr. 3)

Based, in part, on the author's experience with various expeditions to East Greenland over a period of twenty-five years, traveling by ship, on sledge, in open water, and through, or over ice. The last "three chapters form the main theme of the paper and deal with the year-to-year, or longer interval variations in the ice in that part of the Arctic around east and southern Greenland and Iceland."—I. I. Schell.

Contents: 1. Ice terminology. Geographical types of ice and their distribution in the Greenland waters; pack ice.

2. Recent ice observations in East Greenland. Fiord and land ice, and land water along the northeast coast; drift ice in the fiords in summer; gla-

ciers of East Greenland from northernmost point to Angmagssalik, and their production of icebergs.

3. The East Greenland ice in the present century. Quantity of ice in the Atlantic, 1898-1938. (Details of melting, of the ice belt, velocity of drift, and observations from Scoresby Sound and Angmagssalik).

4. Statistical treatment of the ice around Iceland and southern Greenland. (Early and recent literature; ice west and east of Cape Farewell).

5. Ice conditions in the past centuries. Ice around Iceland during the last eleven hundred years; in south Greenland in the Middle Ages; the period between the extinction of the Norsemen and development of whaling; the whaling period; Eskimo archeology and climate. Bibliography (163 items).

Reviewed by I. I. Schell in *Arctic*, Sept. 1949, v. 2, p. 120-22.

8939. KOCH, LAUGE, 1892-. Fra Lissabon til Peary Land. [København] C. Eriksen, 1939. 141 p. 8 plates, 3 maps, diagrs.

Account (for general readers) of an expedition under Koch in the Dornier-VL hydroplane *Perssuak* to northeast Greenland in May 1939, to investigate various geographical problems outstanding from past expeditions, and to map Peary Land from the air. Description of the flight from Lisbon to the base at King's Bay, West Spitsbergen, the plane, equipment, personnel, the base ship *Gustav Holm*; a flight to the Greenland coast (about 81°05'N.) on May 10; and (in more detail) the flight, May 15-16, around and over Peary Land (west by Independence Fiord, "Peary Channel," to J. P. Koch Fiord on the west coast, and return eastward by Frederick E. Hyde Fiord on the north coast). Remarks on hitherto unknown geographic details of the region traversed, on the author's (and others') previous work in Greenland, and on previous flights. (This expedition is reported in *Polar record*, July, 1938, No. 16, p. 92-93).

8948. KOCH, LAUGE, 1892-. Nord om Grønland. København, Levin & Munksgaard, 1925. 279 p. 120 illus. fold. map. *Title tr.:* North of Greenland.

A narrative account for the general reader of Danish Bi-centenary Jubilee Expedition to Greenland in 1920-23, of which the official report was published as the author's *Report of the Danish Bicentenary Jubilee Expedition* [etc.], 1927, q.v.

This narrative follows the report closely in content, order, illustrations, etc., including a few more illustrations, omitting the sketch maps. Describes preparations and equipment, the start from Pitoravik (near 78°N.), the journey through Kennedy Channel to Fort Conger in Grant's Land, across the frozen sea, along north coast of Greenland, the re-discovery of Peary Channel, ascent of Academy Glacier; warm days at Navy Cliff; sledge journey around Cape Bridgman and Cape København, across the inland ice to Kraulshavn, northwest Greenland. Includes data on geography, geology, topography, wildlife, the surveying of the northern coastline, temperature, ice and weather conditions, etc.

Copy seen: NN.

8949. KOCH, LAUGE, 1892-. North of Greenland. (Geographical journal, July 1924. v. 64, p. 6-21, 8 plates, map)

An account of the author's sledge journey during the Jubilee Expedition, around the north coast of Greenland in 1921, to survey Peary Land and the coast to the west. Includes description

of the ice conditions in Kennedy and Robeson Channels. *Copy seen:* DLC.

8950. KOCH, LAUGE, 1892-. Note to maps of Melville Bay from Wilcox Point to Cape York and of North Greenland from 81°-83°35'N. 38°-56°W. 1922. (*In:* Thuleexpeditionen til Grønlands nordkyst. 2d, 1916-1918. [Beretninger] nr. 2. *Pub.* in Meddelelser om Grønland, 1927. Bd. 64, p. 77-88, 2 fold. maps)

Account of the surveying of Melville Bay and the north coast of Greenland, with technical remarks by P. A. Heiberg-Jürgensen, and notes to the two maps.

Maps: (1) Melville Bay from Wilcox Point (about 74°30'N. 56°30'W.) to Cape York, (2) North Greenland 81°-83°25'N. and 38°-56°W.; prepared during the Second Thule Expedition by Lauge Koch (scale 1:500,000; heights indicated). *Copy seen:* DLC.

8951. KOCH, LAUGE, 1892-. Et nyt forkastningsområde i Nordvestgrønland. (*Ymer*, 1925. Årg. 45, p. 329-38, maps) *Title tr.:* A new region in northwest Greenland, where faults occur. English translation was published as *A new fault zone in northwest Greenland*, in *American journal of science*, Oct. 1926. Ser. 5, v. 12, p. 301-310, illus.

Description of the stratigraphy, faults and morphology of the Cape York district, based on observations, 1920-23. *Copy seen:* DLC.

8952. KOCH, LAUGE, 1892-. The physiography of North Greenland. (*In:* Greenland. Copenhagen, 1928. v. 1, p. 491-518, illus., 8 sketch maps)

Contents: Orogenetic summary. Composition of the great plateau of sediments. Various faults in Cape York district (north through Inglefield Gulf region and Prudhoe Land). Morphology of Cape York district. Age of faults and comparison with other regions. Caledonian folding. Summary of geological development. Morphological summary. Short description of various regions. Ice cap. Floating glacier ice. Quaternary epoch. Latest phase. *Copy seen:* DLC.

8953. KOCH, LAUGE, 1892-. Preliminary report on the results of the Danish Bicentenary Expedition to North Greenland. (*Geographical journal*, Aug. 1923. v. 62, p. 103-17, 2 sketch maps)

Contains notes on the outfit, brief account of the journeys across North Greenland (with map of routes) remarks on geographical results, a brief history of "Peary Channel", and notes on the nature of Peary Land.

Copy seen: DLC.

8954. KOCH, LAUGE, 1892-. Preliminary report upon the geology of Peary Land, arctic Greenland. (*American journal of science*, Mar. 1923. Ser. 5, v. 5, p. 189-98)

Notes on the stratigraphy, glaciology, and drainage system of ice-free Peary Land, and on the general geology of the region immediately north of Humboldt Glacier, about the 80°N. parallel, based on observations, 1921.

Copy seen: DLC.

8955. KOCH, LAUGE, 1892-. The question of Peary Channel. (*Geographical review*, 1925. v. 15, p. 643-49, maps)

A review of the literature and a discussion of the terrain in relation to Peary's observations and to later exploration, in the region of Independence Fiord where "Peary Channel" was in question. *Copy seen:* DLC.

8956. KOCH, LAUGE, 1892-. Rapport om Jubilæums-ekspeditionen nord om Grønland. (*Geografisk tidsskrift*, 1923-24. Kjøbenhavn, 1924. Bd. 27, p. 114-17) *Title tr.:* Report of the Jubilee Expedition north of Greenland.

Summary account of the expedition's work and trips in the coastal regions and inland, north of Cape York - Independence Fiord, 1920-23.

Copy seen: DLC.

8957. KOCH, LAUGE, 1892-. Remarks on the map of Dusen Fiord. (*In:* Østgrønlandske expedition til Kong Christian den X's land. Preliminary report, no. 6. *Pub.* in Meddelelser om Grønland, 1930. Bd. 74, p. 383-94, map)

Contains an account of Koch's discovery that Dusen Fiord cuts Ymers Island in two, and of his survey; the naming of the northern part Gunnar Andersson Land; previous cartographic work; remarks on geology, topography, glaciology and biology of Ymers Island. *Copy seen:* DLC.

8958. KOCH, LAUGE, 1892-. Report of the Danish Bicentenary Jubilee Expedition north of Greenland, 1920-23. (*In:* Jubilæumsekspeditionen nord om

Grønland, 1920-23. [Berettelser] nr. 1. Pub. in Meddelelser om Grønland, 1927. Bd. 70, p. 1-232, 106 illus., 13 sketch maps)

Report of the Jubilee Expedition around the north of Greenland, 1920-1923, to survey and map western and northern parts of Greenland from Upernavik to Independence Fiord; to make geological surveys, collect fossils, and make glaciological investigations.

Contains description of equipment; a day-to-day record of Koch's journey along the coast, from Upernavik to Independence Fiord (with notes on "Peary Channel", Academy Glacier, Vildt Land, Adam Biering Land, p. 95-125), and return across the icecap to his headquarters on Ingfield Land; also Nygaard's trip to Washington Land to collect botanical specimens, 1920-21; Koch's subsequent trips from his headquarters (at Igdluorssuit about 78°N. 71°W.) along the west coast and on the icecap, 1921-23. Includes remarks on his cartographical, geological and other work, on geographical features, on remains of former expeditions (e.g. Polaris House and Hall) on Ingfield Land, on game, weather conditions, Koch's use of a tractor, etc.

Most of this report (p. 23-231) is a factual record in diary style, Sept. 4, 1920-Mar. 31, 1923. A narrative account for general readers was published also, as the author's *Nord om Grønland*, 1925, q.v. **Copy seen:** DLC.

8959. KOCH, LAUGE, 1892-. Report on the Geological Expedition to East Greenland 1926-1927. 1930. (Meddelelser om Grønland. København, 1930. Bd. 76, p. 225-82, illus. 2 sketch maps)

Narrative of the East Greenland Expedition to King Christian X's Land 1926-1927, to make a geological survey of the coast north of Scoresby Sound. Day-to-day accounts of Koch's sledge journeys from the base in Scoresby Sound to MacKenzie Bay and Denmark Harbor, with descriptions of ice, snow and hunting conditions and geological formations; also brief account of journeys by A. Rosenkrantz and T. M. Harris to the interior of Jameson Land for geological observations.

Copy seen: DLC.

8960. KOCH, LAUGE, 1892-. Some new features in the physiography and geology of Greenland. (Journal of geol-

ogy, Jan.-Feb. 1923. v. 31, p. 42-65, illus.)

Based on the author's investigations in northwestern Greenland, 1916-1922, and on the published results of the expeditions and studies by other people.

Contents: 1. The orography of Greenland. 2. Altitudinal conditions of the inland icecap. 3. The formation of icebergs. 4. The orographic elements; southern and northern gneiss zones, great Paleozoic transgression in northwest Greenland, North Greenland folded chain, great fracture zone on northeast Greenland, and the basalt region. 5. The Greenland fiords. 6. The origin of the depression. Bibliography.

Results of the Second Thule Expedition, 1916-18, which traveled from Upernavik to Cape Washington, near the northernmost point of Greenland.

Contains remarks on historical geology, description of formations and rocks of the regions of Melville Bay, Cape York, Inglefield Land, Humboldt Glacier, Warming Land, Mylius-Ericksen Land, Hall Land, Nyeboe Land, Sherard-Osborn and I. P. Koch Fiords. Includes a bibliography and a geological map. *Copy seen:* DGS.

8963. KOCH, LAUGE, 1892-. Survey of North Greenland. København, C. A. Reitzel, 1940. 364 p. illus., map, and atlas of 21 fold. maps. (Meddelelser om Grønland. Bd. 130, nr. 1)

Deals with the mapping of Greenland north of a line from Etah to Norske Island off Lambert Land (about 79° N.), as carried out by the author on the Second Thule Expedition, 1917, the Bicentenary Jubilee Expedition, 1921-23, the Three-Year Expedition to Christian X's Land, 1931-34, and the Air Expedition to Peary Land, 1938.

Contents: 1. The Smith Sound route and the first journeys along the north coast of Greenland: Franklin search, American Arctic Expedition, 1860, *Polaris* Expedition, 1869-70, Petermann's opinions about the Smith Sound route, British Arctic Expedition, 1874-76, and the U. S. Expedition to Lady Franklin Bay, 1881-84.

2. Robert Edwin Peary. (Details of mapping; résumé of his expeditions).

3. Danish expeditions to East and North Greenland 1906-23: *Danmark* Expedition, 1906-1908, *Alabama* Expedition, 1909-1912, First and Second Thule Expeditions, 1912, 1916-18, and the Bicentenary Jubilee Expedition around North Greenland, 1920-23.

4. Danish expeditions, 1933-38, north of lat. 79°N.: reconnaissance mapping from the air on the Three-Year Expedition, 1931-34; seaplane expedition to Peary Land, 1938; the Peary Channel question.

Maps: "The most important maps of all expeditions to North Greenland, redrawn on the same projection and on a scale of 1:1,000,000, so that a direct comparison of the maps will be possible".

Index was published separately as Koch, L. *Index to the Survey of North Greenland*, 1942, q.v.

Maps resulting from surveys, 1917-23, scale 1:300,000, were published as Koch's *Map of North Greenland*, 1932, q.v.

Copy seen: DLC; DSI-M.

8964. KOCH, LAUGE, 1892-. Two recent journeys on the coast of eastern Greenland. (Geographical journal, Jan. 1928. v. 71, p. 1-15, 8 plates, sketch map)

A paper read before the Royal Geographical Society, Nov. 1927, giving an account of the sledge journeys from Scoresby Sound to Denmark Harbor (Danmark Havn, 76°46'N. 18°45'W.) made by the author, T. M. Harris, and A. Rosenkrantz, during the Danish East Greenland Expedition to King Christian X's Land, 1926-27, and an appendix: Note on the geology of eastern Greenland. Includes discussion, p. 13-15.

Copy seen: DLC.

8965. KOCH, LAUGE, 1892-. Über den Bau Grönlands. (Geologische Rundschau, Apr. 1936. Bd. 27, p. 9-30, illus.) *Title tr.:* On the structure of Greenland. Discussion, with bibliography, p. 29-30.

Copy seen: DGS.

8966. KOCH, LAUGE, 1892-. Um Grönlands Norden. Braunschweig, G. Westermann, [1928] 209 p. 19 plates, fold. map. *Title tr.:* Around the north of Greenland.

German translation of Koch's *Nord om Grønland*, 1925, q.v.

Copy seen: OCL.

8967. KOCH, LAUGE, 1892-. Vi flyver over isbjørnens land. København, C. Erichsen, 1934. 132 p., 1 l. plates (incl. ports.) *Title tr.:* We fly over the land of the polar bear. Reprinted in 1938.

Account, for general readers, of the author's experiences with the Three-Year Expedition to King Christian X's Land, East Greenland, 1931-34. Description of the author's flights, and his sledge trip, 1933-34; cartographic and geological work accomplished; mineralogical investigations in East Greenland, 1932, and practical work begun in 1933; importance of wildlife to the Eskimos; hunting of seal and walrus, etc., flight to the North; meeting with Col. and Mrs. Charles A. Lindbergh. Koch discusses possibility of Greenland being a key point on the route from America to Europe by way of Iceland; reminiscences from previous expeditions, in particular on events between 1931-34; gives data on weather.

Copy seen: DLC; NN (1934 and 1938 editions).

9968. KOCH, LAUGE, 1892-. De videnskabelige resultater af Jubilaeums-ekspeditionen nord om Grønland. Rapport 1: kartografi og geologi. (Geografisk tidsskrift, Kjøbenhavn, 1923-24, pub. 1924. Bd. 27, p. 208-218, illus., sketch maps) *Title tr.*: The scientific results of the Jubilee Expedition north of Greenland. Report 1: Cartography and geology.

Discussion of previous maps of North Greenland and results of Koch's geological investigation of the northern coastal region between Cape York and Independence Fiord, 1920-23.

A condensed English translation was published (under the title *The geology of North Greenland*) in American journal of science, April, 1925. Ser. 5, v. 9, p. 271-85. *Copy seen:* DLC.

9969. KOCH, LAUGE, 1892-. De videnskabelige resultater af Jubilaeums-ekspeditionen nord om Grønland. Rapport II. Glaciologi. (Geografisk tidsskrift, Kjøbenhavn, 1925. Bd. 28, p. 139-52, maps) *Title tr.*: Scientific results of the Jubilee Expedition north of Greenland. Report II. Glaciology.

Discussion of ice conditions along the northwest coast of Greenland, the glaciers, inland ice (especially) and geology in the region traversed by the expedition (from Cape Robertson north and east by Cape Bridgman to Independence Fiord) and return across the inland ice to Inglesfield Land.

8978. KÖHLER, R. Note préliminaire sur les échinides, ophiures et crinoides recueillis en 1898 et 1899 par la Princesse Alice dans les régions arctiques. (Société Zoologique de France. Bulletin, 1901. T. 26, p. 98-103) *Title tr.*: Preliminary note on the echinoids, ophiurioids and crinoids collected, 1898-99, by the Princesse-Alice in arctic regions.

Contains a list, with station numbers, depths, and some notes, of thirty species of echinoderms from the waters off northern Norway and Svalbard.

Copy seen: DSI-M.

8979. KOEHLER, ROBERT A. Port Valdez to Copper River, down Copper River to Prince William Sound, thence to Port Valdez. (In: U. S. Adjutant-General's Office. Military Information Division. Reports of explorations in the Territory of Alaska [etc.], 1898, pub. 1899, p. 421-32) Subreports of a party of the U. S. Military Exploring Expedition in Alaska no. 2, 1898.

Contains narrative of trip from Valdez, over Valdez Glacier in August to Klutina River and Klutina Lake, and by boat down the Copper River past Miles and Childs Glaciers to the coast. Includes geographic description of country around Klutina Lake (called Lake Abercrombie by the party), but emphasized the difficulties of summer travel that resulted in the drowning of one member of the party.

Copy seen: DLC

8980. KOELBEL, CARL. Crustacean, Pycnogoniden und Arachnoideen von Jan Mayen. (In: International Polar Year. 1st, 1882-1883. Österreichische Polarexpedition nach Jan Mayen. Beobachtungs-Ergebnisse, pub. 1886. Bd. 3, Theil 6 E, p. 39-58, 2 plates) *Title tr.*: Crustaceans, pycnogonids, and arachnids from Jan Mayen.

Annotated list, with synonymy and distribution of thirty-four species of crustaceans, six species of sea spiders, and three species of arachnids (including one new spider) collected by Ferdinand Fischer from Jan Mayen and surrounding waters. *Copy seen*: DLC.

8981. KÖNIG, CARL DIETRICH EBERHARD, 1774-1851. Rock specimens. (In: Parry, Sir W. E. Journal of a voyage . . . 1819-20. Supplement to the appendix, 1824, p. cccxvii-ccclvii) Discussion of the petrology of the east coast of Baffin Island and the Canadian Arctic Islands.

Copy seen: DLC.

8982. KÖNIG, HERBERT. Gedanken zur Frage nach der Urheimat der Eskimo. (International Congress of Americanists. 21st, part 2, Göteborg, 1924. Compte-rendu. Göteborg, 1925) *Title tr.*: Thoughts on the question of the original homeland of the Eskimo.

Contains a brief summary of the varied theories of origin of Eskimo culture as advanced by various anthropologists, followed by a discussion of the procedure and criteria necessary for sound results. Includes discussion, by way of illustration of recommended techniques, of house types, "singing duels," and stone carving and their distribution. *Copy seen*: DLC.

8983. KÖNIG, HERBERT. Das Recht der Polarvölker. (Anthropos. Ephemeris, 1927, Bd. 22, p. 690-746; and 1929, Bd. 24, p. 87-143, 621-64) *Title tr.*: Law among the arctic peoples.

Detailed comparative analysis of the legal principles and practices among the aboriginal people of the Arctic, including Eskimos, Aleuts, Kamchadals, Chukchis, Koryaks, Yukaghirs, Tungus, Yakuts, Samoyeds, Ostyaks, and Lapps. Contains discussion of: 1. Social organization.

2. Inter-tribal legal relationships, including delimitation of tribal areas and relationships in war and peace.

3. Criminal law, including punishment and atonement, and the use of the oath.

4. Marriage law, including forms of marriage contract, matrilineal residence, marriage restrictions such as the levirate and polygamy.

5. Property law, including personal, family, and communal property, ownership of whales and other products of the hunt, and debt relationships.

6. Laws of inheritance.

7. Summary of distribution of various legal traits and analysis of cultural relationships indicated thereby.

Bibliography p. 690-95.

Copy seen: DLC.

8984. KÖNIG, HERBERT. Der Rechtsbruch und sein Ausgleich bei den Eskimo. (Anthropos. Ephemeris, 1923-24, Bd. 18-19, p. 484-515, 771-92; and 1925, Bd. 20, p. 276-315, map) *Title tr.*: Law violation and its settlement among the Eskimos.

A study of ethnological jurisprudence, containing (1) introductory discussion of the relation between law, religion, and custom.

2. Detailed definition, classification, and analysis of the types and prevalence of law-breaking among the Eskimos.

3. Description of the agencies and procedures for dealing with crime, including physical duels, singing duels, household justice, and community justice.

Bibliography, Bd. 18-19, p. 488-91.

Map sketches the distribution of Eskimo house forms and types of duels and atonements, from eastern Asia to eastern Greenland. *Copy seen*: DLC.

8985. KÖPPEN, FEDOR PETROVICH, 1831-1908. Geograficheskoe rasprostranenie khvoynykh derev v Evropeiskoi Rossii i na Kavkazie. S prilozheniem, soderzhashchim: Opyt razdeleniia Evropeiskoi Rossii na drevesno-rastitel'nyia oblasti. S. Petersburg, 1885. xx, 634 p. tables, maps, plate. (Akademiia nauk SSSR. Zapiski, T. 50, prilozh. 4) *Title tr.*: Geographical distribution of coniferous trees in European Russia and the Caucasus. With a supplement, containing an essay on the division of European Russia into natural zones of woody vegetation.

Contains detailed data on the geographic distribution of the most im-

portant coniferous trees and shrubs in European Russia, arranged systematically by families and including some species extending to the arctic regions. Appended, p. 523-630, is an attempt at a zone division of woody vegetation and an index of species.

An enlarged German edition of the main part of the work was published as the author's *Geographische Verbreitung der Holzgewächse*, 1888-89, q.v.

Copy seen: NN.

8986. KÖPPEN, FEDOR PETROVICH, 1831-1908. *Geographische Verbreitung der Holzgewächse des Europäischen Russlands und des Kaukasus*. Theil I-II. St. Petersburg, Kais. Akad. d. Wissensch. 1888-89. xxxvi, 668 p.; iv, 592 p. 5 maps. (Beiträge zur Kenntnis des russischen Reiches, 1888. Dritte Folge, Bd. 5; (II) 1889. Dritte Folge, Bd. 6)

This is a German enlarged edition of Köppen, J. P., *Geographisches rasprostranenie khvoynykh derev v Evropeiskoi Rossii i na Kavkazie*, 1885, q.v. The supplementary part of the original work, dealing with the revision of European Russia into zones of woody vegetation, is not included in this German version.

Résultats scientifiques. Sect. B, livr. 1. Pub. as: Akademiiia nauk SSSR. Mémoires. Sér. 8, classe physico-mathématique, vol. 26, no. 1) *Title tr.:* The ice of the Kara and Siberian [i.e. Laptev] Seas. English translation of chap. 11 was published as the author's *The arctic pack and the polynya*, 1928, q.v.

Chapters on (1) the freezing of sea water and the formation of ice in bays and stretches of water free from old ice, and (2) in the open sea, (3) breaking up of ice and formation of hummocks in the fall, (4) snow cover on sea ice, (5) land floes and their development as determined by the configuration of shore, relief of ocean floor; and the formation of hummocks, (6) phenomena connected with fluctuation of sea level due to tides, (7) ice cover during the winter, and its growth, (8) the melting of the ice cover, (9) the break-up of the fixed ice cover and the formation of broken land floes, (10) the ice cover after the opening of the sea, and (11) the arctic pack (the Arctic Basin and the Kara Sea) and polynya.

Observations were made at the shores of Taymyr Peninsula, at or near most of the New Siberian Islands, near Bennett Island, and in Sannikov, Laptev, Blagoveshchenskii Straits. Figures obtained are used in the text.

9005. KOLCHAK, ALEKSANDR VASIL'EVICH, 1874-1920. Posledniaia ekspeditsiia na ostrov Bennetta, snari-zhennaiia Akademiei nauk dlia poiskov barona Tollia. (Vsesoiuznoe geograficheskoe obshchestvo. Izvestiia, 1906. T. 42, p. 487-519, 2 plates) *Title tr.:* The last Academy of Sciences expedition to Bennett Island in search of Baron Toll.

Résumé of the activity of the Russian Polar Expedition relating to Toll's departure for Bennett Island, whence he failed to return (1902). The organization of a rescue expedition by the author (Jan. 9, 1903); his decision to use sledges and a boat. Course of events along route: Adzhirkhaydaki (about 72°30'N. 140°30'E.), Lyakhovskiiye Islands, Koteln'y, south shore of Bunge Land, Fadeyevskiy to Cape Blagoveshchenskiy, across the strait to Novaya Sibir', and by whaleboat to Bennett Island (76°40'N. 149°24'E.), some information on territory covered, with particular attention to ice formations. Description of Bennett Island and its birds and mammals (p. 510-14). Evidence concerning Sannikov Land, leading to author's conclusion that it does not exist. Evidence that lack of foresight in failure to obtain adequate meat supply by hunting

drove Toll to attempt a winter crossing to New Siberian Islands. Kolchak's return to Kazach'ye on the Yana, and the conclusion that Toll was dead.

Ergänzungsheft no. 28) Title tr.: The First German North Polar Expedition, 1868. Foreword by A. Petermann.*

In the ship *Germania* under the author's leadership, the expedition sailed (from near Bergen) north through Greenland Sea to the edge of the ice off northeast Greenland (73°-75°N.), proceeded eastward to waters northeast of Bear Island, and return; cruised north around West Spitsbergen through Hinlopen Strait; returned by the same route to Greenland Sea, then south to Norway.

In the foreword A. Petermann gives a résumé of the expedition's organization and general information (then held) on the northern waters.

Report on the voyage by Koldewey contains information on pack ice off the East Greenland coast and ice conditions in Greenland Sea and Svalbard waters; notes on hunting bear and walrus, on temperature and wind, color of the sea, Bismarck Strait (Bjørnsundet) and Hinlopen Strait, and the islands in these waters.

Maps: General chart shows course, and detailed chart of Hinlopen Strait, scale 1:400,000.

Die zweite deutsche Nordpolarfahrt in den Jahren 1869 und 1870. 1873. Bd. 1, p. 1-200, illus., 7 plates, 2 maps) Title tr.: The common voyage of the two ships and the voyage of the Hansa.*

The narrative of the Second German Arctic Expedition, 1869-70, from its beginning until the *Hansa* and *Germania* parted ways near 75°N.; and the story of the *Hansa* drift and wreck, Oct. 1870, off the East Greenland coast. Contains chapters by K. Koldevey and Dr. A. Pansch on the first part of the voyage; chapters on the *Hansa's* voyage, her drift in the ice, and wreck, the drift of the crew in the ice and their boat journey along the East Greenland coast and around Cape Farewell, by Capt. Hegemann, Prof. Laube and W. Bade. Included are descriptions of the ice conditions, the polar bears, birds, etc., encountered, the Eskimos of the southern tip of Greenland, and of the ruins and other points of interest ashore.

No. 80, Vechnaia merylota, p. 201-231) *Title tr.*: Notes on the use of heat as an amelioration method in the regions of permafrost and deep winter freezing of the ground.

Contains theoretical discussion on the effects of temperature regime of the soil on vegetation in general and agriculture in particular. Data collected in 1915 in the Far East is cited to show effect of forest cover, grass cover, dead organic cover and its mineralization by means of plowing, removal of snow cover, etc.; monthly and yearly ground temperature at various depths under different conditions of vegetable growth are given. Includes suggestions for improvements of observations and specific ameliorating measures.

9048. KOLPAKOVA, T. A. Epidemiologicheskoe obsledovanie Vil'iuskogo okruga IASSR. Leningrad, 1933. 292 p., illus., fold. map, tables. (Akademiia nauk SSSR. Sovet po izucheniiu proizvoditel'nykh sil. Trudy. Seriiia Yakutskaiia, vyp. 12) *Title tr.*: Epidemiological investigation of the Vilyuy district of the Yakut A.S.S.R.

Basic study of materials collected by the subsection of the medical and sanitary party of the Yakut Expedition in 1925. In this study of infectious diseases in the region, the author takes into consideration all the factors which affect the health and life of the native population: climatic and economic conditions, contact with Russian settlers, transition to a more "civilized" mode of life, specific racial features. The text is illustrated with extensive tabular data, and contains description of the organization of the expedition, preparation of questionnaires, contents of medical chests, etc. Brief geographical description of the region, (63°-65° N. 112°-130° E.) its landscape, vegetation, rivers, climate, p. 24-30. Table of monthly mean, maximum and minimum temperatures and amount of precipitation for Vilyuysk city according to meteorological observations, 1897-1922, p. 25. Social and economic conditions, detailed description of ten different types of dwellings and the changes in housing conditions in the region, p. 30-48. Food, methods of its preparation and conservation, p. 48-56. Tabular data on composition of homesteads: nationality of the owner, type of dwelling, number of families and individuals in one homestead, and diseases encountered, p. 57-72. Some demographic information: effect of miscegenation, health conditions among those of mixed blood; death rate of women and children, p. 73-82. Discussion of 25 diseases, indigenous and carried in by

the Russian settlers, e.g., tuberculosis, leprosy, malaria, small-pox, skin diseases, psychoneuroses, intestinal worms, etc., p. 83-198. Schools, their sanitary and epidemiological conditions, p. 104-110. Results of blood analyses of aborigines, p. 198-204. Microbiological observations, study of pathogenic and psychrophilic bacteria; bacteria in fermentation processes of milk products in the region, p. 204-212. Tabular data on 262 specimens of 138 species of bacteria collected by the expedition, from men, animals, and their environment, p. 212-74. Surgical instruments and remedies used by Yakut medicine men, p. 274-82. Bibliography of over 250 items, arranged according to chapters, p. 282-90. Sketch map shows route of the expedition and geographical distribution of diseases.

KOMOVA, O. N., see also Komov, N. N., & O. N. Komova. Meteorologicheskie nabljudeniya na Cheljuskin. 1938.

9081. KONDA, S. Northern fisheries of Japan. (Sapporo, Japan. Hokkaido Imperial University. School of fishery. Bulletin, 1933. v. 3, p. 1–6, 1–268, tables, double-face map) Text in Japanese, with summary in English, p. 1–6.

The "northern fisheries" include salmon and crab fisheries of Kamchatka, the crab in the Bering Sea off Alaska, and the floating crab canneries.

Contents include: 1. Statistics of catches and products of salmon, production and export of canned crab.

2. Fishery convention between Japan and U.S.S.R. (History and disputes of fishing rights around Kamchatka).

3. Problems of territorial seas. (Bering Sea sealing; crab floating canneries; salmon fleets).

4. Control of fishing enterprises. (Siberian fishery lots, open-sea fishery and companies which control them).

5. Labor. Exchange, hours, wages, social insurance.

Illus., etc.: Chart showing localities of fishing waters in Okhotsk and Bering Seas.

Plans of arrangement of fishery lots, of fishing nets and floating crab cannery and off-shore salmon fisheries, 1930, in Okhotsk Sea. **Copy seen:** DF.

9082. KONDAKOV, K. Malokabotazhnye perevozki po Severnomu morskou puti. (Sovetskaya Arktika, 1940, no. 8, p. 17-25, illus., maps) *Title tr.*: Local coastal shipping along the Northern Sea Route.

Discussion of the problem of coastwise shipping on the Northern Sea Route; suggestions for a regional grouping of the smaller settlements and local shipping services, e.g., for Novaya Zemlya and Dikson, the Tiksi-Ambarchik, and the Provideniya regions. *Copy seen:* DLC.

9083. KONDAKOV, K. O dobyche soli v raione bukhty Kozhevnikova. (Sovetskaya Arktika, 1940, no. 7, p. 22-27, illus., tables) *Title tr.*: On salt extraction in the Kozhevnikov Bay region.

Encouragement for setting up a salt extraction enterprise on the southern shore of Kozhevnikov Bay (Khatanga Bay region), using at first a relatively simple method, the natural freezing process, to eliminate the brine. *Copy seen:* DLC.

Wissenschaftliche Ergebnisse, 1939. Bd. 4, Meteorologie, Halbbd. 2. Die Ergebnisse, p. 1-86, illus. tables, diagrs.) *Title tr.*: Discussion of the results of the East Station in Scoresby Sound. (Statistical discussion). (German Greenland Expedition Alfred Wegener, 1929 and 1930-1931. Scientific results, 1939. v. 4. Meteorology).

The meteorological and aerological results of observations made at the station on the west coast of Jameson Land, at about 71°10'N. 24°15'W., and at Kolonie, on the north side of the entrance to Scoresby Sound.

1. Surface observations; an account and tabulation of bi-hourly measurements of solar radiation at Kolonie, Aug. 1930 and June-July 1931, and at East Station, Oct. 1930-May 1931 (p. 2-12). Average monthly values of pressure, temperature, cloudiness and wind direction and speeds at Kolonie and East Station, July 1930-June 1931; hourly air temperature at East Station,

Oct. 1930-Apr. 1931; summaries of wind direction and speeds, fog, and precipitation at East Station and Kolonie, July 1930-June 1931 (p. 13-69).

2. Aerological statistics. Seasonal and monthly averages of free air temperatures and humidities at standard levels up to 4500 meters at East Station (winter months), and Kolonie (summer months), Nov. 1930-Aug. 1931. Isoplethic charts indicate temperature structure over Scoresby Sound, and are compared with those of Lindenberg and Spitsbergen (p. 69-77).

Upper air wind. Average wind speed and resultant wind directions for winter months at East Station and summer months at Kolonie, are tabulated and charted, 1930-31 (p. 77-86).

Wissenschaftliche Ergebnisse, 1939. Bd. 4, Meteorologie, Halbbd. 2: Die Ergebnisse, p. 274-325, incl. 24 p. of diagrs.) *Title tr.:* Contributions to the mechanics of the weather continuity over Greenland. (German Greenland Expedition Alfred Wegener, 1929 and 1930-1931)

The authors state two questions which must be answered to clarify the overall weather relationships of Greenland: (1) What influence have the mountain and ice massifs upon the composition and movement of cyclones? (2) Are the anticyclonic currents only an effect of the lowest air layer (gravity wind) or the result of a high pressure area over Greenland (gradient wind)?

This paper discusses and presents in graphs the daily cloud and wind observations from Umanak, the West, Middle, and East Stations, and Kolonie (on

the north side of the entrance to Scoresby Sound), a line of stations across Greenland at about 71°N.

Discussion of methods of determining the water discharge of large and small rivers emptying into the seas of the Northern Sea Route.

Copy seen: DLC.

9133. KOROVKIN, I. P. Materialy po gidrologii reki Khatangi. (Severnyi morskoi put', 1940. No. 16, p. 79-98, illus., map, diagrs.) *Title tr.*: Material on the hydrology of Khatanga River.

General description of the river and basin, data on river levels, freezing

and opening, discharge of water, temperatures, and chemical analyses.

Copy seen: DLC.

9134. KOROVKIN, I. P. Rezhim vzveshennykh nanosov v Severosibirskikh rekakh. (Problemy Arktiki, 1940, no. 12, p. 19-27, tables.) *Title tr.*: The system of suspended alluvia in the north Siberian rivers.

Analysis of data collected by expeditions of the Arctic Institute and the Academy of Sciences since 1927.

Tables: 1. Average quantities of suspended alluvia in the principal rivers of arctic Siberia.

2. Average turbidity of Kolymna River at right and left banks.

3. Average turbidity of Lena River at Kyusysur.

4. Vertical distribution of turbidity of the Lena at Kyusysur.

5. Monthly percentile distribution of suspended alluvia in the Ob' and the Yenisey.

6. Physical composition of bottom sediment and suspended alluvium in the Yana.

7. Variations in turbidity of north Siberian rivers in the course of a year.

8. Turbidity in relation to rate of flow.

9. Physical analysis of bottom sediments of the Khatanga.

10. Percentages of organic matter contents of sediments and suspended alluvium in the Khatanga.

Bibliography (8 items).

Historical sketch of Kamchadals living in southern Kamchatka Peninsula.

Copy seen: DLC.

KORSAKOV, G. M., *see also* Sbornik statei, posviashchennykh S. P. Krasneninnikova, 1939.

9140. KORTRIGHT, FRANCIS H. The ducks, geese and swans of North America, a vade mecum for the naturalist and the sportsman. Washington, D. C., The American Wildlife Institute, 1942. 3 p. l., v-viii, 476 p. incl. illus. (incl. sketch maps) 36 col. plates, fold. tables.

Reprinted as "second edition" in 1943, also subsequently (fifth printing, 1948) with minor corrections only.

The author, a Canadian sportsman and naturalist, compiled this unique guide book from the published works of others. It contains introductory material on taxonomy, anatomy, scientific nomenclature, moults and plumages,

sex and age determination, habits, migration routes, conservation, and other general information. Descriptions, identifications and life stories of sixty-two species (including some which have become practically extinct). This represents the first attempt to give year-round plumage identification. Includes weights and measures of wildfowl; and a bibliography (174 items).

9192. KOTSEBU, OTTO EVSTAF'E-VICH, 1787-1846. Puteshestvie v Iuzhnyi okean i v Beringov proliv dlia otiskaniia siyvero-vostochnago morskago prokhoda, predpriiatoe v 1815, 1817 i 1818 godakh izhdiveniem Ego Shiatel'-

stva Grafa Nikolaia Petrovicha Rumiantsova na korabli Riurikiie pod nachal'stvom flota leitenanta Kotsebu. Sanktpeterburg, v tip. Nik. Grecha, 1821-23. 3 v.: clxxxii, 168 p.; 346 p.; 436 p.; plates (part col., part fold.), tables. Also atlas volume: 1 l., 21 maps.

Title tr.: Voyage to the Southern Ocean and Bering Straits for the purpose of finding the Northeast Passage, undertaken in the years 1815-1818, at the expense of the Count N. P. Rumiantsev on the ship *Riurik* under the command of Lieutenant of the Navy Kotzebue.

Account of the Russian round-the-world expedition on the *Riurik*, from Kronstadt round Cape Horn to Kamchatka and Bering Strait, and, after its failure to find a northern passage from Pacific to Atlantic Ocean, the return via Cape of Good Hope to St. Petersburg under the leadership of Kotzebue, with Adelbert Chamisso as naturalist, J. F. Eschscholtz as physician, and others.

Contents include a survey of expeditions aiming to find a short way from the Atlantic Ocean to Pacific Ocean, by Ivan Fedorovich Kruzenshtern, v. 1, p. xxxiii-cxxi.

Kotzebue's narrative includes account of his voyage in 1816 from Kamchatka to St. Lawrence Island, Cape Prince of Wales, the search for the northern passage, discovery of Kotzebue Bay, Krusenstern Promontory, Krusenstern Island (now Little Diomedé), and Gvozdev Island (now Diomedé); description of the regions discovered, the Aleuts, Chukchis and Eskimos, v. 1, p. 85-164.

Account by Kotzebue of his voyage in 1817 to Unalaska and Pribilof Islands (St. Paul and St. George), description of the islands; the story of the appearance of a volcanic island near Umnak in 1796; remarks of Aleuts, sea lions, fur seals, v. 2, p. 213-33.

Description by the naturalist, Adelbert von Chamisso, of Kamchatka, Bering Strait, Chukotsk Peninsula, Unalaska and Pribilof Islands, their flora and fauna, inhabitants, Chukchis, Aleuts, Kamchadals v. 3, p. 319-68.

Notes on minerals found on Unalaska and on the shores of Bering Strait, v. 3, p. 388-400.

Atlas includes maps (no. 1) the world, showing northern shores of Europe, Asia and America and route

of Kruzenshtern's voyage on the *Nadezhda* 1803-1806; (no. 7) Bering Strait region showing Kotšebu's route 1816-1817; (no. 8, double fold.) north-west Alaska from Cape Prince of Wales to Kotzebue Sound, (no. 9, double fold.) region of Fox Islands—Lavrentiya Guba—Eschscholtz Bay; (no. 10) plan of Captains Bay, Unalaska Island.

9193. KOTŠEBU, OTTO EVSTAF'E-VICH, 1787-1846. *Puteshestvie vokrug sviata, sovershennoe po povelëniû Gosudarîa Imperatora Aleksandra Pervago, na voennom shliûpië Predpriiutii*, v. 1823, 24, 25 i 26 godakh, pod nachal'stvom Flota kapitan-leitenenta Kotšebu. Sanktpeterburg, v. morskoi tip., 1828 goda. 3 p. l., 200 [1] p., 4 fold. maps. **Title tr.:** A voyage round the world performed under the order of the Emperor Alexander the First on the war-sloop *Predpriiutie* in 1823-1826 under command of Lieutenant-Commander of the Navy Kotšebu.

Narrative of the voyage for the Russian American Co., on the *Predpriiutie*, 1823-26, from Kronstadt around Cape Horn to Kamchatka and Alaska (Fort New Archangel, now Sitka on Baranof Island) and return by Cape of Good Hope to Kronstadt. Includes a general description of Kamchatka and (in more detail) customs of the inhabitants; and an account of a five-month sojourn among the "Kalushes" (Tlingits) of Baranof Island.

Maps include: Fort New Archangel (scale approx. 1:7,000).

Copy seen: DLC.

9194. KOTŠEBU, OTTO EVSTAF'E-VICH, 1787-1846. *Puteshestviâ vokrug sveta*. Izdanie vtoroe. Moskva, Gos. Izd-vo Geogr. lit-ry, 1948. 332 p., illus., port., 3 sketch maps. **Title tr.:** Voyages around the world. Second edition.

Abridged edition, partly rewritten, of the author's two narratives of his voyages of 1815-18, and 1823-26 respectively; with an introductory survey (p. 5-27) of Kotšebu's achievements and biographical notes by G. Ianikov.

Copy seen: DLC.

9195. KOTŠEBU, OTTO EVSTAF'E-VICH, 1787-1846. A voyage of discovery, into the South Sea and Beering's Straits, for the purpose of exploring a North-East Passage, undertaken in the

years 1815-1818, at the expense of His Highness Count Romanzoff, in the ship *Rurick*, under the command of the Lieutenant in the Russian Imperial Navy, Otto von Kotzebue. London, Longman, Hurst, Rees, Orme, and Brown, 1821. 3 v.: xvi, 358; 433; 442 p. col. fronts. (incl. 2 port.) 6 plates (5 col.) 7 maps (4 fold.) Translation of the author's *Puteshestvie v Iuzhnyi okean i v Beeringov proliv*, 1821, q.v., with the addition of col. plates and maps (not of arctic regions), lacking in the Russian original.

Kotšebu's account of his Kamchatkan and Alaskan experiences appear in v. 1, p. 133-274, v. 2, p. 162-77; and Chamisso's remarks on Kamchatka, Aleutian Islands, etc., in v. 3, p. 261-318. Eschscholtz's chronicle of diseases of the crew throughout the expedition (v. 2, p. 315-47) includes brief references to northern regions.

Copy seen: DLC.

9196. KOTVICH, VI. *Materialy dliâ izucheniâ tungusskikh narechii*. (Zhivâia starina, 1909. v. 18, vyp. 2-3, p. 206-18) **Title tr.:** Materials for the study of Tungus dialects.

Contains a brief survey of the work done in the study of the Tungusic languages in the past, with a bibliography, placing special emphasis on the dialect of the Sungary Goldi (a group of the southern Tungus). Five examples of texts with Russian translation are given.

Copy seen: DLC.

9197. KOVALEV, K. V. *Migratsiî i promysel belukhi v Eniseiskom i Pânskomo zalivakh*. (Lennigrad. Vsesoûznyî arkticheskii institut. Trudy, 1938. T. 123, p. 71-111, illus. (incl. map), tables) **Title tr.:** Migration of the white whale, and the white whale fishery in Yenisey and Pyasina Bays.

A description of whaling practices in these arms of Kara Sea, and suggestions for their further improvements, with bibliography, p. 98-99.

Copy seen: DLC.

9198. KOVALEVSKII, P. V. *shkolë-rûrte*. (Sovetskii Sever, 1934, no. 2, p. 103-107) **Title tr.:** A nomad tent school. Experience of a school teacher in the first Koryak school on Taygonos Peninsula (61°30'N. 161°E.).

Copy seen: DLC.

9199. KOVNER, S. S. K matematicheskoj teorii promerzaniia. (In: U.S.S.R. Glavnoe upravlenie Severnogo morskogo puti. Geologo-razvedochnaia konferentsiia. 1st, Moskva, 1935. Geologiia i poleznye iskopaemye severa SSSR. Trudy, 1936. T. 3, Vechnaia merzlota, p. 34-41, diagr.) **Title tr.:** Concerning the mathematical theory of freezing.

Discussion of the theory of freezing, and detailed exposition of the method suggested by L. S. Leibenson in application to the freezing of water pipes, with mathematical formulas added.

Copy seen: DLC.

9200. KOVTUN, A. G. Astronomicheskie opredeleniia v raione Chaunskoi guby. (Leningrad. Vsesoiuznyi arkticheskii institut. Trudy, 1938. T. 112, p. 185-205, illus., tables, diagrs.) **Title tr.:** Astronomical determinations in the region of Chaun Bay.

A description of the geodetic work of the Chaun Bay Expedition, 1934-35, in northern Kamchatka province, with list of points of determination, and a map, 1:500,000, at the end of volume.

Copy seen: DLC.

9201. KOVTUN, A. G. Kartograficheskie obsledovaniia raiona Chaunskoi guby. (Leningrad. Vsesoiuznyi arkticheskii institut. Trudy, 1938. T. 112, p. 207-215) **Title tr.:** Cartographic study in the region of Chaun Bay.

A description of the mapping and mapping methods of the Chaun Bay Expedition, 1934-35, with two maps, 1:500,000, at end of the volume.

Copy seen: DLC.

9202. KOWARZIK, RUDOLF. Der Moschusochs und seine Rassen . . . Mit einem Anhang: Moschusochsen in der Gefangenschaft. (In: Fauna arctica, 1910. Bd. 5, p. 87-126, illus., plate, tables) **Title tr.:** The musk ox and its races. With an appendix: musk oxen in captivity.

Detailed discussion of the anatomical variations of four races of musk oxen, with tables of skull measurements, and some remarks on the difficulties of acclimatization shown by the few specimens in zoos.

Copy seen: DA.

9203. KOZHANCHIKOV, I. V. Die verbreitung der arktischen Agrotinen und die genetische Untersuchung dieser Fauna. (Zoologischer Anzeiger, Nov. 1934. Bd. 108, p. 113-18) **Title tr.:** The

distribution of arctic Agrotineae and a study of their genetics.

Contains discussion of four genera of moths with circumpolar distribution: *Graphiphora*, *Spoclotis*, *Agrotis*, and *Caradrina*.

Copy seen: DSI-M.

9204. KOZHEVNIKOV, M. Ia. Chukotskaia ekspeditsiia 1909-1910 gg. (Akademiia nauk SSSR. Polarnaia komissii. Trudy, 1935. Vyp. 18 (15 p.) and Prilozhenie k No. 18: Al'bom ilustratsii i kart (17 plates (incl. 1 fold.) 27 maps) **Title tr.:** Chukotsk Expedition, 1909-1910.

A hitherto unpublished description of the routes of this three-man expedition along the coast of the Chukotsk Peninsula (under the leadership of I. P. Tolmachoff) with a separate supplement consisting of forty-six photographs and a map of the expedition's route in twenty-seven sections.

Copy seen: DLC.

9205. KOZHEVNIKOV, M. Ia. Priemy marshrutnoi s'emki i usloviia rabot v raione poberezh'ia Siëvernago Ledovitogo okeana. (Vsesoiuznoe geograficheskoe obshchestvo. Izvestiia, 1912. T. 48, p. 343-55, illus.) **Title tr.:** Methods of surveying routes and conditions of work in the coastal regions of the Arctic Ocean.

Account by the topographer of the Khatanga Expedition (1905) which explored the basins of the Khatanga and the Anabar, and the Expedition for the exploration of the coast from the mouth of the Kolyma to Bering Strait (1909) with information on instruments used.

Copy seen: DLC.

9206. KOZHIN, N. I. Promyslovyie ryby Sibiri i perspektivy ikh ispol'zovaniia. Moskva, Pishchepromizdat, 1946. 78 [2] p. illus. **Title tr.:** Commercial fishes of Siberia and possibilities of their utilization.

Issued under auspices of the Scientific Research Institute of the Salt-water Fishing Industry and Oceanography of Moscow. (Vsesoiuznyi nauchno-issledovatel'skii institut morskogo rybnogo khoziaistva i okeanografii).

Contains (p. 2-9) a short description of the main rivers and lakes of Siberia (Ob', Yenisey, Lena, Baykal and others), also (p. 10-12) a general survey of the ichthyofauna; followed (p. 13-67) by descriptions of main species of fishes in Siberia and their

evaluation from the standpoint of fishing industry. Bibliography (over 200 items). **Copy seen:** DLC.

Heft 20, p. 77-83, illus.) **Title tr.:** Greenland mites. (Zoological results of the Geographical Society of Berlin Greenland Expedition, VI)

Contains a list, with synonymy, localities, and notes, of six (including, with full descriptions, three new) species from Umanak District, two of which were marine forms.

Copy seen: DLC.

9230. KRAMER, PAUL, d. 1898, and C. J. NEUMANN. Acariden, während der Vega-Expedition eingesammelt. (In: Nordenskiöld, N. E. A. Vega-expeditionens vetenskapliga iakttagelser, 1883. Bd. 3, p. 521-29, 1 l. 12 plates) **Title tr.:** *Acarida* collected during the Vega Expedition.

List, with localities and descriptions of ten new species of mites, ticks, etc., collected in northern Siberia, the Seward Peninsula and Bering Island.

Copy seen: DSI-M.

9231. KRAMP, PAUL LASSENIUS, 1887- . Chaetognatha collected by the "Tjalfe" Expedition to the west coast of Greenland in 1908 and 1909. (Dansk naturhistorisk forening. Videnskabelige meddelelser, 1918. Bd. 69, p. 18-55)

Report on detailed study of the occurrence, distribution, and state of sexual maturity of five species of these worms, with a bibliography (27 items).

Copy seen: DSI-M.

9232. KRAMP, PAUL LASSENIUS, 1887- . Chaetognather. 1918. (In: Conspectus faunae groenlandicae 3. del, nr. 15. *Pub.* in Meddelelser om Grønland, 1928. 23. hefte, suppl., p. 17-34)

General remarks, and list, with synonymy, references to literature and localities, of five species of chaetognaths, annelid worms from waters off the east and west coasts of Greenland; bibliography, p. 33. **Copy seen:** DLC.

9233. KRAMP, PAUL LASSENIUS, 1887- . Coelenterata, Ctenophora and Chaetognatha. København, C. A. Reitzel, 1933. 20 p. illus. (incl. map). (Meddelelser om Grønland. Bd. 104, nr. 11)

Results of the Scoresby Sound Committee's 2nd East Greenland Expedition in 1932 to King Christian IX's Land.

This collection made between Cape Dalton and Angmagssalik, especially in Kangerdlugssuaq, is said to be too small to serve as a base for a general zoogeographic discussion. The author gives however an account of twenty-one coelenterate species, including description of a new hydroid *Corymorpha obvolvata* n. sp., one ctenophoran, and two chaetognath species.

List, with synonymy, localities and remarks, of thirteen species of corals collected in the waters west of Greenland.

Copy seen: DLC.

9235. KRAMP, PAUL LASSENIUS, 1887- . The Godthaab Expedition, 1928. Chaetognatha, København, C. A. Reitzel, 1939. 40 p. incl. illus. (incl. maps) tables. (Meddelelser om Grønland. Bd. 80, nr. 5)

List, with synonymy, localities, occurrence and discussions, of five species of chaetognaths collected in the waters west of Greenland; with general remarks. Bibliography, p. 39-40.

Copy seen: DLC.

9236. KRAMP, PAUL LASSENIUS, 1887- . The Godthaab Expedition, 1928. Ctenophora. København, C. A. Reitzel, 1942. 18, 2 p., illus., 3 sketch maps. (Meddelelser om Grønland, Bd. 80, nr. 9)

List, with synonymy, distribution, vertical distribution, seasonal occurrence and remarks on specimens, of five (including one new) species collected in Davis Strait, Baffin Bay and Smith Sound; with zoogeographical remarks, tables and bibliography (21 items).

Copy seen: DSI-M.

9237. KRAMP, PAUL LASSENIUS, 1887-. The Godthaab Expedition 1928. Hydroids. København, C. A. Reitzel, 1932. 86 p. incl. illus., maps, tables. (Meddelelser om Grønland, Bd. 79, nr. 1)

List, with synonymy, locations and descriptions, of fifty-eight species of hydroids, chiefly collected by the *Godthaab* Expedition, 1928, in the waters west of Greenland; also discussion of distribution in deep-sea areas and littoral regions, list of the ninety-two species known to Greenland waters and list of stations. Bibliography, p. 83-86.

Copy seen: DLC.

9238. KRAMP, PAUL LASSENIUS, 1887-. The Godthaab Expedition, 1928. *Medusae*. København, C. A. Reitzel, 1942. 168 p. illus., maps, tables. (Meddelelser om Grønland. Bd. 81, nr. 1)

Systematic account of forty-nine species of jelly-fish, etc., collected in the waters west of Greenland by the *Godthaab* Expedition, 1928, and by Paul M. Hansen, 1930-1939; with remarks (p. 136-65) on conditions in those waters in relationship to occurrence and distribution of the species, also list (with map) of the collecting stations, and bibliography, p. 164-68.

Copy seen: DGS.

9239. KRAMP, PAUL LASSENIUS, 1887-. The Godthaab Expedition, 1928. Pelagic Tunicata. København, C. A. Reitzel, 1942. 8, [2] p. illus. (map) (Meddelelser om Grønland. Bd. 80, nr. 10)

List, with synonymy, localities, distribution and remarks on specimens, of three species of appendicularians collected in Baffin Bay, Davis Strait and Smith Sound; bibliography, p. 10.

Copy seen: DSI-M.

9240. KRAMP, PAUL LASSENIUS, 1887-. The Godthaab Expedition, 1928. Siphonophora. København, C. A. Reitzel, 1942. 24 p. illus. 3 sketch maps. (Meddelelser om Grønland. Bd. 80, nr. 8)

Contains systematic list, with synonymy and localities, of seven species of polyps (including one new, and five new to Greenland waters) collected by the *Godthaab* Expedition, 1928 and the *Dana*, 1925 in Baffin Bay, Davis Strait and Jones Sound; with zoogeographical remarks and bibliography (26 items).

Copy seen: DSI-M.

9241. KRAMP, PAUL LASSENIUS, 1887-. Hydroider. 1914. (In: *Conspetus faunae groenlandica*. 3. del, nr. 9. *Pub. in Meddelelser om Grønland*, 1917. 23. hefte, p. 951-1080)

Summary of earlier research, and list, with synonymy and localities, of eighty-eight species from the west and east coasts of Greenland; bibliography, p. 1074-80.

Copy seen: DLC.

9242. KRAMP, PAUL LASSENIUS, 1887-. Hydroids collected by the "Tjalfe" Expedition to the west coast of Greenland in 1908 and 1909. (Dansk naturhistorisk forening. Videnskabelige meddelelser, 1915. Bd. 66, p. 1-36)

Annotated list, with synonyms and localities, of forty-four species, a list of stations, and a bibliography (54 items).

Copy seen: DSI-M.

9243. KRAMP, PAUL LASSENIUS, 1887-. Hydroids collected in West-Greenland fjords in 1911 and 1912. København, C. A. Reitzel, 1932. 34 p., 1 l. incl. illus. (incl. maps) tables, fold. map. (Meddelelser om Grønland. Bd. 91, nr. 3)

Results of biological investigations of the "arctic" type fiord, Nordre Strømfjord (67°28'N.) by Dr. V. Nordmann, 1911, and of the "Atlantic" type fiords. Kvanefjord (near Frederikshaab 61°55'N.), Bredefjord (north of Julianehaab 60°45'N.) and Skoofjord (ten miles to the south), by K. Stephensen, 1912. A systematic account of forty-four (including one new) species; list of stations; discussion of distribution and zoogeographical character of the hydroids in the fiords investigated; bibliography (17 items).

Copy seen: DSI-M.

9244. KRAMP, PAUL LASSENIUS, 1887-. *Medusae*. Pt. I. *Leptomedusae*. Copenhagen, B. Luno, 1919. 2 p. l., 111 p. illus., 5 plates, 14 sketch charts. (Ingolf-expedition, 1895-1896. [Reports] v. 5, pt. 8)

Covers the geographical area of North Atlantic (north of 50°N.), Davis Strait, Denmark Strait, Greenland, Barents, and Kara Seas, and some European waters, based on collections of the *Ingolf* and several later expeditions and collectors. A classified list, with synonyms, references, descriptions, distribution, and locations, of twenty-eight (including one new) species of jelly-fish; with a bibliography (133 items).
Copy seen: DSI-M.

9245. KRAMP, PAUL LASSENUS, 1887- . Medusae. Part II. Anthomedusae. Copenhagen, B. Luno, 1926. 2 p. l., 102 p. illus., 2 plates, 18 sketch charts, table. (Ingolf-expedition, 1895-1896. [Reports] v. 5, pt. 10)

Based on the collections of the cruiser *Ingolf* in Davis and Denmark Strait, Icelandic waters and Greenland Sea between Jan Mayen and Iceland. A list (with synonyms, references, descriptions, locations and distribution and some notes) of twenty-eight species of these coelenterates.

Copy seen: DSI-M.

9246. KRAMP, PAUL LASSENUS, 1887- . Medusae, part III. Trachylina and Scyphozoa, with zoogeographical remarks on all medusae of the northern Atlantic. Copenhagen, B. Luno, 1947. 66 p. illus. (incl. 17 sketch charts) 6 plates (1 col.) (Ingolf-expedition, 1895-1896. [Reports] v. 5, pt. 14)

Following the publication of the author's *Medusae, pt. II*, 1926 it was decided to limit subsequent published results of the Ingolf Expedition to deep-sea animals. Most of the species treated here are bathypelagic, the few neritic forms are only briefly mentioned.

Based on collections made by the *Ingolf* in 1895-96, and later expeditions in Baffin Bay, Davis and Denmark Straits, Greenland Sea and North Atlantic waters.

Classified list, with full discussion of morphology, classification, occurrence and distribution of twenty-six (including one new) species of jelly-fish; additions and correction to parts 1 and 2 (by same author); zoogeographical remarks on all medusae of the northern Atlantic and adjacent waters; and a bibliography (156 items).

Copy seen: MH-Z.

9247. KRAMP, PAUL LASSENUS, 1887- . Medusae collected by the "Tjalfe" Expedition. (Dansk naturhistorisk forening. Videnskabelige meddelelser, 1913. Bd. 65, p. 257-86)

The *Tjalfe* carried out fisheries investigations in Davis Strait, 1908-1909. The author gives a station list showing where medusae were caught, an annotated list, with synonyms, references, locations, and distribution, of twenty-two (including with description, one new) species of jelly-fish; with a bibliography (36 items).

Copy seen: DSI-M.

9248. KRAMP, PAUL LASSENUS, 1887- . Meduser og siphonophorer. (In: *Conspectus fauna groenlandicae*. 3. del, nr. 3, *Pub.* in Meddelelser om Grønland, 1914. 23. hefte, p. 381-456) *Title tr.:* Medusae and Siphonophora.

General discussion and annotated list, with synonymy, references to literature, localities, etc., of thirty-nine species; bibliography, p. 455-56.

Copy seen: DLC.

9249. KRAMP, PAUL LASSENUS, 1887- . Report on the hydroids collected by the *Danmark* Expedition at north-east Greenland. 1911. Danmark-ekspeditionen til Grønlands nordøstkyst, 1906-1908. Bd. 5, nr. 7. (Meddelelser om Grønland. Bd. 45, p. 339-96 incl. tables diagrs. plates XX-XXV)

Contains characterizations, and general list of the stations where species were collected, showing algal vegetation, and hard or soft bottom; discussion and tables of bathymetric distribution of species; discussion of stolonization; tables showing different supports on which each species was observed, and geographical (general arctic) distribution; and a taxonomic list, with locations, depths, distribution, and morphologic notes, of thirty-three (including with descriptions, three new) species of hydroids, from the waters of Dove Bay, and around Cape Bismarck, in East Greenland (ca. 76°45'N.)

Copy seen: DLC.

9250. KRAMP, PAUL LASSENUS, 1887- . The zoology of East Greenland. Hydroida. København, C. A. Reitzel, 1943. 52 p. illus. (incl. map) (Meddelelser om Grønland. Bd. 121, nr. 11)

Systematic synopsis of forty-eight species, giving synonyms, all East

Greenland records, geographic and bathymetric distribution, and some notes, with a bibliography: (39 items).

Copy seen: DSI-M; DGS.

9251. KRAMP, PAUL LASSENIUS, 1887- . The zoology of East Greenland. Medusae, Siphonophora, and Ctenophora. København, C. A. Reitzel, 1943. 20 p. illus. (map). (Meddelelser om Grønland. Bd. 121, nr. 12)

Systematic synopsis, with all East Greenland records, and distribution, of sixteen species (three ctenophores) and a bibliography (24 items).

Copy seen: DSI-M; DGS.

9252. KRANCK, ERNST HÅKAN, 1898- . Bedrock geology of the seaboard region of Newfoundland Labrador. St. John's, Nfld., 1939. viii, 44 p. incl. 4 plates, fold. map. diagrs. (Newfoundland. Geological Survey Bulletin no. 19)

Based on a reconnaissance from Belle Isle Strait to Hebron, June-Aug. 1937, during the Finland Labrador Expedition, under V. Tanner. Contains notes on physiography, discussion of paleozoic and Algonkian sediments, Archean sediments and gneisses, and the igneous rocks, a summary of stratigraphy and geologic history of the Labrador coast, a comparison with other areas and a note on minerals; with a bibliography (23 items).

Copy seen: DGS.

9253. KRANCK, ERNST HÅKAN, 1898- . Koordination der Grundgebirgsformationen von Labrador und Südgrönland. (In: Naturforschende Gesellschaft. Schaffhausen. Mitteilungen, 1940, pub. 1939. Bd. 16, its: Grönland, p. 213-16) *Title tr.:* Correlation of the primitive rock formations of Labrador and southern Greenland.

Copy seen: DGS.

9254. KRANCK, ERNST HÅKAN, 1898- . Med motor och hammare längs Labradorkusten. Helsingfors, Söderström & Co., 1940. 170 p. 16 plates, sketch map. *Title tr.:* With motor and hammer along the Labrador coast.

Account of the author's experience mainly during the Finnish Labrador Expedition, 1937, in the company of Prof. Tanner in localities northward from Belle Isle Strait to Hebron. Describes the party's travel, the Indians and Eskimos, Moravian mission works, etc. Includes some general discussion

of the geology and physical geography.

Copy seen: CaMAI

9255. KRANCK, ERNST HÅKAN, 1898- . On the crystalline complex of Liverpool Land. København, C. A. Reitzel, 1935. 122 p. incl. illus. (incl. profiles) tables. 2 plates, 2 fold. maps) (Meddelelser om Grønland. Bd. 95, nr. 7)

Detailed analysis of rocks collected during the Danish Three-Year Expedition, 1931-1934, in various localities in Liverpool Land, East Greenland, and theoretical discussion of the petrography and structural geology of Liverpool Land; orogenic movements within each locality, the relation between rock textures and tectonic style, the tectonic development of Liverpool Land and the geological position of its crystalline complex; bibliography, p. 119-22.

Copy seen: DLC.

9256. KRANCK, ERNST HÅKAN, 1898- . On turjaite and the ijolite stem of Turja, Kola. Helsingfors 1928. 104 p. 13 illus. (incl. map), 4 plates. (Fennia, Hefte 51, no. 5)

Study of the occurrence, petrology, and genesis of basic igneous rocks of dikes and lenses in the southwestern part of Turij Peninsula (66°35'N. 34°30'E.) in the southwestern part of Kola Peninsula, with comparison with similar rocks of other countries. Principal emphasis is placed upon turjaite, with less detailed treatment of ijolitic rocks, lamprophyres, and dike rocks rich in carbonate. Bibliography, p. 100-102.

Sketch map shows distribution of some types of rock in the Turij Peninsula.

Copy seen: DLC.

9257. KRANCK, ERNST HÅKAN, 1898- . The rock-ground of the coast of Labrador and the connection between the Pre-Cambrian of Greenland and North-America. (Finland. Geologiska Kommission, Bulletin, 1939. No. 125, p. 65-86)

Based on observations made by the author on the Finnish Labrador Expedition, 1937, between the Strait of Belle Isle and Hebron, and on previously published literature. Description of the basal gneisses, the Pre-Cambrian and Eo-Cambrian sediments and of the igneous rocks; and some comparisons between Greenland and Labrador geology; with a bibliography.

9258. **KRARUP-NIELSEN, AAGE**, editor. Jordens erobring; alle tiders store opdagelsesrejser, redigeret af Aage Krarup Nielsen, skrevet af dr. phil. Kaj Birket-Smith, dr. phil. Knud Rasmussen, magister Einar Storgaard, professor, dr. phil. P. Tuxen og redaktøren. København, C. Erichsen; [etc., etc.] 1930-32. 6 v. illus., plates (part col.) ports., maps (1 fold.) *Title tr.*: The conquest of the earth. The great explorations of all times. Edited by Aage Krarup Nielsen. Written by Kaj Birket-Smith, Ph.D.; Knud Rasmussen, Ph.D.; Einar Storgaard, M.A.; Professor P. Tuxen, Ph.D., and the editor.

Contents include (v. 5, p. 19-26, 309-330, 370-74) account of Vinland voyages, exploration of northwest and northern coasts of Canada.

v. 6. Polarforsknings saga (The saga of polar exploration) by Knud Rasmussen, 398 p., maps, and [9] p. index to v. 1-6. This contains a description of the voyages and discoveries of Erik the Red and the Norsemen; the re-discovery of Greenland; discovery of, and whaling at West Spitsbergen; other arctic explorations by Parry, Franklin, and others; the Northeast and Northwest Passages; the achievements of Nansen, Amundsen, Shackleton, Scott, Peary, Sverdrup etc.; exploration of Greenland, discovery of the North and South Poles; explorations by airplane, balloon, submarine, etc. A German version of v. 6. was published as Rasmussen's *Heldenbuch der Arktis*, 1933, q.v.

Copy seen: DLC; NNSStef (v. 6 only).

9259. **KRASHENINNIKOV, IPPOLIT MIKHAILOVICH**, 1884-1947. Drevneangarskie i drevneberengijskie elementy roda *Artemisia* vo flore sovetskoi arktiki. (Sovetskaja botanika, 1943, no. 5, p. 3-22, illus., text maps) *Title tr.*: Ancient Angara and Beringia elements of the genus *Artemisia* of the flora of the Soviet Arctic.

Contains a geobotanical and phylogenetic study of eighteen species of sagebrushes (*Artemisia*), and their distribution in nine floristic regions of the Soviet Arctic with special attention given to the Angara-Beringia group of *Artemisia*, important for the understanding of phylogeny and distribution of this genus. *Copy seen:* MH-A.

9260. **KRASHENINNIKOV, IPPOLIT MIKHAILOVICH**, 1884-1947. Novye slozhnotsvetnye. (Akademiia nauk SSSR. Botanicheskii institut imeni V. L. Komarova. Botanicheskie materialy gerbariia, 1946. T. 9, vyp. 4-12, p. 152-84, illus.) *Title tr.*: New species of Compositae.

Contains critical notes on, and Latin diagnoses of, three new species of *Artemisia*: from (1) De Long Island (New Siberian Islands); (2) the basin of Olenek and Kolyma Rivers, and (3) Commander Islands.

Copy seen: MH-A.

9261. **KRASHENINNIKOV, IPPOLIT MIKHAILOVICH**, 1884-1947, and M. M. IL'IN. *Aster (Rhinaetina) novopokrovskii*. (Leningrad. Glavnyi botanicheskii sad. RSFSR. Botanicheskie materialy gerbariia, 1924. T. 5, vyp. 11-12, p. 172-73)

Contains Latin diagnosis of this new species of aster, native to Khatanga River basin. *Copy seen:* MH-A.

9262. **KRASHENINNIKOV, STEPAN PETROVICH**, 1713-1755. Aardrykskundige en natuurlyke beschryving van Kantschatka, en de Kurilsche eilanden, met een gedeelte der kust van Amerika. Op Rus-keizerlyk bevel, te Petersburg, in de Russische taal uitg. Vervolgens in het Engelsch en Hoogduitsch, en nu in het Nederduitsch vertaald. Amsterdam, J. W. Willemsz, 1770. 3 p. 1., iii-xiv, 384, [14] p. 3 fold. plates. *Title tr.*: Description of the geography and natural life of Kamchatka and the Kurile Islands, with a section on the coast of America . . . published in Russian at Petersburg by Russian Imperial command, then translated into English and German and now into Dutch.

Abridged translation into Dutch from the English and German versions of the author's *Opisanie zemli Kamchatki*, 1755, q.v. *Copy seen:* DLC.

9263. KRASHENINNIKOV, STEPAN PETROVICH, 1713-1755. Histoire et description du Kamchatka. Amsterdam, M. M. Rey, 1770. 2 v: xvi, 439 p.; 492 p. 1 l., 6 fold. plates, fold. map (2 pt.) fold. tables.

Translation of the author's *Opisanie zemli Kamchatki*, 1755, q.v. This is a new translation from the original, with the text somewhat condensed but not seriously abridged as is the English translation. **Copy seen:** DLC.

9264. KRASHENINNIKOV, STEPAN PETROVICH, 1713-1755. The history of Kamtschatka, and the Kurilski Islands, with the countries adjacent; illustrated with map and cuts. Published at Petersburg in the Russian language, by order of Her Imperial Majesty, and translated into English by James Grieve, M. D. Gloucester, Printed by R. Raikes; London, T. Jefferys, 1764. 4 p. l., vii [8]-280, [8] p. front., plates (part fold.) fold. map.

Greatly abridged translation of the author's *Opisanie zemli Kamchatki*, 1755, q.v. **Copy seen:** DLC.

9265. KRASHENINNIKOV, STEPAN PETROVICH, 1713-1755. *Opisanie zemli Kamchatki*. Sanktpeterburg, Imper. Akademiiā nauk, 1755. 2 v.: 11 p. l., 438 p.; 319 p.; 13 plates (part fold.) 6 maps (3 fold.) **Title tr.:** A description of Kamchatka.

Second edition was reprinted without change in 1786 (copy in DGS). Third edition (2 v.: xxxvi, 493 p.; x, 486 p.) was published 1818-1819 (copy in CtY). Fourth edition, 1949, q.v., was published with extensive additions. Translations of the first edition (with abridgement) were published in the principal European languages.

The first reliable description of Kamchatka, based on observations of the author and his companions, especially Georg Steller, during the Russian expedition to the far North 1734-43, a part of Bering's Great Northern Expedition.

Contains, v. 1, pt. 1, detailed geographical description of Kamchatka, its position and limits, system of rivers and lakes, p. 3-103, also information (from other persons) on Kurile Islands, p. 103-139; description of communication routes and distances on Kamchatka, p. 139-48.

Pt. 2. Natural resources of Kamchatka, its soil, climate, snow cover, rains and fogs and agricultural possibilities,

p. 149-70; volcanoes, hot springs, p. 170-87; ores and minerals, p. 187-90; vegetation, especially edible, fibrous and medicinal herbs and shrubs, p. 191-209; wildlife of land and sea, p. 210-350; data on coastal tides, p. 350-99.

v. 2, pt. 3, gives a general survey of population, p. 1-7; Kamchadals, their origin, former conditions, dwellings, calendar, astronomy, laws, character, p. 9-25; populated places, p. 25-31; utensils, implements, boats and industry, p. 31-43; dress, p. 42-49; food and its preparation, p. 49-54; dog driving, sledges, p. 54-62; war, prisoners, weapons, p. 62-71; cosmogony and religion, shamans, holidays, rites, p. 71-102; festivals, games, songs, p. 103-120; marriage, p. 120-25; birth, names, education, p. 125-30; diseases, medicine and burials, p. 130-37; languages and dialects, vocabulary, p. 137-45. Koryaks, their tribes, physical and moral characteristics, dwellings, food, use of reindeer, religion, marriage, names, burial customs, languages, dialects, vocabulary, p. 145-79; Kurils (aborigines of Kurile Islands) p. 179-88.

Pt. 4, gives a history of Kamchatka, from the time of the Russian conquest, p. 189-236; description of the Russian populated places, strongholds (ostrog), living conditions of Cossacks, relations with aborigines, p. 236-65; routes from Yakutsk to Kamchatka, p. 265-94.

Fold. maps include Kamchatka Peninsula and Sea of Okhotsk, scale 1:1,200,000; and Kamchatka River, scale 1:170,000. Plates are engravings of geographic features, natural phenomena, and inhabitants, especially Kamchadals. **Copy seen:** DLC.

9266. KRASHENINNIKOV, STEPAN PETROVICH, 1713-1755. *Opisanie zemli Kamchatki*. Moskva-Leningrad, Izd. Glavsevmorputi, 1949. 2 v. in 1: 840 p. illus., port., maps 1-24 (incl. 3 fold.) (Akademiiā nauk SSSR. Institut geografii. Geograficheskoe obshchestvo Sofuza SSR. Institut etnografii) **Title tr.:** A description of Kamchatka.

Fourth edition, edited by L. S. Berg, A. A. Grigor'ev and N. N. Stepanov, of the work first published in 1755, q.v.

This edition contains considerable new material: texts of 18th century mss. hitherto unpublished, and notes, etc., by modern specialists, including a biography of Krasheninnikov by N. N.

Stepanov, p. 13-83; text of mss. reports and letters with many valuable scientific data, p. 545-644, and a number of mss. which were only partly used in the original work, such as diaries of the author's travels in Kamchatka and Kurile Islands, p. 646-69; notes on game animals, p. 671-88; descriptions of the various races inhabiting Kamchatka and Kurile Islands, notes on the conquest of Kamchatka (two drafts), etc., p. 689-770; a supplement by A. V. Efimov on maps concerning great Russian discoveries in the 17th and first half of the 18th century, p. 771-97, representing a summary of the author's book published later; extensive footnotes throughout.

9283. KRAUSE, ARTHUR, 1851-. Ein Beitrag zur Kenntnis der Mollusken-Fauna des Beringsmeeres. I. Brachiopoda et Lamellibranchiata. II. Gastropoda und Pteropoda. (Archiv für Naturgeschichte, 1885. Jahrg. 51, Bd. 1, p. 14-40, 256-302, 3 plates) *Title tr.*: Contribution to knowledge of the molluscs of Bering Sea. 1-2.

Based on collections of the Krause brothers' expedition to the Chukotsk Peninsula and Alaska in 1881, from bays along the eastern side of the Chukotsk Peninsula. An annotated list, with localities, of one species of brachiopod, forty (including with descriptions, two new) species of lamellibranchs, sixty-six (including with descriptions, six new) species of gastropods, and one pteropod species.

Copy seen: DSI-M.

9284. KRAUSE, ARTHUR, 1851-. Das Chilcat-Gebiet in Alaska. (Gesellschaft für Erdkunde zu Berlin. Zeitschrift, 1883. Bd. 18, p. 344-68, fold. map) *Title tr.*: The Chilkat territory in Alaska.

Contains a review of the history and topography, a description of the physical features, climatic conditions, flora and fauna and (in brief) of the inhabitants (a Tlingit tribe) of the region around the head of Lynn Canal; based on observations made by the author while on the Bremen Geographical Society Expedition, 1881-82.

Map (scale 1:500,000) of the Chilkat territory shows passes to the Yukon.

Copy seen: DLC.

9285. KRAUSE, ARTHUR, 1851-. Die Dörfer der Tlingit-Indianer. (Berliner Gesellschaft für Anthropologie, Ethnologie und Urgeschichte. Verhandlungen, 1883. p. 205-208) *Title tr.*: The villages of the Tlingit Indians.

Describes the village of the Tlingit Indians in regard to sites, functions, house types, and house groupings, etc.

Copy seen: DLC.

9286. KRAUSE, ARTHUR, 1851-. Die Expedition der Bremer geographischen Gesellschaft nach der Tschuktschen-Halbinsel und Alaska. 1881-1882.

(Reisebriefe des Dr. Arthur Krause). IV. (Deutsche geographische Blätter. 1882. Bd. 5, p. 308-325, 2 maps) *Title tr.*: The expedition of the Bremen Geographical Society to the Chukotsk Peninsula and Alaska, 1881-1882. Travel summary IV.

Narrative of explorations from the head on Lynn Canal up the Chilkoot and Deje Rivers to lakes east of the Yukon divide. Describes physical geography, especially vegetation, animal life, glaciers, lakes.

Maps: Sketch of routes from head of Lynn Canal to West and East Kusawa Lakes (Canada) via Chilkoot and Deje Rivers. *Copy seen*: DLC.

9287. KRAUSE, ARTHUR, 1851- . Katalog ethnologischer gegenstände aus dem Tschuktschenlande und dem südöstlichen Alaska. Gesammelt von den Gebrüdern Dr. Dr. Arthur und Aurel Krause in den Jahren 1881/82. Bremen, 1882. 16 p. (Deutsche geographische Blätter, 1882. Bd. 5, Heft. 4, Anlage) *Title tr.*: Catalog of ethnographic objects from Chukchi land and southeastern Alaska. Collected by the brothers Dr. Arthur and Dr. Aurel Krause in 1881-82.

Contains list of 183 objects and photograph groups from the Tlingits, and 112 objects from the Chukchis, including clothing, ornaments, implements of hunting, fishing and the household, etc.

Copy seen: DLC.

9288. KRAUSE, ARTHUR, 1851- . Nudibranchiaten von Tromsø. (Tromsø, Norway. Museum. Årshefter, 1895, pub. 1897. Bd. 18, p. 94-100) *Title tr.*: Nudibranchiata from Tromsø.

List, with localities and some descriptions, of seventeen species of shell-less molluscs from the Norwegian waters near Tromsø.

Copy seen: DSI-M.

9289. KRAUSE, ARTHUR, 1851- . Quartäre Ablagerungen an der Beringstrasse. (Gesellschaft naturforschender Freunde zu Berlin. Sitzungs-Berichte, 1884. p. 14-16) *Title tr.*: Quaternary deposits along Bering Strait.

Contains description of Quaternary deposits on St. Lawrence Bay. Lists seven species of fossil shells, and gives précis of mammoth tusks also found.

Copy seen: DLC.

9292. KRAUSE, AUREL, 1848- . Einige Landschnecken von der Tschuktschen-Halbinsel und aus dem südöstlichen Alaska. (Gesellschaft naturforschender Freunde zu Berlin. Sitzungs-Berichte, 1883. p. 31-37) *Title tr.*: Some land snails from the Chukotsk Peninsula and southeastern Alaska.

Discusses twenty-three species collected by the Krause brothers, and describes one new variety.

Copy seen: DLC.

9293. KRAUSE, AUREL, 1848- . Die Tlinkit-Indianer. Ergebnisse einer Reise nach der Nordwestküste von Amerika und der Beringstrasse, ausgeführt im Auftrage der Bremer geographischen Gesellschaft in den Jahren 1880-1881 durch die Doctoren Arthur und Aurel Krause, geschildert von Dr. Aurel Krause. Jena, H. Costenoble, 1885. xvi, 420 p. illus., 4 plates, fold. map, tables. *Title tr.*: The Tlingit Indians, results of a trip to the northwest coast of America and Bering Strait, made by Dr. Arthur and Dr. Aurel Krause, in the years 1880-1881, under the auspices of the Geographical Society of Bremen, described by Dr. Aurel Krause.

Results of detailed studies in vicinity of Chilkoot, north end of Lynn Canal. Both brothers Krause spent three-and-a-half months there in winter of 1881-82. In spring, Arthur made pioneer scientific explorations of Chilkoot and Deje Rivers to Yukon basin headwaters. Aurel sailed through Chatham and Clarence Straits with brief stops en route.

Contains chapters on the journey, on the history of the northwest coast, the Tlingit territory (geography, climate, vegetation, wildlife); detailed description of Tlingit life and culture (settlements, dwellings, domestic life, fishing and hunting, trade and arts, birth, marriage and death customs, peace and war, myths, shamanism); remarks on neighboring tribes, also on missions and their efforts to civilize the Tlingits and on the language, with a Tlingit vocabulary of over a thousand words.

Appendix includes a guide to useful literature on the Tlingits and the region; p. 392-404.

Chapter 1, on the journey, includes, p. 10-13, a list of sixteen papers published on the expedition, and a list of fifteen papers, its scientific results. Most of these papers appear in this Bibliography under their respective authors' names. *Copied seen:* DLC.

9294. KRAUSE, AUREL, 1848- . Die Tlinkith. (Globus. 1883. Bd. 43, p. 221-23; 230-32) *Title tr.*: The Tlingits.

A summary description of the ethnology of the Tlingit Indians.

Copied seen: DLC.

Contains critical notes on these and related species of sedges with data on their distribution in eastern Siberia and Alaska. *Copy seen:* MH-A.

9307. KREINOVICH, E. A. Morskoi promysel giliakov derevni Kul'. (Sovetskaiia etnografiia, 1934, vyp. 5, p. 78-96) *Title tr.:* Sea-animal hunting among the Gilyaks in village of Kul'.

Contains an important study of sea animal hunting among the Gilyaks, with information on preparations, personnel, boats, magic ceremonies before and after the hunt, nets and trappings, ownership of fishing places, taboos, kinds of animals hunted and their relative value and use. Additional explanations are furnished regarding religion, social organization and native economy. *Copy seen:* DLC; DSI-M.

9308. KREINOVICH, E. A. Ocherk kosmogonicheskikh predstavlenii giliakov Sakhalina. (Etnografiia, 1929, v. 4, no. 1, p. 78-102) *Title tr.:* An outline of the cosmogonic concepts of the Gilyaks of Sakhalin Island.

Profusely documented with quotations from informants, portions of folklore and supplementary comparative material from other native groups. The data include concepts of the universe, earth, sky, winds, origin of the world, the concept of the three suns, the creation of local topography, the spirit of the sea-creator, the spirits of crests and mountains, the attitude toward the bear, the upper and lower worlds. *Copy seen:* DLC.

9309. KREINOVICH, E. A. Okhota na belukhu u giliakov derevni Puir. (Sovetskaiia etnografiia, 1935, vyp. 2, p. 108-15, 13 illus.) *Title tr.:* White grampus hunting among the Gilyaks of the village of Puir.

Contains a description of the methods and customs connected with hunting for white grampus among the Gilyaks,

with drawings made by a Gilyak hunter and two verbatim accounts of such hunts. *Copy seen:* DLC; DSI-M.

9310. KREINOVICH, E. A. Perezhitki rodovoi sobstvennosti i gruppovogo braka u giliakov. (Akademiia nauk SSSR. Institut antropologii, arkhologii i etnografii. Trudy, 1936, T. 4, Voprosy istorii doklassovogo obshchestva, p. 711-54, illus.) *Title tr.:* Survivals of clan property and group marriage among the Gilyaks.

Contains material on the occupations of the Gilyaks; examples of villages and their plans, the locations of privately, or family- or clan-owned fishing spots are given. The author shows that trade with the Russians influenced the Gilyak fishing methods, that there was an increase of privately owned fishing places, and that clan organization began to disintegrate. Clan- or privately-owned hunting territories for seal and land animals, or for fruit and nettle gathering are described. The second part of the article deals with marriage, family, difficulties of separation, the position of women, and what the author calls traces of "group marriage." *Copy seen:* NN.

Sailing directions in brief which include Kodiak and neighboring islands to the west also the Aleutian Islands (p. 85-87), the coasts of North America from Bering Strait to Southeast Alaska (p. 220-26) and (p. 235-37) the Asiatic coast from Bering Strait to the southern tip of Kamchatka Peninsula; with notes (p. 238-44) on exploration of the arctic coasts of Siberia. **Copy seen:** DLC.

9377. KRUZENSHTERN, IVAN FEDOROVICH. 1770-1846. Puteshestvie vokrug svieta v 1803, 4, 5 i 1806 godakh. Po povelieniu Ego Imperatorskago Velichestva Aleksandra Pervago, na korablakh Nadezhdie i Nevie, pod nachal'stvom flota kapitan-leitenanta, nynie kapitana vtorago ranga, Kruzenshterna. V Sanktpeterburgie v Morskoi tipografii, 1809-1813. 3 v.: xxvi, 388 p.; 471, 2 p.; iv, 449, 2 p.; tables (incl. 1 fold.) Atlas vol.: 1 p. l., CIX plates (part double, incl. maps) **Title tr.:** Voyage round the world, in the years 1803, 1804, 1805, 1806, by order of His Imperial Majesty Alexander the First, on board the ships *Nadezhda* and *Neva*, under the command of Lieutenant Commander, now Commander Kruzenshtern.

Account of the first Russian round-the-world voyage on the *Nadezhda*, 1803-06 from Kronstadt round Cape Horn to Kamchatka, Kurile Islands, Sakhalin, Japan, China, and via Cape of Good Hope to St. Petersburg, undertaken with purpose of exploring the Russian Pacific shores and of developing diplomatic and trade relations of Russia with Japan and China. The voyage included three sojourns, totaling more than three months, at Petropavlovsk in Kamchatka in the summer of 1804, and summer and fall, 1805. The account of the voyage of the *Neva* was published as Iu. F. Lisianskii, *Puteshestvie vokrug svieta*, q.v.

Contents include: Introduction with historical sketch of the exploration of Russian lands in the North Pacific and development of the Russian American Co., p. i-xxv. Description of the shores of Kamchatka, Avacha Bay and Petro-

pavlovsk, and characteristics of the Russian administration, v. 1, p. 252-65.

Description of the social life on Kamchatka, the economic conditions of Russians and Kamchadals and possibilities of economic development; the Russian maladministration and the cruelties of the Russian American Co. toward Russian and aboriginal population; Russian relations with Chukchis; v. 2, p. 113-36, and 215-85.

Results of scientific observations on the *Nadezhda* (v. 3) includes a vocabulary of Chukchi dialects, by D. I. Koshelev, p. 381-87, a Kamchadal song, p. 388-90, and tables of meteorological observations in Petropavlovsk, Kamchatka, Aug. 30-Oct. 9, 1805, v. 3, p. 443-49.

Atlas includes world map showing route of the voyage (merc. scale on equator 1:43,000,000); shores of Kamchatka from Cape Lopatka to Cape Shipunskii (scale 1:1,000,000), with panoramic view; and plan of Avacha Bay (scale 1:85,000); pictures of Aleuts and Kamchadals.

9381. KRUZENSHTERN, IVAN FEDOROVICH, 1770-1846. Voyage around the world, in the years 1803, 1804, 1805, & 1806, by order of His Imperial Majesty Alexander the First, on board the ships Nadesha and Neva, under the command of Captain A. J. von Krusenstern . . . Translated from the original German, by Richard Belgrave Hoppner . . . London, Printed by C. Roworth for J. Murray, 1813. 2 v. in 1: xxxii, 314; 404 p.

Translation of the German edition of 1811. Narrative of first Russian cir-

cumnavigation of the globe, undertaken for the purpose of developing trade relations between the Russian fur producing area of northwestern America and China. Voyage included three as-journs totalling more than three months at Petropavlovsk, Kamchatka, in the summer of 1804 and fall of 1805.

Contents include: Introduction, v. 1, with historical sketch of exploration and trade development of Russian lands of the North Pacific, and origin and growth of the American (i.e. Russian-American) Co., p. xx-xxix.

Description of current practices of the Russian-American Co. in treatment of its employees and of the Kamchadals, v. 2, p. 104-120.

Description of current social and economic conditions of the Russians and Kamchadals in Kamchatka, including notes on health, agriculture, and the town of Petropavlovsk, v. 2, p. 215-56.

Map shows routes of the expedition in the western Pacific. This edition lacks the sections on natural history contained in v. 3 of the German edition of 1810-1812; the Chukchi vocabulary, etc., in v. 3 of the Russian edition; and the atlas volume.

Contains a detailed and comprehensive study of the available data pertaining to the ancient history of the Yakuts, divided into three parts.

1. Survey of the various theories on the origin of the Yakuts, and their ancient migrations. These include the early historians, later historians, the turkologists; Yakut oral traditions, the

southern origin of the Yakuts, distribution of the Yakuts at the time of contact with the Russians.

2. The northern Yakuts: general data; cultural peculiarities; heroic poems of the reindeer-breeding Yakuts; conclusions.

3. The Vilyuy Yakuts: Introductory remarks; early stage of colonization of the Vilyuy regions; the Vilyuy as a colony of the Baykal Yakuts; later stage of Vilyuy colonization; information on the Vilyuy Yakuts from the history of central Asia; the Yakuts and the Mongolian tribes; the ethnic derivation of the Vilyuy Yakuts.

Appendices: Translation of Yakut texts; the poem, "Soluk-Bootur"; list of folklore material; the repertoire of the story-teller Peter Kolesov; examples of the Olenek folklore.

Protokoly zas'edaniï, p. 60-65) **Title tr.:** (On a trip to the Murman coast).

Contains a general account of a journey along the western coast of the White Sea to Kandalaksha and then to Kola, made by the author in 1880, during the Murman Expedition of Prof. M. N. Bogdanov; with notes on geological formations of Kola Peninsula in the region of Khibiny Mts. and Lake Imandra. **Copy seen:** DLC.

9398. KUDRIAVTSEV, V. A. Dinamika vechnoi merzloty v basseïne sredniïgo techeniïa r. Selemdzhi i svïazannye s neïu usloviïa stroitel'stva v ètom raione. (Akademiïa nauk, SSSR. Komitet po vechnoi merzlotе, Trudy, 1939. T. 8, p. 82-117, tables, diagrs.) **Title tr.:** The dynamics of permafrost in the basin of the Selemdzha River, and resulting changes in the conditions of construction in this region.

Contains description of the region (about 53°N. 132°E.), its climate, the character and distribution of permafrost. In general, permafrost in this region is in a state of degradation, though simultaneously some aggradation was encountered. It is shown that degradation is due to the favorable heat balance in the ground, caused by disappearance of natural growth and sun radiation.

Contrary to some opinions, degrading permafrost creates unfavorable conditions for construction, greatly increasing the moisture content of the ground. Measures tending to slow down this process and to promote drainage are given, also specific recommendations as to manner and time for the earth works. **Copy seen:** DGS.

VOSSELER, J. Amphipoda and Isopoda from Spitsbergen.

GIESBRECHT, W. Pelagic copepods.

KÜKENTHAL, W. Some notes on *Hyperoodon rostratus* Lilljeborg and *Beluga leucas* Gray.

Each of these papers appears in this Bibliography under its author's name.

Copy seen: DSI-M.

9407. KÜKENTHAL, WILLY, 1861-1922. Bericht über die von der Geographischen Gesellschaft in Bremen im Jahre 1889 veranstaltete Reise nach Ostspitzbergens (Dr. Kükenthal und Dr. Walter). (Petermanns geographische Mitteilungen, 1890. Bd. 36, p. 61-75, fold. map) *Title tr.:* Report on Geographical Society of Bremen Expedition to East Spitsbergen, 1889 (Dr. Kükenthal and Dr. Walter).

Contains account of the voyage, May-Aug., 1889, along the west coast of West Spitsbergen to Magdalene Fiord, and return, and to Edge Island, Barents Islands, Hinlopen Strait, King Karl's Land and Olga Strait. Includes descriptions of the physical features, rocks, vegetation, etc., of the south and east coasts of Edge Island (with a list of thirty-one plants), the east coast of Barents Island, King Karl's Land and the east coast of West Spitsbergen from Barents Island northward. Includes also remarks and data on the bathymetry, currents, and water temperatures of Olga Strait.

Copy seen: DLC.

9408. KÜKENTHAL, WILLY, 1861-1922. Bericht über die von der Geographischen Gesellschaft in Bremen veranstaltete Forschungsreise in das europäische Eismeer (Dr. Kükenthal und Dr. Walter). (Deutsche geographische Blätter, 1890. Bd. 13, p. 1-92, 2 plates, fold. map) *Title tr.:* Report of the Bremen Geographical Society Expedition to the European Arctic Ocean (Dr. Kükenthal and Dr. Walter).

The expedition in the *Berentine* and later the *Cecile Malene* cruised from Tromsø to Magdalene Fiord, northwestern West Spitsbergen, thence south and east to Whale Point on southwest Edge Island. The greater part of the summer was spent in zoological, oceanographic, meteorologic and geographic research on Edge, Barents, and Ryke Yse Islands, on King Karl's Land, and in Olga Strait.

Author gives an account of the cruise, reporting weather and ice conditions encountered, natural history and whaling or other fishing; brief but informative descriptions of the southeast coast of Edge Island, King Karl's Land, Ryke Yse Islands, and the east coast of Barents and Edge Islands; list of plants collected; and data on the depths, currents, and the water and

air temperatures of Olga Strait and lower end of Hinlopen Strait.

9409. KÜKENTHAL, WILLY, 1861-1922. Bericht über eine Reise in das nördliche Eismeer und nach Spitzbergen im Jahre 1886. (Deutsche geographische Blätter, 1888. Bd. 11, p. 1-43, plate) *Title tr.:* Report on a voyage in the Arctic Ocean and to Spitsbergen, in 1886.

The author sailed aboard a Norwegian whaler, *Hvidfisken*, Apr.-Aug. to make independent zoological observations in Svalbard waters and Greenland Sea. He gives here an account of daily activities of the whalers, description of the fiords along the west coast of Spitsbergen, and notes on the marine fauna, land mammals and birds.

Copy seen: DLC.

9410. KÜKENTHAL, WILLY, 1861-1922. Einige Notizen über *Hyperoodon rostratus* Lilljeborg und *Beluga leucas* Gray. (In his: Beiträge zur Fauna Spitzbergens. *Pub.* in Archiv für Naturgeschichte, 1889. Jahrg. 55, Bd. 1, p. 165-68) *Title tr.:* Some notes on *Hyperoodon rostratus* Lilljeborg and *Beluga leucas* Gray. (Contributions to Spitsbergen fauna).

Descriptive notes on a whale of northern Greenland Sea and the white whale of Svalbard waters.

Copy seen: DSI-M.

9411. KÜKENTHAL, WILLY, 1861-1922. Das nördliche Eismeer und Spitzbergen. (Gesellschaft für Erdkunde zu Berlin. Verhandlungen, 1887. Bd. 14, p. 261-72) *Title tr.:* The Arctic Ocean and Spitsbergen.

Account of the author's voyage on a whaler, May-Aug., 1886, in the Greenland Sea; description of the whaling, and of ice conditions in Ice Fiord, West Spitsbergen, where the ship was held for several weeks by the ice.

Copy seen: DLC.

9412. KÜKENTHAL, WILLY, 1861-1922. Opheliiden. (In his: Beiträge zur Fauna Spitzbergens. *Pub.* in: Archiv für Naturgeschichte, 1889. Jahrg. 55, Bd. 1, p. 147-48) *Title etc. tr.:* Opheliids. (Contributions to Spitsbergen fauna)

Description of two (one new) species of polychaetous annelids, collected during the author's zoological trip in 1886.

Copy seen: DSI-M.

9413. KÜKENTHAL, WILLY, 1861-1922. Über die Aufgaben zoologischen Forschung im nördlichen Eismeer. (Deutsche geographische Blätter, 1889. Bd. 12, p. 1-4) *Title tr.:* On problems of zoological research in the Arctic Ocean.

General discussion of the interest in arctic biology, changing from classic taxonomy to comparative morphology, ecology, and zoogeography.

Copy seen: DLC.

9414. KÜKENTHAL, WILLY, 1861-1922. Über seine Reise nach Ostspitzbergen im Jahre 1889. (Gesellschaft für Erdkunde zu Berlin. Verhandlungen, 1890. Bd. 17, p. 48-55) *Title tr.:* On his trip to East Spitsbergen, in 1889.

A lecture to the Society, giving an account of the Geographical Society of Bremen Expedition in 1889, which explored the east coast of West Spitsbergen, Edge Island and King Karl's Land.

Copy seen: DLC.

9415. KÜKENTHAL, WILLY, 1861-1922. Die Wale der Arktis. (In: Fauna arctica, 1900. Bd. 1, p. 179-234, (illus.) Based on published accounts and studies.

Contains a full discussion of the morphology of whales, and a list, with synonymy and descriptions of twelve species found in arctic seas.

Copy seen: DA.

9464. KUPLETSKII, B. M. Shchelochnye proiavleniia v oblasti razvitiia Sibirskikh trappov (Severo-Zapadnaiu chast'). (Nedra Arktiki, 1947. No. 2, p. 3-36, map, diagr.) *Title tr.:* The alkaline rocks of the northeastern part of the area of the development of Siberian traps.

Study of the Kotuy River region of Krasnoyarsk Province.

"The alkaline rocks occurring as veins and schlieren in the trap area of the northwestern part of the Siberian platform constitute a series, ranging from augite through analcime augite to monchiquite and alnoite. The series is characterized by increasing alkalinity but with a constant magnesium and potash content. The rocks are genetically closely related to the trap rocks of the region. They were probably formed by crystallization differentiation of trap magma, during which process the assimilation of carbonate rocks did not play an essential role."—Geological Society of America. Bibliography and index of geology.

Po-ljarnyi botanicheskii sad i Institut biokhimii im. A. N. Bakha) *Title tr.*: Lichens and their utilization.

Contains general data on the biology, chemical content and geographic distribution of lichens (*Cladonia*, *Alectoria*, *Stereocaulon* and *Usnea*) in northern and arctic U.S.S.R. The second part deals with utilization of lichens as fodder for reindeer and domestic animals, as food (admixture to flour, lichen starch, etc.), also as raw material for the preparation of alcohol, molasses and glucose for technological uses. Special attention is given to description of the authors' method of producing glucose from lichens, with some statistical and economic data.

Berlin, Druck von Mesch & Lichtenfeld, 1879. 69 p. *Title tr.*: Enumeration of the plants collected in western Siberia by K. Graf von Waldburg-Zeil in 1876. Botanical inaugural dissertation. [Friedrich-Wilhelms-Universität, Berlin.]

Result of the West Siberian expedition of the Geographical Society of Bremen under Dr. O. Finsch, 1876.

Contents tr.: 1. Report on the course of the expedition. 2. Arctic florula of the Ob region. 3. Enumeration of the plants collected in western Siberia by Karl Waldburg-Zeil in 1876.

Chapter 2 contains a list of one hundred fifty-five species of vascular plants

known from the western Siberian Arctic, with data on their distribution, and chapter 3, another list of four hundred thirty-two species collected in 1876, with notes on general and local distribution.

Copy seen: NNBG.

Contains data on application of the geobotanical method to the study of arctic flora, which has very little in common with alpine flora according to the author; discussion of typical plant formations in arctic regions and anatomical and biological characteristics of arctic plants. **Copy seen:** DLC.

9513. KUZNETSOV, NIKOLAI IVANOVICH, 1864-1932. "Laidy" v nizov'iax r. Eniseia, ikh stroenie, obrazovanie i mesto v klassifikatsionnoi skheme bolotnolesnykh obrazovani. Leningrad, 1932. 40 p. table map. (Akademiia nauk SSSR. Poliarnaiia komissia. Trudy, 1932. Vyp. 12) **Title tr.:** Laidy in the valley of the lower Yenisey, their structure, origin and place in the classification scheme for the woody formations of swampy regions.

Contains definition of the native term "laidy": a tree-less part of the forest tundra terrain with peat substratum, permafrost not far from the surface, and knolls with low shrubs, mosses and liverworts as vegetation. Three types of "laidy" are distinguished on the basis of the vegetation which covers them. Each type is described with a list of plants found in the lower reaches of

the Yenisey River. Distribution of "laida" is indicated, conditions and causes of their origin, and the peat mounds on them, as well as a provisional classification of "laida" type of terrain, which genetically may be considered "deformed lakes" of the upper-tundra region. A detailed map of the region is given. **Copy seen:** NN.

9550. LAESTADIUS, LARS LEVI, 1800-1861. Anmärkningur om de nordiska arterna af släktet *Agrostis*. (Botaniska notiser, 1856, no. 5-6, p. 78-83) *Title tr.*: Notes on northern species of the genus *Agrostis*.

Contains critical notes on northern grasses, *Agrostis stolonifera*, *A. alpestris*, *A. hyperborea* and their forms, occurring in Swedish and Finnish Lapland.

Copied seen: MH-A.

9551. LAESTADIUS, LARS LEVI, 1800-1861. Anmärkningur om der former af *Triticum*, som förekomma i Norden. (Botaniska notiser, 1856, no. 5-6, p. 74-78) *Title tr.*: Notes on some forms of *Triticum* occurring in the North.

Contains critical notes on nine forms of cereal grass *Triticum caninum* & *T. repens* growing in the northern regions, including seven occurring in Swedish Lapland and arctic Norway and Finland.

Copied seen: MH-A.

9552. LAESTADIUS, LARS LEVI, 1800-1861. Anmärkningur om formerna af *Nuphar luteum*. (Botaniska notiser, 1858, no. 9, p. 137-43) *Title tr.*: Notes on the forms of *Nuphar luteum*.

Contains Latin descriptions of nine forms of the pond lily *Nuphar luteum*, including six native to Lule and Torne Lappmark.

Copied seen: MH-A.

9553. LAESTADIUS, LARS LEVI, 1800-1861. Anmärkningur om *Gnaphalium sylvaticum*. (Botaniska notiser, 1856, no. 5-6, p. 84-87) *Title tr.*: Notes on *Gnaphalium sylvaticum*.

Contains Latin descriptions of seven forms of the herbaceous genus *Gnaphalium sylvaticum*, including f. *subsupinum* from Pajala, and two forms of *G. supinum* native to Lule and Torne Lappmark.

Copied seen: MH-A.

9554. LAESTADIUS, LARS LEVI, 1800-1861. Några anmärkningur om *Scirpus lacustris*. (Botaniska notiser, 1856, no. 5-6, p. 83-84) *Title tr.*: Some comments on *Scirpus lacustris*.

Contains critical notes on *Scirpus lacustris* of the sedge family (Cyperaceae), occurring in Swedish and Finnish Lapland.

Copied seen: MH-A.

9555. LAESTADIUS, LARS LEVI, 1800-1861. Om formerna af *Luzula campestris* och *arcuata*. (Botaniska notiser, 1858, no. 9, p. 143-45) *Title tr.*: On forms of *Luzula campestris* and *L. arcuata*.

Contains critical notes on wood-rushes, two forms of *L. campestris* (from Greenland and Torne Lappmark) and Latin diagnoses of three forms of *L. arcuata* native to Swedish Lapland; contains also references to some other arctic *Luzula* species.

Copied seen: MH-A.

9556. LAESTADIUS, LARS LEVI, 1800-1861. Om formerna af *Thalictrum*

flavum och *simplex*. (Botaniska notiser, 1858, no. 8, p. 121-26) **Title tr.:** On forms of *Thalictrum flavum* and *T. simplex*.

Contains Latin descriptions of four forms of the herbaceous genus *Thalictrum flavum*, including three native to Torne Lappmark in northern Sweden, and eleven forms of *T. simplex*, with seven native to Swedish Lapland.

Copy seen: MH-A.

9557. LAESTADIUS, LARS LEVI, 1800-1861. Species, subspecies, varieties and formae, nec non proles hybridae, in Lapponia hucusque observatae, generis *Betulae*. (Botaniska notiser, 1856, no. 7-8, p. 103-111, plates 2-3) **Title tr.:** Species, subspecies, varieties and forms of *Betula*, observed in Lapland, with some hybrids of the same.

Contains Latin diagnoses and critical notes on fifteen species and numerous forms (some described as new) of birches (*Betula*) growing in Swedish Lapland.

Copy seen: MH-A.

Contains a list of fifty-four species collected near Torne Träsk in northern Sweden, in the summer of 1907 and 1908, including data on habitat and Latin diagnoses of six new forms.

Copy seen: MH-A.

9560. LAGERBERG, TORSTEN, 1882- . Ny lokal för *Sedum villosum* i Torne Lappmark. (Svensk botanisk tidskrift, 1929. Bd. 23, häfte 3, p. 388-89) **Title tr.:** A new locality for *Sedum villosum* in Torne Lappmark.

Contains a report of the finding of *Sedum villosum* near Torne Träsk, in the Abisko region of northern Sweden, a new locality for that species.

Copy seen: MH-A.

9561. LAGERCRANTZ, ELIEL, 1894- . Sprachlehre des Nordlappischen nach den Seelappischen Mundarten. Oslo [Glückstadt und Hamburg, Druck von J. J. Augustin] 1929. 369 p. incl. 13 plates on 7 leaves, tables. 30x23cm. (Oslo. Etnografiske museum. Bulletin 3) **Title tr.:** Grammar of northern Lappish according to the maritime Lapp dialect.

Contains introduction (p. 5-9) on the Maritime Lapps, their areal, population, etc., and grammar, parts of speech, accidence, phonetics, etc.

Copy seen: DLC.

9562. LAGERCRANTZ, ELIEL, 1894- . Sprachlehre des Westlappischen nach der Mundart von Arjeplog. Helsinki, Suomalais-ugrilainen seura, 1926. 365 p. diagrs., tables. (Suomalais-ugrilainen seura. Toimituksia, 55) **Title tr.:** Grammar of the west Lappish tongue (Arjeplog dialect).

Includes instruction in the phonetics of the dialect of Arjeplog (66°5'N. 18°30'E.)

Copy seen: DLC; NNC.

9563. LAGERCRANTZ, ELIEL, 1894- . Strukturtypen und Gestaltwechsel im Lappischen. Helsinki, Druck von J. J. Augustin in Glückstadt und Hamburg, 1927. 425 p. diagrs., tables. **Title**

tr.: Structure types and form changes in the Lappish language.

A contribution to the etymology of the Lappish language and dialects, particularly those of the western Lapps in Arjeplog, Sweden (66°5'N 18°30'E.) and of the eastern Lapps at Polmak in northernmost Finland (70°1'N. 28°E.), stressing differences in idiomatic expressions. *Copy seen:* NNC.

9564. LAGERCRANTZ, ELIEL, 1894-. Synopsis des Lappischen. (Oslo. Universitet. Etnografiske museum. Skrifter, 1941. Bd. 2, Hefte 4, p. 227-349 [1] *Title tr.*: Synopsis of Lappish.

Contains a characterization and analysis of the Lappish language and of its dialects; detailed texts in Lappish and German, of legends, tales, and conversations from fourteen localities grouped according to five Lappish languages, with introductory characterizations of the dialect of each locality; and a discussion of the linguistic relationships between Lappish and other Finno-Ugrian languages. *Copy seen:* DSI.

9565. LAGERCRANTZ, ELIEL, 1894-. Wörterbuch des Südlappischen nach der Mundart von Wefsen. Oslo [etc., etc.], H. Aschehoug & Co. (W. Nygaard), 1926. 214 p. (Instituttet for sammenlignende Kulturforskning, Serie B: Skrifter, 4) *Title tr.*: Dictionary of south Lappish, according to the Vefsen dialect.

Lists nearly 3200 words, with German equivalent and commentaries, from the Vefsen (Herred) region. *Copy seen:* DLC; NNC.

9566. LAGERHEIM, NILS GUSTAF, 1860-1926. Beiträge zur Flora der Bären-Insel. 2. Vegetabilisches Süsswasser-Plankton aus der Bären-Insel (Beeren Eiland). Stockholm, P. A. Norstedt, 1900. 25 p. illus. (Svenska vetenskapsakademien. Handlingar. Bihang. Bd. 26, afd. 3, no. 11) *Title tr.*: Contributions to the flora of Bear Island. 2. Fresh-water phytoplankton from Bear Island.

General discussion and list, with synonymy and localities, of species collected in Ella Lake and at Russian Harbor in the southern part of Bear Island during the Swedish Expedition to Bear Island, 1899. *Copy seen:* DLC.

9567. LAGERHEIM, NILS GUSTAF, 1860-1926. Ein Beitrag zur Schneeflora Spitzbergens. (Nuova notarisia, Apr. 1894. Ser. 5, p. 650-54) *Title tr.*: Contribution to the snow flora of Spitsbergen.

Introductory notes on algae species causing red and green snow on West Spitsbergen and its coastal islands; and a list with notes and some descriptions of three species of Myxophyceae, four species of Chlorophyceae and one diatom, designated with West Spitsbergen as locality, in an herbarium collection. *Copy seen:* DA.

9568. LAGERHEIM, NILS GUSTAF, 1860-1926. Mykologiska bidrag. III. Ueber einige auf *Rubus arcticus* L. vorkommende parasitische Pilze. (Botaniska notiser, 1887, p. 60-67, illus.) *Title tr.*: Mycological contributions III. On some fungi parasitic on *Rubus arcticus* L.

Contains critical notes on five species of fungi parasitic on bushes of various *Rubus* species, including *Puccinia peckiana* and *Phragmidium rubi* affecting *Rubus arcticus* and found in Lule Lappmark and Norrbotten. *Copy seen:* MH-A.

9569. LAGERHEIM, NILS GUSTAF, 1860-1926. Mykologiska bidrag. V. Ueber eine neue *Peronospora*-Art aus Schwedisch-Lappland. (Botaniska notiser, 1888, p. 49-51, illus.) *Title tr.*: Mycological contributions. V. On a new species of *Peronospora* from Swedish Lapland.

Contains a Latin description of, and critical notes on a new fungus, *Peronospora lapponica* n. sp. from Qvikkjokk, Lule Lappmark, and comparison with some other related species of the same genus. *Copy seen:* MH-A.

9570. LAGERHEIM, NILS GUSTAF, 1860-1926. Mykologiska bidrag VII. Ueber *Accidium astragali* Eriksson. (Botaniska notiser, 1890, p. 272-76) *Title tr.*: Mycological contributions VII. On *Accidium astragali* Eriksson.

Contains a Latin description of *Uromyces (Uromycopsis) lapponicus* n. sp., a parasitic fungus synonymous to *Accidium astragali* Eriksson, native to Lule Lappmark, and critical notes on related species of the same genus. *Copy seen:* MH-A.

9571. **LAGERHEIM, NILS GUSTAF, 1860-1926.** Om växt-och djurlämningarna i André's buoy. (*In: Undersökningar beträffande den på Kung Karls land funna stora flytbojen från André-expeditionen*, pt. 3. *Pub.* in Ymer, 1899, arg. 19, p. 425-43) *Title tr.:* On the remains of plants and animals in André's buoy.

Annotated list of species found in the buoy, with discussion of the course of its drift and the length of time it remained on King Karls Land (Svalbard)

Copy seen: DLC.

9572. **LAGERHEIM, NILS GUSTAF, 1860-1926.** *Phaeocystis*, nov. gen., grundadt på *Tetraspora poucheti*, Har. (*Botaniska notiser*, 1893, p. 32-33) *Title tr.:* *Phaeocystis* n. gen. based on *Tetraspora poucheti* Har.

Contains a republication of *Tetraspora poucheti* Hariot n. sp., a marine alga found by G. Pouchet between Lofoten Island and Varanger Fiord in 1882, and a new generic name, *Phaeocystis* n. gen., established by the author on the basis of this species.

Copy seen: MH-A.

9573. **LAGERHEIM, NILS GUSTAF, 1860-1926.** Studien über arktische Cryptogamen. I. Ueber die Entwicklung von *Tetraëdron* Kütz. und *Euastropsis* Lagerh., eine neue Gattung der Hydrodictyaceen. (Tromsø, Norway. Museum. Aarshefter, 1895, Bd. 17, p. 1-24, plate 1) *Title tr.:* Studies of arctic cryptogams. I. On the development of *Tetraëdron* Kütz. and *Euastropsis* Lagerh., a new genus of Hydrodictyaceae.

Contains a study of the taxonomy and phylogeny of *Tetraëdron* Kütz. and *Euastropsis* Lagerh. n. gen., Latin description of this new genus of freshwater algae and *Euastropsis* (*Euastrum*) *richteri*, native to the island of Tromsø, northern Norway.

Copy seen: MH-Z.

9574. **LAGERHEIM, NILS GUSTAF, 1860-1926.** Uredineae Herbarii Eliae Fries. (Tromsø, Norway. Museum. Aarshefter, 1895, Bd. 17, p. 25-132) *Title tr.:* Uredinales of Elias Fries' Herbarium.

Contains an enumeration of over two hundred fifty species of parasitic rust fungi (order Uredinales) from various countries in the Elias M. Fries Herbarium of the Botanical Museum, Upp-

sala University, with descriptions of new or noteworthy species, synonymy, literature citations, data on distribution, bibliography (102 items), indices of rust species and host plants and a list of forty-nine types of rusts deposited in this herbarium; includes *Puccinia epilobii*, native to eastern Finnmark, Norway.

Copy seen: MH-Z.

9575. **LAGERHEIM, NILS GUSTAF, 1860-1926.** Verzeichnis von parasitischen Pilzen aus Södermanland und Bohuslän. (*Svensk botanisk tidskrift*, 1909. Bd. 3, häfte 1, p. 18-40) *Title tr.:* An enumeration of parasitic fungi from Södermanland and Bohuslän.

Contains detailed data on the history and geographical distribution of *Uromys solidaginis* a parasitic fungus, native to arctic Scandinavia, occurring also in Södermanland and Bohuslän, southern Sweden. *Copy seen:* MH-A.

9576. **LAGERKRANZ, J.** Observations on *Catabrosa aquatica* in Greenland. (*Svensk botanisk tidskrift*, 1937. Bd. 31, häfte 1, p. 117-21, illus.)

Contains botanical notes on *Catabrosa aquatica*, an aquatic grass observed first by the author in Greenland in 1934, also two years later. Includes data on habitat, associated plants and distribution in other countries, the Tromsø (Norway) and Arkhangelsk regions, arctic Siberia, and St. Lawrence Bay on Chukotsk Peninsula.

Copy seen: MH-A.

9577. **LAGERSTEDT, NILS GERHARD WILHELM, 1847- .** Sötvattensdiatomaceer från Spetsbergen och Beeren Eiland. Stockholm, P. A. Norstedt & Söner, 1873. 52 p. illus., 2 plates (Svenska vetenskapsakademien. Handlingar. Bihang. Bd. 1, no. 14) *Title tr.:* Freshwater diatoms from Spitsbergen and Bear Island.

Contains a systematic list of eighty-four desmidian algae collected by the Swedish Spitsbergen Expedition of 1861, the Swedish Arctic Expedition, 1868, and the Swedish Expedition to Greenland, 1870.

Excerpts containing Latin descriptions of twelve new species and twelve varieties were published as his *Diatomaceen von Spitzbergen und Beeren Eiland*, in *Hedwigia*, 1874, Bd. 13, no. 8, p. 116-22. (Copy in MH-F).

Contains discussion of the Jurassic layer of over one hundred feet in the region of the lower Lena, which at the mouth of the Olenek, overlies a Triassic formation; and an annotated list of over twenty molluscan fossils characterizing the layer. *Copy seen:* DSL.

LAHUSEN, JOSEF, *see* LAUZEN, IOSIF IVANOVICH, 1846-.

9580. LAING, HAMILTON MACK, 1883- , and others. Birds and mammals of the Mount Logan Expedition. (Canada. Dept. of Mines. National Museum of Canada. Bulletin no. 56. Annual report for 1927, pub. 1929. p. 69-107)

Contents: Laing, H. M., and P. A. Taverner. Notes on birds collected and observed in Chitina River region, Alaska, p. 72-95.

Laing, H. M., and R. M. Anderson. Notes on mammals of upper Chitina River region, Alaska, p. 96-107.

Lists, with notes on habits and locations, of eighty-five birds and seven-teen mammals. Observed by the first author, who accompanied the Canadian Alpine Club party in 1925.

Copy seen: DLC.

9581. LAING, HAMILTON MACK, 1883- . Birds collected and observed during the cruise of the Thiepval in the North Pacific, 1924. Ottawa, F. A. Acland, King's Printer, 1925. 2 p. l., 64 p. incl. 2 plates, front. (Canada National Museum. Bulletin no. 40, Biological ser. no. 9)

A list, with notes on synonymy and habits, of one hundred twenty-five species, mostly from the Aleutian Islands and Kamchatka. *Copy seen:* DLC.

9582. LAING, JOHN, surgeon. An account of a voyage to Spitzbergen; containing a full description of that country, of the zoology of the North, and of the Shetland Isles; with an account of the whale fishery . . . With an appendix, containing some important observations on the variation of the compass, etc. . . . London, Printed for J. Mawman, London; and David Brown, Edinburgh, 1815. 3 p. l., 171, [2] p.

Results of the author's voyages in Greenland Sea as ship surgeon on whalers in 1806 and 1807. He describes the ice conditions, the walrus, seal, polar bear, reindeer, arctic fox and few of the birds near West Spitsbergen; also, the whaling methods.

Copy seen: NNStef.

9583. LAING, JOHN, surgeon. A voyage to Spitzbergen; containing an account of that country, of the zoology of the North; of the Shetland Isles; and of the whale fishery. With an appendix, containing an historical account of the Dutch, English, and American whale fisheries; some important observations on the variation of the compass, etc.; and some extracts from Mr. Scoresby's paper on "Polar ice". 2d ed. Edinburgh, Printed for Adam Black, 1818. 2 p. l., 165 p., 1 l.

This is second edition of the author's *Account*, 1815, q.v., with the addition of appendices. A third edition was published in Edinburgh by W. & C. Tait, 1820, and a fourth edition, Edinburgh for the author, 1822.

Copy seen: DLC (1820); NNStef (1818, 1822).

9584. LAKE, SIMON, 1866-. The development of the under ice submarine. (*In*: Wilkins, Sir G. H. Under the North Pole, 1931, p. 200-232)

Account of the author's experimentation with submarines designed for navigation in waters covered by surface ice, and his advocacy of submarines for north polar exploration; remarks on his *Argonaut*, built 1896-97 and the *Protector*, 1902, and the assignment and remodeling of a U. S. Navy submarine for Wilkins' projected expedition. *Copy seen*: DLC.

9585. LAKHTIN, V. L. Bor'ba za Arktiku. (*In*: Obshchestvo izucheniia Sovetskoi Azii. Vozdushnye puti Severa, 1933, p. 108-136, maps) *Title tr.*: The struggle for the Arctic.

Discussion of the growing importance of arctic regions, their strategic and economic significance, plans (international, Swedish, German, English) for establishing permanent air communication between Europe and America over the Arctic Ocean; the struggle for control of arctic areas; historical and legal grounds for claims of various countries; the Russian-American convention of 1867, and the fundamental declaration of the Central Committee of the Soviet Union of April 15, 1926; arctic lands (discovered and undiscovered), ice-bound areas, seas and air in their international legal aspect; with a sketch map of existing and projected air lines in the northern regions of the U.S.S.R. (scale 1 in:850 km.), and one showing the division of the arctic oceanic area on the sector principle. *Copy seen*: DLC.

9586. LAKTIONOV, A. F. Aisbergi v raione Severnoi Zemli. (Problemy Arktiki, 1940, no. 9, p. 92-94) *Title tr.*: Icebergs in the region of Severnaya Zemlya.

Position of icebergs seen in 1939 and 1940; explanation of their presence. *Copy seen*: DLC.

9587. LAKTIONOV, A. F. Besposadochnyi perelet po marshrutu Moskva-Severnii poliūs-Severnaia Amerika. (Problemy Arktiki, 1937, no. 4, p. 49-53, port., map) *Title tr.*: Non-stop flight along the route Moscow-North Pole-North America.

Account of the flight of Chkalov, Beliaikov and Baidukov in the NO-25 June

18-20, landing near Portland, Oregon. Summary in English. *Copy seen*: DLC.

9588. LAKTIONOV, A. F. 25-letie otkrytiia Severnoi Zemli. (Problemy Arktiki, 1938, no. 3, p. 119-21) *Title tr.*: 25th anniversary of the discovery of Novaya Zemlya.

Historical note on the search for, and discovery of Novaya Zemlya. *Copy seen*: DLC.

9589. LAKTIONOV, A. F. Dvadsat' piat' let nauchnoi raboty v Arktike. (Sovetskaiia Arktika, 1937, no. 5, p. 38-41) *Title tr.*: Twenty-five years of scientific work in the Arctic.

Biographical sketch of V. I. U. Vize and brief account of his scientific work. *Copy seen*: DLC.

9590. LAKTIONOV, A. F. Ekspeditsiia na l/p "Sadko". (Severnii morskoi put', 1936. No. 5, p. 90-96) *Title tr.*: The expedition of the ice-breaking steamer *Sadko*.

A short account of the expedition to the north polar sea in 1935, under the leadership of G. A. Ushakov, and of the scientific work done. Summary in English. *Copy seen*: DLC.

9591. LAKTIONOV, A. F. Ekspeditsiia na ledokol'nom parokhode "Sedor" v severo-vostochnuiu chast' Karskogo moria v 1934g. (Leningrad. Vsesoiuznyi arkticheskiĭ institut. Trudy, 1936. T. 64, p. 7-41, illus.) *Title tr.*: Expedition on the ice-breaking steamer *Sedor* into the northeastern portion of the Kara Sea in 1934.

A description of the expedition organized by the Arctic Institute of the U.S.S.R. and the Hydrographic Dept. of the Main Administration of the Northern Sea Route, led by R. L. Samoilovich, Director of the Institute, with the author as head of scientific work. Notes on personnel, course of the cruise July 19-Oct. 2, 1934 in Kara and Barents Sea; outline of scientific work and summary of results (no data) on current, depths, temperatures, salinity, ice conditions, drift, bottom fauna and sediments, tides; survey of Vize and Lonely (Uyedineniia) Islands, and correction of their position on maps; hydrobiological and microbiological investigations; distribution of sea animals, physical and chemical properties of sea ice; etc. *Illus.* show types and forms of ice encountered.

Translation in English is included,
p. 29-41. **Copy seen:** DLC.

9636. LAMONT, JAMES, 1828-1913. Seasons with the sea-horses; or, Sporting adventures in the northern seas. New York, Harper & Brothers, 1861. 2 p. l., [ix]-xiii, [1] p. 1 l., [17]-282 p. incl. 6 plates. front., fold. map.

During a brief period in summer 1858 and in 1859 the author cruised the Svalbard waters hunting walrus, and shooting reindeer, polar bear and other game. He describes here his experiences, gives chapters on the walrus, reindeer, arctic fox, polar bear, and other wildlife of West Spitsbergen, a brief history of the early voyagers and hunters on the island and good notes on ice conditions, with reference to the polar sea. *Copy seen:* DLC; NNSStef.

9637. LAMONT, JAMES, 1828-1913. Yachting in the arctic seas; or, Notes of five voyages of sport and discovery in the neighbourhood of Spitzbergen and Novaya Zemlya. London, Chatto & Windus, 1876. viii, 387 p. illus., 22 plates (part fold.) 2 fold. maps.

Contains an account of the author's cruise in the *Diana* in summer 1869, in southern Barents Sea, along the west coast of Novaya Zemlya to about 75°N., westward along the ice line to northern West Spitsbergen, then south and eastward into the waters of Stor Fiord and Edge Island. Includes description of walrus, seal and reindeer hunting, historical notes, remarks on ice conditions and on the coasts visited.

Appendix: Table of chronicles on the Spitsbergen, Barents, and Kara Seas from the voyage of Ohthere (890 A.D.) to 1875. *Copy seen:* DLC; NNSStef.

9638. LAMPE, K. Die Polargebiete in der internationalen Politik. (Arkhis, 1930. Jahrg. 3, p. 74-90, incl. 2 sketch maps) *Title tr.:* The polar regions in international politics.

Discussion of sovereignty in the Arctic and Antarctic, international law, with remarks on the waters.

Copy seen: DLC; NNSStef.

9639. LAMPLUGH, GEORGE WILLIAM, 1859-1926, and others. On the shelly moraine of the Sefström Glacier

and other Spitsbergen phenomena illustrative of British glacial conditions. (Yorkshire Geological Society. Proceedings, 1911, pub. 1912. New ser. v. 17, p. 216-41, illus., 13 plates)

Record of the author's observations made during the Spitsbergen excursion of the 11th International Geological Congress, 1910, into the several branches of Ice Fiord. Notes on former glaciation and present conditions, the Sefström Glacier and its remarkable fluctuations, Cora Island covered by the Sefström moraine, with a description of its cauldrons, by Dr. A. Strahan; the author's further detailed description of the moraine, with a *List of shells, etc. from Cora Island*, by G. DeGeer; further description of moraines of the Nordenskiöld and Von Post Glaciers. **Copy seen:** DGS.

9640. LA NAUZE, C. D. A police patrol in the North-West Territories of Canada. (Geographical journal, May 1918. v. 51, p. 316-23, 2 plates)

Contains an account of a journey from Fort Norman to Great Bear Lake, thence across to, and down the Coppermine River and along the northern coast to Bernard Harbour; descriptions of the country, the customs of the Copper Eskimos, and the hunting and fishing possibilities on Coronation Gulf to the Mackenzie delta. Includes the narrative of the police search for two Eskimos, their arrest, trial, and sentence for murder.

v. 1. contains an account of the Kruzenshtern Expedition of 1803-1807 till Langsdorff's separation from it in Kamchatka in 1805. v. 2 contains an account of his experiences in America, Kamchatka and Siberia, of which the Alaskan and Kamchatka sections are

described under the author's *Voyages and travels* . . . 1803-1807, 1813-14, q.v.
Copy seen: DLC.

9665. LANGSDORFF, GEORG HEINRICH, *Freiherr von*, 1774-1852. *Voyages and travels in various parts of the world, during the years 1803, 1804, 1805, 1806, and 1807*. By G. H. von Langsdorff . . . Illustrated by engravings from original drawings. London, H. Colburn; [etc., etc.] 1813-14. 2 v.: xxi, 362, [6] p.; [viii,] 386. [6] p.; 21 plates (incl. fronts. ports. music) fold. map.

Narrative of the author's experience on the Kruzenshtern expedition of 1803-07, in which Langsdorff participated as physician. The author left the expedition at Kamchatka 1805, visited the Aleutian Islands, the northwest coast of America, and returned, via Kamchatka, overland across Siberia to St. Petersburg. Vol. 2 of this narrative is a record of his travels after he left Kruzenshtern, q.v.

Vol. 2 contains account of the voyage and description of the Pribilofs, Unalaska, Kodiak and Sitka (Baranof) Islands, and the mainland around Norfolk Sound; particularly the aboriginal inhabitants, their material culture, religion, customs and social relations; the settlements of the Russian American Co. Account of the wintering on Kamchatka, with remarks on the Kamchadals and extensive notes on natural conditions, vegetation and wildlife, Kamchadal dogs and sledges, political occurrences and social life at Petropavlovsk; a trip among the Koryaks with remarks on their customs and reindeer; voyage to Okhotsk, journey westward via Yakutsk to St. Petersburg. Includes lists of animals and plants observed.

Indians of the United States, contributions by members of the delegation, and by advisers to the Policy Board of the National Indian Institute for the Second Inter-American Conference on Indian Life, convened at Cuzco, Peru, October 10-20, 1948 [i.e. June 24-July 4, 1949])

Describes changes of Eskimo economy under impact of white civilization, and suggests administrative and socio-economic patterns for the development of land utilization satisfactory for both aboriginal and white settlements in Alaska.

Copy seen: CaMAI; DI (has also *Summaries of Contributions by members of the delegation* [etc.]).

9675. LANTIS, MARGARET, 1909- . The social culture of the Nunivak Eskimo. (American Philosophical Society. Transactions, 1946. New ser. v. 35, p. 153-323, illus., 8 plates, sketch map)

Based on a year's residence on Nunivak Island, 1939-40, financed by the American Philosophical Society and the Dept. of Anthropology, University of California. This paper consists of the first two parts of a projected four-part study (1, non-material culture; 2, mythology; 3, material culture, and 4, the psycho-dynamics of Nunivak society.) of West Alaskan Eskimos living on Nunivak Island (60°N. 166°W.)

Contents: 1. Non-material culture: Natural environment and economic factors, ceremonialism, religion, recreation (songs, dancing, sport and games, string figures), life crises, social organization, and summary (example of generic Eskimo culture; local Bering Sea culture, and antiquity of Nunivak culture).

2. Mythology: Translations of forty-one tales with text and translation of four additional myths.

Appendices: 1. Households. 2. Plants. 3. Personal names. Bibliography (16 items).

9689. LAPPO, S. D. Spravochnaiā knizhka poliarnika; kratkie svedeniā ob okeanografii, klimate, zhivotnom mire i naselenii Arktiki. [Moskva] Izd-vo Glavsevmorputi, 1945. 423 p. illus., map (part fold.) tables. Errata slip inserted. **Title tr.:** The handbook of the polar worker; concise information on the oceanography, climate, animals, and population of the Arctic.

A basic reference book intended for "seamen, fliers, employees of polar stations, various enterprises, and expeditions of the Northern Sea Route Administration." In dictionary and tabular form, this work offers general definitions of concepts (including dialect terms), as well as much specific information about the Soviet sector of the Arctic.

The first six chapters are based on the author's *Okeanograficheskii spravochnik arkticheskikh morsk SSSR*, q.v., here revised. Chapter IX was written by members of the Biological Faculty and the Museum of Zoology of Moscow University. Chapter X is based on the unpublished work of A. F. Anisimov, *Narody Severa*. **Contents**

tr.: 1. Water bodies. 2. Forms of land and coasts. 3. Relief and surface of coasts. 4. Relief and the floor of the seas. 5. The surface of the sea (level, currents, disturbances, and other phenomena). 6. Ice. 7. Climate. 8. Various geophysical phenomena. 9. Animals. A. Invertebrates. B. Vertebrates: Fishes, Birds, Mammals. 10. Population. 11. Administrative divisions of the coasts [of the U.S.S.R.] and populated places.

Appendices: 1. The geographical limits of oceans and seas. 2. Areas of continents and oceans. 3. Limits and depths of the arctic seas. 4. Principal islands of the U.S.S.R. arctic seas. 5. Principal straits of the arctic seas. 6. Principal rivers flowing into the Arctic Ocean and their tributaries. 7. The mountains of the coasts and islands of the arctic seas. 8. Information about high tides. 9. The magnitude of magnetic deviation. 10. Duration of day in hours and minutes. 11. Duration of evening twilight in minutes. 12. Duration of morning twilight in minutes. 13. Beaufort scale. 14. Classification scheme for sea deposits. 15. Names of ice forms according to the classification of the Arctic Institute. 16. Conventional symbols of ice forms. 17. Conventional hydrographic symbols on maps. Bibliography (about 275 items). Index.

English translation of oceanographic terms used in this handbook, is on file at DN-HO. **Copy seen:** DGS; DLC.

9690. LAPPO, S. D. Uluchshit' delo ledovykh prognozov. (Sovetskaiā Arktika, 1938, no. 2, p. 48-50) **Title tr.:** For the improvement of work in ice forecasting.

Discussion of measures to ensure adequate ice forecasts; opinions of V. I. Vize, N. N. Zubov, and the author.

Translation of this article is available at Brookhaven National Laboratory, Research Library, Upton, N. Y.

Methods used and results obtained by Arctic Institute ice forecasting teams in 1939. **Copy seen:** NNSf.

9692. LAPPO, V. I. Neftianoe mesto-rozhdenie Nordvik. (fUrung-Tumus).

(Nedra Arktiki, 1946. No. I, p. 74-129, maps, diagrs.) *Title tr.*: The Nordvik oil field (Yurung-Tumus).

Geological description and results of trial borings for oil at the Yurung-Tumus section of Nordvik oil field 1942-44. This oil field (about 74°05'N. 111-112°E.) "is composed of a faulted brachyanticlinal fold pierced by a salt stock. Oil is known to occur in Triassic and Permian strata. Further investigations are expected to reveal the presence of additional extensive reservoirs."—Geological Society of America. Bibliography and index of geology. Summary in English.

9693. LAPPO, V. I., and N. I. KUSOV. Nordvikskoe mestorozhdenie kamennoi soli. (Nedra Arktiki, 1947. No. 2, p. 147-76, maps, diagrs.) *Title tr.*: The Nordvik deposit of rock salt.

Description of the Nordvik salt dome, Yurung-Tumus Peninsula, Krasnoyarskiy Kray, "an open dome with exposed cap rock. The cap rock, intensely folded in places, consists chiefly of gypsum and anhydrite, with limestone, clay, sandstone, and diabase inclusions. The salt is probably Cambrian or Silurian in age. It occurs in layers which are extremely crushed or as irregular bodies which probably represent the zone of greatest deformation."—Geological Society of America. Bibliography and index of geology.

9703. LARSEN, HELGE EYVIN, 1905- . Dødemandsbugten, an Eskimo settlement on Clavering Island. København, C. A. Reitzel, 1934. 185 [1] p. illus., 20 plates (incl. fold. maps). (Meddelelser om Grønland, Bd. 102, nr. 1)

Results of the Three-Year Expedition to King Christian X's Land, 1931-34, under Lauge Koch. An archeological study of a large settlement, at 74°08'N. 21°N. Introductory notes on the Eskimos encountered by Clavering in 1823, but not seen subsequently; a description of the site (23 houses excavated) and cultural material representing two main stages; discussion of inter-cultural relationship with Thule and Inug-suk cultures. Includes a list of objects and a bibliography (54 items).

Appendix: Degerbol, M. Animal bones from the Eskimo settlement; a contribution to the immigration history of the musk ox and reindeer in East Greenland.

Copy seen: CaMAL.

9704. LARSEN, HELGE EYVIN, 1905- . Indtryk fra et ophold blandt Alaskas eskimoer. (Grønlandske selskab. Aarskrift, 1940. p. 68-89, illus. sketch map) **Title tr.:** Impressions from a stay among the Eskimos of Alaska.

Contains a brief history of Alaska from its discovery in 1741, to its purchase from Russia by the U.S.A. in 1867; notes progress under American rule; phenomenal growth of small reindeer herd from Siberia; schools, missions, churches. Includes comparison between the Eskimos in Greenland and Alaska, and their dialects; also approach to the Eskimo problem in the two regions, and data from stay at Point Hope, Alaska, during an archaeological expedition in 1939.

Copy seen: NN.

9705. LARSEN, HELGE EYVIN, 1905- , and F. RAINEY. Ipiutak and the Arctic Whale Hunting Culture. New York, 1948. 276 p. illus., maps (1 fold.) (American Museum of Natural History, Anthropological papers, v. 42)

Report on excavations at Ipiutak, Point Hope, by the authors and J. L. Giddings, Jr., for the American Museum of Natural History, the University of Alaska, and the Danish National Museum, 1938-41.

Contents: History of the expeditions, topography of Point Hope, ecology of northwest Alaska, sketches of the two contrasting types of Eskimo culture in North Alaska (the inland-dwelling Nunamiut, who belong to the Ipiutak complex, and the Tikerarmiut, or Pt. Hope Eskimos who are representative of an Arctic Whale Hunting Culture). Summary and analysis of house types and burials and detailed description and analysis of material found. Description of other culture types than Ipiutak at Point Hope (the Near Ipiutak, Birnirk, Thule, protohistoric, modern). Discussion of position of Ipiutak in Eskimo culture and of its relationships to Okvik, Old Bering Sea, Dorset and other prehistoric and modern culture stages in America and Asia. Concludes that Ipiutak is the oldest known Eskimo culture, dating to the first or second century A.D., that it originated in the northern part of Ural region, around the mouth of the Ob. The Ipiutak complex includes also the Near Ipiutak, Dorset, Kachemak Bay, and modern Central and Bering Sea Eskimos, all of whose culture has an inland orientation, in contrast to that of Okvik, Old Bering Sea, Birnirk, Punuk, Thule and modern North Alaskan and Greenland Eskimos who com-

prise the Arctic Whale Hunting Culture.

Appendices (1) notes on excavations of 72 houses; (2) notes on excavations of 162 burials; (3) analysis of small fragment of iron engraving tool; (4) Dog skulls from Ipiutak, by Olaus J. Murie, Bibliography 260-66.

9715. LATHAM, L. R. "The insulted and injured"; some changes in man's outlook on the North. Editorial. (*Scottish geographical magazine*, Sept. 1937. v. 53, p. 297-306)

Historic perspectives of settlement and economic development of the Arctic, in relation to modern exploitation of the northern regions, more particularly by the U.S.S.R.

Copy seen: DLC.

9716. LATHAM, ROBERT GORDEN, 1812-1888. The native races of the Russian Empire. London, H. Baillière; [etc., etc.] 1854, viii, 340 p. col. front., fold. map. (The ethnographical library, v. 2)

In twenty-one chapters on native groups of European and Asiatic Russia, the introduction, general section,

and four additional chapters include discussion of the Lapps, Voguls, Ost-yaks, Samoyeds, Yukaghirs, and Yakuts. *Copied seen: DLC; NNS Stef.*

9717. LATHAM, ROBERT GORDON, 1812-1888. On the ethnography of Russian America. (Edinburgh new philosophical journal, Jan. 1846. v. 40, p. 35-44)

Paper read before the Ethnological Society, Feb. 1845, on the relationships of the tribes inhabiting the Alaskan coast from Bering Strait southward, (also the Chukchis), with a list of the various groups showing their localities. *Copied seen: DLC.*

9718. LATHAM, ROBERT GORDON, 1812-1888. On the ethnography of Russian America. (Ethnological Society of London. Journal, 1848. v. 1, p. 182-91)

Discusses the linguistic relationships between the various Alaskan tribes and between these tribes and other American and Asiatic peoples. Lists sources of vocabularies. *Copied seen: DLC.*

9719. LATKIN, NIKOLAI VASIL'EVICH, 1833-1904. Krasnoĭarskii okrug Eniseiskoi gubernii. Peterburg, 1890. 74 p. *Title tr.:* Krasnoyarsk District of the Yenisey Province.

Contains sketch of population (with data from 19th century censuses. General description of the district, its mountains, rivers, geological structure, mineral resources, placer deposits, climate, soil, forests, vegetation, animal life, farming, trade, industry, and communication facilities. Historical sketch of the development of the region, its administration, settlements, etc., with detailed description of the town Krasnoyarsk, (56°02'N. 92°48'E.). *Copied seen: DLC.*

9720. LATKIN, VASILII NIKOLAEVICH, 1809-1869. Dnevnik Vasilii Nikolaevicha Latkina, vo vremia putesthestviia na Pechoru, v 1840 i 1843 godakh. (Vsesoiuznoe geograficheskoe obshchestvo. Zapiski, 1853. Kn. 7, p. 1-154, 1-143) *Title tr.:* Vasilii Nikolaevich Latkin's diary during his trips to the Pechora region in 1840 and 1843.

In 1843 the author, a merchant, reached Pustozersk (about 67°30'N. 52°30'E.), traveling by boat down the Pechora. His diary includes a description of that region and the activities of its people, a history of the commerce,

and speculations on the economic possibilities (part 2, p. 20-76). *Copied seen: DLC.*

9721. LATTA, THOMAS A. Observations on ice-bergs, made during a short excursion in Spitzbergen. (Edinburgh philosophical journal, Oct. 1820. v. 3, p. 237-43)

A general account (by the ship's surgeon on Captain Scoresby's voyage of 1818) of the surface features of one of the Seven Glaciers (Dei Sju Isfjella) at 79°20'N. on the west coast of West Spitzbergen. *Copied seen: DLC.*

9722. LATTA, THOMAS A. Observations on the arctic sea and ice, and the intended expedition of Captain Parry to the North Pole. (Edinburgh new philosophical journal, 1826-27, pub. 1827. v. 2, p. 86-104)

Discussion of the (then) current concepts of the nature of ice in the polar region, and of the author's opinion concerning the probability of a frozen Arctic Basin, with theoretical treatment of the action of the sun, wind and currents on the arctic pack. *Copied seen: DLC.*

9723. LATTA, THOMAS A. Observations on the glaciers and climate of Spitzbergen, made during a visit to that island; with a reply to Mr. Scoresby's remarks. (Edinburgh new philosophical journal, Apr.-Oct. 1827. New ser. v. 3, p. 91-103)

Contains a discussion (based on the author's visit in 1818, "a very hot summer") of the snow line, the air temperature, and the glaciers, in support of the author's criticism of Scoresby's *Treatise on the arctic region*, which suggested a warmer climate than Latta experienced. *Copied seen: DLC.*

9724. LATTA, THOMAS A. Observations on the Greenland Sea as connected with the late disasters in Baffin's Bay. (Edinburgh new philosophical journal, Oct.-Dec. 1830, pub. 1831. v. 10, p. 136-46, map)

Suggestions concerning the whaling grounds in Baffin Bay—Davis Strait, as they are affected by ice conditions. *Copied seen: DLC.*

9725. LAUB, VILHELM, 1887- . Kapitajn Einar Mikkelsens ekspedition. (Geografisk tidskrift, 1909-10. Kjøbenhavn, 1910. Bd. 20, p. 291-95) *Title tr.:* Captain Einar Mikkelsen's expedition.

Account (dated Sept. 8, 1910) of the *Alabama* Expedition to the northeast coast of Greenland (74°-82°N.) 1909-1912 describing the voyage sledge journeys etc. in 1909-10.

Copy seen: DLC.

9726. LAUB, VILHELM, 1887- . Report concerning the remaining part of the expedition during Mikkelsen's sledge-journeys. (*In:* Mikkelsen, E., *Alabama-expeditionen til Grønlands nordøstkyst 1909-1912*, nr. 2. *Pub.* in *Meddelelser om Grønland*, 1922. Bd. 52, p. 145-84, illus., 3 sketch maps, 17 plates)

Contains the second-in-command's accounts with geographic descriptions of sledge journeys (1) to Haystack Peninsula on Hochstetter's Foreland, and around Shannon Island, with remarks on currents and ice conditions, 1909-10, and (2) to the west of Queen Louise Land, with descriptions of the glaciers, lakes, and nunataks; a report on the sinking and condemnation of the *Alabama* (Mar. 1910), and account of the base party's activities until it was taken off Shannon Island, and returned home, Aug. 1910.

The collections were made in the easternmost areas of northern Canada visited by the expedition, and investigations made on journeys from headquarters on Danish Island (65°50'N. 83°40'W. in the northwestern Hudson Bay region. The author describes the localities, giving lists of shells found in each, on Baffin Island, Melville Peninsula, Southampton Island, Simpson Peninsula, the coast of Keewatin District from Repulse Bay to Chesterfield Inlet, and the environs of Baker Lake. Includes remarks on the fauna and the geological interpretations; also a list of the recent shells found in more than thirty localities along shores of the same region. Bibliography (39 items).

Bd. 135, nr. 8)

Results of the Danish Nûgssuaq Expeditions in 1938 and 1939, under the leadership of Alfred Rosenkrantz. In addition to collections and observations made in 1939, this paper is based on Quaternary shell collections in the Copenhagen Mineralogical Museum and on a private collection from the Giescke Lake region of Egedesminde District.

The area of investigation in 1939, was Svartenhuk, and Nûgssuaq Peninsulas and Disko Island. Species here described are derived from the area between Norde Strømfjord and Melville Bay. The authors give characterization of beds in each locality and lists

of their fossils; annotated list, with synonyms, of four echinoderm, one brachiopod, eighty-eight mollusc, six crustacean, one bird, four mammal and eighteen foram species. Includes chapters on changes of levels and development after the glacial age, and a bibliography (106 items).

Appendix gives detailed report on outstanding terraces in river valleys of the two peninsulas.

LAWSON, M. A., see Brown, R., & others. Florula Discoana. 1868.

9771. LAY, GEORGE TRADESCANT, fl. 1825-1845, and E. T. BENNETT.

Fishes. (In: Beechey, F. W., and others. The zoology of Captain Beechey's voyage, 1839. p. 41-75, col. plates)

Contains list by region, including about twenty species (some new) collected on the Beechey voyage of 1825-28; and detailed discussion, description, and anatomical notes by Surgeon Collie on some of the specimens. Eighteen species are listed from Avacha Bay, Kamchatka, and one each from St. Lawrence Island waters and Kotzebue Sound, Alaska.

Copy seen: DLC.

LAY, GEORGE TRADESCANT, fl. 1825-1845, see also Hooker, Sir W. J., & G. A. W. Arnott. Botany of Capt. Beechey's voyage to Pacific. 1841.

9772. LAYCOCK, ARLEIGH H. Churchill, Manitoba. Toronto, 1949. 7 p. l., 128 numb. 1. and 21 l. of tables. illus., 18 photos., 18 diagrs. and maps. Type-script. Author's B.A. thesis to the University of Toronto, 1949, based on literature, and his observations during a geographical field party trip in the summer of 1948, during which five weeks were spent in Churchill.

Contains chapters on geology and geomorphology, climate, flora, fauna and soils, history of the region; the building of the railway and development of the Hudson Bay Route, activity of the port of Churchill, subsidiary development of the region, the military forces, and the settlement of Churchill; with a bibliography (77 items).

9814. LEE, CHARLES A., comp. Aleutian Indian and English dictionary; common words in the dialects of the Aleutian Indian language as spoken by the Oogashik, Egashik, Egelik, Anangashuk and Misremie tribes

around Sulima River and neighboring parts of the Alaska Peninsula. Seattle, Wash., Lowman & Hanford Stationery & Printing Co., 1896. 23 p.

Lists of English words with Aleut equivalents, separate lists for numbers, money terms, and names of individuals and companies of importance to the natives. *Copy seen:* DLC; NNStef.

9815. LEE, CUTHBERT, 1891-. With Dr. Grenfell in Labrador, by Cuthbert Lee, with a chapter by Wilfred T. Grenfell. New York, The Neale Publishing Co. 1914. 3 p. l., 5-157 p. 19 plates, incl. ports., map.

The author, who served as a volunteer aide for one year to Dr. Grenfell, here describes the whites, Indians and Eskimos, the medical mission and its stations. *Copy seen:* DLC; NNStef.

9816. LEE, DENARD. Some new species of corals from the Niagaran strata of the Hudson Bay region. (Illinois State Academy of Science. Transactions, 1931. v. 24, p. 360-62, illus.)

Descriptions of three new species of fossils from Ekwan, Severn, and Fawn Rivers, Northern Ontario.

Copy seen: DGS.

9817. LEE, DOUGLAS H. K., and HOYT LEMONS. Clothing for global man. (Geographical review, Apr. 1949. v. 39, p. 181-213, 3 maps, diagrs.)

Discussion in brief of environmental effects on man: (1) thermal, (2) mechanical, (3) psychological, and (4) biological; clothing allowance zone maps, including the arctic zone; and wind chill maps; discussion of the thermal basis of clothing design and principles of arctic clothing.

Copy seen: DLC.

9818. LEE, G. W. A Carboniferous fauna from Novaja Semlja, collected by Dr. W. S. Bruce. (Royal Society of Edinburgh. Transactions, 1909. v. 47, p. 143-86, 2 plates)

"Based on the study of a suite of fossils collected [at Cape Cherney] in 1898 . . . during a cruise with Major Andrew Coats in the Barents Sea, on board the yacht 'Blencathra'."

Contains a classified and annotated list of ninety-two fossil invertebrate species (from Foraminifera through Crustacea) and a table showing the fauna and its horizontal and vertical distribution elsewhere.

Includes a note on the fossil corals, by R. G. Carruthers.

Copy seen: DLC.

9819. LEE, G. W. Note on arctic Palaeozoic fossils from the "Hecla" and "Fury" collections. (Royal Physical Society, Edinburgh. Proceedings, 1912. v. 18, p. 255-64, illus.)

Based on specimens collected on the shores of Prince Regent Inlet (Somerset Island and Brodeur Peninsula) by Parry during his third cruise, 1824-25. Descriptions and synonymy of five species of coelenterates, four brachiopods, eight (including two new) species of molluscs, and three ostracods.

Copy seen: DLC.

9820. LEE, G. W. Notes on fossils from Prince Charles Foreland, brought home by Dr. William S. Bruce in 1906 and 1907. (Royal Physical Society, Edinburgh. Proceedings, 1907-08, pub. 1908. v. 17, p. 149-66, double-face plate)

Based on collections made while Dr. Bruce was surveying the island, during the Scottish Spitsbergen Expeditions. Brief description of the rock formations from which the fossils derived, a discussion of their age and correlation, and lists of one fossil worm, two crustaceans, six (including with descriptions two new) bryozoans, and seven brachiopods. *Copy seen:* DLC.

9821. LEE, HERBERT PATRICK. Policing the top of the world. London, John Lane [1928] 4 p. l., 250 p. 14 plates, incl. ports., and 2 maps.

The experiences of a private in the Royal Canadian Mounted Police at Craig Harbour, Ellesmere Island, 1922-23; descriptions of hunting for seals, bears, and walrus; of the animal life, sledge journeys and the weather.

Copy seen: DLC; NNStef.

9822. LEE, HUGH J. Peary's transections of North Greenland, 1892-1895. (American Philosophical Society. Proceedings, 1940. v. 82, p. 921-34)

Paper read before the Society's Symposium on American Polar Exploration, Feb. 1940, an account of earlier efforts and of Peary's two marches across the icecap, by one of the men who accompanied him on his second trip.

Copy seen: DLC.

9823. LEE, LESLIE W. Some bryophytes of Greenland. (Bryologist, Sept. 1944. v. 47, p. 114-18)

List, with notes on habitats, of about fifty species of mosses from "south Greenland" collected Nov. 1942-Jan. 1943. *Copy seen:* DA.

9824. LEECHMAN, JOHN DOUGLAS, 1890- . Caribou for Chipewyans. (Beaver, Mar. 1948. Outfit 278, no. 4, p. 12-13, illus.)

Brief text to accompany a group of photographs illustrating the process of dressing caribou skins, by the northern Manitoba Indians.

Copy seen: DSI-M.

9825. LEECHMAN, JOHN DOUGLAS, 1890- . Eskimo summer. Toronto, Ryerson Press [1945] ix, 247 p. front. (map) 6 plates.

Account of an archeologists sojourn on Button Islands (off the northern tip of Labrador Peninsula) with Labrador Eskimos from Killinek Island as companions; description of the modern Eskimo way of life, their dances, clothing and hunting, etc.

Copy seen: DLC; NNStef.

9826. LEECHMAN, JOHN DOUGLAS, 1890- . Igloo and tupik. (Beaver, Mar. 1945. Outfit 275, no. 4, p. 36-39, illus.)

Descriptions of the various types of dwellings used by the modern Eskimos of Canada.

Copy seen: DSI-M.

9827. LEECHMAN, JOHN DOUGLAS, 1890- . Indian summer. Toronto, Ryerson Press [1949] x, 182 p. 4 plates.

"These sketches of Indians I have known [in western and northern Canada], and of tales they have told me, cover a period of forty years." The author knows his Indian friends as normal human beings, falling short of white men neither in intellect nor in virtue, describes episodes in their day-to-day life, their handicrafts, practices and beliefs, as parts of the old culture and old philosophies now vanishing.

Illus. are portraits of four Loucheux Indians of Old Crow, Yukon Territory, drawn by A. Langdon Kihn.

Copy seen: DLC.

9828. LEECHMAN, JOHN DOUGLAS, 1890- . Moravians to Ungava. (Beaver, Sept. 1947. Outfit 278, no. 2, p. 28-31, illus., sketch map)

The story of two Moravian brethren and an Eskimo, running Grenfell's Tickle (Ikkerasak, middle part of the passage through Cape Chidley 61°N.

60°W.) in 1811, traveling southwest along the coast as far as the mouth of Koksoak River in Ungava Bay, and return.

Copy seen: DSI-M.

9829. LEECHMAN, JOHN DOUGLAS, 1890- . Old Crow's village. (Canadian geographical journal, July 1948. v. 37, p. 2-16, illus.)

Description of Old Crow, a village dating from about 1912 near the confluence of the Old Crow and Porcupine Rivers, Yukon Territory (about 67°N. 140°W.); its people the Vanta-Kutchin, a branch of the Loucheux tribes, their history, present-day life, houses, food, transportation, commerce, communications, social services and amusements.

Copy seen: DGS; DLC.

9830. LEECHMAN, JOHN DOUGLAS, 1890- . Prehistoric migration routes through the Yukon. (Canadian historical review, Dec. 1946. v. 29, p. 383-90)

Brief description of ancient habitation sites yielding stone implements discovered by the author along the Alaska Highway in 1945. Discussion of probable migration routes followed by early man in interior of Alaska and Canada.

Copy seen: DLC.

9831. LEECHMAN, JOHN DOUGLAS, 1890- . Two new Cape Dorset sites. (American antiquity, Apr. 1943. v. 8, p. 363-75)

Excavations were made in northern Labrador, 1935 and 1936 at Dorset culture sites on McLellan Strait, southeastern end of Hudson Strait, and on Nuvuk, an island 30 miles southwest of Cape Wolstenholme, southwest end of Hudson Strait. Material found included typical Dorset stone implements, harpoon heads, barbed points, needles, sled runners, figurines, etc.

Copy seen: DLC; DSI.

9832. LEECHMAN, JOHN DOUGLAS, 1890- . Whence came the Eskimo? (Beaver, Mar. 1935. Outfit 265, no. 4, p. 38-41, illus.)

An archeologist of the National Museum of Canada discusses the origin of Eskimos, for the general reader.

Copy seen: DSI-M.

9833. LEES, EVERETT JOHN, 1903- . Geology of Teslin-Quiet Lake area, Yukon. Ottawa, King's Printer, 1936. 2 p. l., 30 p. front., plates, fold. map (in pocket) (Canada. Geological Survey. Memoir 203)

Contains: Chapters on physical features, general and economic geology (including gold deposits); bibliography, p. 3. *Map:* Geological map 350 A (scale 1:253,440) 60°-61°15'N. 132°15'-134°15'W. *Copy seen:* DLC.

9834. LEES, EVERETT JOHN, 1903-. *Geology of the Laberge area, Yukon.* (Royal Canadian Institute. Transactions, Sept. 1934. v. 20, p. 1-48, 6 plates) Abstract of the author's PhD. thesis to the University of Toronto.

Contains description of physiography, glacial, structural, and economic geology, stratigraphy and petrography. Includes lists, with descriptions, of twenty-one fossil molluscs, four brachiopods, and one sponge, from the Lewes River and Laberge series.

Copy seen: DLC.

LEES, EVERETT JOHN, 1903-. *see* also Bostock, H. S., & E. J. Lees. Laberge map-area, Yukon. 1938.

LEES, EVERETT JOHN, 1903-. *see* also Cockfield, W. E., & E. J. Lees. Occurrence Triassic Southern Yukon. 1931.

9835. LEFFINGWELL, ERNEST de KOVEN, 1876-. *The Canning River region, northern Alaska.* Washington, U. S. Govt. Print. Off., 1919. 251 p. illus., 35 plates (part fold. incl. 6 fold. maps), diags. (U. S. Geological Survey. Professional paper 109) Report on the results of the Anglo-American Polar Expedition (Mikkelsen-Leffingwell Expedition), 1906-07, and on the author's investigations, 1908-14, in the area south of Camden Bay.

Contents include: Introduction: Itinerary, p. 13-18. Equipment (shelter, gear, dog sleds and harness, food, clothing, scientific instruments) p. 19-31. Construction of the maps (geodetic observations, triangulation, topography) p. 32-45. Hydrography, aurores, tidal observations (cf. Harris, R. A., *Arctic tides*, 1911) p. 46-48.

Geography: Arctic mountain system (including Franklin, Romanzof Mts.), arctic slope, drainage (Okpilak, Hulahula, Sadlerochit, Canning Rivers, and hot springs) climate, vegetation, animal life and population, transportation and communication, p. 48-68. History of exploration (bibliography, abstracts of narratives, 1826-1914) p. 69-87. Geographic nomenclature, p. 87-100.

General geology: Subdivisions of the rocks (including, in the Cenozoic, gravel mounds, recent aufeis, and recent sea ice) p. 100-163. Structure, and historical geology, p. 163-66. Geomorphology (including coast line, drainage, and effects of water, inland ice, sea ice, wind and frost), p. 166-77. Mineral resources (gold, coal, petroleum, amber), p. 178-79.

Ground ice: Permanently frozen ground, p. 179-94. Ice (kinds, structure and preservation), p. 194-204. Observations on ground ice (wedges on north shore of Alaska, miscellaneous forms, review of the literature of Siberia, Novaya Zemlya, Spitzbergen, Eschscholtz Bay region, and North America in general, distribution and age) p. 205-42. Bibliography, p. 242-43. Index, p. 245-51.

Maps: Reconnaissance map of Canning River region (1:250,000); geologic reconnaissance Canning River region (1:250,000); north arctic coast Alaska (1:1,000,000); coast line between Challenge Entrance and Thetis Island, Alaska (1:125,000); coast line between Martin Point and Challenge Entrance, Alaska (1:125,000); triangulation stations along coast adjacent to Canning River, Alaska (1:80,000). *Copy seen:* DGS.

9836. LEFFINGWELL, ERNEST de KOVEN, 1876-. *Flaxman Island, a glacial remnant.* (Journal of geology, Jan.-Feb. 1908. v. 16, p. 56-63)

Description and discussion of the origin of the tundra-covered ice which occurs to unknown depths over this island, off the north Alaskan coast, about 70°12'N. 146°W., based on observations of the Anglo-American Polar expedition, 1906-1907.

Copy seen: DGS.

9837. LEFFINGWELL, ERNEST de KOVEN, 1876-. *Ground-ice wedges, the dominant form of ground-ice on the north coast of Alaska.* (Journal of geology, Oct.-Nov. 1915. v. 23, p. 635-54, illus.)

Contains a description of forms which the author believes might be developed throughout a region of permanently frozen ground; a discussion of their formation and the associated frost cracks and polygonal soil to be found on the north coast of Alaska.

Copy seen: DGS.

LEFFINGWELL, ERNEST de KOVEN, 1876- , see also Mikkelsen, E. Conquering arctic ice. 1909.

LEFFINGWELL, ERNEST de KOVEN, 1876- , see also Mikkelsen, E., & E. de K. Leffingwell. Report of Mikkelsen-Leffingwell Expedition. 1907.

9838. LEFFLER, J. A. Bidrag till kännedomen om de skandinaviska arterna af växtsläktet *Lepigonum*. (Botaniska notiser, 1865, no. 5, p. 89-98) *Title tr.*: A contribution to the knowledge of Scandinavian species of the genus *Lepigonum*.

Contains critical notes on four Scandinavian species of herbaceous genus *Lepigonum*, including *L. marinum* occurring in Nordland, Norway and *L. salinum* native to Finnmark (68°49'N.)

Copy seen: MH-A.

9839. LEFROY, Sir JOHN HENRY, 1817-1890. Diary of a magnetic survey of a portion of the Dominion of Canada chiefly in the North-Western Territories executed in the years 1842-1844. London, Longmans, Green, & Co., 1883. xxiv, 192, [2] p. 5 maps (4 fold.) tables, fold. diagr.

Contains detailed discussion of magnetic elements and methodology; diary, Sept. 19, 1842-June 30, 1844, of an extensive trip from Montreal via Fort Garry (Winnipeg) to Hudson Bay (York Factory, Churchill); via Lake Winnipeg, Saskatchewan River, Lake Athabaska, to Great Slave Lake and down the Mackenzie River to Fort Good Hope (66°16'N.) Includes throughout, brief comment on terrain, weather, and travel conditions, and (in detail) results of Lefroy's observations together with a consolidation of other observers' results, particularly those made between the time of Lefroy's trip and the publication of this book. Note on permanently frozen ground at Fort Norman, p. 161. List of stations and index.

Copy seen: DLC; NNSStef.

9840. LEFROY, Sir JOHN HENRY, 1817-1890, and Sir JOHN RICHARDSON. Magnetical and meteorological observations at Lake Athabasca and Fort Simpson, by Captain J. H. Lefroy . . . and at Fort Confidence, in Great Bear Lake, by Sir John Richardson. Printed by order of Her Majesty's government. London, Pub. for H. M. Stationery Off., by Longman, Brown,

Green & Longmans, 1855. xiv p., 2 l., 3-391, [1] p. illus., fold. diagr.

Contents: Lefroy, J. H. Magnetical and meteorological observations at Lake Athabasca and Fort Simpson, Oct. 1843-May 1844, p. 1-288.

Richardson, Sir John. Magnetical observations at Fort Confidence, reduced and discussed by C. W. Younghusband, p. 289-323.

Richardson, Sir John. Meteorological observations, Oct. 1848-April 1849 at Fort Confidence, p. 324-391.

Copy seen: DLC.

9841. LEGGET, R. F. Canadian interest in snow and ice research. (National Research Council of Canada. Associate Committee on Soil and Snow Mechanics. Technical memorandum, 1949. No. 14, N.R.C. no. 2034, p. 40-60)

One of the Canadian papers presented at the Oslo meeting of the International Union of Geodesy and Geophysics, Aug. 1948, stating the problems connected with snow and ice in Canada, discussing the research being carried out, the work of an earlier period, and projects suggested for future research; with a bibliography (21 items).

Published also in International Geodetic and Geophysical Union. Association of Scientific Hydrology. Assemblée générale d'Oslo, 1948. Procès-verbaux. T. 2. Travaux de la Commission de la neige et des glaciers, pub. 1950? p. 128-37 (copy in DGS).

9842. LEGOFF, LAURENT. Note sur la langue des Dénés. (International Congress of Americanists. 15th, Quebec, 1906. [Compte rendu] pub. Quebec, 1907. v. 2, p. 217-23)

Describes (briefly), with examples, some of the linguistic characteristics of the Athapaskan stock. Points out some word similarities between Athapaskan and Celtic. *Copy seen*: DLC.

9843. LEGREID, DOMINICUS ORBECK. Liv og virke på Bjørnøya værstasjon. Hesten som spiser kjøtt og fisk (Polar-årboken, 1938, p. 81-85) *Title tr.*: Life and work at the meteorological station on Bear Island. The horse that eats meat and fish.

Describes living conditions, and routine meteorological work at Tunheim, Bear Island, pilot balloon observations,

transmission of wind and weather reports to Trømsø. **Copy seen:** NN.

9844. LE GROS CLARK, W. E. On a series of ancient Eskimo skulls from Greenland (Royal Anthropological Institute of Great Britain and Ireland. Journal, 1920. v. 50, p. 281-98, illus.)

Contains quantitative and non-quantitative descriptions of sixteen skulls collected by J. Brierley from West Greenland, chiefly in the vicinity of Melville Bay. Describes the "type contour" of Eskimo skulls, compares it with the Chancelade (Magdalenian) skull, and concludes that "Chancelade Man" was not an Eskimo. Includes a table of detailed craniometric measurements for the sixteen skulls. **Copy seen:** DLC.

9845. LEHNERT, E., and A. W. GREELY. Mosses and lichens. (*In:* Greely, A. W. Three years of arctic service, 1886. v. 2, p. 392-98)

Annotated list of sixty-six mosses, one liverwort and seven lichens, from northern Ellesmere Island.

Copy seen: DLC; NNStef.

9846. LEHTISALO, T. Beiträge zur Kenntnis der Rentnierzucht bei den Juraksamojeden. Oslo, H. Aschehoug & Co., Cambridge, Mass., Harvard University Press; [etc., etc.] 1932. 8 p. l., [9]-180 p. (Institutet for sammenlignende kulturforskning. [Publikasjon] Ser. B: Skrifter, XVI) **Title tr.:** Contributions to a knowledge of reindeer breeding among the Yurak Samoyeds.

Contains a description of reindeer herding among the Yurak Samoyeds between the White Sea and the Yenisey River, based chiefly upon sojourn among the tundra Yuraks in 1911-12, and the forest Yuraks in 1914, and interviews with Yuraks in Finland in 1928. Includes glossary of terminology associated with reindeer and their breeding; description of wild reindeer and their hunting; detailed description and associated elements of sled and pack travel, food and other reindeer products, trade, and social, religious, and property institutions and customs; notes on dog transport and relations with neighbors; and a selected bibliography.

Maps: (1) small-scale location map of the Yurak area, showing rivers and principal Yurak settlements; (2) small-scale sketch map of Yamal Peninsula

showing location of various tribal groups. **Copy seen:** DSI.

9847. LEIBER, FERDINAND. Im Eise des Lilliehöökletschers. (*In:* Miethe, A., and H. Hergesell. Mit Zeppelin nach Spitzbergen, 1911. p. 203-208, illus.) **Title tr.:** In the ice of Lilliehöök Glacier.

During the German Arctic Zeppelin Expedition, 1910, a party undertook a trigonometric measurement of the glacier's movement. The author here describes the appearance and calving of the glacier into Cross Bay.

Copy seen: DLC.

9848. LEIBSON, R. G. Kolichestvennyj uchët donnoj fauny Motovskogo zaliva. (Moskva. Vsesoiuznyi nauchno-issledovatel'skii institut morskogo rybnogo khozjaistva i okeanografii. Trudy, 1939. T. 4, p. 127-98, maps, tables, diagrs.) **Title tr.:** Quantitative evaluation of the bottom fauna of the Motovskii Bay.

A study based on investigations of the research vessel *Persei*, 1931-32.

Contains geographic outline of the region "one of the most important fishery regions of the Murman coast"; discussion and data (based on samples from 92 stations) on biomass distribution; bottom population complex and separate forms.

Copy seen: DLC.

9849. LEIGH, R. W. Dental pathology of the Eskimo. (Dental cosmos, Sept. 1925. v. 67, p. 884-98, illus.)

Contains note on physical characteristics of the Eskimo in general, and a detailed analysis of dental characteristics of three hundred twenty-four modern Eskimo crania in the U. S. National Museum.

Copy seen: DLC; NNN.

9850. LEIGH, ROY E. Problems in Canadian winter operations. (World oil, Feb. 1, 1949. v. 128, no. 10, p. 192-93, illus.)

Discussion in general of drilling, transportation, protection of equipment, workers, and crude oil in cold weather.

Copy seen: DGS.

LEIGH SMITH, BENJAMIN, *see* SMITH, BENJAMIN LEIGH.

9851. LEIGHLY, JOHN. Cuspate surfaces of melting ice and firn. (Geo-

graphical review, Apr. 1948. v. 38, p. 300-306, illus.)

Contains discussion of the processes of melting of overhanging surfaces and the cellular convection of air at surfaces of melting ice, with reference to a question raised by R. P. Sharp in, *The Wolf Creek glaciers*, 1947., q.v.

Copy seen: DLC.

9852. LEIGHTON, DOROTHEA CROSS, 1908-. Walrus—many-purpose animal of the Arctic. (Nature magazine, Nov. 1942. v. 5, p. 477-79, illus.) Condensation of this article was published in *Alaska life*, Nov. 1942. v. 5, no. 11, p. 55-56, 58, 60-61.

Description of uses (by Eskimos) of the walrus, its range and diminishing members, based on observations on St. Lawrence Island, Bering Sea.

Copy seen: DLC.

9853. LEIGHTON, W. A. Notes on lichens collected by Sir John Richardson in arctic America (Linnean Society, London. Journal; botany, 1867. v. 9, p. 184-200, plate.)

Based chiefly on the collections made in 1826, from the Mackenzie River valley, Great Bear and Great Slave Lakes, and York Factory, northern Manitoba. A list, with localities and some notes on taxonomy, of one hundred fifty-nine forms of one hundred fifteen species of lichens.

Copy seen: DLC.

9854. LEINBERG, ARTHUR. Über die finnischen *Episernus*-Arten. (Societas pro fauna et flora fennica. Meddelanden, 1903-1904, pub. 1904. Häfte 30, p. 16-22) *Title tr.:* On Finnish species of *Episernus*.

Contains a revision of three species and three varieties (one species and two varieties new) of coleopterous genus *Episernus*, including Latin and German descriptions of *E. granulatus sulcatus* native to Kola Peninsula, and *E. angulicollis angulatus* from Finnish and Russian Lapland.

Copy seen: MH-A.

9855. LEIPER, R. T. Trichinosis in arctic animals. (Zoological Society of London. Proceedings, 1938. v. 108, ser. C, p. 13-14)

Note on infection of polar bears and arctic foxes of the Society's Zoological Gardens, supposed to have been contracted in the arctic region.

Copy seen: DSI-M.

9856. LEIST, E. E. Meteorologische skizzen usloviia poleta Andre. (Zemlevedenie, 1900. T. 7, vyp. 2-3, p. 132-37) *Title tr.:* Meteorological conditions of Andrée's flight.

Remarks on structure and capacity of balloons for projected north polar flights since 1847; Andrée's balloon, his ascent from Danish Island, 79°40' N. 10°52'E. on July 11, 1897; author's views on his objective, and his possible survival.

LEITH, ARTHUR T., *see* Leith, C. K. & A. T. Leith. Summer & winter on Hudson Bay. 1912.

9857. LEITH, CHARLES KENNETH, 1875-. An Algonkian basin in Hudson Bay, a comparison with the Lake Superior basin. (Economic geology, Apr. 1910. v. 5, p. 227-46, illus. (map))

A study made in 1909, of the rock formations and their relationships, from Moose Bay to Richmond Gulf, including remarks on the iron formation of Nastapoka Islands.

Copy seen: DLC.

9858. LEITH, CHARLES KENNETH, 1875-, and A. T. KEITH. A summer and winter on Hudson Bay. Madison, Wis. [Cartwell Printing Co.] 1912. 1 p. l., [9]-203 p. front. (map) 36 plates.

Narrative of the authors' geological expedition, in the summer of 1909, when his four-man party canoed down Moose River to Moose Factory, sailed along the east coast of James and Hudson Bay to Richmond Gulf. From there two of the party returned shortly in the same way, and A. T. Leith and companion remaining till Christmas, returned by dog team and snowshoes early in 1910.

Contents: Pt. 1. Leith, C. K. A summer on Hudson Bay. (Account of the canoe trip, Moose Factory, the Eskimos, and their customs, and the sailing trip in Hudson Bay).

Pt. 2. Leith, A. T. A winter on Hudson Bay. (The author's journal, and extracts from records of the Hudson's Bay Co. post at Great Whale River, 1902, on the weather, and that on Little Whale River, 1876-77, on hunting, and on the Eskimos and their hunting and trapping activities).

1948. 136 p. diagsr. (Danske videnskabelnes selskab. Biologiske skrifter. Bd. 5, nr. 3)

A detailed morphologic and taxonomic study, with a key to the classification, list of synonymy and references, and bibliography of a sub-order of the Opisthobranchiata, marine snails, including in part I, some species from the waters off East and West Greenland.

Copy seen: DF.

9863. **LEMICHE, HENNING MOURIER, 1904-** The zoology of East Greenland. Gastropoda Opisthobranchiata. København, C. A. Reitzel, 1941. 49, [1] p. illus. (5 maps, diagr.) (Meddelelser om Grønland. Bd. 121, nr. 7)

Based on published records, this constitutes a revision of earlier works, recent materials from Scoresby Sound and Franz Joseph Fiord with hydrographic records being so complete, that elucidation of some ecological problems is now possible. Author gives a systematic synopsis, with synonyms, East Greenland records and occurrence, distribution and remarks, of sixteen (including with description one new) species; discussion of life zones, and a bibliography (21 items).

9871. LEMSTRÖM, SELIM, 1838-1904, and ERNEST BIESE. Observations faites aux stations de Sodankylä et de Kuitala. Publiées aux frais du gouvernement finlandais sous les auspices de la Société des Sciences de Finlande. Helsingfors, Impr. des héritiers de Simelius, 1886-98. 3 v. in 1. front. (v. 2) illus., 2 maps, tables, 5 col. plates on 3 l., diagrs. (part fold.) *Title tr.*: Observations made at the stations at Sodankylä and Kuitala.

Results of the Finnish Expedition (in connection with the First International Polar Year program) to establish a polar station at Sodankylä (67° 26'N. 26°34'E.), and an auxiliary station at Kuitala (68°30'N. 26°46'E.) in northern Finland.

Contents: v. 1, *Meteorology.* The organization, program and instrumentation of the expedition are briefly reviewed. The following results are tabulated: hourly and three-times daily registering of the meteorological elements, three-times daily measurements of soil temperatures, and daily river water temperatures at Sodankylä at various times during the period Sept. 1882-Aug. 1884; and three-times daily meteorological observations at Kuitala (68°30'N. 26°46'E.) Jan. 15-Mar. 17, 1884.

v. 2, *Terrestrial magnetism.* The absolute determination of the magnetic elements, the instrumentation and procedures in making and reducing the measurements on the magnetic elements precede the tabular results of: hourly values of declination, the horizontal and vertical components and readings made every five minutes on bi-weekly

term dates during the period Aug. 1882-Sept. 1883; reading of the three elements three-times daily and 5-minute readings on term dates, Sept. 1883-Aug. 1884, and 30-seconds readings on weekly term dates, Nov. 15, 1883-Aug. 22, 1884. All measurements at Sodankylä.

v. 3. *Atmospheric electricity, Telluric currents, etc.* Hourly values of atmospheric electricity (volts) Nov. 1, 1882-Aug. 31, 1883, and three-times daily, Sept. 1, 1883-Aug. 22, 1884, with bi-weekly term dates having readings at intervals from 5 to 30 minutes at Sodankylä; three-times daily readings with term date readings every 5 to 30 minutes at Kultala during the period Jan. 15-Mar. 17, 1884. Hourly readings of the telluric currents (north-south and east-west) Sept. 1882-Aug. 1883, and three-times daily readings Sept. 1, 1883-Aug. 28, 1884, with bi-weekly term date readings every 5 minutes and weekly term dates having minute readings, Nov. 1, 1883-Aug. 22, 1884, at Sodankylä, and three-times daily at Kultala, Feb. 9-Mar. 17, 1884, with term dates.

The E.M.F. measurements of atmospheric electricity made daily at 0500, 1300 and 2100 hours at Sodankylä with five-minute and minute measurements on bi-monthly and weekly term dates respectively during the period Nov. 8, 1883-Aug. 26, 1884, and similar measurements at Kultala during the period Jan. 15-Mar. 17, 1884.

9935. Le ROY, PETR LUDOVIK, 1699-1774. A narrative of the singular adventures of four Russian sailors, who were cast away on the desert island of East-Spitzbergen. Together with some observations on the productions of that island, etc. By Mr. P. L. Le Roy . . . Tr. from the German original, at the desire of several members of the Royal Society. (In: Staehlin von Storcksburg, Jakob. An account of the new northern archipelago, lately discovered . . . in the seas of Kamtschatka and Anadir. London, 1774. p. 41-118)

Translated by C. Heydinger, from the German original *Erzählung der Begebenheiten vier russischer Matrosen*, 1760. Also published in a French translation (copy in ICJ).

Copy seen: DLC.

9936. Le ROY, PETR LUDOVIK, 1699-1774. Priklŭcheniĭa chetyrekh matrosov na Shpitsbergene. Leningrad, Izd-vo Vsesoiŭznogo arkticheskogo instituta, 1933. 51 [1] p. illus., diags. **Title tr.:** Adventures of four sailors on Spitsbergen.

Revised edition of the Russian translation published in 1772 of the German original *Erzählung der Begebenheiten vier russischer Matrosen, die durch einen Sturm zur Insel Ost-Spitzbergen verschlagen worden* . . . published at Riga and Mieltau 1760 (copy not located). An English translation was

published as *Narrative of the adventures of four Russian sailors*, q.v.

Contains introductory note (p. 3-17) by the editor V. Iŭ. Vize, outlining the discovery of Svalbard, with bibliographical footnotes. Account (p. 19-46) by a participant of the experience of four Russian sailors, who, after their ship was driven away by drift ice, were compelled to spend six years (1743-49) on Edge Island of the Svalbard group, relying upon their ingenuity and the natural resources of the island for survival, (e.g. during their stay they shot 250 reindeer and 10 white bears with improvised bow and arrow; as antidote to scurvy they used scurvy grass).

9942. [LESLIE, ALEXANDER] The arctic voyages of Adolf Erik Nordenskiöld. 1858-1879. London, Macmillan & Co., 1879. xiv p., 1 l., 447, [1] p. front., illus., 3 fold. maps. Published in German as *Die Nordpolarreisen Adolf Erik Nordenskiöld's 1858 bis 1879.*

Contents: 1. The Nordenskiöld family; an autobiographical sketch. 2. The Swedish Arctic Expeditions of 1858 and 1861. 3. The Swedish Arctic Expedition of 1864. 4. The Swedish Polar Expedition of 1868. 5. Expedition to Greenland. 6. The Swedish Polar Expedition

of 1872-3. (Includes discussion of reindeer) 7. Voyage to the Yenissej in 1875 and ascent of the river. 8. Second voyage to the Yenissej in 1876. 9. The North-East Passage Expedition 1878-79.

Appendix 1. ENVALL, A. Official report to the Swedish Royal Board of Health in the hygiene and care of the sick during the Swedish Polar Expedition, 1872-3.

2. BAGGE, L. B. List of books and memoirs relating to the Swedish arctic expeditions. Both appendices appear in this Bibliography under their authors' names. **Copy seen:** DLC.

9943. [LESLIE ALEXANDER] Die Nordpolarreisen Adolf Erik Nordenskiöld's, 1858 bis 1879. Aus dem Englischen. Autorisirt deutsche Ausg. Leipzig, F. A. Brockhaus, 1880. x, 443 [1] p. 44 illus., 4 maps (incl. 1 fold., 2 double)

Translation of *The arctic voyages of Adolf Erik Nordenskiöld, 1858-1879*, q.v. **Copy seen:** DLC.

LESLIE, ALEXANDER, see also Nordenskiöld, N. A. E. Voyage of Vega round Asia & Europe. 1882.

9944. LESLIE, Sir JOHN, 1766-1832, and others. Discovery and adventure in the polar seas and regions. With a narrative of the recent expeditions in search of Sir John Franklin, including the voyage of the "Fox" and the discovery of the fate of the Franklin expedition. London, T. Nelson & Sons, 1860. 652 p. incl. front., and added t.p. *Other authors:* H. Murray and R. M. Ballantyne.

Later editions of the authors' *Narrative of discovery and adventure*, 1830 were published under slightly different titles, e.g., as above, and as *Polar seas and regions*. Text is similar to the original work with enlarged and more detailed chapters on a number of the voyages in search of the Northwest Passage, added section on the Franklin search expeditions; and omitting the chapter on arctic geology.

Copy seen (of various editions): DLC; MB; NNSf.

9945. LESLIE, Sir JOHN, 1766-1832, and others. Narrative of discovery and adventure in the polar seas and regions with illustrations of their climate, geology, and natural history; and an ac-

count of the whale-fishery. By Professor Leslie, Professor Jameson and Hugh Murray . . . Edinburgh, Oliver & Boyd; [etc., etc.] 1830. vi, [2], 424 p. illus., plates, fold. map. Added t.-p., illustrated.

Contains chapters on the climate of polar regions, the animal and vegetable life, ancient voyages to the North, voyages in search of Northeast and Northwest Passages and the North Pole, with concluding chapters on the northern whale fishery and arctic geology.

Chronicle of broad scope and appeal, intended "to exhibit a complete and connected view of successive voyages to the arctic regions" to time of publication. Several editions and reprints were published in the 1830's-40's, in Edinburgh by Oliver & Boyd, and in New York by Harper & Bros., with the fourth edition revised and enlarged, Edinburgh, 1835, chapters were added on voyages in the Canadian Arctic. From the 1850's the work continued to appear with further changes as *Discovery and adventure in the polar seas and regions*, q.v.

Copy seen (of various editions): DLC; NNS Stef.

9946. LESQUEREUX, LEO, 1806-1889. Contribution to the Miocene flora of Alaska. (U. S. National Museum. Proceedings, 1882, pub. 1883. v. 5, p. 443-49, plates VI-X)

Report on fossil plants collected by W. H. Dall from the south coast and islands of Alaska and Alaska Peninsula. Notes on twenty-one (including seven new) species not previously known from Alaska.

Copy seen: DLC.

9947. LESTER, JOSEPH. Come and get 'em! (Alaska sportsman, Apr. 1940. v. 6, no. 4, p. 8-9, 24-25, illus.)

Discussion of Dolly Varden trout as enemies of salmon, the bounty on these trout in the Bristol Bay region, and the salmon fishery in relation to it.

Copy seen: DLC.

LETHBRIDGE, T. C., see Wordie, J. M. Expedition to North West Greenland & Canadian Arctic 1937. 1938.

9948. LETTERS FROM THE ANDRÉE PARTY. (Smithsonian Institution. Annual report, 1897, pub. 1898. p. 401-412. 7 plates (incl. ports.)) Reprinted from McClure's magazine for March, 1898.

Brief account of S. A. Andrée's project to reach the North Pole by balloon in 1897, with a general description of the balloon; letter written by Nils Strindberg in the interval before the ascent at Danish Island, July 1897, and account of the start of Andrée and his party in the balloon, by Axel Stake.

9975. LEVIN, M. G. O proiskhozhdenii i tipakh upriazhnogo sobakovodstva. (Sovetskaiâ étnografiâ, 1946, vyp. 4, p. 75-108, 24 illus.) *Title tr.:* Concerning the origin and types of dog harness.

Contains a discussion of the origin and types of dog harness, with considerable comparative data from the Tungus, Yeniseians, Ostyaks, etc., showing methods of harnessing. The extensive use of a small "hand" sleigh dragged by the hunter is indicated among the Tungus, Amur River tribes, Zyryans and others, and its construction is described. Some data are given regarding the method of harnessing dogs to this small type of sleigh. Five major types of dog harness, along with their distribution, and three types of dog sleigh are described. On the basis of this, the author is able to establish five types of uses of dogs in harness, their distribution and possible origin.

Contains report on metabolism and note on anemia, based on studies of sixteen Eskimos from the lower Yukon River and Nome, July-Aug. 1934.

Copy seen: DLC; NN.

9977. LEVINE, VICTOR E., and others. The blood iron and blood copper of Eskimos. (American Society of Biological Chemists. Proceedings 31st annual meeting, Apr. 1937. *Pub.* in Journal of biological chemistry, June 1937, v. 119, p. lxiii) *Other authors:* A. Sachs, and A. A. Fabian.

Based on tests of 62 Eskimos of the lower Yukon, St. Michael, Stebbins, King Island and Nome, July-Aug. 1934,

showing that fish-eating Eskimos have a greater tendency to anemia than the meat-eating natives.

Copy seen: DLC; NN.

9978. LEVINE, VICTOR E. Capillary fragility tests on Eskimos and whites living in the Arctic. (American Society of Biological Chemists. Proceedings 31st annual meeting, Apr. 1937. *Pub.* in Journal of biological chemistry, June 1937, v. 119, p. lxii)

Based on tests made in 1935 on 1046 people (760 Eskimos, 5 Lapps, and 281 whites), living between St. Michael and Point Barrow, Alaska, showing that diet of whites and Eskimos (when examined) showed deficiency in vitamin C.

Copy seen: DLC; NN.

9979. LEVINE, VICTOR E. Scurvy, the soldier's calamity. (Military surgeon, Aug. 1941. v. 89, p. 140-55)

History of scurvy and its effect on morale, and on healing of wounds, drawn from 19th and 20th century records with a bibliography (55 items).

Copy seen: DLC; NNSStef.

9980. LEVINE, VICTOR E. The value of meat as an antiscorbutic. (American journal of digestive diseases, Dec. 1941. v. 8, p. 454-63)

Clinical discussion of various problems relating to vitamin C: inactivation by heat, potency with reference to freezing, blood as antiscorbutic, and the guinea pig as test animal; discussion of importance and examples of meat as an antiscorbutic, and vitamin C content of arctic foods; bibliography (67 items).

Copy seen: DLC; NNSStef.

9981. LEVINE, VICTOR E., and C. G. WILBER. Fat metabolism in Alaska Eskimos. (Federation proceedings of the Federation of American Societies for Experimental Biology, Mar. 1949. v. 8, no. 1, p. 95-96)

Note on results (mean values) of fifty analyses for lipid component of Point Barrow Eskimos, based on the authors' studies at the Arctic Research Laboratory there under auspices of the Arctic Institute of North America.

Copy seen: CaMAI.

9982. LEVINSSEN, GEORG MARIUS REINALD, 1850-1914. Bidrag til kundskab om Grønlands trematodfauna. (Danske videnskabernes selskab. Over-

sigt . . . forhandler, 1881. p. 52-84, 2 plates) *Title tr.*: Contribution to knowledge of Greenland's trematodes.

Descriptions in Latin, and notes on fourteen (including seven new) species of these parasitic flatworms, mostly from cod (and a few from the eider) of Egedesminde, West Greenland.

Copy seen: DLC.

9983. LEVINSEN, GEORG MARIUS REINALD, 1850-1914. Bryozoa. Danmark-ekspeditionen til Grønlands nordøstkyst, 1906-1908. Bd. 3, nr. 16. (Meddelelser om Grønland, 1917. Bd. 43 p. 431-72, plates XIX-XXIV) Posthumous manuscript completed by Ad. S. Jensen.—Pref.

Contains a list, with synonymy, locations, and discussion, of sixty-seven (including with description, two new) species, and one new genus, collected in the outer waters of Dove Bay, near Danmarks Havn. *Copy seen:* DLC.

9984. LEVINSEN, GEORG MARIUS REINALD, 1850-1914. Bryozoa, Endoprocta, Pterobranchia og Enteropneusta. (*In*: Conspectus fauna groenlandicae, 3. del, nr. 5, *Pub.* in Meddelelser om Grønland, 1914. 23. hefte, p. 545-634)

List, with synonymy, references to literature and localities, of hundred forty-seven species of bryozoans, six polyzoans and two hemichordates from waters off the east and west coasts of Greenland; bibliography, p. 631-34.

Copy seen: DLC.

9985. LEVINSEN, GEORG MARIUS REINALD, 1850-1914. Bryozoeer fra Kara-havet. (*In*: Lütken, C. F. Dijnphna-togtets zoologisk-botaniske udbytte, 1887, p. 305-28, plates 26-27) *Title tr.*: Bryozoans from Kara Sea.

List, with references to literature, depth and descriptions, of fifty-one (including two new) species. Summary in French, p. 512. *Copy seen:* DLC.

9986. LEVINSEN, GEORG MARIUS REINALD, 1850-1914. Kara-havets Echinodermata. (*In*: Lütken, C. F. Dijnphna-togtets zoologisk-botaniske udbytte, 1887, p. 381-418, plates 34 and 35) *Title tr.*: Echinoderms of the Kara Sea.

List, with synonymy, references and some descriptions, of twenty-seven species of starfish, etc. Summary in French, p. 513-14. *Copy seen:* DLC.

9987. LEVINSEN, GEORG MARIUS REINALD, 1850-1914. Kara-havets leddorme (Annulata). (*In*: Lütken, C. F. Dijnphna-togtets zoologisk-botaniske udbytte, 1887, p. 287-303) *Title tr.*: Annelid (Annulata) worms of the Kara Sea.

List, with synonymy, remarks and depth, of sixty (including with descriptions, two new) species. Summary in French, p. 512. *Copy seen:* DLC.

9988. LEVINSEN, GEORG MARIUS REINALD, 1850-1914. Kara-havets svampe (Porifera). (*In*: Lütken, C. F. Dijnphna-togtets zoologisk-botaniske udbytte, 1887, p. 339-72, plates 29-31) *Title tr.*: Sponges of the Kara Sea. (Porifera).

List, with synonymy, references to literature, depths, discussions and some descriptions, of nineteen (including six new) species. Summary in French, p. 512-13. *Copy seen:* DLC.

9989. LEVINSEN, GEORG MARIUS REINALD, 1850-1914. Meduser, ctenophorer og hydrorder fra Grønlands vestkyst, tilligemed bemærkninger om hydroidernes systematik. (Dansk naturhistoriske forening. Videnskabelige meddelelser, 1892, *pub.* 1893. Aarg. 44, p. 143-212, 4 plates) *Title tr.*: Medusae, Ctenophora, and Hydroidea from the west coast of Greenland, with remarks on the systematics of the hydroids.

Systematic list of twenty-five species of medusans, three ctenophorans, and sixty-four (including with descriptions, ten new) species of hydroids, giving geographic distribution, localities, and in some cases extensive taxonomic discussion. *Copy seen:* DSI-M.

9990. LEVINSEN, GEORG MARIUS REINALD, 1850-1914. Om en ny *Thujaria*-art fra Kara-Havet. *Thujaria carica*, nov. sp. (Dansk naturhistoriske forening. Videnskabelige meddelelser, 1892, *pub.* 1893. Aarg. 44, p. 213-14) *Title tr.*: On a new *Thujaria* species from Kara Sea. *Thujaria carica*, nov. sp.

Full description of a new coelenterate. *Copy seen:* DSI-M.

9991. LEVINSEN, GEORG MARIUS REINALD, 1850-1914. Rotatoria. (*In*: Conspectus fauna groenlandicae, 3. del, nr. 6. *Pub.* in Meddelelser om Grønland, 1914. hefte 23, p. 635-58)

List, with synonymy, references to literature and localities, of eighty-eight species from regions on the west and east coasts of Greenland; bibliography, p. 657-58. **Copy seen:** DLC.

9992. LEVINSEN, GEORG MARIUS REINALD, 1850-1914. Smaa bidrag til den grønlandske fauna. (Naturhistoriske forening. Videnskabelige meddelelser, 1881, pub. 1882. Aarg. 33, p. 127-36, illus.) **Title tr.:** Small contributions to the fauna of Greenland.

Contains remarks and description of a new species classified by the author as a rhizopod; remarks on the rotifer fauna of Greenland and on a Greenland chaetopod; description of a new leech. **Copy seen:** DLC.

LEVINSON, A. Z., see Fersman, A. E., & others. Sulfidnye mestorozhdeniia Moncha-guby. 1932.

9993. LEVRING, TORE. Über die Phaeophyceengattungen *Myriogloia* Kuck. und *Haplogloia* nov. gen. (Botaniska notiser, 1939, häfte 1, p. 40-52, illus.) **Title tr.:** On the genera *Myriogloia* Kuck. and *Haplogloia* n. gen. of the Phaeophyceae.

Contains a critical revision of the algal family Myriogloiaceae (brown algae), including *Myriogloia callitricha* from the West Greenland coast, and Latin diagnosis of *Haplogloia* n. gen. and *H. andersonii* n. comb., native to Sitka (Baranof) Island, Alaska.

Copy seen: MH-A.

9994. LEVSKII, V. P. Islandskii shpat. (Sovetskaiia Arktika, 1935, no. 4, p. 67-70, illus.) **Title tr.:** Iceland spar.

Contains data on Iceland spar occurrences and some other mineral resources of the Lower Tunguska River basin, based on the work of a survey party in the region, 1930-34.

Copy seen: DLC.

9995. LEWIN, PERCY, EVANS, 1876-. The North-West Company and the fur trade. (United Empire; the Royal Colonial Institute Journal, 1923. New ser., v. 14, p. 369-71)

Note on an unsigned ms. *Some account of the trade carried on by the North-West Company, 1809*, in the Library of the Royal Empire Society, London, with an account of the operations of the Company in western Canada, around Great Slave Lake and upper Mackenzie River region. Includes

remarks on the Indians and on the Jay Treaty, 1794, in relation to the fur trade.

Copy seen: CaO (also photographic copy of the ms.).

9996. LEWIN, WALTER HENRY, 1866-. Did Peary reach the Pole? By "an Englishman in the street" (W. Henry Lewin) London, Simpkin, Marshall, Hamilton, Kent & Co., Ltd., 1911. xii, 9-84 p., fold. map.

A critical analysis of Peary's records of distances, speed of marches, etc., during his dash to the Pole; with some references to Nansen's and others' experience. **Copy seen:** DLC; NNS Stef.

9997. LEWIN, WALTER HENRY, 1866-. The great North Pole fraud, by W. Henry Lewin . . . with a monograph by Capt. Thos. F. Hall on the murder of Professor Ross G. Marvin. London, C. W. Daniel Co. Ltd. [1935] vii, 192 p. fold. map, diagrs.

"This book is the personal history of a twenty-five years' anti-Peary propaganda . . . Many of the articles and much of the correspondence in Part II of this book are reprints from . . . [the *Individualist*, a journal published annually by the author] which during its twenty-three years of issue, ending in 1930, was largely responsible for a more or less continuous anti-Peary publicity".—Foreword.

Copy seen: DLC; NNS Stef.

9998. LEWIS, ARTHUR. Life and work of the Rev. E. J. Peck among the Eskimos. New York, A. C. Armstrong & Son, 1904. xvi 349, [1] p. 18 plates.

Account of the work of a Church of England missionary, 1876-1902, on the eastern coast of Hudson Bay, on Ungava Bay and at Cumberland Sound, Baffin Island; with chapters describing the life of the Eskimos.

Copy seen: DLC; NNS Stef.

9999. LEWIS, HARRISON FLINT, 1893-. Notes on September birds along Ontario's sea-coast. (Canadian field naturalist, Apr. 1939. v. 53, p. 50-53)

Field observations made between Moosonee and East Point, Hannah Bay (James Bay). **Copy seen:** DLC.

10000. LEWIS, HARRISON FLINT, 1893-, and HAROLD S. PETERS. Notes on birds of the James Bay region

in the autumn of 1940. (Canadian field naturalist, Nov. 1941. v. 55, p. 111-17)

Lists, with notes on dates and localities, of eighty-one birds from the Ontario and Quebec shores of James Bay, forty-eight birds seen on Akimiski Island, thirty-three species on Strutton Islands, and twenty-five species of Plover Shoals, east side of Hannah Bay. **Copy seen:** DLC.

LEWIS, J. S., *see* Kark, R. M., & others. Defects of pemmican. 1945.

10001. LEWIS, Sir THOMAS. Observations on some normal and injurious effects of cold upon the skin and underlying tissues. (British medical journal, Dec. 6, 13, and 20, 1941. p. 795-97, 837-39, 869-71) Holme lectures delivered at University College Hospital, London.

Contents: 1. Reactions to cold, and injury of normal skin. 2. Chilblains and allied conditions. 3. Frost-bite. Bibliographies (37 items). **Copy seen:** DSG.

LEWIS & SONS, Philadelphia, *see* Quale, P. Account of eryolite in Greenland. 1867.

10002. LI, FANG-KUEI. Chipewyan. (In: Osgood, C. ed. Linguistic structures of native America, 1946. p. 398-423)

Description of phonology, morphology, verbs, etc., based on language observations made at Chipewyan on Lake Athabaska, northern Alberta, in 1928. **Copy seen:** DLC.

10003. LI, FANG-KUEI. A list of Chipewyan stems. (International journal of American linguistics, 1933. v. 7, p. 122-51)

Contains a list of about thirteen hundred Chipewyan word stems, from material gathered at Fort Chipewyan, northern Alberta. Includes brief discussion of the general characteristics of the language. **Copy seen:** DLC.

10004. LIBBEY, WILLIAM, 1855-1927. The relations of the Gulf Stream and the Labrador Current. (International Geographical Congress. 6th, London, 1895. Report, 1896. p. 461-74, fold. diagr.) Translation in German appeared in *Annalen der Hydrographie u. maritimen Meteorologie*, 1895. Jahrg. 23, p. 416-19.

Contains discussion of the temperature relationships of the surface and deep currents, based on a series of profile studies made over a period of three years, off the New England coast, in connection with fisheries research.

Copy seen: DLC.

10005. LIBBEY, WILLIAM, 1855-1927. Some of the geographical features of southeastern Alaska. (American Geographical Society. Journal, 1886, v. 18, p. 279-300, illus.)

Observations made by the author (a professor of physical geography) during his visit (with F. Schwatka), to Alaska in 1886, sponsored by the *New York Times*. Description of the beauties of the coast as viewed by travelers, and remarks on the character of the mountains, with special treatment (in more detail) of the Mt. Saint Elias "group". **Copy seen:** DLC.

10006. LIBIN, I. A. S. Èkspeditšijn na samolet "SSSR N-169". (In: Èkspeditšijn na samolet "SSSR-N-169" v raion "Poliusa Nedostupnosti". Nauchnye rezultaty. 1946. p. 14-27, illus., port. map.) **Title tr.:** The U.S.S.R. N-169 Expedition.

A report (by the chief scientist) on the aerial expedition April 1941, to the region of the "Pole of Inaccessibility" in the Arctic Basin (about 81°N. 180°E.). Includes information on the personnel, route and stops during the 29,000 kilometer flight; equipment, scientific work and principal results. Summary in English. **Copy seen:** DLC.

10007. LIBIN, I. A. S. Hidrologičeskie nablūdeniia. (In: Èkspeditšijn na samolet "SSSR-N-169" v raion "Poliusa Nedostupnosti". Nauchnye rezultaty, 1946, p. 74-123, plates, maps, tables, diagrs.) **Title tr.:** Hydrological observations.

An account (by the leader of the scientific section of the airplane Expedition to the Pole of Inaccessibility, 1941) of the program, equipment, and technique of the oceanographic work. Data and discussion of the soundings and bottom samples taken at landing points; of the salinity and oxygen, temperature (including vertical) and current observations made; also ice cover observed, April 1941. Summary in English. **Copy seen:** DLC.
